Subject: Daily Summary

Update 1/20/16 – 16th Day (15th Full Day) After Governor's Declaration of an Emergency

Mission focus for the day:

- Receive, store and increase quantities of supplies
- Continue to implement the logistics plan and adjust as needed
- Continue door to door/Flint Water Response Teams (FWRTs)
- Prepare for possible surge in FWRTs utilizing NG personnel

Attached Documents:

- *SitRep* 15

Status on Governor's request letter to the President:

- Emergency declaration received.

Key items for tomorrow to note are:

- The logistics plan will be fully executed tomorrow with all teams.
  - We will have 18 National Guard (MSP supported), type 3 teams (6-9 personnel), with a goal of 300 homes per team.
  - We will have 10 ARC, type 5 teams (2-4 personnel), with a goal of 100 homes per team.

Items to Note

- Deployed 10 state/local teams and 10 ARC Flint Water Response Teams to the field today.
- News release sent from Governor's office about the appeal to the President of the disaster declaration.
- SEOC Logistics worked with JIC and Governor's office to establish a business resource submission tab on www.helpforflint.com
- SEOC Operations continued to develop and finalize Phase 2 canvassing roll out.
- SEOC Operations held logistics meeting in reference to National Guard deployment
- Information reported to the *JIC*:

  - As of 1/20/16 as of 4 pm for PODs and 5 pm for FWRT (start date was Tuesday, 1/12/16)

    1. 29,317 homes visited by the FWRTs to date. We believe we have ~24,000 homes with filters; still trying to validate. This is form the data we received from prior to the SEOC activation plus the PODs and door to door operations since activation.

2. Distributed: Includes outstanding data from yesterday- PODs after 5 pm, ARC worksheets and local EOC hotshots.
    a. Number of cases of water 90,337
    b. Filters 73,229
    c. Filter cartridges 185,852
    d. Test kits 19,866

3. Total number of customers on the Flint water system
    a. 29,944 paying customers
    b. 45,000 hookups (This is our high end target #)
    c. 39,000 includes apartment complexes (The is the low end target #)

4. Resources purchased:
    a. Cases of water 111,630 (additional 18,502 donated)
    b. Filters 115,700
    c. Filter cartridges 243,200
    d. Test kits 61,161

5. Teams going out tomorrow:
    a. 18 National Guard State (6-9 folks) type 3 teams---Goal tomorrow 300 homes per team
    b. *10 ARC (2-4 folks) type 5 teams---Goal tomorrow 100 homes per team*

Local EOC

Operations:

- Addressed reports of water contamination in distributed bottled and canned water. Confirmed that water is safe to drink through testing by MDEQ. Coordinating with JIC and MDEQ for improved public information on the issue.
- Identifying options to reroute unsolicited offers for supplies and services outside of the EOC. Coordinating to set up 800 number.
- Attended meeting with Flint & Genesee Chamber of Commerce to discuss coordination of efforts, representation at EOC, and improved messaging.
- Attended meeting with Community Foundation of Greater Flint to discuss coordination of neighborhood groups and improved messaging.
- Coordinated with MDARD to provide additional lead testing at restaurants, and signage for safe locations.
- Coordinating with SEOC Logistics to receive information on purchasing strategy and volumes for filter equipment.
- Coordinated and verified deliveries of supplies to apartment complexes.
- Discussed logistics requirements of delivery requests for homebound residents with SEOC Logistics.

Flint, MI Social Listening Report: 1/20/16 1845 ET

This report includes analysis for External Affairs information requirements of social media data including but not limited to FEMA public perception issues, rumor control and public sentiment.

FEMA:

- **Mike Brown.** Former FEMA Administrator Michael Brown appeared on national news outlets today saying "every single layer of bureaucracy failed" the city of Flint, and that the government should have used lessons learned from Katrina. Public response to this interview was overwhelmingly negative (example 1, example 2, example 3). Many felt he was not the appropriate person to speak to the issue. Some local news publications posted about the Katrina quote on Twitter with a poorly worded tweet that could imply it was something said by the current Administrator.

- **Public Appeals.** There has been an increase in posts from the public expressing anger/frustration that the disaster declaration was denied. People are asking President Obama to reconsider and continue to ask "Where's FEMA" or "Can FEMA help."

- **State Appeal.** Although the state submitted its official appeal of the disaster declaration today, this was not a story that was widely shared or talked about on social media. Although people have been asking President Obama to reconsider they do not seem to be aware that an appeal has been filed.

Public Perception:

- **Blame and Apologies.** Last night in his State of the State speech Governor Snyder was apologetic and told Flint residents *"Government failed you." Some members of the public perceived his speech as shifting the blame* and responded with anger (example 1, example 2). Others felt the apology was too little too late (example 1, example 2).

- **Race and Class Issues.** There continues to be a discussion of what the role of race and economic class (example 1, example 2) may have played in exacerbating the issue. The Flint Mayor said that this would never have happened in a rich suburb.

Zach, Sam:

Here's the basic model. Will send the update I got last night as well. Lastly, I'll ask if we can get the distro time changed from 2100 to 1900. I believe I said it, but if I didn't—the reason I asked for such a late pull was so I wouldn't get out in front of the SitRep.

Thanks,
Chris

Incident Command:

- Identifying options to reroute unsolicited offers for supplies and services outside of the EOC. Coordinating to set up 800 number.
- Addressed reports of water contamination in distributed bottled and canned water. Confirmed that water is safe to drink through testing by MDEQ. Coordinating with JIC and MDEQ for improved public information on the issue.
- Coordinating with JIC and SEOC for improved messaging and message control.
- Received donation for $10,000 from Little River Band of Ottawa Indians.
- Command emphasis:

Operations Section:
Attended meeting with Flint & Genesee Chamber of Commerce to discuss coordination of efforts, representation at EOC, and improved messaging.

- Attended meeting with Community Foundation of Greater Flint to discuss coordination of neighborhood groups and improved messaging.
- Coordinated with MDARD to provide additional lead testing at restaurants, and signage for safe locations.
- Identifying warehouse locations for unaffiliated water donations.

Planning Section:

- Tracking supplies and distribution at PODs.
- Set up pallet recycling process to reduce waste volume at Fire Station PODs.
- Coordinating with SEOC Logistics to receive information on purchasing strategy and volumes for filter equipment.
- Coordinating with GCHD to follow up on request for blood lead level testing by special location.
- Reviewed draft for recycling information material.
- *Attended Logistics conference call and addressed local concerns regarding stocking of supplies.*
- Developed SitRep #10.

Logistics Section:

- Coordinated and verified deliveries of supplies to apartment complexes.
- Identifying locations for 5 to 9 potential recycling stations.
- Data entry for deliveries to homebound residents on ipads.
- Discussed logistics requirements of delivery requests for homebound residents with SEOC Logistics.

From: Roe, Christopher <christopher.roe@fema.dhs.gov>
Sent: Wednesday, January 20, 2016 3:30 PM
To: MSP-seocda1
Subject: Cong. Coordinating Call notes--(Unofficial. SA only.)

Hi Zach:

Brief unofficial synopsis of the call FYSA. Dan Shulman plans to send official notes later—

Presenting Attendees: Capt. Kelenske, Gen. Vadnais, David Samaniego, FEMA FCO, and Ben Goldhaber of HHS presented on basic operational outcomes-to-date in Flint. All of these details were culled from your SITREP. (Nothing new—basic discussion of POD sites, MI-NG roles, etc.) Additional attendees were representatives from Sens. Stabenow and Peters, Rep. Kildee, Rep. Pelosi, and a representative from the Congressional Black Caucus.

A total of three questions were received. Two from Rep. Kildee's DC staff and one from the Congressional Black Caucus Rep on the call.

Questions were as follows:

Rep. K1: Asked how individuals who were unable to travel to POD sites and/or functional needs received commodities.

Capt. Kelenske referred to the 2-1-1 system as the most effective means to get constituents with challenges accessing the PODS the commodities they need.

Q2 from Rep. Kildee's Office: Will there be an increase in distribution centers?

Answer from Capt. Kelenske: MSP has leveraged the faith-based community to distribute some commodities over the course of the past two Sundays. He confirmed that 9 churches were used two weeks ago, and (up to) 15 churches were used to distro materials last Sunday. (1/17) He stated that MSP will continue to leverage those opportunities as they become available.

Q1 from Cong. Black Caucus: How were large facilities such as schools, hospitals, and businesses being provided with commodities?

Answer from Capt. Kelenske: These organizations were stockpiling water and have an abundance available. He mentioned that in the initial phase of the response, MSP had borrowed water from them. (Which has since been reimbursed.)

Call began at 1430 Hours and was concluded by 1500. No follow-up RFI's were received from any Congressional Staffers.

Hope this is useful!

Thanks,
CWR

Subject: Daily Summary

- As of 1/19/16 as of 4 pm for PODs and 5 pm for FWRT (start date was Tuesday, 1/12/16)

1. 22,129 homes visited by the FWRTs to date. We believe we have ~24,000 homes with filters; still trying to validate. This is form the data we received from prior to the SEOC activation plus the PODs and door to door operations since activation.

2. Distributed: Includes outstanding data from yesterday- PODs after 5 pm, ARC worksheets and local EOC hotshots.
    a. Number of cases of water 77,794
    b. Filters 69,730
    c. Filter cartridges 184,457
    d. Test kits 16,671

3. Total number of customers on the Flint water system
    a. 29,944 paying customers
    b. 45,000 hookups (This is our high end target #)
    c. 39,000 includes apartment complexes (The is the low end target #)

4. Resources purchased:
    a. Cases of water 95,760 (additional 16,056 donated)
    b. Filters 115,700
    c. Filter cartridges 243,200
    d. Test kits 61,161

5. Teams going out tomorrow:
    a. 7 National Guard State (6-9 folks) type 3 teams—Goal tomorrow 300 homes per team
    b. 10 ARC (2-4 folks) type 5 teams----Goal tomorrow 100 homes per team

Sorry that it took an extra 5 minutes, just had an issue with unruly residents at Station 8.;)

Incident Command:

- Attended public health group meeting with GCHD, City of Flint Water Department and MDEQ to discuss water test information being returned to residents, to allow residents a greater understanding of results.
- Discussed operations of a POD through Headstart Genesee County.
- Worked with United Way to troubleshoot and refine distribution of information via 211.
- Participated in initial recycling/trash management group meeting.
- Command emphasis:

Operations Section:

- Attended conference call with SEOC, ARC and Michigan Community Service commission to coordinate volunteer and donations management.
- Setting up meeting with Community Foundation of Flint to discuss public outreach and long-term strategy.
- Arranged volunteer assignment for Lt. Governor Calley on 01/20/2016.
- Coordinated deliveries of supplies to faith-based organizations, apartment complexes and homebound residents.

Planning Section:
- Tracking supplies and distribution at PODs.
- Attended recycling/trash management group meeting with DEQ, Republic Services, Keep Genesee County Beautiful and Genesee County Planning Commission. Provided projections on current and anticipated bottle distributions.
- Developed SitRep #9.

Logistics Section:
- Coordinated and verified deliveries of supplies to apartment complexes.
- Starting to field requests for deliveries of replacement filters.
- Identifying locations for 5 to 9 potential recycling stations.
- Coordinated with Comcast to set up locations for distribution of filters (distributed 60 filters on 01/19/2016).
- Initiated data entry for deliveries to homebound residents on ipads.

See below update:

- Revamped daily planning maps for Field Teams to refine operational areas and begin preparations for phase II team deployments. Set update interval for maps to 7:00 PM daily. New map refocuses efforts on residential only, and highlights only filter distributions for coverage.
- Released updated JIC map at 1800 displaying updated field team activity and integrating historic paper records that have been entered into the tracking system for field team activity.
- Configured an interface with AGOL to allow MDARD to live update food and water establishment statuses as it relates to the incident. Plan on building a dashboard to monitor status of these facilities for display in the SEOC.
- Coordinated with Flint City GIS to gather total counts for buildings and units per parcel. Still not delivered, but meeting late in the day confirmed the data is available.
- Built a data entry tool and deployed to the documentation unit for paper forms from field teams. No issues to report on this tool.
- Met with FEMA GIS Coordinator, Scott Bailey. He will be granted access to the GIS viewers to prepare maps for federal partners. Additionally, he will attend morning GIS huddle to deconflict tasks and identify priorities for the day.
- Built plan to revamp dashboards used in SEOC to accommodate large volumes of traffic and ensure stability. Intended release is 1/21/2016.
- Received tasker for updating app for Phase II of team deployments. However, no form fields have been provided and need to meet to structure out the app as this will be a major overhaul requiring a new release of the system.
- Provided map of preliminary Water Testing Results to CPT Kelenske for planning purposes and SA.
- Nikkia Anderson returned to the office and has been reintegrated into the schedule.
- HSIP Gold received today. Will work to incorporate into viewers of the following days. This opens up a wider array of data sources for mapping.
- Fixed accounts for iPADS that were failing in the field and brought them back online.
- Coordination continued with U of M Flint. Plan on passing data tomorrow to assist in synchronizing efforts.

To: plangc
Cc: Bresler, Amanda (MSP)
Subject: CDC Visit This Week - ATSDR

Hi Amanda,

Below is a summary of the visit from CDC this week:

Deployment:

Tuesday night (1-19-16) until Friday night (1-22-16)
Leave ATL and Chicago on late flight and arrive in Lansing near 11:00 PM ET
Lodging near HD (located at 201 Townsend Street (Capitol View Building), downtown Lansing
1:30 meeting with state officials (Mikelle Robinson, Deputy Health Official point of contact, reserved conference room)

Attendees (EOC making travel arrangements):

Ileana Arias, PhD Division Director – Division of Community Health Investigations, ATSDR
Role - Sr. NCEH/ATSDR representative, linked to the SHO
Herbert Wolfe, PhD – Senior Advisor – Office of the Director, NCEH/ATSDR
Role – NCEH/ATSDR OD Response Lead
Mary Jean Brown, PhD – Director, Lead and Health Homes Program
Role – Lead expert, liaison to lead program and education interventions, surveillance strategy
Mark Johnson, PhD – Region 5, ATSDR
Jasen Kunz and Troy Ritter – Water systems specialists (Legionnaire's disease) in Environmental Health Services Branch
John Sarisky – Branch chief and water systems specialist in the Environmental Health Services Branch
Andy Dent – Director, Geospatial Research, Analysis, and Services Program (GRASP)
Christain Scheel – Associate Director, NCEH/ATSDR Office of Communication
Pat Breysee -Director, NCEH/ATSDR
Donna Knutson– Deputy Director (Acting), NCEH/ATSDR
Sharunda Buchanan – Director, Division of Environmental Emergencies and Health Services
John Decker – Associate Director, NCEH/ATSDR Office of Science
Nancy Messonnier - Deputy director, NCIRD, OID

Purpose:

To gather ground information on what is happening in Flint and with the State HD regarding the water and lead situation. Specific asks from the state and county have been received –

- A public health advisor to provide on-site assistance to SHO in prioritizing and managing critical tasks

- Communications expert to guide internal and external messaging, and assistance in preparing SHO for legislative hearings and inquiries
- Assistance in developing comprehensive plan to accelerate lead testing among children 0-6 years of age
- Support in developing statewide lead surveillance strategy for all high risk communities in Michigan
- Assistance in prioritizing and guiding a plan for secondary/tertiary prevention strategies for the Flint community, including with working local public health, subject matter experts, the academic community, and the Governor's multi-agency coordinating committee
- Blood lead surveillance- review of case definition for surveillance; determine utility of methods such as shewart charts for situational awareness; review of Poisson regression modeling for Flint; identification of best practices for geospatial analysis and the role of ZIP code versus other geographic units such as wards.
- Legionellosis - development of methods and tools for the identification of high risk facilities and development of risk mitigation guidance for such facilities
- BSN prepared nurse facilitator to supervise student nurses rotating through Flint and providing community outreach and intervention to residents

Upon return from the visit, HHS will develop a more consolidated, longer term plan for assistance for Flint and the State of Michigan to be implemented with ASPR coordination.

Is this what you were looking for?

Thanks,
Jennifer Lixey Terrill

Logistic Section Chief major activities:

- Received interest from various organizations to donate water; directed to Donations Management or local EOC, as appropriate, for coordination.
- Received information from several vendors wishing to provide water treatment solutions; OSC asked JIC for common messaged to address these offers.
- Vetting and directing various 211 inquiries and requests for help; forwarding to appropriate agencies for answers.
- Follow up on resource requests in MI CIMS for current status.
- Order pitchers and assess need for replacement filters for pitchers to be distributed.
- Work on Phase II logistics plan, to include pickup of water test kits from homes.

Hi Zach:

Please see attached a tool that we are using which will feed the metrics I shared with you last night. The Blue Tab data comes from our folks. The Maize Tabs are primarily from your SITREP. There are some yellow highlighted areas on the *State tabs. If this is information you have available and could include in future SITREPs, we would appreciate it.* (My feeling is that the "pitcher replacement cartridge" number will be very, very low. I am also guessing that the folks who have received pitchers got them at a POD as opposed to getting them from a canvassing team, but if I am mistaken and you have that data, we would really appreciate it.)

Lastly, I know that these numbers are fluid and that there will be a big inventory count this evening. No administrative burden is intended for your team, I just want you to see the rough cut of our basic tool. If anything is flatly wrong or you see places where we could improve it (again—without creating extra work for you), we'd appreciate the feedback.

Thank you Sir!

Subject: Daily Summary

Update 1/18/16 -- 14th Day (13th Full Day) After Governor's Declaration of an Emergency

Mission focus for the day:

- *Receive, store and increase quantities of supplies*
- Continue to implement the logistics plan and adjust as needed
- Continue door to door/Flint Water Response Teams (FWRTs)
- Prepare for possible surge in FWRTs utilizing NG personnel
- Work to bring FEMA IMAT personnel up to date following the Presidential Emergency declaration.

Attached Documents:

- SitRep 13

Status on Governor's request letter to the President:

- Emergency declaration received.

Key items for tomorrow to note are:

- The logistics plan will be fully executed tomorrow with all teams.
  - We will have 5-6 state/local agency, type 3 teams (6-9 personnel), with a goal of 300 homes per team.
  - We will have 10 ARC, type 5 teams (2-4 personnel), with a goal of 100 homes per team.

Items to Note

- Deployed 12 state/local teams and 10 ARC Flint Water Response Teams to the field today.
- DTMB is working to secure space in Flint for FEMA staff.
- Cost analysis to investigate if it would be more cost effective for FEMA to purchase water vs the SOM.
- ARC news release concerning the Volunteer Reception Center (VRC) sent out today.
- Media availability conducted today at 3pm at the VRC.
- *Information reported to the JIC:*

  - As of 1/17/16 as of 5 pm (start date was Tuesday, 1/12/16)

    1. 21,393 homes visited by the FWRTs to date. We believe we have ~24,000 homes with filters; still trying to validate. This is form the data we received from prior to the SEOC activation plus the PODs and door to door operations since activation.

    2. Distributed:
       a. Number of cases of water 37,313
       b. Filters 53,713
       c. Filter cartridges 169,520
       d. Test kits 7,379

    3. Total number of customers on the Flint water system
       a. 29,944 paying customers
       b. 45,000 hookups (This is our high end target #)
       c. 39,000 includes apartment complexes (The is the low end target #)

    4. Resources purchased:
       a. Cases of water 82,992 (additional 16,056 donated)
       b. Filters 115,700
       c. Filter cartridges 243,200
       d. Test kits 61,161

    5. Teams going out tomorrow:
       a. 5-6 State (6-9 folks) type 3 teams---Goal tomorrow 300 homes per team
       b. 10 ARC (2-4 folks) type 5 teams----Goal tomorrow 100 homes per team

Local EOC

Operations:

- Continuing to work with faith based organization to distribute resources.
- Working with colleges to obtain volunteers for canvassing.
- Requested information from SEOC regarding amount of distributed bottles to date, and projected amounts for future distribution for trash management/recycling plan meeting on 01/19/2016.

Subject: SitRep bullets

Incident Command:

- Established objectives for the current operational period.
- Requested deployment of Reserve Deputies from Saginaw County Sheriff's Office to support field operations.
- Coordinating the use of PUR sampling teams with SEOC and City of Flint.
- Responded to offer of relieve from the Little River Band of Ottawa Indians. Sought guidance from SEOC.
- Standardized information collection systems (i.e., spreadsheets) for tracking of home deliveries of supplies to allow GIS mapping for emergency responders without access to GIS systems.
- Provide guidance to Fire Station PODs for distribution and collection of test kits/water sample.
- Addressing concerns that distributed water is tainted with lead (via reports through 211).

Operations Section:

- Clarifying volunteer operations, and working to improve communication between EOC/SEOC and Michigan Community Service Commission to develop a clear plan.
- Provided clarification of data entry on ipads to canvassing teams through Sheriff's Office.

Planning Section:

- Tracking supplies and distribution at PODs.
- Discussion with ARC, SEOC and EOC operations regarding digital submission of address sheets from ARC canvassing teams to SEOC for data entry.
- Preparing IAP process for current operational period.
- Identified operational functions at EOC to provide input for development of objectives for the operational period.
- Requested information from SEOC regarding amount of distributed bottles to date, and projected amounts for future distribution for trash management/recycling Plan meeting on 01/19/2016.
- Developed SitRep #8.

Logistics Section:

- Initiated and followed up on resource requests.
- Coordinated hotshot deliveries of supplies to faith-based organizations and special locations.
- Coordinated with Comcast to set up locations for distribution of filters.
- Identifying suitable space for incoming National Guard command staff.
- Assisted coordination of donated vehicles.

Subject: FW: Activities Summary 1/18

From: MSP-SEOCGIS2
Sent: Monday, January 18, 2016 7:40 PM
To: plangc
Subject: Activities Summary 1/18

We:

- Continued producing maps of lead service lines (40% complete with primary effected area)
- Developed a map of comparative activity for the JIC from pre-response to post-response (established a recurring task to update this map)
- Established metrics to measure percent completion of resource distribution. The following two are from today:
    - Active Water Subscribers confirmed as Having a Filter: 13164 of 29994 total subscribers (44% coverage)
    - Total parcels confirmed as having a filter: 15364. Total parcels needing to be targeted is unknown as field teams are noting that the Flint parcel layer is not accurate for vacant homes. Need to work with assessor's office to update. Planned to be researched and established tomorrow.
    - Multi-tenant home status: Cannot be completed right now as we need to work with Flint's assessor's office to identify tenancy counts. Planned to be researched and established tomorrow.
- Fixed data from apps and paper copies of field team reports and PODS. There remains a significant amount of unplotted data due to issues with teams using paper forms.

Hi Jane,

Below is the info we need for today and going forward. Thanks!

Homes visited daily. Jan. 18th 5,040

To date, total number of homes visited by water response teams. 21,393

Since January 9, total number of resources distributed to residents, both at the water resource sites and by the water response teams, in addition to donations:
•cases of water 37,313
•water filters 53,713
•water testing kits 7,379

The State of Michigan has purchased the following resources, since January 5, which will continue to be delivered to Flint over the coming days:
•cases of water 58,456
•filters 108,520
•water testing kits 28,903

Operations

Today was a planning day, so objectives, critical tasks, and tactics were reviewed for an operational period of 7 days beginning Tuesday, January 19.

Operations submitted a resource request for MANG to assist with delivery of water, filters, test kits and replacements filters to Flint residents, beginning Tuesday, Jan 19.

A cost analysis of State of Michigan purchasing water vs FEMA purchasing water has been requested prior to FEMA purchasing additional. They "leaned forward" immediately yesterday and had water in route before this analysis could be done. We would like to ensure the most cost effective means before additional is purchased.

An informational document was reviewed and approved by command regarding "Lead in the Water" for the Michigan.gov/Flintwater website

An Arabic version of the palm card was reviewed and approved by command. This was developed via Arab American and Chaldean Council.

We learned that the CDC/ATSDR (Agency for Toxic Substances Disease Registry) has deployed a team to Michigan.

In working to assist in gathering of information for Capt's briefing to be conducted on 1-19-16, I have the following:

Purchased since activation:

82,992 cases of water was purchased in addition to 16,056 donated cases of water

115,700 faucet filters were purchased

236,000 replacement cartridges were purchased

2,300 filtered water pitchers were purchased

From Planning:

Here is the information on resource distributed as of 5 pm today. This includes the updated totals from yesterday (between 7-9 pm) and the daily totals for PODs and FWRT as of 5 pm today.

As of 1/18/16 as of 5pm (start date was Tuesday, 1/12/16)

1. 21,393 homes visited by the FWRTs to date. We believe we have ~24,000 homes with filters; still trying to validate. This is form the data we received from prior to the SEOC activation plus the PODs and door to door operations since activation.

2. Distributed:
    a. Number of cases of water 37,313
    b. Filters 53,713
    c. Filter cartridges 169,520
    d. Test kits 7,379

A cost analysis of State of Michigan purchasing water vs FEMA purchasing water has been requested prior to FEMA purchasing additional. They "leaned forward" immediately yesterday and had water in route before this analysis could be done. We would like to ensure the most cost effective means before additional is purchased.

An informational document was reviewed and approved by command regarding "Lead in the Water" for the Michigan.gov/Flintwater website

An Arabic version of the palm card was reviewed and approved by command. This was developed via Arab American and Chaldean Council.

We learned that the CDC/ATSDR (Agency for Toxic Substances Disease Registry) has deployed a team to Michigan.

In working to assist in gathering of information for Capt's briefing to be conducted on 1-19-16, I have the following:

Purchased since activation:

82,992 cases of water was purchased in addition to 16,056 donated cases of water

115,700 faucet filters were purchased

236,000 replacement cartridges were purchased

2,300 filtered water pitchers were purchased

From Planning:

Here is the information on resource distributed as of 5 pm today. This includes the updated totals from yesterday (between 7-9 pm) and the daily totals for PODs and FWRT as of 5 pm today.

As of 1/18/16 as of 5pm (start date was Tuesday, 1/12/16)

1. 21,393 homes visited by the FWRTs to date. We believe we have ~24,000 homes with filters; still trying to validate. This is form the data we received from prior to the SEOC activation plus the PODs and door to door operations since activation.

2. Distributed:
   a. Number of cases of water 37,313
   b. Filters 53,713
   c. Filter cartridges 169,520
   d. Test kits 7,379

Bullets for Logistics – 1/18/2016

- Secured email and phone booster for warehouse.
- Worked with FEMA to order water and filter cartridges.
- Researched expedited testing kit shipping.
- Tactics meeting.
- Worked with DHHS re: purchase of filtered pitchers.
- Meetings with FEMA and ARC
- Assigning Hot Shots.
- Working with Donations management re: resources.
- Supporting potential expansion of teams.
- Working to get back-up for warehouse teams.
- Continuing inventory monitoring and hot shots tracking.
- Projecting future orders of water resources and commodities.

Finance Section:

- Assisting MI NG with hotel logistics for possible deployment to Flint.
- Continue developing spend plans.
- Work with FEMA to determine costs for possible reimbursement for Flint emergency.
- Meet with FEMA IMAT Public Assistance

Hi Amanda

1. I talked with James T. regarding the attached spreadsheets provided by Lauren and the data needs to be entered into an online form. This can't be uploaded into the system. This means that either we put an EMHSD staff member into the EOC under Planning to be a data entry person or have the Red Cross do it.

   From here forward, the red cross should be entering this information into the online form and not into a spreadsheet that is forwarded to us.

2. Is the goal to know what amount of filter types are at each house, so that we can forecast how many replacement filter cartridges that will need to be replaced for the next year or so. If yes, then the red cross needs to make sure that this data is captured, if they use paper and not the iPad.

We can talk on this.

Thanks
Sam

Subject: RE:

Hey, I just put some numbers up so I could put the screen on here again. Please still try to give me access to your spreadsheet with burn rates, etc.

For Sam's information: I changed around the rows for Gallons and Bottles, since National Guard reports in that order and we can just copy out of their documents.
Also, I changed bottles to cases instead of pallets, since NG reports in cases, and there was some confusion on the SEOC side regarding how many cases are on a pallet. Since numbers vary, they now might want to use cases as their unit of choice.

thanks,
does the document you are pulling together include the hourly levels? if it does, can you send me a copy each time you update, so I won't have to pull from the seperate SG spreadsheets?
If not, I will copy out of what the Guard is sending us.

Subject:

Henrik,

Here are the answers:

Two questions:

1. Who is the Order Unit Leader?
Pam Strobel

2. Just trying to figure out if I understood you correctly on the phone: Are you still going to pull all the numbers from the stations together so you have a side-by-side comparison for all the stations?

Right now we are pulling together numbers the national guard is sending us and using those to keep a burn rate for the PODs.
I am tasked with reporting on how the PODs were stocked throughout the day when we have our brief-out here, so I don't need it every hour, but a couple of updates throughout the day so I can see the progression.
If you were not planning on maintaining the google docs document or capturing that info in another spreadsheet - no big deal, I would just do it myself. Just trying to avoid duplication.
Keep doing the google doc for your view and for us to see a snapshot of inventory levels.

Sam is at an appointment and will be back later I will have him call you and follow up to make sure I didn't miss anything.

Thanks,

Subject: FW: SEOC Update 1/16/16 - Flint Water - Limited Distribution

Here is new format to send to the SDEMHS at the close of business each day...

Update 1/16/16 – 12th Day (11th Full Day) After Governor's Declaration of an Emergency

Mission focus for the day:

- Receive, store and increase quantities of supplies
- Continue to implement the logistics plan and adjust as needed
- Continue door to door/Flint Water Response Teams (FWRTs)
- Prepare for possible surge in FWRTs utilizing NG personnel
- Work with FEMA personnel to prepare for engagement following the Presidential Emergency declaration

Attached Documents:

- SitRep 11

Status on Governor's request letter to the President:

- Emergency declaration received.

Key items for tomorrow to note are:

- The logistics plan will be fully executed tomorrow with all teams.
  - We will have 10 state agency, type 3 teams (6-9 personnel), with a goal of 300 homes per team.
  - We will have 10 ARC, type 5 teams (2-4 personnel), with a goal of 100 homes per team.
- I will be back on duty Sunday.

Items to Note

- LT Gov visited the local EOC today; discussed local EOC operations.
- Deployed 11 state teams and 10 ARC Flint Water Response Teams to the field today.
- DEQ had concern about testing kits not being with the teams today; test kits were assembled and available at the ARC HQ. This appears to be a disconnect in communications and will be addressed by Logistics.
- SEOC planning is asking if the 800 MHz radio has the event channel that they could communicate with local EOC on ground truth inventory.
- Information reported to the JIC:
  - As of 1/16/16 as of 7pm (start date was Tuesday, 1/12/16)

1. 11,324 homes visited by the FWRTs to date. We believe we have ~24,000 homes with filters; still trying to validate. This is form the data we received from prior to the SEOC activation plus the PODs and door to door operations since activation.

2. Distributed:
    a. Number of cases of water 20,876
    b. Filters 47,935
    c. Filter cartridges 167,401
    d. Test kits 3,322

3. Total number of customers on the Flint water system
    a. 29,944 paying customers
    b. 45,000 hookups (This is our high end target #)
    c. 39,000 includes apartment complexes (The is the low end target #)

4. Resources purchased:
    a. Cases of water 57,456 (additional 12,884 donated)
    b. Filters 108,520
    c. Filter cartridges 239,081
    d. Test kits 28,901

5. Teams going out tomorrow:
    a. 10 State (6-9 folks) type 3 teams---Goal tomorrow 300 homes per team
    b. 10 ARC (2-4 folks) type 5 teams----Goal tomorrow 100 homes per team

Local EOC

Operations:

- Provided direction to Operations and Logistics Section to initiate water sample collection at PODs.
- Lt. Roach worked with faith based organizations today reference water and filter distribution. Additional churches were supplied with water, filters and test kits.
- Still concerned about people going to every fire station and collecting water/filters.
- Station #6 (POD) has associated safety concerns due to proximity of street and lack of suitable parking. We are working to resolve.
- Discovered disconnect in "request" for security at the warehouse overnight. Tonight it is being handled with Genesee County doing drive-bys throughout the night. Continuous security is required 7 PM to 7 AM from this point on. This will be resolved by virtue of a formal request being put in by the Local EOC.

Sorry for the late submission.

Incident Command:
- Coordinated with Sloan Museum for facilitation of education outreach (originally offered to serve as POD).
- Facilitated removal of a Facebook post calling for uncoordinated response by spontaneous volunteers.
- Facilitated activation of Genesee County/Genesee Health System MOU for mental health services.

Operations Section:
- Handled coordination of supplies for UofM Flint.
- Coordinated trash pickup at Fire Station PODs with Liaison Officer.
- Worked with Liaison Officer to track hotshot distributions to faith-based organizations.

Planning Section:
- Tracking supplies and distribution at PODs and warehouses.
- Liaison with Fire Station PODs.
- Maintained digital dashboards in EOC.
- Developed SitRep #7.

Logistics Section:
- Initiated and followed up on resource requests.
- Coordinated hotshot deliveries of supplies to special locations.
- Provided list of already serviced special locations to canvassing teams to avoid duplication of efforts.

My apologies for the delay- we've been slammed today.

- Held a media availability at Fire Station #5 where Major General Vadnais announced Michigan National Guard efforts will be doubled to approximately 70 personnel by Monday to assist at water resource sites.
- Governor's Office issued a new release announcing the Presidential emergency declaration approval.
- Answered media calls about the state's resource distribution and activity efforts to date.
- Updated daily talking points to include the state's activity efforts to date and the Presidential emergency declaration.

- Coordinating with FEMA External Affairs to plan a Congressional call on January 17, in additional to a legislative call regarding the Presidential emergency declaration. Preparing talking points for the Congressional and legislative conference calls.

- Issued a news release with today's activity for the water resource sites and water distribution teams, as well as the increase in National Guard personnel.

- Issued a news release from the American Red Cross and United Way regarding the volunteer resource center and how individuals can volunteer to help.

From: MSP-SEOCGIS2
Sent: Sunday, January 17, 2016 5:15 PM
To: plangc
Subject: GIS Update 1/17/2016

The major effort for the day was determining metrics for success regarding filter distributions. A method has been developed to tie back resource distributions to active water customers. As a result of this effort it was determined that of the 29,994 active water subscribers on the Flint Water System, 12,002 have been confirmed as having received filters (4623 of which were a result of SEOC driven operations that we began tracking on the 13th of January). There are a significant number of paper copies of records and database entries that need to be cleaned that are not included in the above. Additionally, there are a significant number of persons who do not show in the records as having been a water subscriber that received a filter. We are actively working to synch up all of these datasets to get a more accurate picture of who does and does not have filters.

Another major focus was determining what map should be provided through the JIC to the media to update the public on the status of response efforts. It was determined that the point data from the dashboard is ideal to show progress. This has been established as a recurring task and the map will be produced daily by 1700.

Maps produced today:

- Flint Water Response Teams Planning Maps
- Team Activities Map for JIC
- City of Flint Infrastructure Map for FEMA

Additionally, provided tabular data from Flint Water Response Team Activities for the Recovery Unit.

No progress was made on the mapping of lead water service lines in the City of Flint.

CLASSIFICATION: UNCLASSIFIED

Sir,

I talked to NCOIC on ground (SSG Wedding) he gave the following answers to questions asked from SEOC and other issues on ground:

1) When and individual comes to a station, attempting to get an ID from them is happening, some don't want to give ID or say they don't have water. So, if it is an individual case then they hand it out so no issue is created between locals and soldiers/Red Cross.

2) The Red Cross is handling most of the filters and taking address from civilians. An issue is some addresses come up as vacant or non-existing. The number of locals flowing in does not allow for the checking of addresses right away, it is done later in the day creating this problem.

3) The tablets given to process the addresses cannot have the location turned on, it creates some problem with the *imputing of other addresses.*

4) No site can fit a 50' trailer. The current delivery vehicles are the largest that can be used.

5) The site storage areas are not large enough to take much more than current load. Site layouts are being made to portray the space available.

6) SSG Wedding did request to talk to our rep at SEOC to go more in depth with these issues. His number is 517-582-4928

Subject: [Non-DoD Source] Requested Staging Requirements

Mr. Stemitz and All,

I would like to present the requirements that we are requesting from the Selfridge ANGB staff to conduct staging operations:

1) Ramp/Tarmac space to store 30 - 40 tractor/trailers, 5 box trucks, 1 C2 40 foot comms unit, and various support vehicles. Utilize the Joy Road gate to support ingress/egress of trucks to property if possible.

2) Office space for 3 - 5 administrative personnel near the operations
area
with latrine.
3) Approximately 5000 square feet of indoor storage space for stowage
of water
test kits, water filters, and water filter replacement inserts.
4) 2 enclosed cab type all terrain forklifts.
5) 4 generator light sets
6) 7 pallet jacks
7) 2 porta-pots with associated support

The most important requirements are the first three. Everything else can be acquired via contract via FEMA if needed. We understand that some of these requirements may not be available from the Selfridge ANGB. It is imperative that the requirements that cannot be provided do not become an impetus to the implementation of the agreement. We will need to develop a License and Use Agreement as well. I am attaching a sample document we could utilize and have with other DOD installations. Needless to say, acquiring the staging area is the top priority for FEMA Logistics. We are motivated to solidify this agreement as soon as possible. Typically we ask the DCE to be our advocate but since this property is owned by the state it presents a different situation and opportunity to negotiate directly with the state. The DCE will still remain engaged and we welcome their guidance and advice as always.

Mr. Stemitz et al, my contact data is the following:

Sent: Saturday, January 16, 2016 3:46 PM
Subject: [Non-DoD Source] FEMA-3375-EM IMAT Operations Order Michigan 01162016.docx

Good Evening,

FEMA-3375-EM has been approved for the State of Michigan as a result of elevated lead and contaminated water. The FEMA Region 5IMAT Team will deploy to Lansing, Michigan to provide response and recovery support to the state of *Michigan and City of Flint.*

* *RA's Intent: The IMAT will coordinate federal regional response*
efforts, build a common operating picture, develop a support plan, and deploy and track required assets and resources, in support of the Michigan State Emergency Operations Center.

* Concept of Operations: *Further deployment and travel instructions*
will be provided at that time.

* Coordinating Instructions. IMAT will assume primary duty in
support of other incidents.

* A manning roster will be provided by the IMAT Team Leader.

* Travel. This order does not provide authorization to travel. An
approved travel authorization is required for travel.

Very Respectfully,

Cornelius C. Miller

Senior Watch Officer

Hi Zach:

Thanks for making time for me. We appreciated the explanation of the SITREP reporting numbers.

Requests: Deborah.fulk@fema.dhs.gov, Planning Section Chief, and Christopher.roe@fema.dhs.gov, SITL, would appreciate being added to the SITREP Mailing List, please.

Data Request: We received an RFI for updated commodity expenditure totals for the follow items.

Replacement Filters:
Faucet Filters:
Cases of Water:
Water Test Kits:

Thanks for your assistance, Sir.

Plans Team,

Tomorrow, in the event the NG SEOC LNO is unavailable to receive the data from the PODS, they (the PODS) are on Channel G9 - Event 9 is primary for the overall response Channel. G10 - Event 10 is alternate for the overall response. We will work to get computers with Mifi devices to each POD to allow hourly reporting of the previously submitted spreadsheet. I am tracking this data is the long pole in the tent right now.

Hi Lauren,

Sam had an in depth discussion this evening with LTC Stemitz about tracking resources with the PODs. They will be implementing a process of having the NG soldiers email the information directly to Sam and Henrik to help speed up the reporting process. We are also going to get a 800 MHz radio for the SEOC, so the resource unit can have situational awareness and have direct contact with local SEOC and PODs.

Please contact me tomorrow if you have any concerns.

Amanda

Subject: POD inventory plan

Hi Amanda

The current plan is to have the National Guard provide the tracking sheet that they have developed. This will provide the resource unit and the local EOC with up to date inventory hourly.

This may take a day to implement.

Thanks
Sam

My apologies for the delay- we've been slammed today.

- Held a media availability at Fire Station #5 where Major General Vadnais announced Michigan National Guard efforts will be doubled to approximately 70 personnel by Monday to assist at water resource sites.

- Governor's Office issued a new release announcing the Presidential emergency declaration approval.
- Answered media calls about the state's resource distribution and activity efforts to date.
- Updated daily talking points to include the state's activity efforts to date and the Presidential emergency declaration.
- Coordinating with FEMA External Affairs to plan a Congressional call on January 17, in additional to a legislative call regarding the Presidential emergency declaration. Preparing talking points for the Congressional and legislative conference calls.
- Issued a news release with today's activity for the water resource sites and water distribution teams, as well as the increase in National Guard personnel.
- Issued a news release from the American Red Cross and United Way regarding the volunteer resource center and how individuals can volunteer to help.

> **Subject: SEOC Staffing through 1/31/16**

Good evening,

Attached is the list of staff assigned to work in the SEOC through 1/31/16. The hours are 8 a.m. to 8 p.m. Lunch and dinner will be provided. As always, business casual attire is appropriate. No jeans for EMHSD staff.

For Fiscal, your names are not on this schedule but I know it has been worked out within the section for the appropriate staff to cover.

Thanks,

Penny

State Emergency Operations Center
Logistics Section Chief
517-333-7767

Flint Water Response Team Plan for Wednesday, 01.20.16_V2.0_FINAL

Changes are highlighted in red

Key

WRT	Water Response Team
OIC	Officer In Charge
ARC	American Red Cross
OGCS	Office of Genesee County Sheriff
HH	Household
LEOC	Local Emergency Operations Center
NG	National Guard

Key Leaders

WRT OIC	Lt. Amy Dehner	
ARC OIC	Robert Gaskill-Clemons	

Plan

Agency	Team Types	Mission	Priority Distribution Areas
MSP/NG	9 Teams	5400 HH	Target Areas 10-18
ARC	10 Type V	1200 HH	Target Areas 1-9

Resource Status

Team Type & Quantity	Type: N/A Quantity: 9				
Resource	**Minimum**	**Confirmed**	**Notes**	**Date**	**Time**
Team Leader	9	9		1/19/16	2004
16ft box truck	9	9		1/19/16	2004
Truck Driver	9	9		1/19/16	2004
Team Member	95	95		1/19/16	2004
Team Transport Vehicle for 6-9 Team Members	8	8		1/19/16	2004
Team Transport Driver	8	8		1/19/16	2004

Patrol Car	8	8		1/19/16	2004
iPads	16	16		1/19/16	2004
Hand Warmers	300	300		1/19/16	2004
Vests	0	0		1/19/16	2004
Distribution Kit	N/A	N/A		1/19/16	2004

Team Type & Quantity	**Type: Type V Quantity: 10**				
Resource	**Required**	**Confirmed**	**Notes**	**Date**	**Time**
Team Leader	10	10		1/19/16	2004

16ft box truck	0	0		1/19/16	2004
Truck Driver	0	0		1/19/16	2004
Team Member	30-60	30		1/19/16	2004
Team Transport Vehicle for 2-4 Team Members	10	10		1/19/16	2004
Team Transport Vehicle Driver	10	10		1/19/16	2004
Patrol Car	0	0		1/19/16	2004
iPads	10-20	10		1/19/16	2004
Hand Warmers	60	382		1/19/16	2004
Distribution Kit	100	1200		1/19/16	2004

Execution:

Key Locations

Team	**Assembly Area**	**Hours of Operation**
OGCS/MSP	LEOC Genesee County Administration Building	0830-1600

	1101 Beach St, Flint	
ARC	ARC 1401 S Grand Traverse St, Flint	0730-1600
Warehouse	4315 North Clio Road, Flint	0700-1900

Critical Task: Assemble, coordinate, and monitor WRTs

OGCS/MSP Process:

1. Assign team leaders, team members, and routes to teams
2. Team Member check in
3. Conduct pre-deployment briefing to include team mission assignments, concept of operations, deployment locations, replenishment process, reporting process, and safety briefings (refer to OGCS_MSP WRT Volunteer Assembly Information V2.0_011816 for detailed information on volunteer processing at LEOC)
5. Provide training to new team members
6. Issue vest and badge to team members
7. Execute morning distribution assignment
8. Lunch served between 1230-1330
9. *WRT OIC and Team Leaders midday brief*
10. Execute afternoon distribution assignment
11. Conduct post-deployment debrief with team leaders and members
12. Collect vest and badge from team members

Sample Script for Team Members:

We're here to make sure you have all the resources you need. We have bottled water, a faucet and replacement filter, and a water test kit. Your water sample will assist in monitoring the lead and copper in the water system. Make sure to submit the water sample. The instructions are included here with the bottle, but make sure to submit within 14 days. If you need assistance or have other questions, you can call 211.

Execution Support:

Product Replenishment Process:

Team	Replenishment Trigger	Replenishment Location	Process
GCSO/MSP	0 Distribution Kits Remaining	Distribution Route: exact location determined by Team Leader	1. Contact warehouse to request replenishment truck 2. Coordinate replenishment location with warehouse 3. Exchange replenishment truck with empty truck
ARC	0 Distribution Kits Remaining	Clio Warehouse	Replenish ERV at warehouse

Warehouse

Tactics:

1. Load a minimum of 2 trucks in preparation for replenishment requests with product loads corresponding to Team Typing Matrix

Lunch

OGCS/MSP WRTs lunches will be provided by the ARC and coordinated by LEOC Logistics.

Reporting:

Tactics:

1. All WRTs will utilize ipads as the primary reporting method and the WRT Distribution Tracking Tool as a secondary method if ipads fail.

Flint Water Lead Project

Michigan Department of Health and Human Services
Situation Report for January 15, 2016

Governor Snyder declares a state of emergency for Genesee County due to the health and safety issues related to lead in city of Flint drinking water.

The Community Health Emergency Coordination Center (CHECC) is at Level 2 Activation

****NOTE: Contains potentially Identifiable Information- REDACT AS INDICATED****
New items for the day listed first and in bold print.

Daily Briefing and Situation Report prepared by Linda Dykema

Surveillance Indicators: People Tested for Lead 10/1/2015 to 1/8/2016: 2,642;
Children less than 6 years old ≥ 5 µg/dl since 10/1/2015: 28
Children 6 to 17 years old ≥ 5 µg/dl since 10/1/2015: 7
Adults 18 years and older ≥ 5 µg/dl since 10/1/2015: 15
Severity Indicators: Hospitalized/Discharged - 1/1; Deaths - 0

DAILY ACTIVITY SUMMARY

Elevated Blood Level (EBL) Environmental Investigations – ETC Contractors, Wes Priem, Courtney Wisinski

- EBL report through 1/15/2016
  - 23 families contacted
  - **17 EBL investigations completed.**
  - **17 Water samplings completed.**
  - **10 EBL Reports Received.**
    - **9 homes with lead dust hazards**
    - 3 homes with lead in soil hazards
    - **8 homes with lead-based paint hazards**
    - **5 homes with lead detected in tap water**
      - 1 home with lead water levels greater than 15 ppb
  - **4 investigations scheduled.**
  - *5 applications received for the Lead Safe Homes Program, 1 family enrolled.*
- 1 home was found to have elevated lead concentrations (72 ppb) in water from a bathroom tap. The family has been advised not to use the tap for consumption or brushing teeth. An additional filter will be provided to the family and options for replacing the fixture will be explored.

MDHHS/Genesee County Health Department (GCHD) Case Management (CM) Services – Nancy Peeler

- CM report through 1/8/2016:
  - # of contacts attempted: 186 (0-5 year olds) and 12 (6-17 year olds)
  - # offered CM: 134 (0-5 year olds) and 12 (6-17 year olds)
  - *# CM started: 25 (0-5 year olds) and 3 (6-17 year olds)*
  - # of children receiving CM who live in Flint: 25 (0-5 year olds) and 3 (6-17 year olds)
  - # billed to Medicaid: 14 (0-5 year olds) and 1 (6-17 year olds)
  - # other disposition: 30 (0-5 year olds) and 1 (6-17 year olds)

Epidemiology/Surveillance – Corinne Miller, Patti McKane, Martha Stanbury, Bob Scott, Jessica Cooper

- **Developed metrics related to elevated blood lead testing among children < 6 years of age in Flint who are enrolled in Medicaid.**
- **Held conference call with CDC to discuss development of tools related to identification of and recommendations for facilities at greater risk for transmission of opportunistic pathogens.**
- Developed/updated Talking points to respond to Legionella questions.
- Completed Summary report describing second illness wave case investigations.
- Updated Analysis/Summary on first illness wave investigation with recently acquired patient information and illness-related mortality standard.
- *Supplied Legionellosis cases to Vital Records for linkage to ascertain any unreported deaths.*

Filter & Water Distribution Sheryl Thompson

Filter report through 1/13/2016

	Received	Distributed	Remaining
Water Filters	22,000	13,008	8,992
Water Pitchers	720	409	311
Replacement Cartridges - Brita	19,400	3,367	16,033
Replacement Cartridges - PUR	5,706	375	5,331
Replacement Cartridges - Zero	375	205	170

Communications/Information Sharing – Linda Dykema, Eden Wells

- **Weekly HHS internal briefing.**
- **Weekly coordination call with GCHD.**

Health Education Resources Updates - Michelle Bruneau, Emily Houk

- Continuing to write and coordinate additions to the EBL Case Manager Binder, now known as the MDHHS Lead Safe Family Guide Book. (MB)
- *Began work on filter cartridge changing fact sheet; clarifying uses of filtered/vs unfiltered water (MB)*

Toxicology - No Updates

WIC - No updates.

Healthcare/Providers - No updates

DEQ Information - Linda Dykema as Liaison

- DLARA plumbers will replace fixtures at Freeman Elementary School that were previously tested and found to have > 15 ppb of lead in the water. MDEQ will conduct a "deep flush" of the school plumbing since many lines have been unused for several months. MDEQ will then retest of the water from the new fixtures to confirm whether or not these efforts have been effective in reducing or eliminating exposure to lead in the water.

Flint Water Response Team Plan for Tuesday, 01.19.16_V2.0_FINAL

Changes are highlighted in red

Key

WRT	Water Response Team
OIC	Officer In Charge
ARC	American Red Cross
OGCS	Office of Genesee County Sheriff
HH	Household
LEOC	Local Emergency Operations Center

Key Leaders

WRT OIC	Lt. Pat Young	
ARC OIC	Robert Gaskill-Clemons	
Warehouse	Shawn Scott-Fitzgerald	

Plan

Agency	Team Types	Mission	Priority Distribution Areas
OGCS/MSP	5-6 Type III	3600 HH	Refer to 20160116_Team_Assignment_Areas_Update.jpg
ARC	10 Type V	1200 HH	Refer to 20160116_Team_Assignment_Areas_Update.jpg

Resource Status

Team Type & Quantity	Type: Type III Quantity: 5-6				
Resource	**Required**	**Confirmed**	**Notes**	**Date**	**Time**
Team Leader	5-6	5-6		1/18/16	
16ft box truck	5-6	5-6		1/18/16	
Truck Driver	5-6	5-6		1/18/16	
Team Member	40-50	40-50		1/18/16	
Team Transport Vehicle for 6-9 Team Members	5-6	5-6		1/18/16	

Team Transport Driver	5-6	5-6		1/18/16	
Patrol Car	10-12	10-12		1/18/16	
iPads	10-20	20		1/18/16	
Hand Warmers	144	382		1/18/16	
Vests	0	200		1/18/16	
Distribution Kit	1500-1800	1500-1800		1/18/16	

Team Type & Quantity	**Type: Type V Quantity: 12**				
Resource	**Required**	**Confirmed**	**Notes**	**Date**	**Time**
Team Leader	10	10		1/18/16	
ARC ERV	10	10		1/18/16	
ARC ERV Driver	10	10		1/18/16	
16ft box truck	0	0		1/18/16	
Truck Driver	0	0		1/18/16	
Team Member	30-60	30		1/18/16	
Team Transport Vehicle for 2-4 Team Members	10	10		1/18/16	
Team Transport Vehicle Driver	10	10		1/18/16	
Patrol Car	0	0		1/18/16	
iPads	10-20	10		1/18/16	
Hand Warmers	60	382		1/18/16	
Distribution Kit	1200	1200		1/18/16	

Execution:

Key Locations

Team	**Assembly Area**	**Hours of Operation**
OGCS/MSP	LEOC Genesee County Administration Building 1101 Beach St, Flint	0830-1600
ARC	ARC 1401 S Grand Traverse St, Flint	0730-1600
Warehouse	4315 North Clio Road, Flint	0700-1900

Critical Task: Assemble, coordinate, and monitor WRTs

OGCS/MSP Process:

1. Assign team leaders, team members, and routes to teams
2. Team Member check in

3. Conduct pre-deployment briefing to include team mission assignments, concept of operations, deployment locations, replenishment process, reporting process, and safety briefings (refer to OGCS_MSP WRT Volunteer Assembly Information V2.0_011816 for detailed information on volunteer processing at LEOC)
    5. Provide training to new team members
    6. Issue vest and badge to team members
    7. Execute morning distribution assignment
    8. Lunch served between 1230-1330
    9. WRT OIC and Team Leaders midday brief
    10. Execute afternoon distribution assignment
    11. Conduct post-deployment debrief with team leaders and members
    12. Collect vest and badge from team members

Sample Script for Team Members:

We're here to make sure you have all the resources you need. We have bottled water, a faucet and replacement filter, and a water test kit. Your water sample will assist in monitoring the lead and copper in the water system. Make sure to submit the water sample. The instructions are included here with the bottle, but make sure to submit within 14 days. If you need assistance or have other questions, you can call 211.

Execution Support:

Product Replenishment Process:

Team	Replenishment Trigger	Replenishment Location	Process
GCSO/MSP	100 Distribution Kits Remaining	Distribution Route: exact location determined by Team Leader	1. Contact warehouse to request replenishment truck 2. Coordinate replenishment location with warehouse 3. Exchange replenishment truck with empty truck
ARC	*0 Distribution Kits* Remaining	*Clio Warehouse*	Replenish ERV at warehouse

Warehouse

Tactics:

1. Load a minimum of 2 trucks in preparation for replenishment requests with product loads corresponding to Team Typing Matrix

Lunch

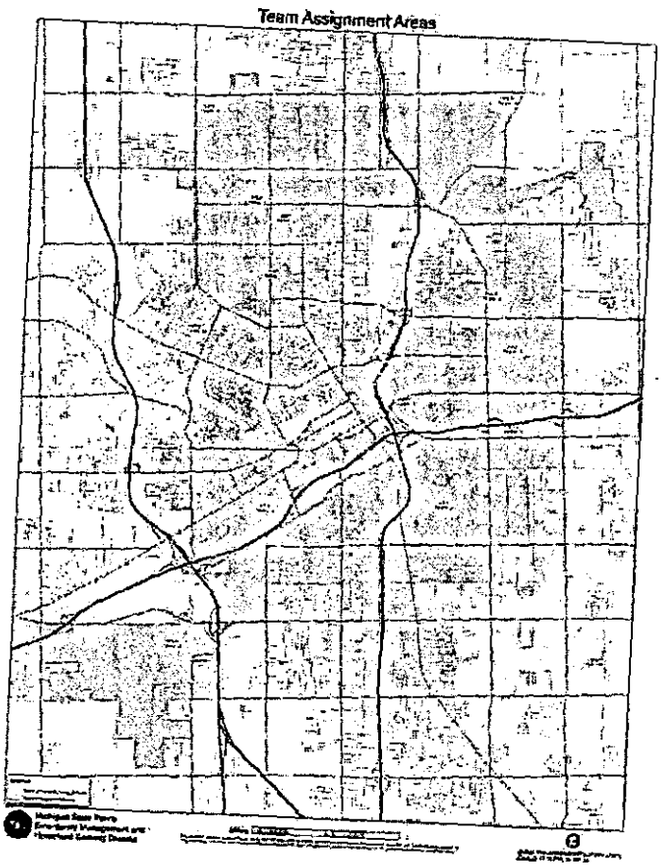
OGCS/MSP WRTs lunches will be provided by the ARC and coordinated by LEOC Logistics.

Reporting:

Tactics:

1. All WRTs will utilize ipads as the primary reporting method and the WRT Distribution Tracking Tool as a secondary method if ipads fail.

Priority Distribution Areas



WATER/FILTER REQUESTS (257-3600)

Damage Assessment and Emergency Status Report

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

Operational Period

Operational Period Begin:	01/19/2016 08:00:00
Operational Period End:	01/26/2016 08:00:00
Situation Report No.	13
SEOC Status:	Full
SEOC Hours of Operation Begin:	01/18/2016 08:00:00
SEOC Hours of Operation End:	01/18/2016 20:00:00

Executive Summary

SEOC Update:
Accomplished today (January 18):

The SEOC continues to provide:
- Situational awareness.
- Common operating picture/objectives.
- Coordination with city/county.
- Potential coordination with federal agencies.
- Incident prioritization.
- Coordination of life/health safety measures.
- Resources.
- Public Information Control.

- Logistics:
o Secured email and phone booster for warehouse.
o Worked with FEMA to order water and filter cartridges.
o Worked with DHHS to order filter pitchers for distribution.
o Meetings with FEMA and ARC
o Coordinated resources and needs with donations management.
o Working with Red Cross to provide relief teams for warehouse manager.
o Continuing inventory monitoring and hot shots tracking.
o Projecting future orders of water resources and commodities.

- JIC:
o ARC news release concerning the Volunteer Reception Center (VRC) sent out today.
o Media availability conducted today at 3pm at the VRC.
o News release with daily numbers released this evening.
o Social media covered state and local volunteers in the field today.
o FEMA external affairs in JIC today.

- Recovery Branch:
o Sent out 12 type 3 and 10 type 5 teams to canvass today.
o Data is for 1/18/16 as of 5:00 pm:
o Total homes visited
❑ 11,841 (total)
❑ 5,040 (today)
o Door Hangers
❑ 8,452 (total)
❑ 2,083 (today)
o Water Cases
❑ 5,008 (total)
❑ 1,411 (today)
o Replacement Cartridges
❑ 3,468 (total)
❑ *529 (today)*
o Faucet Filters
❑ 6,441 (total)
❑ 1,666 (today)

- Planning Section:
o Lead morning and afternoon state agency conference call.
o Coordinated logistics of resource tracking.
o Developed projections based off of reporting and trend analysis.
o *Published Sit Rep # 13.*
o Published IAP #6
o Participated in distribution process meetings.
o Participated and facilitated tactics meeting.

- Operations Section:
o Resource request sent for MIANG assistance to deliver water, filters, test kits, and replacement filters to residents.
o Cost analysis to investigate if it would be more cost effective for FEMA to purchase water vs the SOM.
o Arabic version of the palm card was reviewed and approved by command.
o *62 American Red Cross Volunteer active across Incident today.*

o Warehouse Numbers:
- Clio St Warehouse (6pm inventory)
- Replacement Cartridges.
o 60,636
- Filters (faucet)
o 70,855
- Water (cases)
o 149,760
- Testing Kits
o 800
o Point of Distribution (as of 6 pm)
- Contacts
- 1249
- Water (cases)
- 8355
- Filters (faucet)
- 1388
- Replacement Cartridges
- 378
- Filters (pitcher)
- 53
- Test kits
- 1773

- Finance Section:
o Assisting MIANG with hotel logistics for possible deployment to Flint.
o Continue developing spend plans.
o Work with FEMA to determine costs for possible reimbursement for Flint emergency.
o Meet with FEMA IMAT about Public Assistance.

- GIS Branch Updates:
o Continued producing maps of lead service lines (40% complete with primary effected area)
o Developed a map of comparative activity for the JIC from pre-response to post-response.
o Established metrics to measure percent completion of resource distribution. The following two are from today:
o Active Water Subscribers confirmed as Having a Filter: 13164 of 29994 total subscribers (44% coverage)
o Total parcels confirmed as having a filter: 15364.
o Multi-tenant home status: Cannot be completed now, planned to be researched and established tomorrow.
o Fixed data from apps and paper copies of field team reports and PODS.

DTMB:
- Additional 30 iPads will be sent to the teams for tomorrow.
- 2 cell phones procured for DHHS donations management.
- Working to secure space in Flint for FEMA staff.
- 2 port-a-johns procured for warehouse staff.

DHHS-CH:
- The CDC Agency for Toxic Substances and Disease Registry (ATSDR) will deploy to Michigan.
- Continue to work on items for procurement of DBH.

DEQ:
- 7200 sample bottles scheduled for delivery tomorrow.
- Pushed up delivery of 20,000 bottles to meet demands.

Local EOC Update:
- Continuing to work with faith based organization to distribute resources.
- Working with colleges to obtain volunteers for canvassing.

Incident Response/Recovery Priorities/Objectives

1. Ensure all households within impacted community have required resources.
2. Ensure accurate tracking and accounting of all commodities.
3. Improve and maintain public information strategy and process.
4. Develop a long term public health and services plan.
5. Ensure adequate staffing to support operational requirements.
6. Identify possible assistance programs.
7. Maintain GIS strategy.
8. Maintain coordination between partner agencies and organizations to include FEMA IMAT.
9. *Enhance situational awareness and common operating picture of all activities.*
10. Develop a comprehensive Recovery Plan.

Damage Assessment Summary

Agency Summaries

Joint Information Center / Public Information Officer

The Joint Information Center (JIC) was operational in Flint from 8 a.m. to 8 p.m. on Jan. 18.

State agencies at the JIC included the Governor's Office, Departments of Health and Human Services, Agriculture and Rural Development, and Technology and Management and Budget, Natural Resources, Environmental Quality, Licensing and Regulatory Affairs, Military and Veterans Affairs and Michigan State Police. The Genesee County Sheriff's Office was also present.

Tasks Completed:

- Updated internal talking points to include updated information and activity.
- Arranged a media availability event at the Volunteer Reception Center located at the American Red Cross office on Grand Traverse St. Event. The event was staffed by the United Way of Genesee County, the Michigan Community Service Commission and the American Red Cross of East Central Bay-Michigan.
- *Sent out a news release for the American Red Cross about volunteer efforts.*
- Arranged to have a section for a photo gallery on the Flint water website.
- Updated the ICS204 form.
- Sent an email to the State PIOs for staffing the JIC for this weekend through next week.
- *Planning to send out nightly news release with updated information about today's activity.* The release will also include the flint water response team activity map.

Agriculture and Rural Development (MDARD)

Monday Jan 18th update: monitoring mode; planning for field activities this coming week.

American Red Cross (ARC)

The assembly of water test kits at ARC headquarters was postponed until product is available.
We deployed and supported 10 teams for neighborhood canvassing (Water Response). 10-14 teams are planned for tomorrow.
We supplied lunches for all of the Water Response Teams today, and will feed all of the teams again tomorrow.
The volunteer reception center (VRC) was in full operation today. The VRC will be in operation on Tuesday.
We continued warehouse and inventory management efforts.

Civil Rights (MDCR)

Continue to review activities to provide support and assistance to assigned Human Services branch and other SEOC activities. Also monitoring media and coverage of rallies and events.

Community Health (MDCH)

Communications have been maintained between the SEOC and the CHECC, which remains activated at a level 2.

The CHECC was notified that the CDC Agency for Toxic Substances & Disease Registry will have a team of 3-5 people in MI as early as Wednesday this week. This team is coming to MI to provide technical assistance as part of their regular mission. Details are still being worked out with the MDHHS Division of Environmental Health. FEMA and SEOC Incident Command have been made aware.

The CHECC provided an update from the Midwest Kidney Network (ERSD Network 11. "At this time, no dialysis related ramifications have been identified or reported to Network 11" for this at-risk population. The information was shared with LARA as the licensing agency for dialysis centers.

EMpower data has been received which identifies individuals who are dependent on electrical medical equipment in the home. The data is being cleaned for redundancies and will be able to be compared with other data sets to ensure that those at-risk individuals are not missed by the Flint Water Resource Teams that are distributing resources door to door.

The CHECC continues to work with the Behavioral Health and Developmental Disabilities Administration (BHDDA) to address behavioral health needs associated with this incident in collaboration with CMH and SAMHSA.

Corrections (MDOC)

Brent Travelbee and Todd Bechler on duty SEOC today. All previous requests for vehicles, personnel and warehouse equipment have been filled and continue to be on site to assist with water distribution; additional request's today for re-allocation of hand jacks, a replacement electric jack, an additional box truck and 2 more transportation vans have either been filled or are in progress set for Monday morning delivery. MDOC Director Heidi Washington is providing full support to our assistance efforts. We will continue to staff the SEOC as a full-time partner as we have assets deployed into the field. All resources are documented on the appropriate forms and shared with the SEOC staff. Additional resource requests are coming in frequently and we are working hard to locate the requested resources while still maintaining minimal local facility operational requirements from the providing facility.

The MDOC is dedicating a considerable amount of resources and staff to this effort. We are working closely with the Logistics Chief to locate needed resources and fulfill resource requests in a timely manner. All MDOC resources will be reporting tomorrow Sunday January 17, 2016 as requested.

MDOC RESOURCES PENDING DEPLOYMENT: Monday, January 18, 2016

Vehicles with Drivers

(2) – 18' Box Trucks
(4) – 20' Box Trucks
(2) - 24' Box Trucks
(1) - 30' Box Truck (Lift gate broken but truck still on site, DTMB repairing)

Box Trucks have power lift gates

(1) – F250 Pick Up Quad Cab with Cap
(1) – 5 Passenger Handicapped Capable Van

(1) – 15 Passenger Van with 10' Enclosed Trailer
(1) – Pick-up Truck

(6) – 10/15 Passenger Vans

(1) – 20 Person Shuttle Bus (Sent to Red Cross Volunteer Sight)

(1) - 53' Refrigerated Semi-Trailer

(3) - Electric Pallet Jacks (This includes one that is broken and will be returning to Ionia tomorrow night for repair)

(7) – Hand Pallet Jacks

(5) 6-10 Passenger Vans

All vehicles drivers have 800 MHz Radio Operability (G EVENT 9)

Staffing

There will be 24 staff members on site 23 drivers and an assistant for the Red Cross Transportation Van (w/trailer).

Education (MDE)

MDE is monitoring the situation and coordinating as necessary with other state agencies.

English Language Learners report from Flint Public School District (Flint Community Schools). Results show 338 total with 83% Spanish speakers; 6% Arabic; all others report less than 1%.

Environmental Quality (MDEQ)

The Department of Environmental Quality (DEQ) completed the following activities today:
- Another 21,600 bottles for test kits ordered. This totals 50,400 bottles expected to ship in variable allotment beginning tomorrow.
- Participated in SEOC activities to include the daily state agency briefing and the Distribution Process meetings.
- Responded to 211 calls regarding ZeroWater, TDS Meter testing of canned water and facilitated pick up of cans and resupply of bottle water to concerned parties.

Human Services (MDHS)

Looking for availability of Zero Water pitchers per resource request.
Received two cell phones for MCSC to assist with their donation management processes.
Looking to provide a conference room at MDHHS Clio Rd for MDARD inspector training on Wednesday.

CHECC continues to maintain a Level 2 Activation

Licensing and Regulatory Affairs (LARA)

Updated the LARA Executive Team.

DTMB reordered two additional bubbler for the Freeman Elementary faucet replacement pilot project. These bubblers are expected to arrive tomorrow (Tuesday, Jan. 19). LARA will then coordinate with Freeman Elementary to finish the construction work. After that work is complete, LARA will coordinate with DEQ to conduct water re-testing at Freeman Elementary.

LARA is continuing to work with DEQ to establish a schedule, for the next several weekends, to complete school water testing.

LARA communicated with the DEQ LARA's resource availability to assist with water testing.

Military and Veterans Affairs (DMVA)

Last 24 hours:
Distributed water, water filters, water test kits and collected water samples for analysis at five points of distribution. Coordinated efforts with Genesee County EOC and Joint Information Center. In-Processed Soldiers to augment distribution operations at 1800 S. outer Dirve, Saginaw, MI on 17 January 2016 at 1300. Conducted lodging and operations orientation following in-processing. Total of ' Soldiers on State Active Duty on 17 January 2016. All PODS received pallet jacks for off-loading water pallets. Coordination between FEMA and Selfridge Air Base (SANGB) taking place. Exact terms of agreement of FEMA using SANGB for staging operations have not been identified at this time.

Total of Soldiers on State Active Duty:
1 at Genesee County EOC

at Joint Information Center
-- at PODS
Soldiers In-processing

Next 48 hours:
Distribute water, water filters, and water test kits and collect water samples for analysis at five points of distribution. Coordinate efforts with Genesee County EOC and Joint Information Center. Relieve Red Cross at PODS, assuming their role of distributing filters. Total of Soldiers on State Active Duty on 17 January 2016. Additional Soldiers will conduct first full day of distribution operation on 18 January 2016. Continue coordination between FEMA and SANGB, a 0800 meeting will be conducted on 18JAN16.

Micheal Shook
CPT, IN, USA

National Weather Service (NWS)

Jim Maczko from NWS Grand Rapids will participate in SEOC morning briefings via phone call and will coordinate support with local forecast office that serves Flint - NWS Detroit/Pontiac. Participation in afternoon SEOC briefings is planned only if significant changes in the forecast occur.

NWS support beyond this weekend being coordinated between NWS Grand Rapids and NWS Detroit. Hand off to NWS Detroit for morning conference call weather forecast likely before the end of January.

Natural Resources (MDNR)

MDNR LED continues to support its QOL partners with staffing at the SEOC.

Department POC's include:
Chief Gary Hagler, F/Lt. Jennifer Wolf, F/Lt. Steven B. Burton.

Services to the Aging (OSA)

Valley Area Agency on Aging - Region 5 (VAAA), in partnership with other local community agencies such as the Genesee County Health Department and MDHHS, has helped organize local meetings and distribute water and water filters. VAAA is an access point for receiving calls from homebound seniors who are not able to pick up water filters or need assistance installing water filters. VAAA reports they continue to receive calls from seniors who need assistance.

Contact Info for VAAA Executive Director is:

Kathryn C. Boles
President, CEO
Valley Area Agency on Aging
225 E. Fifth Street, Suite 200
Flint, MI 48502
(810) 239-7671
(810) 239-8869 fax

VAAA has distributed 2 bottles of water with each home delivered meal to each HDM client within the City of Flint. Water. VAAA also provided water to homebound seniors who needed water to prepare food as they had limited support to pick up bottled water. Congregate meal participants also have access to water and filters as needed. Once water filters were installed, VAAA discontinued including water with home delivered meals.

VAAA also contacted the Grandparents Raising Grandchildren program to ensure that they were aware of educational efforts and confirm the program had received water filters to distribute to program participants.

On 1/11/16 AASA forwarded to MSP/GIS over 1,400+ NAPIS addresses of Flint seniors who received in-home services in FY15. The NAPIS file was sent encrypted and did not include client names. The NAPIS file included 1,029 HDM, 138 CM, and 30 CCS clients.

VAAA continues to operate as a call center and referral point for area seniors concerned about their drinking water. They've noticed this week that seniors who've had filters installed are beginning to request bottled water again.

AASA's State LTC Ombudsman has checked in with the local Ombudsman in Flint. Local Ombudsman reports Flint area nursing homes have been taking precautions using bottled water for cooking and drinking. The local Ombudsman remains concern about Nursing Homes' long term need to replace old facility plumbing that may be leaching lead.

State Police (MSP)

Teams have been distributing water all day. 5075 homes have been visited today.

12:43 p.m. - The SEOC may be requesting additional 20 – 30 Troopers/County or Local Officers along with marked patrol vehicles to assist with the Door to Door Operations with the National Guard starting tomorrow (1-19-16). The SEOC is still waiting for the Governor to approve the use of National Guard personnel.

5:13 p.m.- The Governor has approved the use of the National Guard for the Door to Door Operations in Flint. The Local EOC was advised to proceed with the planning process for obtaining the additional Troopers/County and or Local Officers with marked patrol vehicles to assist the National Guard. As stated below, they plan on deploying 20 teams on Wednesday 1-20-16.

There will be 200 National Guard personnel arriving on Wednesday (1-20-16). One hundred and eighty (180) of the National Guard personnel will be boots on the ground assisting with the Door to Door Operations and 20 will be National Guard Command Officers. Upon arrival the National Guard personnel will report to the local EOC for briefing and will be deployed into the field using Michigan Department of Corrections transport vehicles.

The ICS 208 was created for 1-19-16 thru 1-26-16 to include updated weather information provided by the National Weather Service.

We had 12 Teams that were deployed today, utilizing 16 trucks (four were utilized for replenishing the team trucks) 110 volunteers, of which 103 were confirmed to be State Agency volunteers.

Supreme Court

08:50 - State Judiciary EMC John Ort reported to the SEOC regarding the Flint water emergency. Nothing to report from the Judiciary regarding the emergency. DEQ website resources shared with our State Court Administrative Office (attn: Region II) in case our Genesee County courts have any questions regarding the emergency.

Technology, Management and Budget (MDTMB)

Provided management briefing and information on emergency declaration.

DTMB Mail Services has seven drivers with trucks assisting in transporting supplies to support point of distribution centers and Flint Water Resource Teams. Drivers have agreed to work through the end of day Tuesday, January 19.

DTMB assisted in procuring 72 truck loads of water, 8 trucks per day until Wednesday, January 20.
91 tablets have been provided to the Flint Water Response Teams to record supplies being delivered in the field.
Provided 450 credentialing badges for volunteers and 4 temporary fuel cards for the MSP officers driving rented U-Haul trucks.
Warehouse space was procured for 80,000 square feet to hold water, water filters, cartridges and water test kits.
Procured 500 rain ponchos for volunteers and a 40 yard dumpster for use at the warehouse.
Providing printing needs for agencies for volunteers to distribute to city residents.
Provided armed security for Clio Rd. warehouse.
Providing server monitoring of MiCIMS servers.
Provided wireless router and printer for FEMA staff at SEOC.
Acquired a Verizon Wireless booster for the Clio Road warehouse.
Procured hand warmers for Water Response Teams.
Provided 2 cell phones to DHHS Michigan Community Service Commission to your for donation management.
Contacted Penske Truck Rental and acquired 23 donated trucks for use through Friday for water response teams.
Provided 2 portable bathrooms for use at the Clio warehouse.

Transportation (MDOT)

MDOT continues to maintain situational awareness and respond to issues regarding equipment and road conditions.

Executive Summary

On January 6, 2016, Governor Snyder declared a State of Emergency for the City of Flint and Genesee County. Genesee County requested the Governor's declaration on January 5, 2016, following the declaration of a State of Emergency in the county in response to the presence of lead in the public water supply, and the detection of elevated blood lead levels exceeding governmental standards. These conditions exist in the City of Flint, which declared a local State of Emergency and activated local response plans and their Emergency Operations Center on December 15, 2015. A public health emergency was declared by the Genesee County Health Department on October 1, 2015.

By early May 2014, the City of Flint switched from the Detroit Water and Sewerage Department (DWSD) to the Flint River as their primary water source. The corrosive river water caused the leaching of lead from lead pipes into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Elevated blood lead levels were observed in a significant sampling of young children in the City of Flint, and confirmed by the State Chief Medical Officer.

To mitigate the negative effects of corrosive river water on the water infrastructure in the City of Flint, the city switched back to DSWD as their primary water source on October 16, 2015. Funding to reconnect to DWSD was provided from the City of Flint, the Charles Stewart Mott Foundation, and the State of Michigan. Water is treated with a supplemental phosphate addition to rebuild the protective layer in the

distribution system and reduce the leaching of lead into the water supply.

For the mitigation of negative health effects, over 24,000 water filters and replacement cartridges have been distributed to residents in the City of Flint. Approximately 13,000 water filters, water pitchers and replacement cartridges were distributed by the Michigan Department of Health and Human Services (MDHHS) in the timeframe of October 1 to December 31, 2015 alone. MDHHS has increased surveillance of blood lead levels in children, addresses water issues in environmental investigations facilitated to identify lead sources in the environment of affected children, and provide health education and information to residents, health care providers and daycare/educational institutions. Local nonprofit organizations have provided potable water to Flint residents. MSP/EMHSD GIS staff is supporting county and local GIS staff, consolidate data from local sources into comprehensive databases, and providing mapping services that support incident analysis and forecasting. Data and maps will be made available regarding the location of water pipes, affected schools, filter distribution locations, water monitoring results, predictive blood lead levels for affected areas, demographics, etc.

Before December 16, 2015, $9.35 million were provided by the State of Michigan, and $6 million by local agencies and nonprofit partners to manage the effects of the corroded pipes. While drops in lead levels have been observed since reconnecting to the DWSD system, water in the City of Flint is still not safe to drink, unless specifically filtered.

Damage Assessment Summary

Agency Summaries

Joint Information Center / Public Information Officer

The Joint Information Center (JIC) was operational in Flint from 8 a.m. to 8 p.m. on Jan. 18.

State agencies at the JIC included the Governor's Office, Departments of Health and Human Services, Agriculture and Rural Development, and Technology and Management and Budget, Natural Resources, Environmental Quality, Licensing and Regulatory Affairs, Military and Veterans Affairs and Michigan State Police. The Genesee County Sheriff's Office was also present.

Tasks Completed:

- Updated internal talking points to include updated information and activity.
- Arranged a media availability event at the Volunteer Reception Center located at the American Red Cross office on Grand Traverse St. Event. The event was staffed by the United Way of Genesee County, the Michigan Community Service Commission and the American Red Cross of East Central Bay-Michigan.
- Sent out a news release for the American Red Cross about volunteer efforts.
- Arranged to have a section for a photo gallery on the Flint water website.
- Updated the ICS204 form.
- Sent an email to the State PIOs for staffing the JIC for this weekend through next week.
- Planning to send out nightly news release with updated information about today's activity. The release will also include the flint water response team activity map.

Agriculture and Rural Development (MDARD)

Monday Jan 18th update: monitoring mode; planning for field activities this coming week.

American Red Cross (ARC)

The assembly of water test kits at ARC headquarters was postponed until product is available.

One hundred and eighty (180) of the National Guard personnel will be boots on the ground assisting with the Door to Door Operations and 20 will be National Guard Command Officers. Upon arrival the National Guard personnel will report to the local EOC for briefing and will be deployed into the field using Michigan Department of Corrections transport vehicles.

The ICS 208 was created for 1-19-16 thru 1-26-16 to include updated weather information provided by the National Weather Service.

We had 12 Teams that were deployed today, utilizing 16 trucks (four were utilized for replenishing the team trucks)
110 volunteers, of which 103 were confirmed to be State Agency volunteers.

Supreme Court

08:50 - State Judiciary EMC John Ort reported to the SEOC regarding the Flint water emergency. Nothing to report from the Judiciary regarding the emergency. DEQ website resources shared with our State Court Administrative Office (attn: Region II) in case our Genesee County courts have any questions regarding the emergency.

Technology, Management and Budget (MDTMB)

Provided management briefing and information on emergency declaration.

DTMB Mail Services has seven drivers with trucks assisting in transporting supplies to support point of distribution centers and Flint Water Resource Teams. Drivers have agreed to work through the end of day Tuesday, January 19.

DTMB assisted in procuring 72 truck loads of water, 8 trucks per day until Wednesday, January 20.
91 tablets have been provided to the Flint Water Response Teams to record supplies being delivered in the field.
Provided 450 credentialing badges for volunteers and 4 temporary fuel cards for the MSP officers driving rented U-Haul trucks.
Warehouse space was procured for 80,000 square feet to hold water, water filters, cartridges and water test kits.
Procured 500 rain ponchos for volunteers and a 40 yard dumpster for use at the warehouse.
Providing printing needs for agencies for volunteers to distribute to city residents.
Provided armed security for Clio Rd. warehouse.
Providing server monitoring of MiCIMS servers.
Provided wireless router and printer for FEMA staff at SEOC.
Acquired a Verizon Wireless booster for the Clio Road warehouse.
Procured hand warmers for Water Response Teams.
Provided 2 cell phones to DHHS Michigan Community Service Commission to your for donation management.
Contacted Penske Truck Rental and acquired 23 donated trucks for use through Friday for water response teams.
Provided 2 portable bathrooms for use at the Clio warehouse.

Transportation (MDOT)

MDOT continues to maintain situational awareness and respond to issues regarding equipment and road conditions.

Water Response Team: Concept of Operations and Support V2.0_011816

Mission: Distribute filters and additional resources to all households within the impacted area

Concept of Operations and Support

1. Planning & Prioritization
    a. Plan Components
        i. Team Type: Mission, Resources (example: Vehicles, Team Members, Product)
        ii. Priority: Priority locations for distribution within the impact area
            1. Priority locations are determined based on 3 projections: lead concentration, locations of vulnerable populations, and previous distribution locations
    b. Accountable: SEOC Recovery Branch Director
    c. Approval: State EM Director
2. Resource Support
    a. Resource Components
        i. Vehicles
        ii. Product
        iii. Personnel
        iv. Team Support (example: lunch, rain ponchos)
    b. Accountable: SEOC Logistics Section Chief
    c. Responsible: SEOC Logistics, SEOC Warehouse, American Red Cross Volunteer Resource Center
3. Execution
    a. Water Resource Team Daily Distribution
    b. Accountable: Office Genesee County Sheriff (OGCS)/Michigan State Police (MSP)
    c. Responsible: Water Response Team Officer In Charge (OIC), American Red Cross (ARC) OIC
4. Execution Support
    a. Team Replenishment
    b. Accountable: SEOC Logistics Section Chief
    c. Responsible: SEOC Warehouse
5. Reporting
    a. Distribution Reporting
    b. Accountable: Water Response Team OIC
    c. Responsible: All Water Response Teams

The below quantities are planning factors and will be continually refined based on data from WRT feedback

Team Typing

Type	Mission	Truck	Team Leader	Team Member	Team Transport Vehicle	Team Transport Driver	Patrol Car	iPad	Distribution Kit
Type I	500 HH	1 – 26' - 24' Box	1	10-20	1+	1+	1-2	1-2	500
Type II	400 HH	1 - 20' 18' Box	1	8-16	1+	1+	1-2	1-2	400
Type III	300 HH	1 16' Box	1	6-9	1+	1+	1-2	1-2	300
Type IV	200 HH	1 14' Box	1	4-8	1+	1+	1-2	1-2	200
Type V	100 HH	1 ARC ERV*	1	3-6	1+	1+	0	1-2	85**

* American Red Cross Emergency Response Vehicle

**Replenishment required to achieve mission

Distribution Kit per Household

Door Hanger	1
Water, case	1
Filter*	1
Test Kit	1
Replacement Filters	1

*If filter doesn't fit then distribute

Pitcher*	1

Team Member	30-60	60		1/17/16	2000
Team Transport Vehicle for 2-4 Team Members	10	10		1/17/16	2000
Team Transport Vehicle Driver	10	10		1/17/16	2000
Patrol Car	0	0		1/17/16	2000
iPads	10-20	10		1/17/16	2000
Hand Warmers	60	382	Delivery Monday prior to start	1/17/16	1752
Distribution Kit	1200	1200		1/17/16	2000

Execution:

Key Locations

Team	**Assembly Area**	**Hours of Operation**
OGCS/MSP	LEOC Genesee County Administration Building 1101 Beach St, Flint	0830-1600
ARC	ARC 1401 S Grand Traverse St, Flint	0730-1600

Warehouse	4315 North Clio Road, Flint	0700-1900

Critical Task: Assemble, coordinate, and monitor WRTs

OGCS/MSP Process:

1. Assign team leaders, team members, and routes to teams
2. Team Member check in
3. Conduct pre-deployment briefing to include team mission assignments, concept of operations, deployment locations, replenishment process, reporting process, and safety briefings (refer to OGCS_MSP WRT Volunteer Assembly Information V2.0_011816 for detailed information on volunteer processing at LEOC)
5. Provide training to new team members
6. Issue vest and badge to team members
7. *Execute morning distribution assignment*
8. Lunch served between 1230-1330
9. WRT OIC and Team Leaders midday brief
10. Execute afternoon distribution assignment
11. Conduct post-deployment debrief with team leaders and members
12. Collect vest and badge from team members

Sample Script for Team Members:

We're here to make sure you have all the resources you need. We have bottled water, a faucet and replacement filter, and a water test kit. Your water sample will assist in monitoring the lead and copper in the water system. Make sure to submit the water sample. The instructions are included here with the bottle, but make sure to submit within 14 days. If you need assistance or have other questions, you can call 211.

Execution Support:

Product Replenishment Process:

Team	Replenishment Trigger	Replenishment Location	Process
GCSO/MSP	100 Distribution Kits Remaining	Distribution Route: exact location determined by Team Leader	1. Contact warehouse to request replenishment truck 2. Coordinate replenishment location with warehouse 3. Exchange replenishment truck with empty truck
ARC	0 Distribution Kits Remaining	Clio Warehouse	Replenish ERV at warehouse

Warehouse

Tactics:

1. Load a minimum of 2 trucks in preparation for replenishment requests with product loads corresponding to Team Typing Matrix

Lunch

OGCS/MSP WRTs lunches will be provided by the ARC and coordinated by LEOC Logistics.

Reporting:

Tactics:

1. All WRTs will utilize ipads as the primary reporting method and the WRT Distribution *Tracking Tool as a secondary method if ipads fail.*

Tactics:

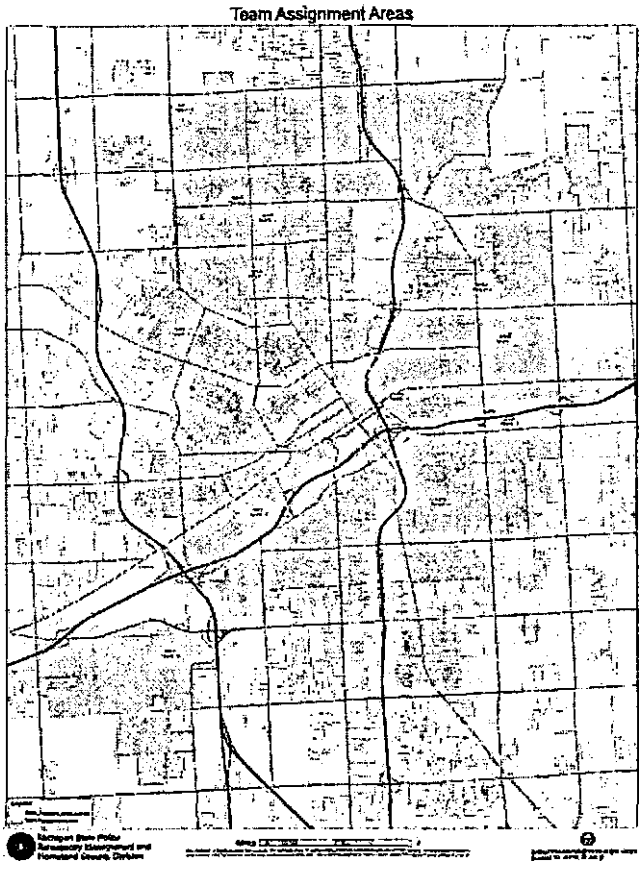
1. All WRTs will utilize ipads as the primary reporting method and the WRT Distribution Tracking Tool as a secondary method if ipads fail.

Priority Distribution Areas



Michigan National Guard coordination efforts with FEMA in order to provide federal assistance to the city of Flint:

Develop a License and Use Agreement that permits FEMA to use space on Selfridge Air National Guard Base to conduct staging operations.

FEMA requirements include:
1. Ramp/Tarmac space to store 30 - 40 tractor/trailers, 5 box trucks, 1 C2 40foot comms unit, and various support vehicles. Utilize the Joy Road gate to support ingress/egress of trucks to property if possible.
2. Office space for 3 - 5 administrative personnel near the operations area with latrine.
3. Approximately 5000 square feet of indoor storage space for stowage of water test kits, water filters, and water filter replacement inserts.

Additional requests:
4. 2 enclosed cab type all terrain forklifts.
5. 4 generator light sets
6. 7 pallet jacks
7. 2 porta-pots with associated support

on-Volunteers to include 11 drivers from Dean Trailways, 12 MDOC workers, 17 MSP and 29 GCSO

1/17/16 Logistics Bullets:

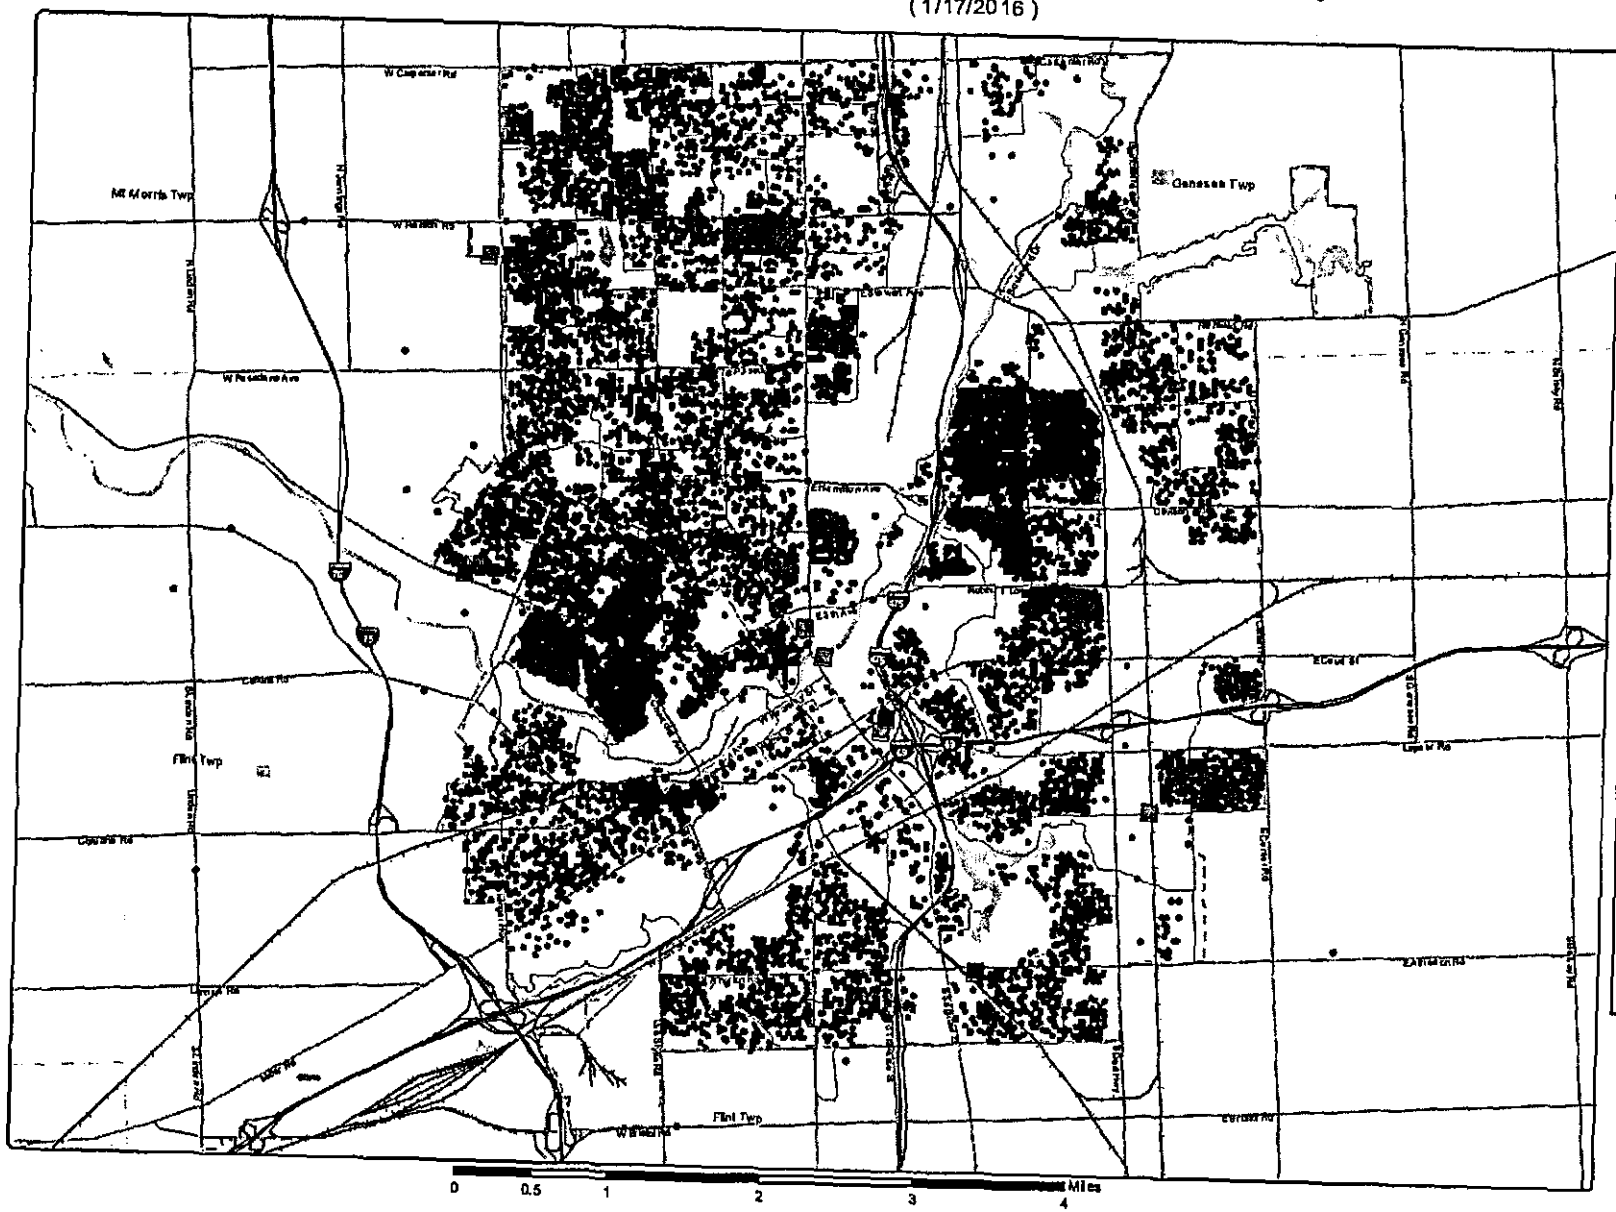
- Working on vehicles for additional teams for Monday, January 18th. Unable to get in touch with contact from Penske. DTMB has procured 5 of the requested trucks. They need to be picked up at U-Haul in Flint on Monday at 7 am.
- Procured 2 additional 15-passenger vans from DOC for shuttle with additional teams next week.
- Obtaining armed security for warehouse between the hours of 7:00 pm and 7:00 am. DK Security performed site visit and will determine best way to meet needs.
- Requested expedited delivery of DEQ water testing kits that are expected to be delivered within the next two weeks.
- Trailer for use by ARC in storing test kits that are ready for distribution has been arranged by DOC and a 20 foot trailer will be dropped at ARC headquarters in Flint.
- Verizon Booster and wireless will be provided to warehouse for internet connectivity and improved cellular reception.
- Trash from water distribution at PODs is becoming problematic. Decided that drivers dropping off supplies will pick up whatever trash they can and take back to the warehouse for removal.
- Submitted a request to MDOT for reflective vests for volunteers.
- Submitted request for hand warmers for volunteers. DTMB has procured 300 that will be available for Monday for teams.
- Coordination meetings with FEMA.

1/17/16 Finance Group Chief

- Working on verifying correct entry of EMHSD staff overtime in DCDS.
- Continuing to work on developing spend plan.

Flint Water Response Activity

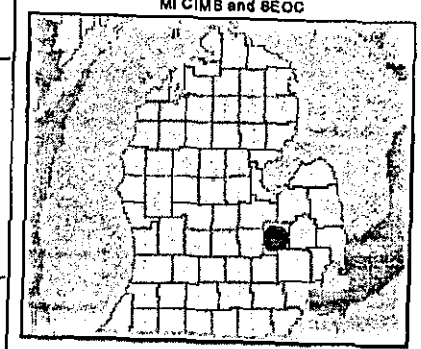
(1/17/2016)



Legend

- Water Resource Site (Fire Dept)
- Filter Point of Distribution
- Water Point of Distribution
- Flint Water Response Activity

Affected Areas Information from MI CIMS and SEOC



Map Last Updated:
1/17/2016 6:15:28 PM

Michigan State Police
Emergency Management and
Homeland Security Division

Water Response Team: Concept of Operations and Support V2.0_011816

Mission: Distribute filters and additional resources to all households within the impacted area

Concept of Operations and Support

1. Planning & Prioritization
    a. Plan Components
        i. Team Type: Mission, Resources (example: Vehicles, Team Members, Product)
        ii. Priority: Priority locations for distribution within the impact area
            1. Priority locations are determined based on 3 projections: lead concentration, locations of vulnerable populations, and previous distribution locations
    b. Accountable: SEOC Recovery Branch Director
    c. Approval: State EM Director
2. Resource Support
    a. Resource Components
        i. Vehicles
        ii. Product
        iii. Personnel
        iv. Team Support (example: lunch, rain ponchos)
    b. Accountable: SEOC Logistics Section Chief
    c. Responsible: SEOC Logistics, SEOC Warehouse, American Red Cross Volunteer Resource Center
3. Execution
    a. Water Resource Team Daily Distribution
    b. Accountable: Office Genesee County Sheriff (OGCS)/Michigan State Police (MSP)
    c. Responsible: Water Response Team Officer In Charge (OIC), American Red Cross (ARC) OIC
4. Execution Support
    a. Team Replenishment
    b. Accountable: SEOC Logistics Section Chief
    c. Responsible: SEOC Warehouse
5. Reporting
    a. Distribution Reporting
    b. Accountable: Water Response Team OIC
    c. Responsible: All Water Response Teams

The below quantities are planning factors and will be continually refined based on data from WRT feedback

Team Typing

Type	Mission	Truck	Team Leader	Team Member	Team Transport Vehicle	Team Transport Driver	Patrol Car	iPad	Distribution Kit

Genesee County EOC:

Incident Command:
- Coordinated shipment of supplies to Whaley Children's Center.
- Toured facility and discussed EOC operations with Lt. Governor Calley.
- Briefed Major General Vadnais, National Guard.
- Began coordination of key agencies regarding analysis of water sampling results, and providing interpretable information to affected populations.
- Provided direction to Operations and Logistics Sections to initiate water sample collection at Fire Station PODs.

Operations Section:
- Coordinating for deliveries of supplies for homebound and access and functional needs individuals.
- Implemented water sample collection at Fire Station PODs.
- Reviewed draft donations and draft volunteer management.
- Coordinated staffing of MSP/EMHSD GIS personnel at Genesee County EOC on 01/16/2016.

Planning Section:
- Coordinating test kit assembly and delivery.
- Attended conference call with SEOC and ARC logistics management to clarify supply level tracking and receive further instructions.
- Tracking supplies at PODs.
- Liaison with Fire Station PODs.
- Developed Situation Report #5.

Logistics Section:
- Coordinated arrival and distribution of supplies with warehouse management teams.
- Solicited large volume donations of supplies.

- Coordinated distribution of supplies to apartment complexes, student housing facilities and other special locations (10 hotshot distributions).
- Coordinated filter pick-up for 2,000 filters for MSHDA Section 8 housing in the city.
- Participated in conference calls with SEOC and ARC logistics management.
- Implemented water sample collection at Fire Station PODs.

Ops desk:

1. Coordinated 8:30 and 9:30 calls along with the legislative briefing with the Captain (2pm)
    - Assembled bullets from state agencies for the legislative briefing

2. Spent time fielding and responding to inquiries from the JIC
    - Numbers from PODS
    - Homes visited by the response teams
    - Financial numbers on purchases
    - Clarification on goals (homes)
    - MDHHS media release (review)
3. Ensuring that PODS are stocked, making sure we have enough supplies in our warehouse
4. Working with faith based on credentialing procedure with Lt. Roach
5. Worked with DMVA with resource/task request

Incident Command:

- Evaluation of need to engage further public health/medical professionals.
- Initiated evaluation of Fire Stations as additional test kit/sample collection points.
- Provided direction to accelerate preparation of test kits for distribution in the community.
- Discussed need to implement program for replacement of filter cartridges initially provided within the community.
- Evaluating need for resource request for assistance with elevated blood lead level clinics.
- Preparing to update objectives for next operational period, including an objective regarding the utilization of Fire Station PODs as additional test kit/sample collection points.

Operations Section:

- Coordinate volunteer management plan with ARC and SEOC.
- Coordinate for deliveries of supplies to homebound residents through the Genesee County Sheriff's Office.
- Reviewed draft donations management plan, planning for submission to the SEOC.

- Coordinated arrival and assignments for state volunteers working between 01/16/2016 and 01/18/2016 (expecting 150+ volunteers).
- Evaluating volunteer needs for MDEQ/LARA lead sampling teams at charter schools, daycare facilities, etc.

Planning Section:
- Coordinating test kit assembly and delivery.
- Tracking supplies and distribution at PODs and warehouses.
- Liaison with Fire Station PODs.
- Developed Situation Report #4.

Logistics Section:
- Coordinated arrival and distribution of supplies with warehouse management teams.
- Reviewed American Red Cross logistics plan draft.
- Solicited large volume donations of supplies.
- Coordinated distribution of supplies to apartment complexes and student housing facilities.

Zach,
Here are bullet points for the sit rep regarding the GIS work on 1/14/2016:

Conducted IPad Collector App training in Flint and assisted with technology needs.

Completed map of active LHD license establishments/restaurants map for MDARD.

Completed a map of the water pipes with an overlay of points received from Brad Deacon for MDARD.

Continued to develop the IPad Collector process for use in Points of Distribution(PODS) in addition to Water Resource Teams.

Built Operational Dashboards for use with real time data feeds from the Ipad data collector.

Continued to work with ESRI Disaster Response Program consultant on technical GIS issues and improving GIS processes.

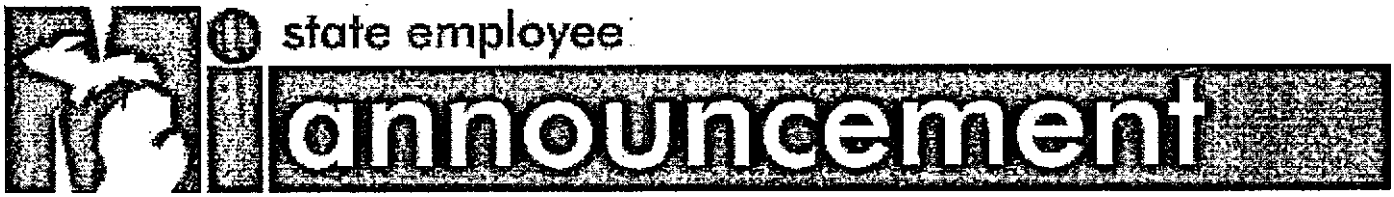
Sent: Thursday, January 14, 2016 5:29 PM
To: MSP-seocda1
Subject: Volunteer Opportunity in Flint



The State Emergency Operations Center (SEOC) is coordinating a response to the ongoing health and safety issues in the city of Flint's drinking water. Teams from the Michigan State Police, Genesee County Sheriff's Department, Michigan Department of Health and Human Services, and volunteer organizations have been delivering bottled water, water filters, replacement cartridges and water testing kits at homes in the city of Flint since Tuesday.

To help with this critical work, the SEOC is looking for volunteers to expand this effort and continue this distribution during the upcoming holiday weekend. Teams are being assembled for shifts on Saturday, January 16; Sunday, January 17; and Monday, January 18, 2016. If you are interested in volunteering your time for this critical work, please complete the information in one of the attached surveys (depending on which day you are volunteering).

To volunteer on Saturday, January 16, https://www.surveymonkey.com/r/28NVJBL

To volunteer on Sunday, January 17, https://www.surveymonkey.com/r/26NMJKK

To volunteer on Monday, January 18, https://www.surveymonkey.com/r/26P7P5G

Volunteers will begin their assignment at the Local Emergency Operations Center located in the Genesee County Administration Building located at 1101 Beach St, Flint at 9 a.m. and end by 4 p.m. Parking is available at the corner of Beach Street and 8th Street. Lunch will be provided. This is strictly a volunteer effort, as all three days will be unpaid. Volunteers are responsible for their own transportation; mileage reimbursement for personal vehicles is not authorized. Volunteers should dress for working outdoors and wear foot attire appropriate for walking.

This opportunity is for state employees and their immediate family members 16 years of age or older only, others looking to assist should volunteer through the American Red Cross in Flint. The volunteer coordination center for the Red Cross is located at 1401 S. Grand Traverse, Flint, MI. They are open from 9 a.m. to 7 p.m.

For more information on the state's response efforts, visit www.michigan.gov/flintwater.

Importance: High

Distribution Team:

Please see attached Distribution Operations Plan 1.0 that was discussed in our 10:30 a.m. meeting today. Review with track changes on and send back to me and I will submit to Lauren all edits into one clean document. I would like your edited copy by 5 p.m. today.

Please add to your edited document: name, position, and all contact information.

The conference call with the team will be conducted each day at 10:30 a.m. and 7 p.m.

Conference call information:

If you are asked to email me (Pam Strobel) for SEOC information, donations, updates, tasks, etc., from this time forward please use the following email address: MSP-SEOC11@michigan.gov, this is the designated email address for my position, which is now the SEOC Logistics Order Unit Leader.

If you have any questions, please ask.

Thank you,
Pam Strobel

For your sitrep, here an exclusive sneak peak of what will be released later in our Sit Rep #3:

Incident Command:

- Command Emphasis: Continue to develop and maintain an effective SEOC/EOC/IMT interface.
- Evaluation of need to engage further public health/medical professionals.
- Continuing to identify appropriate agencies that need to be represented in EOC, and discuss strategies to engage them.
- Addressed lack of distribution of supplies to undocumented populations.
- Coordination of financial control and educating county finance staff.

Operations Section:

- Coordinate with Flint Mass Transportation Authority (MTA) to include Fire Station PODs on bus routes, regarding potential home delivery of supplies to homebound residents, and to use transit center as POD.
- Coordinating and preparing review of draft volunteer and donations management plans.
- Meeting with EOC, SEOC and American Red Cross logistics staff.

Logistics Section:

- Securing adequate warehouse space for incoming supplies.

Subject: FW: GIS Update

From: MSP-SEOCGIS
Sent: Wednesday, January 13, 2016 3:11 PM
To: plangc
Subject: GIS Update

In accordance with Objective 7's tactics:

Tactic A: Updated PODS and Elderly locations in ArcGIS Online. Made large wall map for Local EOC of PODS. Also made a franchise water customer map for MDHS. Additionally, work continued mapping lead service line locations. At this point we are 20% complete with the city (NW Corner).

Tactic B: Upgraded ArcGIS Online Collector App to field teams and tracked resources and site visits and procured 30 additional tablets for tomorrows field teams. We will be formatting them at the SEOC and sending them to the local EOC where Flint GIS will conduct training with field staff. Also, updating EOC dashboards to track more detailed metrics and track team locations. Also, implementing a POD tracker for tomorrow that can be used to monitor distributions in real time.

Tactic C: Complete.

Tactic D: Current focus is optimizing the dashboards to include triggers that notify staff when inventory limits are exceeded to better manage the ordering process for new supplies. The first phase is pushing out an app to POD staff controlling distributions to track their output in real time. The second phase is implementing an inventory management tool that can be compared against the POD distribution data.

Tactic E: No Update

Sent: Wednesday, January 13, 2016 3:11 PM
To: MSP-SEOCPIO
Cc: JICManager
Subject: JIC update and 3:30 bullets

Hi Jane,

Here are the requested updates, as well as our 3:30 p.m. bullet points of accomplishments from today:

- Rumor trends from 211 - Not so much rumors, but below are questions they are receiving that we need answers to:
    - Can apartment complexes pick up supplies for their residents or have them distributed? County advises the city is keeping a list of apartment complexes, but we are not clear on what phone number the apartment complexes should call to get on the list. We are going to try to contact the city PIO to find out.
    - Also receiving questions about impacts on water heaters. 211 is using their normal talking points they use when people call for assistance in replacing appliances.
    - Citizens are indicating the snow is not plowed well at the fire stations making access difficult, especially carrying bottled water to their vehicles.
- Are local POC's in the JIC? - Yes. We have a PIO from 2-1-1, Genesee County Sheriff, and we had a PIO from Red Cross stop by and will be returning later today.
- Any recent issues or concerns? - JIC will need information on how we will respond to the non-JIC/SEOC announcement made by the Governor this afternoon which will result in media calls to the JIC. We also need to be able to confirm how much water, filters, kits, etc. the state has purchased and distributed, the number of water response teams in the field, and the number of homes the teams have visited to date. We have pending media inquiries on this and need an answer from the SEOC. If this information cannot be provided publicly, we need the SEOC to provide us with a statement we can give the media explaining why this information cannot be provided. We have pending inquiries from the Detroit News, Rachel Maddow Show, and the Wall Street Journal, to name a few that are due by 4 p.m.
- Any scheduled media events-Next press release? We arranged a heavily attended media event that was held earlier today with MSP and National Guard at Fire Station #3. Working on b-roll and photos from the event, which will be shared on web and social media to further expand reach. There are no plans to issue a news release today as we are handling media calls through the media hotline.
- Anything command needs for media events-talking points - Attached are talking points we are using today for questions about yesterday's press release regarding FEMA and National Guard.

3:30 p.m. bullet points:

- Number of calls to media hotline have increased today. Returning calls as quickly as possible, but some require research and answers from the SEOC. Several inquiries are pending information.
- Good collaboration among 211, state PIOs and county PIO. Could use a city PIO in JIC, which has been requested all week.
- Prepared talking points about yesterday's press release re: FEMA and National Guard.
- Held media availability at Fire Station #3 with MSP and National Guard from 11:30 - 12:30.
- Created logo for Flint Water Response Team; pending city and county approval.
- Reviewed fact sheet from MDHHS, and informational materials from MDARD, MDE, and MSHDA. Will be sent to the SEOC for approval before issuing.
- Will be posting video b-roll and photos of today's event on the website and social media.
- Arranging to have a state videographer get b-roll of the warehouse process that can be shared with media; this will help eliminate media from going directly to the warehouse to get footage.
- Working with DTMB to get a TV in the JIC to increase media monitoring efforts.
- Will begin to promote free MTA fare on social media; will reach out to city to determine what they are saying.

--Shanon

To: MSP-seocda1
Subject: RE: Assistance Needed

Still waiting on numbers from the warehouse manager (per my call with Matt). I expect from her:
- Current stock at GCCARD warehouse
- Outgoing shipments for today

Combined with the supply counts at the PODs in the morning we would be able to calculate burn rates for the different supply categories.
I have tried to capture what has arrived at the PODs throughout the day, but with the expansion from 2 to 6 trucks delivering today, communication from the drivers broke down and my information is incomplete.

If you need any preliminary talking points to keep people satisfied until we can get hard numbers to you, give me a call - 810-232-2912.

Sent: Wednesday, January 13, 2016 3:13 PM
To: Hollaender, Henrik (MSP)
Subject: Assistance Needed

From: MSP-seocda1
Hey Henrik,

I am in need of your assistance. FEMA is requesting information from me for their situational awareness report.

Here is what they need and I am hoping you can help me with the most current information.

Additional information we would appreciate:

-Commodity/Filter/Cartridge counts, burn rates, and current costs. (Jason ran these numbers down for us at our 1300 EST call, but we agreed that it would be best for me to contact you to validate your most current stats.)

I can get the information on the counts from the fire stations but need your assistance with what is at the warehouse and burn rates if you have them for all the items.

Please let me know if you can do this.

Thanks,

Zachary Baker, PEM

Zach, this is perfect. Thank you.

Lower priority RFI: The drill down on the filter/cartridge/test kit count and burn rate would be helpful if your team has it. (The cartridge life expectancy per gallon question is too far in the weeds at this point. A raw number is all we need. We do not need this data for today's deliverable.)

Filter Type	Distributed/On Hand	Burn Rate/Day	Cartridge Type	Distributed/On Hand	Burn Rate/Day	Tes
Pitcher Manufacturer XX SKU#XXX			Manufacturer XX SKU#XXX			Mai XX S
Faucet Manufacturer XX SKU#XXX			Manufacturer XX SKU#XXX			[redacted]

Best,
CWR

Chris,

Here is what I have found out on the money front.

In October 2015 the Michigan Department of Health and Human Services (MDHHS) was given an appropriation of 2.1 million. This was intended to help with resources for the City of Flint incident. So far MDHHS has spent 1.8 million on primarily filter purchases.

Let me know if this is what you needed.

Chris,

I am Robb Morford's friend Zach and I am acting as the Situation Unit for the SEOC. Amanda is out of the SEOC temporarily so I will assist you with this information.

I just talked with our Logistics Section Chief and here is what we have in terms of warehouses at this time:

GCCARD (75,000 sq. ft. (10,000 available to us))
2727 Lippincott
Flint, MI 48507

Court St Warehouse (50,000 sq. ft.)

3086 E. Court St
Flint, MI 48506

We are working to move all our warehousing operations to the Court St warehouse location. We are also working to identify another warehouse in the Flint area as we anticipate we will fill the Court St location soon.

Let me know if there is any other information I can provide.

- 1/3 is going to GCard and the rest is going to the new warehouse

12,768 cases to arrive daily beginning Thursday through Saturday (177 pallets a day)

Filters

Today's numbers:

Ordered 1/11/16 – Delivered 1/12/16 direct to GCCARD

2,000 – Brita filter faucet mounts

Filter Replacements

2,400 – Brita filter replacements

8,000 – Brita filter replacements

Ordered 1/12/16 to arrive Wednesday

Faucet Mounts – To be delivering direct to GCCARD on 1/13/16 (Wednesday)

10,000 – PUR Vertical faucet mount

2,500 – PUR Horizontal mount

Replacement Filters – Delivering direct to GCCARD on 1/13/16 (Wednesday)

10,000 – PUR replacement filters

10,000 – PUR replacement filters

PUR Combination Pack – Delivering direct to GCCARD on 1/13/16 (Wednesday)

10,700 – PUR combo packs

To arrive Thursday

Zero Water Pitcher (8 Cup) – Delivering direct to GCCARD on 1/14/16 (Thursday)

1,300 – Zero Water pitchers

Faucet Mounts – Delivering direct to GCCARD on 1/14/16 (Thursday)

11,000 – PUR vertical faucet mount

1,500 – PUR Horizontal faucet mount

5,000 – Brita faucet mount

10,000 – Brita adv faucet mount white

12,000 – Brita adv faucet mount chrome

Replacement Filters – Delivering direct to GCCARD on 1/14/16 (Thursday)

15,000 – PUR replacement filter
45,000 – PUR replacement filter
40,000 – PUR replacement filter
16,000 – PUR replacement filter
1,600 – Brita replacement filter

Test Kits

6601 unassembled kits arrived at GCard today, 1/12/16.

- 500 have been assembled and are ready for distribution

1000 additional unassembled kits have been ordered to be delivered at GCard (no ETA yet)
10,142 unassembled kits to arrive at GCard early next week

Second warehouse

100, 000 square feet of secure warehouse obtained.
Located in Flint
Accepting commodities beginning Wednesday, January 13

Manpower

An American Red Cross Logistics Planner arrived today as requested. Specialist will assist in streamlining the inventory and distribution of same.

Subject: 2-1-1 Flint Water Crisis Daily Update January 12, 2016

This is the daily 2-1-1 summary on the Flint Water Crisis for Tuesday, January 12, 2016

GENERAL INFORMATION:

- ***Jennie Pollak, Manager of Central Michigan 2-1-1 will be at the JIC around 9:00 am tomorrow morning (1/13/16) to meet with PIOs and other staff to share information and coordinate activities with 2-1-1.***

CALL VOLUME:

- 185 calls requests for water-related issues had been received as of 4:45 pm.
- At 9:30 am Central Michigan 2-1-1 provided training to staff at 2-1-1 partner agencies across Michigan to increase capacity to handle any sudden surge in call volume. Trained agents are flagged in the statewide call routing platform as specially prepared to provide water assistance.
- At 12:08 pm there was a sudden influx of calls to 2-1-1 resulting from news coverage on TV and radio. The call queue increased to a maximum of 25 callers. Additional capacity from 2-1-1 partners ensured the wait-time for callers remained under two minutes during this period.
- Primary reason for calls are water filters and bottled water.

SPECIAL NEEDS/REQUESTS

- ☑ **Received response to request in yesterday's update on where to send information on callers requesting transportation assistance and water filter delivery.**
- ☐ Still seeking information on yesterday's request on whether an apartment complex manager can pick up filters for entire complex (47 filters).

- Central Michigan 2-1-1 contacted the EOC with reports that some fire station were out of water. EOC shared information on the process to restock sites along with a standard message for 2-1-1 to share with callers to provide reassurance.
- Callers are asking when canvassers will be coming to their communities. 2-1-1 is telling these callers the canvassing map has not been released, but the door-to-door outreach will begin in areas reporting the highest lead levels, then will expand across the city.

RUMOR CONTROL

- There were no more reports of rumors lead being found in bottled water.
- Several callers asked about the safety of bottled water for baths – they reported hearing rumors about rashes caused by bathing in bottled water. 2-1-1 referred to information on the flyer at the state web site regarding water safety and also suggested contacting their doctor or health provider with any related concerns.

OTHER

- At a recent Coalition To Keep Michigan Warm meeting, 2-1-1 heard anecdotal reports that some households in Flint have to replace water heaters annually due to corrosive water. A review of 2-1-1 call data identified 15 requests for water heater replacement in Flint since October 1, 2015.

Subject: Logistics Update

Objective 1: Ensure all households within impacted community have required resources.

- 50,000 square foot warehouse facility located by DTMB at 3086 E. Court Street, Flint. Will begin accepting truckloads of resources on Wednesday, January 13, 2016.
- Daily inventory figures for the five fire departments are being reported to the Resource Unit within the SEOC at the end of each day.

Objective 2: Ensure accurate tracking and accounting of all commodities.

- American Red Cross has warehouse management team on-site at GCCARD. Resource request has been entered into MI CIMS asking for a second ARC warehouse management team for the Court Street Warehouse location.

Objective 3: Ensure adequate staffing to support operational requirements.

- Assistant State Director has requested all positions work no more than 4-12 hour days consecutively. Staffing roster for next week being developed based on this condition.
- Section chiefs have been asked to provide availability of staff.
- Daily sign in sheets have been developed and are provided every morning.
- Working with DTMB to locate vehicles needed for MSP volunteer deployment on Thursday, January 14, 2016.

Hey Team!!!

So they have increased the hours of operation of the SEOC until 8 PM daily. Thoughts on how we want to handle this? Or work load is kind of sporadic. It is slow and then we get busy and then it dies back down again...

Tony is going to head out here after I hear from Joe with the material list to be ordered.

I am all ears!

Henrik,

Please start using this Google Doc to track the resources at the PODs and Warehouses. We're working on a more robust plan using ArcGIS but don't worry about that for now. We'll be looking forward to your inventory reports! If something doesn't make sense, call me.

Subject: Trigger levels

Trigger levels for Fire Station PODs established over the weekend:

Water: 2 pallets
Brita Init.:100
Brita Repl.:100
Pur Repl.:100

8 cup pitcher: 20
23 cup pitcher: 20
Testkits: 100

(With the low/nonexistent supply for everything but water, they don't really report on anything but water.)

FYI to Planning and Ops since I won't be here tomorrow:

Just assigned a task to DHHS (Jennifer Lixey) for the use of their 100,000 square foot space called "Diplomat", which should not be publicized. This space will be used to send all of our shipments to and we will pull from this space to restock the GCCard. So GCCard essentially becomes the staging area and Diplomat is our warehouse.

2 Additional volunteers were requested from ARC to assist with fire station distribution.

Subject: GIS Update

Today we:

- Updated distribution sites map
- Submitted a request for assistance to ESRI (GIS vendor) to supplement our technology and provide professional services in support of the incident
- Updated Flint DDACTS (crime analysis) hotspots
- Coordinated getting additional staff due to operational hour increase from DTMB (Currently only one additional expected, will request more tomorrow)
- Setup ArcGIS in conjunction with Flint GIS staff
- Configured mobile app for field data collection during MSP neighborhood visits
- Updated filters database and generated maps
- Began mapping lead service lines (anticipated to have rough idea of lead service lines by Friday)
- Coordinated with local IT managers overseeing Filter tracking system to streamline data collection

To: Kelenske, Chris (MSP); plangc
Cc: Katarsky, Anthony (MSP); MSP-seoclgc
Subject: Activities for 1-11-16

Activities from today:

It has been constant battle to keep up with the water demand at the 5 Flint Fire Stations. We have been distributing and re-distributing it as fast as we can.

WATER:

- As of today, an ongoing purchase of bottled water that been established through Gordon's Food Service to delivery **1,593 cases of water per day**. The first delivery will occur tomorrow.

- Contact has been made by Mr. Katarsky with **Indiana Emergency Management** to inquire about a stockpile of water that they find with continuous expiration dates. They will be providing the appropriate contact to determine availability and cost. This would potentially be an EMAC request if determined to be a feasible option.

- **DEQ has 30,000 gallon water truck** in the area that can dispense water into gallon jugs. Investigation is in action.
  All information regarding this option is forthcoming. As this specific agency is not "trusted", this may not prove to be a viable action.

- We have assigned a single person to identify a **continuous supply of water.** The immediate need is an issue; the need will continue to be an issue. As we ensure today's needs are met, the goal will be to have adequate supplies to come in on a DAILY basis and ensure supply is not depleted. This may be donations or purchased water.

- **DMVA** is in the SEOC researching the option of utilizing **water buffalos** for dispensing water in the Flint area. They are 400 gallon water buffalos. They could rotate 4 in and 4 resupplying each day. Cost would be **$9,600 for a 10 day period.** LTC (?) Chad Randall will be present Tuesday morning to further discuss. Additionally, we would need to purchase gallon jugs for water distribution.

- **MIWARN** has been contacted. MiWARN is a statewide Water/Wastewater Agency Response Network (WARN) of "members helping members" to prepare for the next natural or human-caused emergency. MIWARN provides utilities and public works agencies with a Mutual Aid Agreement for sharing resources in an emergency to a pre-determined and agreed manner. They are researching options and will advise as quickly as possible.

- **Nestle** is sending 2 semi's Wednesday instead of Friday. It will consist of 2.5 gallon containers, 1 gallon and 12 oz bottles.

- **Home Depot**, they can get water by the truckload and on an ongoing basis. 1,596 cases (38,304 bottles) per truck at $3.47 per case ($5,538.12 per truck). The first truck will arrive tomorrow. We can continue as requested

- MDARD is contacting potential trucking assets (such as milk haulers) to determine if quantities of water can be trucked in for distribution and how that might/might now be a resource for dispensable water. This does not appear to be a viable option

- Jason is in contact with the **FEMA water supply** to investigate a cost and ETA for receipt.

FILTERS:

- A delivery of filters/replacement cartridges have been confirmed for receipt on Tuesday, Jan 12. 2,000 filters, 8000 (2 pk) filter replacements and 2,400 single pack filter replacements will arrive. A request for delivery time was 8:00 a.m.. This has not yet been confirmed.

- An addition 28,000 filters have been ordered but have not yet received a confirmed ETA.

- We are putting in a request to American Red Cross for a warehouse management team. This would include trained warehouse manager, 2 warehouse personnel and a staff member to track commodities and ensure adequate supply levels are maintained.

- By noon tomorrow, all cards with addresses provided by those receiving filters will be updated into the system, including the backlog from December.

ISSUES:

- Safety concern was raised specifically about volunteers located at Fire Station 6. This concern has been addressed. Concerns only exist if fire fighters are called out, leaving volunteers on their own. At this time, should the station be called out to respond, Genesee County Sheriff will send a car to provide security at Station 6 until crew returns.

- Palm cards were printed and transported to Flint. We have since learned they were not signed off by the appropriate department; they have been edited, resent to DTMB for print, and will

Jeanette has provided the following availability of filters through 4 providers: - No action has been taken to date

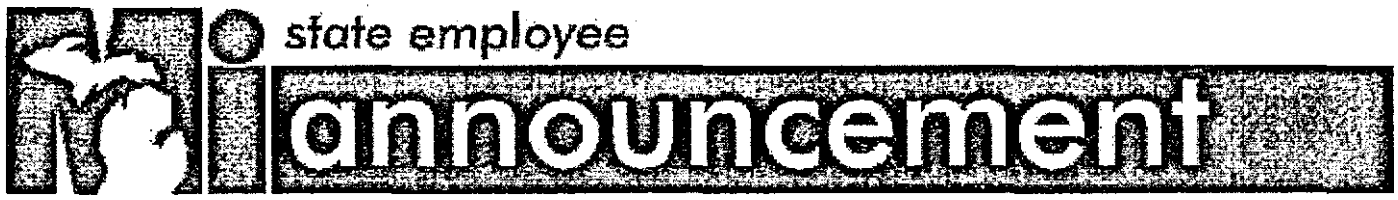
Subject: Michigan 529 College Savings Program Webinars



Michigan Education Trust (MET) and Michigan Education Savings Program (MESP) are encouraging parents and grandparents to learn more about college savings by offering monthly webinars beginning in January through October on the second and fourth Tuesday of the month as well as November 15 and December 6, 2016. These webinars will cover program details of MET and MESP.

Webinar sessions are scheduled to last one hour including time for questions and answers. You may be allowed administrative leave to participate in a webinar; however, you must obtain your supervisor's approval before participating. If you are unable to participate in a scheduled Webinar, a power point document is available.

To participate in a webinar session, visit the calendar of events to select the date you would like to participate. Once you have selected a webinar, click "RSVP today" and the "RSVP" site will provide login instructions.

Questions regarding the scheduled Webinars may be directed to the MET office at (517) 241-4884 or 1-800-638-4543 outside the Lansing area. Program information may be obtained by calling MET at 1-800-MET-4-KID (1-800-638-4543) or MESP at 1-877-861-MESP (1-877-861-6377). Enrollment booklets are available on line at MET www.SETwithMET.com or MESP www.misaves.com.

GIS Summary

Submitted report on total number of filters, pitchers, and replacement cartridges to Logistics
Printed map of wards for the City of Flint with Points of Distribution overlayed
LARA maps of Health Facilities and Active Facilities in progress
Geocoding water filter distribution addresses
Devise a method for measuring water filter distributions throughout the city. We will sum filter distribution by city block and produce distribution maps by block
DDACS Crime map overlay onto distribution map

- Worked on figuring out a long-term storage option. Because GCCard is large enough, centrally located and comes staffed, we are going to use this for a while until a logical long-term storage option can be found. GCCard has 75,000 sq ft and has warehouse managers to assist with tracking resources coming in and out.
- Requested an inventory of what has been distributed so far. Determined that the local health department wouldn't staff anyone during the weekend, so the only numbers we could obtain have not been updated since 1/8/16.
- Assigned someone at the local EOC to find anyone to enter the address cards collected from all the distribution sites. In order to determine what areas are in greater need, these address cards are essential for the GIS tracking and reporting.
- Determine water quantities in Flint
- Worked with recovery on needs for door-to-door operation
- Completed 204's for 3 objectives

Assigned requests:

- Extra volunteers for the added fire department hours. (MDHHS – Thelen)
- There was an extra church that was added. A request went through to ensure they received supplies and volunteers. (Local EOC)
- Flyers were created, printed and distributed to the 9 churches. (JIC, DTMB and Local EOC)
- Gate Operations for the broken SEOC Gates (MSP)
- More cards for churches & FD's (Logistics)
- Locate replacement filters in the Flint area (Local EOC)
- Deliver 6 pallets of donated water to GGCard (ARC)
- Develop re-stock plan for distribution sites (local EOC)

Subject: Status Update for Sunday, Jan 10

- Ensured the delivery of water and filters to the 9 churches in the Flint area.
- Discussed strategies for community outreach (door to door)
- Worked on facility safety at Collins Road (gate issues/lighting)
- Manage Task assignments for the SEOC (Press avail/door hangers/rules for water pickup)
- Requested a second DC to assist in Region 3 (Lt. Russo), start time TBD.
- Requested product information required to design signs for the fire stations to make it visibly apparent to the public. Awaiting feedback from fire stations (through Lt. Roach)
- Developed Branch Directors within the SEOC to reduce span of control (specifically Human Services Branch (Richard Thelen) and Health and Environmental Branch (Jennifer Lixey-Terrill)
- Worked to identify a storage location within the City of Flint for water and supplies. G-CARD is identified as temporary location.
    - GCCard is large enough, centrally located and comes staffed. We will use this sight temporarily until a logical long-term storage option can be found. GCCard has 75,000 sq ft with warehouse managers to assist with tracking resources coming in and out.
- Distributed to date (1/8/16). Logistics has asked GIS to provide us daily updates of how much was distributed each day.
    - 12,386 filters
    - 1,985 replacement filters
    - 354 Pitchers
    - 2500 Lead Testing Kits
- Local EOC was asked to identify someone to enter the information collected on address cards from all the distribution sites as essential for the GIS tracking and reporting.
- Fire stations were initially established for 9-4 operations; this has been extended to 9-9 operation. Volunteers were located to accommodate these operations. This will continue as long as the need is realized.
- Logistics is in process of location additional replacement filters.
- Establishing and tracking of resources is a priority. Staffing has been assigned to get a good handle on these to ensure distribution sites maintain an appropriate level of inventory.

Subject: Finance Update - January 10th

Task: Research printing options for informational flyer for distribution at churches today.
Update: DTMB obtained 3 quotes for printing services by phone and internet as required. JIC provided document for copying and sent to FedEx printing for 2000 copies to be done immediately. Reproduction was completed within an hour of submitting the document to FedEx and pickup information was forwarded to Genesee County EOC. **Task complete.**

Task: Locate restaurants in the Flint area that are willing to bill MSP/EMHSD directly so JIC staff and local EOC staff can have lunch provided during the day.
Update: Unable to speak to managers as required since it is Sunday. Did talk to Panera manager and will have direct billing established on Monday with account ready to charge to on Tuesday. Will contact at least three other establishments on Monday to do the same. Will provide update to local EOC, JIC Manager and update in MI CIMS.

Task: Cost Center Information
Update: Continue to document staff in SEOC and any costs incurred by state agencies for response efforts. First Spend Plan report will be provided to State Director on Friday, September 15th.

To: Kelenske, Chris (MSP)
Cc: plangc; Katarsky, Anthony (MSP)
Subject: Daily Update

Captain Kelenske,

A 3rd FEMA LNO has arrived today to act as Technical Assistance in the planning and operational process.

An 8:30 call was conducted with the Genesee County Emergency Manager to discuss situation, status and needs. EMHSD and DEQ IMAT staff members are now in the EOC assisting with the local operations, planning and logistics.

A 9:30 conference call was conducted with all State Agency Emergency Managers to review ongoing activities and status of current tasks.

A 10:45 conference call was held with the Genesee County EOC, specifically state personnel, to discuss processes for the upcoming days.

An 11:55 report out by state agencies and SEOC operations was completed to ensure the JIC staff were all on hand and knowledgeable of situational status. This was completed and of great value to them. At this time, all 5 fire stations have received water, water filters, replacement cartridges and water testing kits with American Red Cross at each location to assist with delivery of resources and collection of addresses receiving them. These locations will be open from 9-4:00 daily until determined they are no longer needed. Those picking up water testing kits will be advised that they can return the test kits to the fire departments (where they will be picked up and taken to the Flint City Hall), the Flint Water Treatment Plant, or they can take them directly to the Flint City Hall. For those unable to return the kits, 211 can make arrangements for pick up the kits. We understand response to these sites as been positive. The Genesee County EOC will be monitoring these supplies and request replacement of products as needed.

A press release was approved by the State Director to advise the public that all levels are working together to ensure delivery of filters, test kits and water; noting that all of these items were delivered to the 5 Flint fire department stations as of this time. It was stressed that the public should become aware that the local and state agencies have been working cooperatively to assist the residents - and will continue to do so.

The arrangement of 2,000 filters, to be taken to 8 (maybe 10) local churches on Sunday, January 10, is ongoing. The filters have been secured; they are now in the possession of the DTMB. DTMB will return to Flint on Sunday morning to deliver these to necessary locations. The American Red Cross will be on site at each church to assist with distribution and recording addresses (for GIC). The local EOC is working to ensure these arrangements are complete and run smoothly.

An extensive meeting was held with LNO, Jason Gamble, Jackie Hampton and Tom Weber was held to review the planning and operation process. We will begin Sunday as a planning day with 48 hour operations to begin on Monday, January 11. Planning days will be Sunday, Tuesday and Thursday.

A 3:30 briefing was conducted in the SEOC to provide status updates.

As we advised you at 3:50, the County EOC has no support from the City of Flint. For smooth operations and the ability to serve the residents of Flint, a liaison is necessary in the EOC. This is also important to keep the Flint Mayor is appraised of activities being conducted in the city.

Subject: Notes from today - Logistics

- Worked with Red Cross to recruit volunteers at churches (obtained 2 per site)
- Obtained church addresses and passed them on to the county, DTMB, DHHS and GIS
- Address cards have been developed and distributed to Flint Fire Department for tracking. Information from the address card is continuously being entered by MDHHS employee. Updates will be sent to SEOC Human Services POC throughout the day.
- Logistics is working with DTMB to get the door-to-door flyers printed. Once these are done, will work on getting those to Flint and distributed to teams
- Printed cards for churches and gave them to DTMB drivers to deliver with the materials to each church on Sunday
- Assigned various requests: supply truck to follow teams, trucks to transport teams and materials, security officer for EOC and for each team, long and short term storage options, plan for individuals not able to drive to return test kits, determine locations in Flint that already have large stashes of water on hand and have them deliver to food bank for distribution, method for getting address cards back from churches to EOC, individuals at storage sites to serve as warehouse managers
- Need to update POD boards from the local EOC, any resources should be requested from the SEOC.
- Set up direct bill at hotel in local area
- Make sure information is being entered into MI CIMS.
- Reiterate to continue to request resources in MI CIMS.
-

Subject: Tasks Completed

I apologize for the delay in getting these to you. I don't have a Sit Rep, but here are my bullet points for today's activities.

- Training has been confirmed for the door-to-door operations teams scheduled to start Tuesday.
- Training will take place at 1 p.m. on Monday afternoon at the DHHS office on Clio Road. DEQ and DHHS will provide the training.
- Hours of operation will be Tuesday through Friday from 8:30 a.m. to 5 p.m.
- Logistics are being worked out for the teams and trucks to handle stocking and re-stocking of materials during daily operations.
- Currently working on the overall plan for the door-to-door operations.
- Will begin working with the local EOC first thing tomorrow to determine the areas of Flint to focus our efforts and work out the remaining details.
- Trevor Hawks is working with the JIC on the door hanger.

Let me know if you have questions or need anything else.

Below is a listing of what we have accomplished today:

- Reproduced Socio-Economic Status Map
- Reproduced Predicted Affected Populations Map
- Cleansed old data and reports for water filter distributions
- Created draft map of water filter distributions (Refinement needed before releasing final product)
- Scheduled on-site visit with Flint GIS Department and Genesee County GIS Department
- Formatted databases to host content
- Researched service line database creation and scheduled in person meeting with U of M Flint to discuss timelines and resource needs
- Generated water infrastructure map (does not include building service lines)

Tomorrow we will:

- Meet with Flint City GIS
- Meet with Genesee County GIS
- Meet with U of M Flint GIS
- Finalize water filter distributions map
- Finalize plan for data distribution methods

All,

Here the draft for the first Situation Report.
I was planning on publishing this draft around noon today, and publish an updated SitRep2 with additional measurable objectives for distribution of filters, water, testkits, nutritional assistance for the next OP before the end of the day.
Most of the day here was overtaken by donations management and logistics considerations, so I wasn't able to finalize SitRep1 or establish the objectives here with the EMC and staff that is involved in the Ops side of things here.

Please just use for information and do not publish.

Thanks,
Henrik

Captain,

A summary of today's SEOC activities is provided here, and today's SitRep is attached.

SEOC Accomplishments:

- Recovery Branch was established under Operations Section. Brianna Briggs will lead.
- Discussed Recovery Task Force (State). Recommendation forthcoming. Action will depend on pending possible EO.
- Conducted briefing with local EOC and county executive.
- Conducted briefing with state agencies (daily updates).
- Began work to schedule legislative/congressional conference calls.
- JIC continued to develop messaging.
- Provided input to local EOC regarding best methods of identifying health and non-structural impacts for damage assessment process.
- Deployed to EMHSD/SEOC liaisons to assist the local EOC.
- Published the Incident Action Plan and continued assignment of objectives/tasks.
- FEMA Liaison Officers are deploying to assist command and general staff and will arrive this evening.

The SEOC continues to provide:

- Situational awareness
- Common operating picture/objectives
- Coordination with city/county
- Potential coordination with federal agencies
- Incident prioritization
- Coordination of life/health safety measures
- Provide resources
- Public Information Control

Agencies represented in the SEOC will need to:

- Determine what federal agencies are already involved.
- ICS Planning P cycle has been established.
- Identification of potential water supplies is ongoing.
- State Agency EMC's are identifying existing lead pipe replacement programs (DEQ).

- The GIS team has made progress in identifying and update situational mapping. (EMHSD GIS)
- Filter distribution processes are being analyzed and mapped (EMHSD GIS).
- Determine which mechanisms are in place for nutrition supplementation-ongoing. \
- City of Flint water filter distribution map has been prepared and will be updated as new data becomes available.

MDHHS – Elevated Blood Lead Levels.
On day 1 of activation Dr. Eden Wells gave an in depth summary of lead poisoning and what has occurred relating to health monitoring during the Flint crisis.

MDEQ – Water Testing Protocols
On day 1 of activation Mr. George Krisztian of MDEQ gave an in depth summary of the testing protocols and summary results that as they have developed throughout the emerging crisis.

EMHSD GIS:
Accomplished Today:

- Reproduced Socio-Economic Status Map
- Reproduced Predicted Affected Populations Map
- Cleansed old data and reports for water filter distributions
- Created draft map of water filter distributions (Refinement needed before releasing final product)
- Scheduled on-site visit with Flint GIS Department and Genesee County GIS Department
- Formatted databases to host content
- Researched service line database creation and scheduled meeting with U of M Flint to discuss timelines and resource needs
- Generated water infrastructure map (does not include building service lines)

Tasks for Tomorrow:

- Meet with Flint City GIS
- Meet with Genesee County GIS
- Meet with U of M Flint GIS
- Finalize water filter distributions map
- Finalize plan for data distribution methods

Updated.

MSP/EMHSD GIS Section Update
Accomplished Today:

- Produced Water Point of Distribution Map
- Produced Filter Point of Distribution Map
- Met with Genesee County Emergency Manager to discuss POD locations, times, is supposed to be sending us data on new facilities serving as POD's, as well as hours of operations
- Attempted to geocode list of properties that have receive a water filtration system. Geocoding is a problem
- MI CIMS password resets
- Attempted to get data on the zip codes
- Met with GIS from Flint to discuss data and methods.
- U of M contacted us to set up a meeting on best to proceed with digitizing water lines
- Received account from City of Flint for their ArcGIS online.

Tasks for Tomorrow:

- Finalize updated list on water filter distributions map
- Update Water and Filter POD's with updated information from Genesee County Emergency Manager.
- Discuss a time to meet with U of M
- Finalize water filter distributions map
- Finalize plan for data distribution methods

Water distribution

From: MSP-SEOCGIS2
Sent: Friday, January 08, 2016 10:54 AM
To: Weber, Thomas (MSP); plangc
Subject: project bulletpoints

-geocoded water filters by address (people who went and picked up a filter filled out an address sheet). Map is on front wall.

- We were sent another list that is slightly larger, we are trying to filter out sites already mapped, this process takes a while to process. Addresses need revision, and it takes a while, very time intensive.

-Water Points of Distribution. Started with 8 sites as listed by the emergency manager, this list will be expanded upon throughout the day, will update as information comes in. Information will be directly forwarded to us from the EM of Genesee Co.

-Filter Distribution Sites. Richard Thelan gave us a list with 5 filter distribution sites, will begin mapping this after I wrap up this email.

-Produced a map of the city water pipelines and colorcoded them by material (most of the city is Cast Iron). Also included the parcel data, coded by whether the parcel is vacant or contains a structure.

-We have a block group layer that contains census demographics, but haven't really used it in a map. But with this data set we can find block groups with the largest amount of children under 5, and other age, ethnicity, income groups. Just looking at it, there are 2 block groups that have the most children under 5, they are usually in apartment buildings and trailer parks (according to this data).

-We have the dataset from Dr. Mona Hanna-Attisha and Dr. Sadler (MSU) doing a blood level prediction.

-Water monitoring points from 11/25/2015 showing whether lead levels at test sites are above or below accepted levels.

A lot of the first day was trying to find data. Yesterday was trying to process the data. We are currently trying to process the updated water filter distribution, but it will take a while (I know I mentioned this, but it will take some time).

I will update you when we get information from Genesee County with new sites.

Subject: Water and Filter Lists

By the time I get in the office, ~0930, I want a list of water distribution sites, address, hours open, status of water, etc. Info was sent to GIS by Chris D yesterday on water locations and filter locations. I want a map of all these also so we can determine if we need more locations.

This is a priority. Real or perceived, I do not feel we are moving quick enough. I checked some of the tasks and am not seeing entries where work is being done but agencies may just not be entering the info. I am concern that Richard is over tasked. DHHS needs more support so someone get with Richard on that to see if this is accurate and if he needs help.

I have been on the phone with Chris D this morning to discuss some of my concerns.

Right around the corner will be a request for assistance with nutrition support and that will take a lot of resources.

Regional Weather and Impacts

Alexander County levee break will bring more challenges
(The Southern Illinoisan)
Alexander County, IL: The grim reality of unseasonable flooding that led to a levee break in Alexander County last week might be compounded when high waters finally recede. After the 1993 flood, it cost about $4 million to repair the Len Small Levee, said Alexander County Board Chairman Chalen Tatum. He also pointed out that the '93 levee break was smaller than last week's breach. It's too early to know how much the latest breaks will cost, additionally, a second, smaller breach occurred sometime after Friday's breach. Tatum believes repairs will cost more than they did 23 years ago, considering inflation factors. The good news is the U.S. Army Corps of Engineers will likely cover 80 percent of those costs if the Levee District meets a long list of conditions, a Corps spokeswoman said. The bad news — in a sparsely populated area of small towns and farmland in one of the state's poorest counties, there's still the 20 percent to come up with.

Receding waters allowing some to return home, clean up, return to normalcy
(The Southern Illinoisan)
Cairo, IL: As floodwaters began to recede in parts of Southern Illinois, some communities are turning to cleanup and even returning to the homes they might have left. As the water recedes in Alexander County, many of the side roads still remain closed, said Alexander County Sheriff Tim Brown. The major roads, like Illinois 3 and 127, were never closed and are still open to travel, he said. A Mississippi River flood warning is still in effect for Alexander County for the next few days, according to Greg Meffert, lead forecaster for the National Weather Service. The river measured 4In Jackson and Union counties, emergency management officials lifted their evacuation recommendation and voluntary evacuation order at 8 a.m. Wednesday. Road-closure signs have been removed from most of the blockaded streets, Union Sheriff Scott Harvel said Wednesday afternoon. "It's looking a lot better because the river is really starting to drop," Harvel said. Since

Sunday, the river has fallen almost six feet, from its high of 48.8 feet on Sunday to 41.48 feet on Wednesday, he said. Crews were out Wednesday cleaning up, he said.

Durbin looks for answers as flood victims plead for delayed funds
(WSIL 3)
Alexander County, IL: Flooding in Alexander County brings a reminder of unfilled promises for many. County Leaders say owners of 127 properties who opted for the buyout program are still waiting for that money, so residents pleaded with U.S. Senator Dick Durbin to find out why. "The federal funds are there available for use. It's the 25 percent state matching funds that the state has locked up," said a county official. "Well, clearly the answer is the state budget," said Durbin. "We've waited a long time, the sooner the better. In the meantime, I'll contact the Rauner administration to see if they can do a release when it comes to these funds." News 3 asked if that would require a court order and Durbin said "Beyond the current court order, I can't say. I just can't say at this point. But if it discretionary on the part of the state of Illinois to have this decision to release state funds then that's the governor's decision. News 3 also spoke with the governor's office, who says there's been no appropriation for the contribution at the state level and the federal contract makes Alexander County responsible to provide and/or secure the matching funds.

Damage assessments begin as evacuations lifted
(WPSD)
Grand Tower, IL: Evacuation notices have been lifted in Union and Jackson counties in Illinois, giving the all clear for people to return home for the first time in over a week. Jackson County Emergency Manager Derek Misener says the county is just now starting to get a sense of how much damage was done. "The most devastated areas are really just now starting their damage assessments," said Misener. "One of the things with flooding is you don't really know if a road is ruined until the water goes down." Misener says it's crucial that people report any damage because the state of Illinois has to hit an $18 million damage threshold to receive any assistance from the federal government. He says while that may not seem like a lot now, during the next flood it could keep the water in the rivers and out of your town. According to Misener, levee improvements and a new flood gauge are needed before the water rises again.

Flooding Disaster Declaration Could Lead To Federal Relief, but There's No Guarantee
(Peoria Public Radio)
Iroquois County, IL: Governor Rauner toured the flooded areas of Illinois and continued on Tuesday with a visit to Watseka, about 100 miles south of Chicago near the Indiana border, in Iroquois County, one of the counties that's just received the disaster designation. Rauner says that does two things. "One, it frees up state resources so we can bring state personnel and equipment and supplies to help the first responders and volunteers everywhere," he said. It's also the initial step in requesting federal disaster relief. "We are going to try to get the federal government to reimburse losses as a result of this flood," Rauner said. But it's no guarantee; the Federal Emergency Management Agency has denied some of Illinois' requests in the past, for example, after tornadoes. Higher damage costs could increase the state's chances. Affected homeowners are asked to submit their financial information to county officials. The new additions are Cass, Cumberland, Iroquois, Lawrence, Marion, Menard, Moultrie, Pike, Richland, Sangamon and Vermilion counties. Last week, Alexander, Calhoun, Christian, Clinton, Douglas, Jackson, Jersey, Madison, Monroe, Morgan, Randolph and St. Clair counties received the designation.

Fort Wayne to receive delayed FEMA money for buying 18 homes in flood-prone area
(News Sentinel)
Fort Wayne, IN: The City of Fort Wayne was scheduled Thursday to receive a check from the U.S. Department of Homeland Security's Federal Emergency Management Agency (FEMA) for $862,946 to buy and demolish 18 homes in flood-prone areas. Receipt of the FEMA award was announced in July. Plans for its distribution had been put on hold early last year by a dispute between FEMA and a Kokomo project to build a baseball stadium that reportedly extended onto flood-prone land. City officials provided additional details about the Fort Wayne project in December during an update to City Council. The city and Maumee River Basin Commission must contribute 25 percent in matching funds — nearly $288,000 — increasing the total funds available to about $1.15 million. The homes the city hopes to purchase are located in various locations throughout the community, but the largest share are near Junk Ditch and Fairfield Ditch in southwest Fort Wayne. None of the 18 homes has been purchased yet, and buyouts would take place only if the homeowners voluntarily agree to sell to the city. After the homes are demolished, the land will be maintained as green space. The project is part of pre-disaster mitigation efforts, which provide grants so state and local governments can take long-term steps to reduce the risk of flood damage, the city's announcement said in July.

Water Sector

Water crisis in Flint, Michigan, draws federal investigation

(CNN)

Flint, MI: High levels of lead have plagued Flint's municipal water supply for at least a year, prompting extensive emergency measures to keep residents safe. Flint returning to Detroit water amid lead concerns. On Tuesday, Michigan Gov. Rick Snyder declared a state of emergency for Genesee County as a result of the water crisis. The U.S. attorney's office for the Eastern District of Michigan is also investigating, office spokeswoman Gina Balaya said Tuesday. Curt Guyette of the American Civil Liberties Union of Michigan called the probe "an important step that needs to be taken in order to get to finding the root causes of the disaster that has occurred in Flint and to hold everyone involved responsible." Flint council OKs funds for return to Detroit water after lead concerns. In November, Flint citizens filed a class-action lawsuit on behalf of victims of high levels of lead against Snyder, the state of Michigan, the city of Flint and other state and city officials. The investigation by the U.S. attorney's office comes more than a year after the city of more than 100,000 people began getting water from the Flint River instead of from Lake Huron via Detroit's water system. The move was announced as a temporary, cost-cutting measure until Flint could get Great Lakes water on its own, according to the class-action lawsuit. But then came residents' complaints about strangely colored tap water. Studies showed that lead piping elevated lead levels 10 times higher than they had previously measured. A local hospital discovered that the percentage of Flint children with elevated lead levels nearly doubled after the switch. The health effects listed in the class-action suit include: skin lesions, hair loss, high levels of lead in the blood, vision loss, memory loss, depression and anxiety. Keith John Pemberton and his wife, Jacqueline, who are in their late 60s, allege in court documents that they suffered property damage because of the corrosive water, loss of value in their home, skin lesions and "psychological disorders such as depression, chronic anxiety and an inability to cope with normal stress." These conditions, according to the suit, were the result of bathing, washing and normal household activities. The Pembertons' allegations mirror those of Rhonda Kelso, 52, who, along with her 12-year-old daughter, said she suffered skin lesions and psychological problems. Kelso and her daughter have pre-existing disabilities, which they said the lead buildup in their blood compounded. The complaints prompted a host of actions to address what was labeled a public health emergency. The city ordered public schools to stop running water for taps and water fountains, according to WEYI-TV. Government agencies passed out more than 6,000 water filters, said Nick Lyon, director of the Michigan Department of Health and Human Services. The situation could affect the city for years. In a state of emergency declaration, Flint Mayor Karen Weaver indicated that more funding will be needed for special education services because lead "can cause effects to a child's IQ, which will result in learning disabilities." The water from the Flint water plant, according to an October public health emergency declaration from the Genesee County Board of Commissioners, meets all federal standards. But the declaration said that lead in service lines, or solder connections, can leach into individuals' homes because "of the corrosivity of the water since changing to the Flint River as the source supply." The governor's office has said Snyder "requested funding to switch the source back to the Great Lakes Water Authority," to combat the lead leaching, and "appointed an independent task force to identify possible missteps and areas for improvement." The situation got under control after city and state officials announced last fall that Flint would switch back to Detroit's water supply.

Communications/Information Technology Sector

Time Warner Cable says up to 320,000 customers' data may have been stolen

(Reuters)

National: Time Warner Cable Inc said on Wednesday up to 320,000 customers may have had their email passwords stolen. The company said email and password details were likely gathered either through malware downloaded during phishing attacks or indirectly through data breaches of other companies that stored Time Warner Cable's customer information, including email addresses. The company said it has not yet determined how the information was obtained, but there were no indications that Time Warner Cable's systems were breached. Time Warner Cable spokesman said it was recently notified by the Federal Bureau of Investigation that some customers' email addresses including account passwords "may have been compromised." The company said it is sending emails and direct mail correspondence to encourage customers to update their email passwords as a precaution.

Transportation Sector

Inbound Stevenson Expressway Shut Down Near Central Avenue after 5-Vehicle Crash

(NBC Chicago)
Chicago, IL: All lanes on the inbound Stevenson Expressway were shut down near Central Avenue during the evening rush hour Thursday due to a five-vehicle crash, state police said. At least one person was injured in the accident. All lanes had reopened around 5 p.m., but extensive delays were still reported on the roadway.

Law Enforcement & Intelligence Sector

Milwaukee Suspect among Three Arrested In ongoing Terror Sweep
(CBS 58)
Milwaukee, WI: Arrests were made Thursday in Houston, Sacramento and Milwaukee in an ongoing terrorism investigation, according to law enforcement sources. "I can confirm that there were two national security related arrests today, one in Houston and one in Sacramento," Department of Justice spokesman Marc Raimondi told CBS News' Paula Reid. "There is no current threat to public safety associated with these arrests." The Milwaukee division of the FBI confirms that three subjects were arrested in Wisconsin today. Those charges are unrelated to terrorism. The subjects are expected to be in court tomorrow and more information will be released then. The FBI wants everyone to be aware that there is no threat to the public in Wisconsin.

Subject: 01_06 SEOC Situation Report, Flint Water

Dr. Wells, Mr. Krisztian,

Attached please find a draft for the Executive Summary to be included in the first Situation Report for this incident, which will be published on MI CIMS later today.
The Executive Summary is supposed to provide a brief overview of the incident to increase situational awareness of responding agencies.

If you can find time, please review the draft to see if any statements that relate to the area of expertise of your agencies are incorrect, or if you can recommend any additions.

Thank you for your help,

Henrik Hollaender

Importance: High

Good afternoon, Pam.
Per our conversation, I was in attendance at the SEOC from 11:03a to 3:45p. With the recent transition of these responsibilities at MTED, I have not been trained on/logged in to the SIMs system to date. Therefore, this message contains the report from Michigan Department of Talent and Economic Development (MTED), due by 4:30p:

MSHDA

1. Allowable: Pay for the costs of water quality analysis of all MSHDA backed mortgages in Flint.
2. Allowable: Pay for the replacement of water lines owned by residents with MSHDA mortgages within the city that need to be replaced or lines to homes with MSHDA backed mortgages or incomes less than 50% AMI.
3. Allowable: Pay for a percentage of the reconnection fee to acquire water from Detroit up to an amount not to exceed the % of MSHDA financed homes or low income households in the city (50% AMI).
4. Allowable: Pay for the replacing the city's municipal water line infrastructure associated with water lines being replaced to homes in the city with MSHDA backed mortgages or those household at or below 50% AMI.

5. Allowable: Pay for a percentage of any new infrastructure costs associated with the build out of a new water supply system so long as the amount doesn't exceed the % of MSHDA financed homes or low-income households in the city (50% AMI).
6. Allowable: Purchase of water for low income households (50% AMI).
7. Allowable: Purchase of water filters for any low income households (50% AMI).
8. Allowable: public awareness through HDF grants

- The grants staff team is already drafting the necessary background materials for a potential grant application request. We would just need to know the recipient of the grant and purpose (allowable uses).

- We are exploring CDBG grant funds or other assistance from HUD.

MSF/MEDC

- MSF/MEDC had offered low interest loans as part of the deep freeze crisis. While this would require legislative action to authorize, it is something that could be considered in this scenario. It would require re-purposing any remaining funds.

Please let me know if there is additional information required. I *am* receiving the SEOC emails/voicemails.
As a side note, Melanie Brown has been temporarily reassigned to DEQ during the Flint Water Crisis. Jeremy Hendges will be acting as PIO for TED (cc'd on this message).

Thank you for your assistance, Pam.

Regional Weather and Impacts

Ardent Mills Says Resumes Operations At Illinois Flour Mill After Flooding
(Reuters)
Alton, Illinois: The largest U.S. flour miller Ardent Mills has resumed bulk shipments at a mill in Alton, Illinois, as floodwaters along the Mississippi River receded while a mill in Chester, Illinois, "likely will be down for multiple weeks," company spokeswoman Mary Ann Strombitski said on Tuesday. Near-record high floodwaters following deadly winter storms forced the company to shut down the mills a week ago.

Federal Officials Make Recommendations To Prevent Future Flood Damage
(WSIL ABC 3)
Grand Tower, Illinois: Federal development officials are touring areas affected by flooding throughout the southern Illinois region. They are assessing ways government aid can help communities recover and rebuild. A group of Delta Regional Authority employees made several stops, including the levee in Grand Tower. Their goal is to figure out exactly what investments will help make local flood protection sustainable for years to come. As federal officials tour Jackson County with Delta Regional Authority - they also recommend installing a better river gauge on the Big Muddy and creating an overpass road above the Cora levee to prevent Route 3 from closing down. Damage in Jackson County varies. Most levees along the Mississippi River held up, while chunks of the Big Muddy levee were eroded away. Some say Jackson County got lucky. The Len Small Levee near Olive Branch in Alexander County did breach, flooding dozens of properties and putting some local residents out of a job.The levee could take months to repair. Emergency officials are considering how soon to lift their recommendation for voluntarily evacuation.

Alexander County Levee Break Will Bring More Challenges
(Southern Illinoisan)

Illinois: The grim reality of unseasonable flooding that led to a levee break in Alexander County last week might be compounded when high waters finally recede. After the 1993 flood, it cost about $4 million to repair the Len Small Levee, said Alexander County Board Chairman Chalen Tatum. He also pointed out that the '93 levee break was smaller than last week's breach. It's too early to know how much the latest breaks — a second, smaller breach occurred sometime after Friday's breach — but Tatum believes repairs will cost more than they did 23 years ago, just considering inflation. The good news is the U.S. Army Corps of Engineers will likely cover 80 percent of those costs if the Levee District meets a long list of conditions, a Corps spokeswoman said. The bad news — in a sparsely populated area of small towns and farmland in one of the state's poorest counties, there's still the 20 percent to come up with It is too soon to tell how bad the levee damage was, at Len Small or elsewhere in Southern Illinois. Most levees in the region, as well as the state within the Corps' St. Louis District, are currently at minimally acceptable or unacceptable status of Corps standards. That means repairs needed outside of flood damage must be locally funded. Most of those levees are also Corps built, unlike the Len Small Levee. For those levees, the Corps will pay 100 percent of the cost for flood-related repairs. Several districts, including the Grand Tower Levee District and the Degonia and Fountain Bluff Levee District have enrolled in a Corps program designed to provide technical advice to restore systems to acceptable levels. Officials in Jackson and Union counties said it is still too early to assess damage, though it appears the flood did not cause significant damage. The worst might be at the Degonia and Fountain Bluff Levee and Drainage District, President Carl Heins said. Some sliding on the levee wall did occur that will likely need to be built back up.

Water Sector

Michigan Governor Declares State of Emergency over Flint's Toxic Tap Water

(Weather.com)

Michigan: Michigan Gov. Rick Snyder has declared a state of emergency in Flint and Genesee County due to a contaminated drinking water crisis. Coincidentally, this declaration came on the same day that the U.S. Attorney's Office confirmed its investigation into the contamination of Flint's water supply, according to the Detroit Free Press. "The health and welfare of Flint residents is a top priority and we're committed to a coordinated approach with resources from state agencies to address all aspects of this situation," said Snyder in a press release. "Working in full partnership with the Flint Water Advisory Task Force, all levels of government and water quality experts, we will find both short-term and long-term solutions to ensure the health and safety of Flint residents." In 2014, Flint swapped over from Detroit's water system to water from the Flint River in an effort to cut costs, reports FOX News. It was a temporary set up until a pipeline was built from Lake Huron. The change did not go unnoticed by residents, who complained about the taste of the water, as well as its smell and appearance. The issues worsened as elevated levels of lead were found in children as a result of drinking the water. In October 2015, the city returned to Detroit's drinking water. "The damaged water infrastructure and leaching of lead into the city's water caused damage to public and private water infrastructure, and has either caused or threatened to cause elevated blood lead levels, especially in the population of children and pregnant women, and causing a potential immediate threat to public health and safety and disrupting vital community services," said Snyder in the declaration. The emergency declaration makes federal aid possible. Snyder can request a damage assessment from the Federal Emergency Management Agency (FEMA) to use as a basis for determining eligibility for federal aid.

Federal Officials Probe Lead-Tainted Water In Flint, Michigan

(Reuters)

Michigan: Federal officials are investigating the lead contamination of drinking water in Flint, Michigan, after the financially beleaguered city switched sources to save money, a spokeswoman for the U.S. Attorney in Detroit said on Tuesday. Michigan Governor Rick Snyder apologized in late December for the state's mishandling of lead contamination of Flint's water supply and accepted the resignation of the state official whose department is responsible for overseeing water quality. The U.S. Attorney's Office is working closely with the U.S. Environmental Protection Agency to address the concerns of Flint residents and investigate the contamination of Flint's water supply, said Gina Balaya, a spokeswoman for the U.S. Attorney. Snyder later on Tuesday declared a state of emergency in Genessee County, which includes Flint, authorizing additional state resources to address the health and safety issues. The city declared a local emergency in mid-December. Snyder spokesman Dave Murray said the state would cooperate with any requests from the U.S. Attorney's Office "as it looks into Flint's water challenges." The governor has appointed an independent panel to review local, state and federal actions related to the drinking water situation and is working with city and county leaders, he said.

Boil Water Advisory Issued For Belle Isle

(The Detroit News)

Michigan: There is a boil water advisory in effect on Belle Isle after low water pressure and low chlorine levels were detected Tuesday, according to the Michigan Department of Natural Resources. "Bacteria levels came out negative which means that's OK, but the chlorine levels are still low," said Ron Olson, chief of parks and recreation for the DNR. "The suspicion is because the water pressure is low, that may affect the chlorine levels." The issue was detected around 12 p.m. Tuesday after city officials tested water near the island's Coast Guard outpost, which recently had been experiencing varying levels of water pressure, Olson said. Belle Isle is hooked up to the city's water and sewerage system. Further testing showed no harmful bacteria in the water but officials determined the water "may not be potable" due to the low pressure and low chlorine, Olson said. The advisory was issued "as a precautionary measure." Several agencies including the city, the DNR and the Michigan Department of Environmental Quality are working to pinpoint the cause of the low water pressure, Olson said. Meanwhile, Olson said aquatic life at the island's aquarium are protected in their controlled tank environments.

Communications/Information Technology Sector

DHS Issues Process and Privacy Guidance on State and Local Drones

(Electronic Frontier Foundation)

National: Just before the holidays, a Department of Homeland Security (DHS) working group released guidance for state and local agencies using drone aircraft. The document, Best Practices for Protecting Privacy, Civil Rights & Civil Liberties In Unmanned Aircraft Systems Programs, addresses concerns over the implications of high-tech tools that, without rigorous controls and oversight embedded in law and embodied in code, can easily be abused. Some aspects of the guidance construct a robust process surrounding the adoption of drones. For instance, it suggests consultation with legal counsel and issue experts, as well as a clear definition of a program's mission and scope. The guidance also recommends ongoing assessment of privacy impacts and a redress program. Other more substantive provisions address the use of drones themselves. For instance, the DHS guidance suggests limits on how drones collect data, how the data used, how long it is retained, and to whom and for what purposes it is disseminated. At root, the guidance remains advisory, binding neither state nor local agencies, nor even agencies within DHS itself. Longstanding concerns about inadequate transparency and protections by DHS component agencies will remain and continue to mount. The guidance is also limited to particular settings. The working group said its guidance was "intended for first responders (e.g., emergency management, emergency medical service, fire departments, and security professionals responding to disasters and other emergencies) and does not seek to provide guidance in regard to investigative use of [drones]," despite the group's recognition of historical patterns of recurring abuses by law enforcement agencies.

Very Respectfully,

Cornelius C. Miller

Subject: GIS Update

Today the following was accomplished by EMHSD GIS:

- Hosted a conference call to begin coordination with Flint City and Genesee County GIS departments and the SEOC
- Established a daily call in to synchronize GIS efforts in support of the Flint water crisis at 8:30 A.M.
- Began consolidating local data from local GIS practitioners into a consolidated database, to include:
    - Water Pipeline Locations
    - Filter Distribution Locations
    - November 25th Water Monitoring Results (Partial, some data remains to be digitized)
    - Effected School Locations
    - Predictive analysis of blood lead levels for affected area
    - Updated Parcels
    - Demographics
    - Block Groups
- Produced a map for the filter distribution locations
- Began contacting specialists who developed historic maps depicting the Flint Water Crisis to get data

During the next day GIS staff will

- Conduct the first synch call with GIS staff including identified specialists who prepared the predictive analysis layer
- Begin production of planning maps
- Update any out of date data
- Continue identifying partners supporting Flint Water GIS

Sent: Wednesday, January 06, 2016 3:33 PM
To: MSP-seocda1
Subject: FW: Tactics Established: IAP objectives and command emphases

Objectives

Activate the State Recovery Task Force

Identify and obtain approval for assignment of Task Force Leader
Task Force leader will provide recommendations and obtain approval for Task Force membership
State Recovery Task Force shall determine mission and establish means to provide support as needed

Ensure coordination between the *City of Flint, Genesee County, state and federal agencies, and appropriate medical* experts.

Request and establish LNO in the SEOC to support liaison with other federal agencies
Establish Recovery Unit
Maintain daily SEOC Briefing with state agencies
Establish and maintain routine calls with local emergency manager and EMHSD District Coordinator

Obtain and maintain situational awareness and common operating picture of all activities.

Conduct daily briefings with state agency emergency managers
Monitor MICIMS
Produce "water filter distribution" map to include affected area, infrastructure and outside data
Complete and produce daily situation reports

Establish operational period and hours of operations.

Operation Period has been established as well as SEOC operational hours
Review weekly for alteration of same

Investigate and identify available programs for assistance with direct or related impacts

Identify agencies to research potential assistance programs
Named agencies will research programs and determine eligibility guidelines, benefits, application process, contacts, etc.
Provide report to Operations Section (Recovery Unit) as to program availability.

Develop a comprehensive GIS strategy

Identify critical needs for maps and overlays
Identify current and potential resources for data collection
Contact and coordinate with identified agencies to obtain and centrally locate all data
Provide spatial analytics in support of SEOC

Identify critical resources for acquisition and allocation.

Develop and forward email to all state agencies to identify available resources for deployment

Coordinate response and recovery activities and identify mission areas with MIVOAD.

Establish Recovery Unit
Gather and compile available resources
Gather and compile available assistance programs
Determine resources already provided to affected area in response to emergency

Facilitate and coordinate technical assistance among state agencies and to local agencies.

Identify subject matter experts (Dr. Wells, Dr. Mona Hatta-Attisha, George Krisztian)
Establish and coordinate routine communication between SME's.

Provide technical assistance and facilitate the local Damage Assessment.

Establish Recovery Unit
Provide templates and information as to requirements of damage assessment reports
Conduct daily conference calls with local emergency manager and EMHSD District Coordinator to assess progress and obtain updates
Coordinate daily communication with DC, Recovery Unit Lead, GIS Unit Lead to monitor progress and document data

Establish a Joint Information Center and identify a public information strategy.

State agency PIO's meet to determine needs and strategy for public information dissemination
Determine technical needs for on-site JIC
Coordinate with local (County/City) JIC
Determine need to co-locate state and local JIC
If need identified to relocate JIC, establish location and logistical needs

Monitor MI CIMS for resource requests and address as appropriate.

Logistics Section Chief will monitor and assist with input of resource requests
Review requests and review with command to receive approval to assign and fill requests
Track resources provided to date and those provided throughout the course of this event.

Establish and disseminate cost center information for the incident.

Establish Index/PCA
Distribute information to state agencies
Track costs related to this emergency

Command Emphasis

Provide regular technical briefings
Identify life safety issues.
Identify priorities.
Provide policy direction by observance of SEOC SOPs.
Coordinate with FEMA.
Provide regular legislative/congressional briefings.

Thanks in advance!!

Subject: sitrep exec summary

On January 6, 2016, Governor Snyder declared a State of Emergency for Genesee County. Genesee County requested the Governor's declaration on January 5, 2016, following the declaration of a State of Emergency in the county in response to the introduction of lead into the public water system , which has caused elevated blood lead levels exceeding governmental standards. These conditions exist in the City of Flint, which declared a local State of Emergency and activated local response plans and their Emergency Operations Center on December 15, 2015. A public health emergency was declared by the Genesee County Health Department on October 1, 2015.

In April 2014, the City of Flint switched from the Detroit Water and Sewer Department (DWSD) to the Flint River as a temporary water source. Untreated corrosive river water in the city's water infrastructure caused the leaching of lead from lead pipes into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders.
Increased water lead levels, and as a result elevated blood lead levels in young children were observed in the City of Flint, and confirmed by the State Chief Medical Officer.

To mitigate the negative effects of corrosive river water on the infrastructure in the City of Flint, the city switched back to water from DSWS on October 16, 2015. Funding to reconnect to DWSW was provided from the City of Flint, the Charles Stewart Mott Foundation, and the State of Michigan. Water is treated with a supplemental phosphate addition to rebuild the protective layer in the distribution system and reduce the leaching of lead into the water supply.

For the mitigation of negative health effects, over 24,000 water filters and replacement cartridges have been distributed to residents in the City of Flint. Approximately 13,000 water filters, water pitchers and replacement cartridges were distributed by the Michigan Department of Health and Human Services (MDHHS) in the timeframe of October 1 to December 31, 2015 alone. Local nonprofit organizations have provided potable water to Flint residents. MDHHS has increased surveillance of blood lead levels in children, addresses water issues in environmental investigations facilitated to identify lead sources in the environment of affected children, and provide health education and information to residents, health care providers and daycare/educational institutions.

While drops in lead levels have been observed since reconnecting to the DWSW water system, water is still not safe to drink and. Before December 16, 2015, $9.35 million were provided by the State of Michigan, and $6 million by local agencies and nonprofit partners to manage the effects of the corroded pipes.

Subject: IAP objectives and command emphases

Draft objectives, please edit as needed and respond by 12:30

I've compiled them all here. Feel free to address/edit any, but of course you only need to be concerned about those specific to your area of responsibility.

Objectives

Activate the State Recovery Task Force
Ensure coordination between the City of Flint, Genesee County, state and federal agencies, and appropriate medical experts.
Obtain and maintain situational awareness and common operating picture of all activities.
Establish operational period and hours of operations.
Investigate and identify available programs, including the federal Lead Pipe Replacement Program.
Develop a comprehensive GIS strategy
Identify critical resources for acquisition and allocation.
Coordinate response and recovery activities and identify mission areas with MIVOAD.
Facilitate and coordinate technical assistance among state agencies and to local agencies.
Provide technical assistance and facilitate the local Damage Assessment.
Establish a Joint Information Center and identify a public information strategy.
Monitor MI CIMS for resource requests and address as appropriate.
Establish and disseminate cost center information for the incident.

Command Emphasis

Provide regular technical briefings
Identify life safety issues.
Identify priorities.
Provide policy direction by observance of SEOC SOPs.
Coordinate with FEMA.
Provide regular legislative/congressional briefings.

Thanks in advance!!

Subject: Incident Created: 2015-10-01-City of Flint-Water Contamination / Shortage

The Genesee County Health Department has Declared a Public Health Emergency for those using the Flint City Water Supply.

Message Creator: Jenifier Boyer, County of Genesee MGT EM Coordinator (jboyer@co.genesee.mi.us)

For more info log in at: https://micims.state.mi.us

Mike Sobocinski's notes on January 15, 2015 - 2nd daily SEOC briefing (4:00am):

MSP SEOC Planning Section (Amanda Bresler): Goes over upcoming battle rhythm items.

MSP SEOC Operations (Gabe Covey): Must ensure adequate supplies at the pods and the warehouse. Obtain volunteer numbers for tomorrow.

(Health and Environmental Branch: includes the next several agencies, including Red Cross)

MDHHS (Kathy Wald): Getting addresses for medically dependent persons. Following up on "the lab issue from this morning." Offer from SAMSA (?) to activate hot line. [A couple other items too fast to capture in notes.]

MDARD (Brad Deacon): Training staff to be able to test samples, prepare and visit sites.

MDLARA (Alisha Gensler): Helping DEQ with school water testing. [1 comments too fast to capture in notes.]

MDEQ (Jen Wolf): Plan coordinator is establishing teams for the school water testing. By February 6, the whole program will be running, but by next weekend, (some initial more urgent parts of it will be implemented.) 2600 test kits left in the pods (something about 2 days). About 1100 test kits coming in today. Have ordered another 28,000, to arrive in the next couple of weeks. The total amounts to more than one test kit per Flint home since the declaration started. Labs are staying open on the weekend and the Monday holiday.

"Human Services Branch" (Rich Thelen): Processing filter and replacement cartridges – more than 30,000 each. Requested after-hours contact person [I didn't catch where or with whom].

MDOE (Kevin Walters): Working with Civil Rights for student and staff counts for all educational institutions, to deliver the EPA message.

MDHHS (don't know who?) A few I-Pad "hiccups" were clearing up well this afternoon. (Jeannette Doll, MDTMB: over 30,000 [of something] are available through Home Depot.)

MOSA? "Aging and Adult Services" (Steve Betterly): We've sent more than 80 additional addresses to GIS, from the local area agency on aging, for mapping. Working on the Recovery Resource Guide.

ARC (Paul Spata): Operating the Volunteer Reception Center, putting supplies in the field. Coffee was being provided for volunteers, the JIC, etc., and tomorrow this will expand to actually provide meals. 20 volunteers are assigned tomorrow (for kit assembly?) The warehouse and inventory management activity continues.

MSP Public Safety (Matt Bolger): Working on distribution mechanism with ARC. Want to pre-load trucks during the night. Over 50,000 homes visited [if I caught this information correctly]. Volunteer staffing numbers were provided for the coming 3-day weekend period.

MDOC (don't know who?): Adding two 24-foot trucks and drivers. Working to add 5 more for the next operational period.

MDMVA (don't know who?): 34 soldiers active—a couple in the Genesee County EOC and the JIC, and the remaining 32 distributed across the 5 pods.

MDTMB (Jeannette Doll): Received notification of more than 300 identification badges ready to be used this weekend. 30 additional I-Pads, which SEOC GIS will load software onto. A dumpster is headed to Clio Road. Notify that additional traffic will be going to the state lab over the weekend.

Local EOC EMHSD liaison ([garbled name over phone]): Working to re-establish local fire stations as ([distribution/receiving points]). (Capt. Kelenske: The mayor said that samples will not be received there. We must have a consistent message on this topic.)

MSP SEOC Logistics Section (Wendy Galbreath): Two sites are still open, but are moving to consolidate to one at Clio Road warehouse. We want 4 out of the 20 vehicles to be pre-loaded tonight—only 4, so that water won't be frozen in the outdoor temperatures. Rain parkas are on their way to ARC and EOC locations.

MSP SEOC Planning Section (Amanda Bresler): [something] warehouse data, app numbers, [something else] numbers should therefore be available here to analyze.

SEOC Recovery Branch (MSP Brianna Briggs): Good progress today. Plan in place. Supply the pods first, then the teams. Pre-load vehicles with potentially everything needed throughout day, with a resupply then available if needed.

ARC (Lauren Twohig): We want to increase resource teams and daily volume, to increase the number of households reached.

PIO (Nicole Lisabeth): Capt. Kelenske gave a legislative briefing. We updated the talking points. We'd like to issue a news release containing specific numbers on personnel and resource distribution, but we still need to confirm some of these numbers before the press release can be made. The ARC news release will probably be delayed a couple of days. The MING could still get a news release out today. MDHHS has new blood level test results, to be placed online as soon as possible. An inquiry was *received from Jackson, MI regional HHS regarding donated water plus a Wal Mart truck,* but it is best to have a coordinated statewide response over separate individual agency activities. Media were at the Genesee County office building all day today, due to Governor and Mayor meetings. Still awaiting a city PIO at the JIC. Updating web site information on 2-1-1 and other topics. Confusion exists regarding FEMA, which is not actually a source of the water so far. The JIC is getting requests (media and legislative) for the presidential declaration request letter itself. The Governor did release yesterday's letter to Detroit newspapers. (Capt. Kelenske: concerned that information from such a release is not final, and therefore will require clarification.) We're requesting better coordination with Governor's office, etc.

Capt. Kelenske: SEOC operating hours are still 8am to 8pm until the situation stabilizes. Please arrange staffing for your agency. Leave contact information if not directly represented by a person at the SEOC. The JIC should be prepared for an upcoming legislative call with the Captain and FCO, when a response is received on the declaration request. We want to increase MING staff from 50 to over 65, but that will need to be approved first. A group [didn't note who] is doing some sort of mobile testing in Flint. There was an SEOC briefing on stress and emotions, providing handouts with tips—take a minute to obtain and read those. The Lieutenant-Governor is here.

Lt. Gov. Brian Calley: Offering thanks and appreciation. The anxiety level in Flint is being reduced. As immediate needs are being met, longer-term aspects can be more focused on. Thanks for the high level of professionalism under trying and difficult circumstances.

MSP Amanda Bresler: Situation reports due at 6pm. Next briefing will be tomorrow at 9:30am.

Mike Sobocinski's notes on January 15, 2015 - 1st daily SEOC briefing (9:30am):

MSP SEOC Planning Section (Amanda Bresler): Reads off the battle rhythm for the day. Yesterday's IAP was approved.

MSP SEOC Operations (Gabe Covey): The top priority today is tracking to ensure that adequate staff and resources are in the field. We are setting up the Water Resource Teams for the weekend. The Governor had asked for a declaration of both an emergency and disaster by the federal government yesterday. Working to improve coordination with JIC.

National Weather Service (Jim Askow [sp?]): It will be about 40 degrees F all day today but afternoon rains will cause some slippery conditions. Temperatures drop tonight. It will be very cold Saturday through next week. Standing water will freeze in place tomorrow morning. Sunday's high temperature will be about 15 degrees F. Becoming breezy on later days, through next week, again resulting in circumstances in which exposed skin risks frostbite in 15 to 30 minutes outdoors.

Capt. Kelenske: We have intended to give credit to all who were involved, but some agencies were recently missed when trying to list them all.

(Health and Environmental Branch: next several respondents)

[ ] (Kathy Wald): The CHECC will be open Saturday, Sunday, and Monday, helping with the county phone banks on those days. Coordinating with GIS regarding those who are dependent upon medical equipment in their homes. Data is being obtained and provided to GIS. Genesee County Health Department requesting 10,000 copies of an EPA document, so MDTMB will arrange (Capt. Kelenske: or EPA itself can provide them).

MDARD (Brad Deacon): Prioritizing food facilities for follow-up next week. Coordinating with DEQ.

LARA ([?]): 20% of the 244 health facilities [something - too fast for notetaking]

MDEQ (Jen Wolf): Working on teams for the plan [for? and?] testing water [at schools?]. Logistics of 10,000 water bottles' assembly and distribution.

"Human Services Branch" [MDHHS? (Rich, Thelen?)]: Filter and cartridge numbers were stated. Reordering is necessary today. Met with Finance, figuring out stuff with others. (Capt. Kelenske: Yesterday there was a budget meeting with SBO [?].)

MI Dept. of Education (Kevin Wolff): Coordinating with private and parochial schools. [something else didn't catch it]

Dept. of Civil Rights (Mark Bishop): The EPA document is available online in multiple languages, has been handed out at schools. Would be good to coordinate with these other agencies and order more copies to meet everyone's needs.

[ ] (Brian [ ]): door-to-door [something - TOO FAST FOR NOTETAKING!]

State Office Services to the Aging (Steve Betterly): The Valley Area office (and Kathy Bolz) referral issue has been resolved by MSP Michelle Kuzera. 400 new addresses of "my choice waiver clients" [ ] were received and forwarded to GIS. Information on independent and assisted living facilities in Flint (non-regulated congregate settings) to overlay onto the existing heat map. Received question on

Legionnaire's Disease—any connection known? (Capt. Kelenske: no known connection. May need to put out a statement from DHHS or the Governor for PIO use.) Question on whether the heat map (by Dr. Mona Hanna-Attisha) is available to the public. (Capt. Kelenske: It is already available, open source.)

American Red Cross (Paul Spata): Many persons are asking about Legionnaire's Disease at the Flint fire stations. (Capt. Kelenske: Again, we will check this morning with the Governor on how to keep these topics disconnected. It's okay for fire stations to refer people to the web site, but there's a problem with providing handouts there and connecting the topics.) Five sites were staffed by ARC yesterday, but the MI National Guard takes over the staffing today. ARC is supporting the Water Response Teams today, and continuing to operate the Volunteer Reception Center. Supporting the distribution of materials, and providing warehouse operations management.

ARC (Lauren Twohig): Describes some sort of coordination. [too fast for notetaking]

MSP (? Over phone): States various numbers of volunteer state employees. 10 teams are in the field, in wards 5 to 7 of the city. The ARC has an additional 5 teams, focusing on Ward 6. The I-Pad issue was partly the result of low temperatures, and partly related to software and operator handling of the software. Working with MDTMB on software to prevent I-Pad problems. (Capt. Kelenske: If there is a way to weatherproof them, let us know how to help.) Could use rain ponchos. (Capt. Kelenske: Will do.) Various sign-ups so far for working on Saturday (24), Sunday (39), and Monday (46). Working with Penske on truck donations.

MI Dept. of Corrections ([illegible]): Total of 14 vehicles including a handicap-accessible van.

MI National Guard (Lt.-Col. Randall): "O and O" [?] at local EOC. Have been transitioning into pods, which is going well. (Capt. Kelenske: TAG discussions—will provide info separately, soon. No tents are to be used.)

MDTMB (Jeannette Doll): Specialized items are available at the Mundy Township Home Depot, to use in the pilot (such as water bubblers). Volunteer identification badges should be available today. (Capt. Kelenske: We'll discuss re: "Volunteer" on badge design, since not all workers are volunteers.) Something was also said about fuel cards and employee "Survey Monkey" [unclear].

Attorney General (Peter Manning): Will be submitting some legal questions.

MSP SEOC Logistics Section (Wendy Galbreath): Working with Jeannette Doll (MDTMB) on the consolidated warehouse. Today is day 1 of the plan.

MSP SEOC Planning Section (Amanda Bresler): Situation reports due again by 6pm today.

MSP Recovery Branch (Brianna Briggs): Working on the weekend team logistics, and on identifying standardized information to be submitted daily (rather than repeatedly asked for).

PIO/JIC (Nicole Lisabeth): The Governor stopped by at a fire station, unannounced. Positive media regarding the federal declaration request that was made. No known media errors identified lately. A legislative briefing occurs today. There have been a couple requests for the presidential request letter (Capt. Kelenske: Not available publicly yet. Its release is to be discussed first for approval.) Today there are 3 news releases. Potential on Saturday for [something]. Attorney General Schuette: sending out some info on his investigation. Today there is a Time Magazine interview with Dr. Eden Wells. Please notify the JIC of any agency messages that are being sent out. A Governor's statement is being made

today about returning additional powers to the Flint mayor. The Genesee County Health Department is on furlough right now, so people should dial 2-1-1 instead.

MSP Capt. Kelenske: At about 11am, 50,000 phone lines in Flint will receive a message from the Governor. This could cause a spike in calls to 2-1-1 as well as in the demand for supplies. Would like to get a briefing to the Mayor of Flint and to the Governor, summarizing agency actions. Please send bullet points to Gabe Covey (MSP Operations Chief) for him to assemble for this list of specific things being done. More items are better for the list, but each item should be short. SEOC hours will continue to be from 8a to 8p on Saturday, Sunday, and Monday. The #1 focus is on the pods, for distribution of water resources to Flint. If necessary, the field teams will support these pods if there is a need.

Future sample test site	114	52

Mike Sobocinski's notes on January 14, 2015 - 2nd daily SEOC briefing (4:00am):

[NOTE: The initial tactics was much too rapidly paced to take notes on, and its content should be available once the ICS 204 forms are all submitted.]

(Health and Environmental Branch: first several respondents, including Office on Aging)

DHHS (Jennifer [illegible]): Working on nutrition plan and behavioral health work.

MDARD (Brad Deacon): Food guidance went out in today's mail. Now working to prioritize sites in the most at-risk zones (the redder zones on a map) for forthcoming inspections.

MDEQ (Jen Wolf): Only 80 samples are present at Flint, perhaps because the only two collection sites for them are at City Hall and the Water Treatment Plant, and the plant might not be on the bus transit routes. May need to make fire stations into collection points, but indications had been that they didn't want to be responsible. The governor wants 8 teams—staff is needed who have some scientific background. Many bottles are coming in (overseen by American Red Cross[illegible]) Lot testing is needed to verify bottle cleanliness after they've been received from the vendor.

MDLARA (Karen Towne): Supplies were received. Pilot project installation to occur Saturday, with testing on Sunday.

MDHHS (Brian Wilson): Volunteers in the field have been receiving a lot of positive feedback from the community. IPad operation was much better today—fewer delays.

American Red Cross (ARC) (Lauren [illegible]): Standardization of water response teams [??Can't be sure this completely represents her statement - it went by too quickly.]

ARC (Paul Spata): Continued to staff the 5 fire stations. Coordinating with MING regarding their staffing over the weekend.

State Office on Aging (Steve Betterley): Coordination of referrals problem was successfully solved by Michelle Kuzera. Still in the process of identifying senior addresses in Flint who may need assistance.

MSP Public Safety: [some 2330 number rattled off along with a bunch of other stuff. Possibly the number is a cumulative number of doors visited to date by field teams??. Way too much info. presented in too fleeting a manner to capture any of it in written notes. ☹☹☹☹☹☹☹☹☹☹☹☹]

MDMVA/MING (unidentified speaker in SEOC): Hotel rooms confirmed for 35 [something—soldiers?] who will be there. Each pod is to have a government phone (and?) Blackberries. List provided to planners. Providing liaison to local EOC and a PIO to the JIC.

MDTMB (Jeannette Doll): Four U-Haul trucks were obtained. Working on resource requests all day.

Local EOC MSP Liaison (Lt. B.J. Roach): Working with churches to coordinate. (Capt. Kelenske: Is a person available to handle that duty and thus free her up for many other tasks?)

MSP Logistics (Wendy Galbreath): Many requests regarding volunteer donations. Penske offered 15 to 20 trucks, Dean transportation has drivers available. Confusion regarding whether to go to EOC or to GCCARD, but that's now cleared up. MSHDA's 24 Flint properties are to get filters installed. "Zero water" [??] news event—to offer match (i.e. donations) of filters.

MSP SEOC Planning (Amanda Bresler): Logistics resource plan and IAP work today—need info as soon as possible. Situation reports are due by 6pm.

MSP Recovery Team (Kriste Davis): Planning involving the teams and coordination (mostly covered by others).

JIC/PIO (Shannon [redacted]): The email for state employees has been drafted, and is being reviewed. Several media requests received for warehouse events but need to be delayed until the transition is done and the warehouse is operating smoothly (in about 2 days?). Found no major media errors today. Many questions are pending and the list of them is growing in number—need info from the SEOC to answer them—especially needed for rumor control, since the same questions are being asked by activists. Trouble getting in contact with local community PIOs and need help to contact them. (Capt. Kelenske: need documentation of unsuccessful contact efforts, and submission of an actual list of questions; a follow-up call will occur on this topic.)

Capt. Kelenske: Met with TAG ([redacted]) today—General Vadinez ([redacted]). There's an issue involving used empty water bottles—a recycling system needs to be provided (regardless of whether it actually receives widespread use) so there isn't an issue with empty bottles everywhere. West Virginia has an after-action report which probably has good ideas about handling this. The next briefing will be tomorrow at 9:30am.

1. Situation:

There are 45,000 active water meters in the impacted area
As of 2130 on 01.13.16 17, 276 households have received water filters
MAP

2. Mission Statement:

Ensure all households within the impacted area have the required resources

3. Execution
   a. Commander's Intent
      i. Distribute filters and additional resources to all impacted households within 5 days. The priority of effort is the Fixed Points of Distribution (PODs).
   b. Concept of Operations
      i. Distribution of resources will be conducted using 4 methods: Fixed PODs, Mobile Distribution Teams, Rapid Response Distributions, and Local Partner Distributions.
      ii. Tasks
         i. Fixed PODs
            1. Red Cross will staff all sites through ~~XXX~~1/14
            2. Red Cross will conduct transition brief with Michigan National Guard on ~~XXX~~1/15
            3. Michigan National Guard will assume staffing responsibility as of ~~XXX~~1/15
         ii. Mobile Distribution is being conducted via Water ~~Resource~~ Response Teams
            1. Recovery Branch Support will determine Water ~~Resource~~ Response Team composition, standards, resource requirements, and priority areas for distribution
            2. Michigan State Police will provide command and control (assemble, coordinate, monitor) of Water ~~Resource~~ Response Teams
         iii. Rapid Response Distributions
            1. Local EOC Operations Section Chief/District Coordinator will approve partner requests for distribution support
            2. Local EOC Operations Logistics will execute Rapid Response Distributions
         iv. Local Partner Distributions
            1. Local EOC Operations Section Chief/District Coordinator will approve partner requests for distribution support
            2. XXX will execute partner requests for distribution support
   c. Coordinating Instructions
      i. Fixed PODs are located at 5 fire stations.
         i. POD Locations

Water Resource Site Fire Station 1	310 East Fifth, Flint, MI 48502	0900-2100
Water Resource Site Fire Station 3	1525 Martin Luther King Ave. Flint, MI 48503	0900-2100
Water Resource Site Fire Station 5	3402 Western Rd, Flint, MI	0900-2100
Water Resource Site Fire Station 6	716 West Pierson Rd, Flint, MI	0900-2100

	48505	
Water Resource Site Fire Station 8	202 East Atherton, Flint, MI 48507	0900-2100

2. POD Product Composition
    1. **NEED FROM SHAWN**

ii. Mobile Distribution is being conducted via Water ~~Resource~~ Response Teams
1. **Assembly area**
2. **Mission Ready Packets**

iii. Rapid Response Distributions
1. **NEED PROCESS FROM MICHELLE**

iv. *Local Partner Distributions*
1. **NEED PROCESS FROM MICHELLE**

d. Concept of Support

i. *Resourcing support for all distribution methods will be provided via a consolidated* logistics pipeline. Replenishment will be conducted automatically and on demand. Reception, Staging, and Onward Integration (RSOI) of material resources will be managed via a warehouse system and RSOI of personnel resources will be managed via a *Volunteer Reception Center and XXX (State Employees)*

ii. Tasks
1. SEOC Logistics Section Chief is accountable for resourcing support for all distribution methods and maintaining end to end visibility of all resources requests
2. SEOC Logistics Order Unit~~Support~~ Staff is accountable for maintaining the Pipeline Report to ensure accurate resource tracking
3. Red Cross Warehouse Managers will provide warehouse management and are accountable to the SEOC Logistics Section Chief
~~3.~~4. SEOC Planning Resources Unit is responsible for tracking resources that are deployed.
4. Red Cross will manage the Volunteer Reception Center in coordination w/ local EOC
5. Local EOC Logistics will provide logistics support to the Rapid Response Distributions

iii. Warehouse System
1. Currently operating 3 locations with intent to consolidate to single, central location

Name	Location	Hours of Operation	POC
GCARD	2727 Lippincott, Flint , MI		Shawn
Clio	4315 North Clio Road, Flint, MI	Somehow mark this as the final warehouse were	John Foust

		everything will go???	
Court	3086 East Court Street		John Foust

iv. Volunteer Reception Center
   1. 1 location managed by American Red Cross
   2. The volunteer intake process takes 20-30 minutes.

Name	Location	Hours of Operation	POC
American Red Cross	1401 S Grand Traverse Flint, Mi 48503	0900-1900	

v. Resource Request and Tracking Process
   1. Pipeline Report
   2. ~~https://goo.gl/G31kyJhttps://docs.google.com/spreadsheets/d/1wXVQvQ2lJ6N-ORpo8bytBIEQJrDxkyoPg-EiZRtNepg/edit?usp=sharing~~
   2. All resource requests and offers of support (people, product, facilities, vehicles, etc) will be entered into MI CIMS as a resource request to the SEOC Logistic Section Chief.
   3. The SEOC Logistic Section Chief, will task it out to the State or Volunteer Agency that can fill that request or procure as necessary
   4. All resource requests and offers of support will be tracked and monitored via the Pipeline report (Google docs collaboration document)
   5. Warehouse inventories will be sent to the SEOC Logistic Section Chief, daily at 1800 and incorporated into the Pipeline report
   6. Volunteer Workforce Request for Volunteer Reception Center
      1. REQUIRED INFORMATION:
         i. Who is the Point Of Contact?
         ii. Who is the supervisor?
         iii. Where do volunteers report?
         iv. What Dates are volunteers needed?
         v. What times are volunteers needed?
         vi. How many volunteers are needed?
         vii. Who is providing transportation for the volunteers?
         viii. Who is providing meals, snacks and beverages?
         ix. Are there any qualifications needed?
         x. IMPORTANT NOTE:
            - Brief job description is required
            - The requestor of the volunteers must understand they assume responsibility for the volunteer's safety and the volunteer's actions.
            - The requestor of the volunteers are responsible for managing and providing direction.
            - 48 hour advance notification required for request.
            - Reasonable expectations of the volunteer workforce

2. POD inventory will be provided to local EOC or SEOC Planning resource unit (this needs to be determined) hourly

Formatted

3. POD distribution report provided to local EOC or SEOC Planning resource unit (this needs to be determined) at 1200 and 1800. (This is a list of equipment that has been taken off the trucks and put in the PODs).
4. Fixed PODs, SEOC Planning resource unit needs to know total staff from each agency for tracking at 1000 each day.
5. Mobile Distribution is being conducted via Water Response Teams, SEOC Planning resource unit needs to know total staff from each agency for tracking at 1000 each day.
6. Mobile Distribution is being conducted via Water Response Teams, SEOC Planning resource unit needs to know amounts that have been distributed for tracking at 1800 each day.
7. Rapid Response Distributions, SEOC Planning resource unit needs to know amounts that have been distributed for tracking at 1800 each day.
8. Local Partner Distributions, SEOC Planning resource unit needs to know amounts that have been distributed for tracking at 1800 each day.
9.

Distribution Reporting

1. Situation:

There are 45,000 active water meters in the impacted area
As of 2130 on 01.13.16 17, 276 households have received water filters
MAP

2. Mission Statement:

Ensure all households within the impacted area have the required resources

3. Execution
   a. Commander's Intent
      i. Distribute filters and additional resources to all impacted households within 5 days. The priority of effort is the Fixed Points of Distribution (PODs).
   b. Concept of Operations
      i. Distribution of resources will be conducted using 4 methods: Fixed PODs, Mobile Distribution Teams, Rapid Response Distributions, and Local Partner Distributions.
      ii. Tasks
         i. Fixed PODs
            1. Red Cross will staff all sites through XXX
            2. Red Cross will conduct transition brief with Michigan National Guard on XXX
            3. Michigan National Guard will assume staffing responsibility as of XXX
         ii. Mobile Distribution is being conducted via Water Resource Teams
            1. Recovery Branch Support will determine Water Resource Team composition, standards, resource requirements, and priority areas for distribution
            2. Michigan State Police will provide command and control (assemble, coordinate, monitor) of Water Resource Teams
         iii. Rapid Response Distributions
            1. Local EOC Operations Section Chief/District Coordinator will approve partner requests for distribution support
            2. Local EOC Operations Logistics will execute Rapid Response Distributions
         iv. Local Partner Distributions
            1. Local EOC Operations Section Chief/District Coordinator will approve partner requests for distribution support
            2. XXX will execute partner requests for distribution support
   c. Coordinating Instructions
      i. Fixed PODs are located at 5 fire stations.
         i. POD Locations

Water Resource Site Fire Station 1	310 East Fifth, Flint, MI 48502	0900-2100
Water Resource Site Fire Station 3	1525 Martin Luther King Ave, Flint, MI 48503	0900-2100
Water Resource Site Fire Station 5	3402 Western, Flint, MI 48506	0900-2100

Water Resource Site Fire Station 6	716 West Pierson, Flint, MI 48505	-0900-2100
Water Resource Site Fire Station 8	202 East Atherton, Flint, MI 48507	-0900-2100

2. POD Product Composition
    1. **NEED FROM SHAWN**

ii. Mobile Distribution is being conducted via Water Resource Teams
    1. **Assembly area**
    2. **Mission Ready Packets**

iii. Rapid Response Distributions
    1. **NEED PROCESS FROM MICHELLE**

iv. Local Partner Distributions
    1. ***NEED PROCESS FROM MICHELLE***

d. Concept of Support
    i. Resourcing support for all distribution methods will be provided via a consolidated logistics pipeline. Replenishment will be conducted automatically and on demand. Reception, Staging, and Onward Integration (RSOI) of material resources will be managed via a warehouse system and RSOI of personnel resources will be managed via a Volunteer Reception Center and XXX (State Employees)

    ii. Tasks
        1. SEOC Logistics Section Chief is accountable for resourcing support for all distribution methods and maintaining end to end visibility of all resources
        2. SEOC Logistics Support Staff is accountable for maintaining the Pipeline Report to ensure accurate resource tracking
        3. Red Cross Warehouse Managers will provide warehouse management and are accountable to the SEOC Logistics Section Chief
        4. Red Cross will manage the Volunteer Reception Center
        5. Local EOC Logistics will provide logistics support to the Rapid Response Distributions

Comment [JE1]: To get resources for this operation should local EOC call SEOC or Logistics? -Jay

    iii. Warehouse System
        1. Currently operating 3 locations with intent to consolidate to single, central location

Name	Location	Hours of Operation	POC
GCARD	2727 Lippincott, Flint, MI		Shawn
Clio	4315 North Clio Road, Flint, MI		John Foust
Court	3086 East Court Street		John Foust

    iv. Volunteer Reception Center
        1. 1 location managed by American Red Cross
        2. The volunteer intake process takes 20-30 minutes.

Name	Location	Hours of Operation	POC
American Red Cross	1401 S Grand Traverse Flint, Mi 48503	0900-1900	

v. Resource Request and Tracking Process

1. Pipeline Report
   https://docs.google.com/spreadsheets/d/1wXVQvQ2IJ6N_ORpo8bvtBIEQJrDxkyoPg-EiZRtNepg/edit?usp=sharing

Comment [JE2]: In the google doc Henrik is listed as the local logistics POC. He is planning section in the EOC. Jay Eickholt is the current Logistics POC.

2. All resource requests and offers of support (people, product, facilities, vehicles, etc) will be entered into MI CIMS as a resource request to the SEOC Logistic Section Chief.
3. The SEOC Logistic Section Chief. will task it out to the State or Volunteer Agency that can fill that request or procure as necessary
4. All resource requests and offers of support will be tracked and monitored via the Pipeline report (Google docs collaboration document)
5. Warehouse Inventories will be sent to the SEOC Logistic Section Chief. daily at 1800 and incorporated into the Pipeline report
6. Volunteer Workforce Request for Volunteer Reception Center
   1. REQUIRED INFORMATION:
      i. Who is the Point Of Contact?
      ii. Who is the supervisor?
      iii. Where do volunteers report?
      iv. What Dates are volunteers needed?
      v. What times are volunteers needed?
      vi. How many volunteers are needed?
      vii. Who is providing transportation for the volunteers?
      viii. Who is providing meals, snacks and beverages?
      ix. Are there any qualifications needed?
      x. IMPORTANT NOTE:
         - Brief job description is required
         - The requestor of the volunteers must understand they assume responsibility for the volunteer's safety and the volunteer's actions.
         - The requestor of the volunteers are responsible for managing and providing direction.
         - 48 hour advance notification required for request.
         - Reasonable expectations of the volunteer workforce

Distribution Reporting

Mike Sobocinski's notes on January 14, 2015 - 1st daily SEOC briefing (9:30am):

MSP SEOC Planning (Amanda Bresler): A 10:30am distribution process meeting has been added to the battle rhythm. Today is a "planning day" [this phrase was still not clearly explained but might refer to the development of a new IAP]. 12:30pm submission deadline for the ICS 204 form. Developing the IAP for the next operational period. (Numerous objectives were read aloud.)

MDEQ (George [redacted]): There's been a question of when the water is to be considered safe. A tentative SEOC answer (*not for public dissemination yet*) – since the question is complex, it will result from a consensus decision of all major partners, including locals. Copper and lead rules: a new 6-month monitoring period has just begun in Flint, involving a June 30 deadline for 60 samples to be tested for Cu, Pb. This routine schedule is of course too long for our current circumstances. Since December 9, phosphate supplements had been added to discourage pipe corrosion, rebuild a protective layer. There's a meeting with the Flint mayor regarding various system access points beyond the Pb and Cu rule's minimum test requirements. Seeking resident volunteers for monthly water test, to start analyzing trends over time. (Capt. Kelenske: It's being asked during the door-to-door visits, and over 60 so far have agreed. This info will be sent to DEQ.)

MSP SEOC Operations Section (Gabe Covey): An additional 80,000 square feet of warehouse space has been secured.

National Weather Service (Jim Askew[redacted]): Temperatures go up to the freezing point today. A mixture of snow and drizzle with the potential for icy roads where roads have been left untreated. Tomorrow from about 11am until about 6pm we expect rain showers, with the high temperatures around 40 degrees F. Not too much rain, a little ponding potential. Then from Friday evening, a little snow, as Saturday temperatures would be back down in the teens again and also during next week. Just one brief warm-up over the next day.

(Health and Environmental Branch, next few agencies)

MDHHS (Jennifer [redacted]): Subject matter experts are in the CHECC working on yesterday's question regarding emergency vs. disaster eligibility of a particular program under the Stafford Act. Working on the stress effects of the event upon mental health. Developing educational materials and messaging. Developing short and long-term goals regarding the "food desert situation." [NOTE: Afterward, I gave her my contact info to join discussion of definitions and alternatives, related transportation access ideas such as providing paid bus passes to improve food access]

MDARD (Brad Deacon): A revised handout was approved and is being mailed out to food service locations, and web posting. Inspections of these locations will begin.

MDLARA (Karen Towne): Something about a pilot project (involving, or in addition to) insulation and retesting. There's a question involving licensed in-home child-care facilities (up to 6 kids) and asking them whether they want to be water testing sites. Will research whether the authority exists to require testing.

MDEQ (Jen Wolf): Ensuring the transport and storage of water test kits. Heard a report of non-residential (e.g. businesses) told that the kits were only for residential units, but this is not true and therefore must be corrected. Test kits, etc. are free to all, not just residential: "No one gets turned away for anything."

MDHHS (Richard Thelen): A database with more than 17,000 addresses was supplied to the GIS section. 2-1-1 inquiry regarding whether State Emergency Relief (SER) is available. Will need to develop messaging on this topic, to explain to everyone what it is and what is available.

Lauren (Edren?) of the American Red Cross?: A logistics pipeline plan [is/was/is being] developed.

American Red Cross (Paul Spata): Volunteer Reception Center was opened but not yet publicized, because it's first day was to test its processes to ensure they will be up to speed. About 6 volunteers were processed yesterday. Today, it should be fully open. Ten emergency response vehicles were staged to support the response teams in the field.

Department of Education (Louie Burgess): Receiving calls from federal level regarding things like unlicensed child care centers (residential, for up to 4 kids at a time). Checking into information for those inquiries. A 17-level departmental director is now on the educational planning team. The department is seeking contact with the Flint school district for something... [very unclear]

MDHHS (Brian Wilson): Volunteers remain active in Flint.

State Office on Aging (Steve Betterley): Sent at least 500 additional names to GIS staff yesterday. The Valley Area Agency on Aging raised a question regarding GCCARD: something about it not being involved in something [I didn't discern the details in any coherent way], and Michelle Kuzera, MSP representative at the local EOC, will follow up with Kathy Bolz (sp?) to resolve the issue. Getting information on *Medicaid waiver clients. Teri Simmons (sp?) will represent this office for the 4pm briefing.*

MSP Public Safety (Inspector Bolger): MSP is at the local EOC. [Phone-in participants interrupted numerous times with information; I'm not totally sure who said what in the end.] Buses are being used to shuttle residents. 36 MSP volunteers available today for Flint activities. Adequate filters and water are on hand right now (at least 1000). Wrapping up with the southwest side of Flint today, and proceeding to the north and northeast sides starting tomorrow. Discussion about different teams having different sizes, creating confusion over estimates of how many total persons are on them...between 4 and 15 persons per team? (Captain Kelenske directs a standardized number on each team, with accurate summary info presented to him in writing. A 10:30am follow-up call was agreed to.) Obtained trailers were not all adequate for their required purpose, such as being open-top trailers—situation must be resolved.

MDMVA / MING (?): All went well yesterday with the National Guard soldiers posted at the fire stations. More than 30 troops are being used today. 1pm media address occurring today. Tomorrow at 9am, 3 soldiers will be assigned to each fire station.

MDTMB (Jeannette Doll): Getting water moved over to Clio. A water-order program is in process. U-Haul trucks are being ordered to fill the MSP resource transportation needs. Have upgraded now to a $30 million Home Depot contract. Replacement filters are important for long-term recovery.

Local EMHSD Liaison [MSP's Michelle Kuzera]: Working on planning tasks and processes for the homebound.

MSP SEOC Logistics (Wendy Galbreath): Site visit took place yesterday (with Lauren) to check into new locations. Three locations are now moving toward one large location at Clio Road, which has its own experienced crew for loading and unloading trucks, plus a Red Cross warehouse manager. Daily logistics meetings now occur at 10:30am (brief) and at 7pm (longer). Court Street and GCCARD will have their resources moved to and consolidated at Clio. (MSP's Kriste Davis: Mission-ready packages MRPs. Working toward standardized teams of similar size, plan being pushed up to work on it today. Yesterday's final numbers turned out to be 492 occupied homes visited (total 653, implied to include vacant ones).) About 2 minutes per door – a good rate of field work.

PIO/JIC (Shannon ?): Reviewing fact sheets. Michigan Association of Broadcasters sending radio PSA today. Received a request for door-to-door team credentialing (with official ID). If this is to be used, info will be needed for official distribution. (Capt. Kelenske: Each team has either a sheriff or MSP vehicle, "marked unit car." Someone else: the problem may be when teams cover an entire block, with the 1 vehicle not easily visible to every household.)

MSP Planning (Amanda Bresler): Improving the pod technology thanks to MSP James Tchorzynski's work there. Meeting with agencies to help with ICS 204 forms. 6pm situation reports are due. Next briefing will be at 4pm.

Capt. Kelenske: Senator Arenic(?) was met with and shown the SEOC; appeared impressed.

1. Situation:

There are 45,000 active water meters in the impacted area
As of 2130 on 01.13.16 17, 276 households have received water filters
MAP

2. Mission Statement:

Ensure all households within the impacted area have the required resources

3. Execution
    a. Commander's Intent
        i. Distribute filters and additional resources to all impacted households within 5 days. The priority of effort is the Fixed Points of Distribution (PODs).

Recovery Branch – 1/13/16 6:00 pm

- Coordinating with Red Cross on volunteers for weekend
- *Ordered 15 passenger vans to transport teams 1/14-1/15*
- Contacted Comcast to coordinate volunteer opportunities- awaiting response of number of potential volunteers.
- Coordinated trucks and drivers with Corrections to deploy on 1/14-1/15
- Coordinated tracking numbers with GIS:

Overall Numbers:		**1/13/2016**
Occupied Homes	533	291
Vacant Homes	238	86
Total Homes	**771**	377
Resources		
Door Hangars	473	256
Water	265	148

Pitchers	9	6
Water test kits	92	44
Replacement Filter	93	93
Total Resources Dispersed	**1167**	
Future sample test site	62	34

Mike Sobocinski's notes on January 13, 2015 - 2nd daily SEOC briefing (4:00pm):

MSP SEOC (Brianna Briggs): leads the meeting: Agency situation reports are due by 6pm. "Tomorrow is a planning day." [No explanation for this statement was provided.] Agencies, be sure to update 204 forms tactics, especially pods, teams, warehouses, etc.

(Health and Environmental Branch, next few agencies) MDHHS Community Health (Kathy Wahl [sp?]): Working on nutritional plan with several other agencies. Lori ([Laura?] Sempler ([sp?]) will be the lead on that plan. *Disaster behavioral health coordination is occurring, with CHECC exploring options, checking* with DTAC at SAMSA [references not explained], targeted to Stafford Act qualifications. (Capt. Kelenske: does it qualify under an emergency such as this? This needs to be verified.) Some wording changes were suggested for the fact sheet.

MDARD (Brad Deacon): Mailing out food establishment requirements—about 800 of them.

MDEQ (Jen Wolf): Conversation about bringing more health people into the ([local?]) EOC.

M???: *Two of the 5 trucks loaded with water filters are at the GCCARD. 10,700 filters,* [two other large numbers were given for other types of resource there, rattled off too quickly for my poor & tired writing hand to keep up with]

American Red Cross (Paul Spata): Staffing fire station points of distribution. Further coordination with MI National Guard (MING) on staffing. Volunteer reception center was up today; numbers to be reported in the sit rep tonight. *Fielding a request to feed field response teams.*

MDHHS (Brian Wilson): Their volunteers are still in the field. Heard concerns about some IPads not *functioning in the cold, then seemed to work better? Awaiting confirmation of replenished stock.*

Offices of Services on Aging (Steve Betterly): Valley Area Agency on Aging has been fielding calls. *Something fell apart regarding the schedule of water/filter deliveries—need to get in touch with local* EOC on this. (Brian Wilson: probably fixed last night.) (Michelle Kuzera?: Local EOC confirms follow-up to occur [She disappears from phone suddenly, not to reappear]).

Capt. Kelenske: Any more personnel needed by the Sheriff's department for deliveries?

[Unknown replacement on phone from local EOC]: Being handled okay by the locals so far.

Capt. Kelenske: Consider replacing sheriff staff with area health and social work specialists, to better match staff with their expertise and free up sheriff personnel for their normal duties. (Services on Aging ([steve?]): off-duty teams are available to help with phone lines and resource distribution.)

MSP: Working with MDOT for shuttle vans, working with Public Affairs re: state agency volunteers for the weekend.

MI National Guard (Colonel Reynolds): 1 full-time staff at each of the 5 "pods." Friday morning 9am will resume handing out water at the pods. 800 MHz channel. MING needed 33 volunteers, and actually

obtained 48. (Capt. Kelenske: Any feedback on public reaction or questions re: MING soldier presence? A: not known.)

MDTMB (Jeannette Doll): A warehouse has been located at another site. Red Cross and MSP Wendy Galbreath are checking it out as a replacement for the other site that had problems (Court Street school district site). Stuff is to be moved from the old to new site. Based upon truck loads, will be maintaining 8 truck loads per day through Saturday, available on Sunday too, if needed. 117,000 filters coming in, and 139,000 faucet (founts???). Tablets are coming in tonight to the EOC for GIS staff to download an app, then going to Flint in the morning. Information cards sent to Flint. 15 trucks are waiting. (Capt. Kelenske: They must offload somewhere and not wait.) Only 1 loading dock at each facility. Court Street won't work—told that it was vacant and had 80,000 square feet, but it was full. (Someone on phone, Jackie Hampton perhaps?, later announces that the site will be available tonight, after all. Commissioner Curtis had prompted warehouse emptying which is allowing trucks to be moved there now. Equipment and staff available to unload, with warehouse reportedly able to be cleared out tonight. A Dort Highway location is being investigated for suitability.)

Local EOC (unknown person): Information entry and radio [channels?] seem good. Only the issue of supplies waiting on the road (presumably: on trucks or in transport) must be cleared up.

MSP SEOC Logistics (Penny Burger): Working on trailers and vehicles from Department of Corrections, for door-to-door campaign. Coordinating with MSP for Thursday and Friday volunteers. Financial analysis being finished up—to be reviewed first by Captain Kelenske before submission.

MSP SOEC Planning (Zach Baker? Couldn't see across room.): Progress on tracking inventory. Sit reps due at 6pm.

MSP SEOC Recovery Team (Kriste Davis): Some numbers may not be in yet—issue of paper substitute for frozen IPads. 394 homes were visited yesterday, plus 378 more today, possibly more, once additional reports are processed. Even if number appears lower today, there was a smaller number of vacant homes today, so the actual number of inhabited homes is higher today. Working with the Red Cross this weekend for teams. Monday is a holiday. (Capt. Kelenske: Any info on community reaction? A: No info yet.)

JIC/PIO (Shannon Banner): Media hotline saw a markedly increased number of calls, although it was not overloaded. Some media questions need answers to come from the SEOC. Good collaboration with 2-1-1, county, and state agency PIOs. Could use the local PIO today, though. From 11:30a to 12:30p there was a media briefing at fire station #3—very good media turnout, positive in tone. Waiting for the logo approval (from local and county) for the response team. (Capt. Kelenske: How is 2-1-1 doing—being monitored for success of call handling, good staffing levels, etc.? Nicole Lisabeth [JIC/PIO]: 2-1-1 is going well.

(Phone discussion regarding Legionnaire's disease report—unclear who the participants were.)

Capt. Kelenske: DHHS will handle those Legionnaire's-related questions through separate, normal channels, not through the SEOC or local EOC but through other channels, as a separate matter.

SEOC Planning Brianna Briggs: The next briefing will be tomorrow at 9:30am.

1/13/16

FEMA/National Guard Press Release Talking Points:

- Governor has requested support from FEMA
  - Coordinate interagency recovery plan
  - Identify federal agencies that have programs, authorities, and technical expertise to assist
  - At this point there is not a federal declaration. FEMA is not currently sending supplies to this incident.
- Governor issued EO to activate Michigan National Guard
  - Will help staff water resource sites to support the distribution of bottled watered, water filters, replacement cartridges and water testing kits
  - National Guard personnel will not be going door to door with the water resource teams
  - National Guard is uniquely prepared and trained to respond quickly in emergency situations
  - Arrive in Flint Wednesday
  - Expect more than 30 personnel by Friday
  - Second time Governor has issued EO activating the National Guard
    - Last time was for the Duck Lake Fire in Luce County in May, 2012
  - Per Michigan Emergency Management Plan, the Michigan State Police Director or her designee is responsible for coordinating all state efforts, including the Michigan National Guard
  - Activation of the Michigan National Guard will enable volunteers from the American Red Cross, who have been staffing the water resource sites, to join the water distribution teams
- Flint residents can continue to pick up free bottled water, water filters, replacement cartridges and home water testing kits at water resource sites
- Governor declared State of Emergency in Flint on Jan. 5
- Water resource sites were established Jan. 9
- Water resource teams began going door-to-door on Jan. 12

Mike Sobocinski's notes on January 13, 2015 SEOC briefing (9:30am):

MSP SEOC Planning chief (Amanda Bresler): leads the meeting: Agency situation reports are due by 6pm. A new IAP is available. Agencies need to update their "204 forms" throughout the day.

National Weather Service (Jim Askill): Still cautioning about the potential for frostbite in 30 minutes or less (for exposed skin outdoors). Tomorrow's temperatures are expected to rise to about the freezing point (32 degrees F). Possible light rain on Friday could cause icy roads. The weekend will be a little colder, with occasional snow.

MDHHS ([redacted]): CHECC is working on a nutritional plan with other agencies. The plan could address education, short-range and long-range goals, and the mitigation of lead vulnerabilities, perhaps working with a farmer's market. Reference to Flint as a "food desert" and to perhaps open a decent grocery store there. A potential lead impact document has been submitted to planning. Currently considering mental health impacts and resources. Following up with local health departments to determine their staff and support needs.

MDARD (Brad Deacon): A document was approved: Requirements for Licensed Food Establishments using City of Flint Water.

MDLARA ([redacted]): Coordinating with MDEQ. MIOSHA scientists are to help with residential water testing.

MDEQ (Jen Wolf): Extra staff are in Flint today to help with kits. A field observer is helping to organize and plan for the transport of kits to the lab. Helping with the request for a presidential declaration.

Human Services ([redacted]) (Rich [redacted]): Reports "zero filtration products" at the fire stations as "Good job!" [Unclear to me exactly what and why he is reporting as good] Regarding trucks, information is needed about the quantities on them, being distributed.

American Red Cross (Paul Spata): Five fire stations are staffed for resource distribution. [something] management team for GCCARD (Genesee County Community Action Resource Department). Began [? just the start of ARC involvement, does he mean?] assembling water testing kits. Volunteer reception center is active today. "Lauren" [who??] was brought in for logistics planning in the SEOC.

MDHHS (Brian Wilson): Staff volunteers are on site to help with distribution.

[also MDHHS] (Steve Federly): Valley Aging is "extracting" data on seniors for use by GIS.

Michigan State Police ([redacted]): Teams are out now, matched with sheriff personnel. G-event channels were set up on 800 MHz radio: 9 is the primary and 10 is the secondary channel.

Michigan Department of Corrections (Brent Travelbee): Teams are in the area, assisting. A 50' truck was delivered to the food bank. Local shuttle bus will start tomorrow in the area, able to take about 20 persons at a time to obtain resources.

Michigan National Guard (Chad Randall): Some soldiers are to help at distribution points. Just one per location. MING leaders meeting with Flint mayor today.

MDTMB (Jeannette Doll): There is [some sort of unclear] issue with the Court Street warehouse...something which sounded like it involved its seller having a $2 million liability on it. Might need a food-grade warehouse [not sure whether I heard this phrase correctly]. Working on resource requests and replacement cartridges and water.

MSP SEOC Logistics (Penny Burger): Every agency remember to update past assignments and resource requests in MI CIMS. There's been a request for a budget projection of total costs for this year, which would be hard to do more than just guess at right now.

Recovery Team (Brianna Briggs): "Water Resource Teams" are in the field—that is their official name and is to be used. Could place and maintain an extra 15 teams in the field (Friday). Working with Red *Cross to assemble real-time data from "pods" at the fire stations.*

PIO/JIC (Nicole Lisabeth): Set up [something; could not make it out]. Good media reports at 11pm last night. Monitoring media and clarifying the role of the MI National Guard, who are at resource sites, not going door to door. Red Cross is dealing with distracting media personnel at water distribution sites. Flint's bus system is now including water resource sites on its routes. Arabic-language information card is proceeding ahead, and logo/branding of water resource teams is being worked on. There was some sort of Legionnaire's Disease report in the media today, according to MDHHS.

MSP SEOC Planning section (Amada Bresler): Resource list to integrate with fire stations and local EOC info. The next briefing is at 4pm today.

- MDHHS
  - CHEC working on updating contact list in registry
  - Looking into information for people with functional needs
  - Researching disaster behavioral health planning
  - Working with partners for nutrition planning
- MDARD
  - Food safety – updated guidance document for retail anf restauruant water usage
  - Scheduling water smapling and testing next week, need map overlay of priorotuy areas and food estbalsihments
  - 3 animal shelters in flint are not on flint water
  - 2 clinincs on water system, MDARD will be following up with them
  - MDARD researching opps. Regarding nutrition and donations mgnt. Needs
- LARA
  - Nothing
- DEQ
  - 7601 water test bottles at warehouse pending analysis
  - Requested additional staff for testing and tracking
    - Trouble coordinating with City as they are not in the local EOC
  - May need tracking system for test smaples
- MDCH
  - Filter truck arrived
    - Next shipment for 1800 tonight (12,500 filters)
- ARC
  - Provided volunteers for PODs, warehouse – added staff to manage inventory
  - Starting VRC tomorrow
- Brian Wilson
  - Door to door distro getting positive remarks
  - Idnetified 16 DHHS volunteers for this weeks door to door distro
- DTMB
  - Procured additional filters/cartridges
  - DTMB real estate finalizing lease for 100,000sqf warehouse
  - 1400 testing kits delivered to lansing
  - 3 more trucks being deployed for door to door deliveries
  - 12 trucks of water to 3 warehouse sites?
  - 27000 brita filters
  - 27500 pur filters
  - 12000 pur filters
  - 40000 pur 3-pack filters
- MSP
  - Requesting IPADs from DTMB to support additional door to door teams
  - Corrections providing some trucks and staff

- NWS
  - Snow on and off tonight
  - 5-10 degrees overnight with blowing snow and winds
  - Less than inch of accumulation tomorrow
  - Thursday-Friday, snow, near freezing, maybe rain Friday night
- Logistics
  - Keep updating task/resource assignments
- Finance
  - Nancy and Kevin are here as back up, developing cost projections
- Recovery
  - Working on logistics of more door to door teams
  - Fifth team starting tomorrow
  - 1530-292 homes
    - 120 were vacant homes
    - 153 door hangers
    - 75 cases water
    - 73 filters
    - 2 pitchers
    - 33 test kits
    - Total reources: 336
    - 18 homes offerd to be future sample site
- Corrections
  - 53' truck deliverd to food bank in morning, pallet jacks and five vans to Flint
- PIO
  - Media overview
    - NY Times did internview with DEQ nd DHHS
    - FOIA request sent to DHHS for all investigation materials
    - CBS This Morning requested FEMA Liaison interview
    - Governor issued release with PSA video
    - High demand for media on numbers of state actions
    - Good coverage of teams going door to door
    - Developing MDARD fact sheet
    - DOE prepared letter for schools on lead testing
    - Need local PIO in JIC – Red Cross is there
    - Media questions on number of teams going out
    - Monitoring MLK Day protesting
    - One post about protest in Lansing on Thursday
    - Requested to all state agencies for any available PIOs
    - Rep. Kilde sent letter to White House about what he thinks state should be requesting.
- Planning

    - Tracking sheet developed
        - GCCARD still difficult to monitor
    - Pending changes, IAP approval tonight
    - SitRep needed by 6pm tonight
- Director
    - Great progress
    - Hesitant in accolades
    - JIC – media will continue to drive as what state is doing. Refer back to what county/state are doing.
    - Evaluating need for NG resources.

Flint Water Crisis
Community Volunteer Resource Center (VRC)
Event-Based Volunteer Engagement

Overview:

Damaged infrastructure and the leaching of lead into the city's water caused damage to public and private water infrastructure and has caused or threatened to cause elevated blood lead levels especially in the population of children and pregnant women. The water situation has resulted in an immediate threat to public health and safety and disrupted vital community services. The city, county and state have all declared a state of emergency and have begun distributing required resources on a city-wide level. Stakeholders, (ex. NGOs, faith-based organizations, businesses and government agencies), acknowledge that a critical component of the Flint Water Crisis response and recovery is a sustainable community volunteer staffing solution.

Purpose:

The purpose of the Volunteer Reception Center (VRC) is to leverage the community partner agencies' expertise recruiting and managing event based volunteers to address the staffing needs of government agencies, community partners, and stakeholders.

The VRC will:

- Expand the existing workforce to meet urgent staffing needs and encourage long term planning of EBV staffed: events, work sites, activities, etc...
- Help set the strategic direction for building, sustaining and delivering the response and recovery programs to facilitate individual, family and community recovery.
- Serve as a mechanism/tool to recognize, capture and focus the good will of the local, regional and national communities and their interest in supporting the city of Flint and its citizens.
- Acknowledge, capture and focus the good will of the local, regional and national communities to support the response and recovery of the city of Flint and its citizens.

Audience:

- Individuals or groups of event-based volunteers (EVBs).
- Community partners and stakeholders, (i.e. non-profit and faith-based organizations, businesses and government agencies).

Volunteer Expectations:

- Match the need of the assignment with the skill set and ability of the volunteer.
- Orientation, education, training, safety briefing and job assignment.
- Providing an efficient and effective volunteer intake process and satisfying work assignment experience.

VRC Operations
Hours: 9 a.m. to 7p.m.
Location: American Red Cross
1401 South Grand Traverse
Flint, Michigan 48503

Flint Water Lead Project

Michigan Department of Health and Human Services
Situation Report for January 11, 2016

Governor Snyder declares a state of emergency for Genesee County due to the health and safety issues related to lead in city of Flint drinking water.

The Community Health Emergency Coordination Center (CHECC) is at Level 2 Activation - Elevated Threat/Alert Mode.

****NOTE: Contains potentially Identifiable Information- REDACT AS INDICATED****
New items for the day listed first and in bold print.

Daily Briefing and Situation Report prepared by Linda Dykema

Surveillance Indicators: People Tested 10/1/2015 to 12/18/2015: 2,182;
Children less than 6 years old ≥ 5 µg/dl since 10/1/2015: 23
Children 6 to 17 years old ≥ 5 µg/dl since 10/1/2015: 7
Adults 18 years and older ≥ 5 µg/dl since 10/1/2015: 13
Severity Indicators: Hospitalized/Discharged-1/1; Deaths- 0

DAILY ACTIVITY SUMMARY

<u>Elevated Blood Level (EBL) Environmental Investigations</u> – ETC Contractors, Wes Priem, Courtney Wisinski

- EBL report through 1/6/2016
  - **22 families contacted**
  - 14 EBL investigations completed.
  - 14 Water sampling completed.
  - 7 EBL Reports Received.
    - 6 homes with lead dust hazards
    - 3 homes with lead in soil hazards
    - 5 homes with lead-based paint hazards
    - 2 homes with lead detected in tap water
      - *0 homes with lead water levels >5 ppb*
      - 0 homes with lead water levels >15 ppb
  - **6 investigations scheduled.**
  - 5 applications received for the Lead Safe Homes Program, 1 family enrolled.

<u>MDHHS/Genesee County Health Department (GCHD) Case Management (CM) Services</u> – Nancy Peeler

- Families that have moved to other counties
  - *GCHD forwarded a list of 40 families they were unable to contact: CLPPP staff identified* updated contact information for 39 of the 40 families and forwarded that information to GCHD on 1/5/16.
  - GCHD is utilizing the updated information. They have already identified a family that has relocated to Ingham County, and another that relocated to Florida. Nancy has reached out to Mark Miller to initiate contact with Ingham for follow-up with that family.
- CM report through 12/31/15:
  - # of contacts attempted: 186 (0-5 year olds) and 12 (6-17 year olds)
  - # offered CM: 109 (0-5 year olds) and 6 (6-17 year olds)
  - # CM started: 25 (0-5 year olds) and 2 (6-17 year olds)
  - # of children receiving CM who live in Flint: 25 (0-5 year olds) and 2 (6-17 year olds)
  - *# billed to Medicaid:* 14 (0-5 year olds) and 1 (6-17 year olds)

- # other disposition: 23 *(0-5 year olds) and 1 (6-17 year olds)*

Epidemiology/Surveillance – Corinne Miller, Patti McKane, Martha Stanbury, Bob Scott, Jessica Cooper

- **Dr. Hanna-Attisha provided the first set of requested data as approved by MDHHS IRB.**
- **Blood testing data through 12/8/2016 pulled from the warehouse: report pending.**
- The data specifications and metrics were developed for a report to measure blood lead testing of children in Flint who are enrolled in Medicaid. The preliminary report will be reviewed week of 1/11/15.
- Additional Zip code-specific blood lead data on children in Flint was provided in response to a request from the MDHHS Director.
- Pending: hiring 2 epidemiologists to provide BLL surveillance support.

Filter & Water Distribution Sheryl Thompson

Filter Distribution 10/1/15 to 1/6/15			
	Received	Distributed	Remaining
Water Filters	15,000	11,587	3,413
Water Pitchers	720	251	469
Replacement Cartridges - Brita	9,000	1,704	7,296
Replacement Cartridges – PUR*	5,706	33	5,603
Replacement Cartridges - Zero	375	8	367

*The PUR replacement cartridges are being made available in all locations for the convenience of residents. Once the PUR cartridges are exhausted and more are needed DHHS will purchase additional ones. The current supply was given to DHHS and GCCARD by United Way.

Communications/Information Sharing – Linda Dykema, Eden Wells

- No updates.

Health Education Resources Updates - Michelle Bruneau, Emily Houk

- Continuing to write and coordinate additions to the EBL Case Manager Binder, now known as the MDHHS Lead Safe Family Guide Book. (MB)
- Began work on filter cartridge changing fact sheet; clarifying uses of filtered/vs unfiltered water (MB)

Toxicology - Kory Groetsch, Lisa Quiggle, Jennifer Gray

- Working on method(s) to convert lead dust wipe sample results into an intake metric compatible with the IEUBK model.
- Working on Child EBL Access database, which will be used to ensure that each child/family is offered all available SOM services and activities related to EBL cases.

WIC

Mike Sobocinski's notes on January 12, 2015 SEOC briefing (9:30am):

MSP Resouce unit (acting planning chief) Amanda Bresler: Reading IAP objectives. SEOC hours will go until 8pm, so 6pm agency situation reports are due. 2pm tactics meeting scheduled.

National Weather Service (Jim Askill): Contacted Genesee County EOC and added them to the list of NWS contacts. Today's weather is "sloppy," with "off and on" lake effect snow. Some spots might see snow all day, other spots might not see much. Various bands produce spotty effects locally. Today, snow, low temperatures, and winds produce treacherous travel. Frostbite sets in within 15 to 30 minutes on exposed skin. About 1 to 2 inches of snow accumulation will be seen today, then "off and on" snow tomorrow during both day and night—one inch or less. After the next few days it should warm up a bit (to the freezing point).

MSP SEOC Operations section (Jackie Hampton): Identified shortages need to be addressed: water filters and test kits. Another warehouse is being opened today. Need equipment at DHHS site (loaders, etc.) to move resources on/off vehicles. 9600 cases of water per day are being handled, so space is needed to stockpile that. GCARD (?) to eventually be used for staging only, when more space has been found.

DHHS (Jennifer ?): Currently at a level 2 activation. Processing the request for a warehouse facility. Must sort through the short and long-term storage needs. Distributing guidelines/message information. Also dealing with volunteer information (and organization – the availability of volunteers).

MDARD (Kay Fritz): Updated guidance document re: food service establishments, and the document is being approved through the JIC. Animal shelters and related tasks are being worked on. Information is going out to veterinarians in Flint. Coordination occurring with Genesee County Health Department and Genesee County animal control. (She quickly reads off their list of actions.)

MDLARA (unknown person): Doing work with ?plumbing chief. En route. [Didn't catch information clearly.] A list of home-based day care centers is available.

MDEQ (Jen Wolf): Refers to online links for approved water filters. 10,000 water test bottles are on order. Coordination with American Red Cross. More supplied ordered – another 10,000 water test bottles. Would like to always have at least 2,000 on hand, at the warehouse.

Capt. Kelenske: Make sure that the fire stations have what they need. That's the area that is farther from direct control (i.e. outside of state framework).

MDHHS (unknown speaker): Logistics of coordinating with American Red Cross, etc. Given 10am ETA on truck with provisions from/to? Home Depot retail outlets. But it's more useful to be given a current location of the truck, rather than an ETA. About 700 (something – individual bottled water servings, I think) were obtained and are being delivered.

American Red Cross (Paul Spotter): *Trying to increase staffing. Is it possible to reduce hours (stopping* at 7pm) to accommodate the difficulty for volunteers during the cold weather? (Capt. Kelenske: Current

hours are 9am to 9pm, and will remain so.) Some warehouse teams have been established. Tomorrow, a volunteer reception center is opening.

MDHHS (Brian [redacted]): Teams are preparing for distribution activities, but the main current focus is on the procurement of water filters.

MI Dept. Of Civil Rights (Mark [redacted]): About 15,000 Spanish-language and 30,000 English-language palm cards exist. Would like to arrange deliveries to Our Lady of Guadelupe Church and to the Hispanic center. (Capt. Kelenske: Must deliver broadly to all faith based places at once rather than just to one or two specific ones.)

Office of Services on Aging ([redacted]): Delivery to 1400 addresses with seniors – meals, care management services. Working with the Genesee and Valley Area agencies on aging. Care management clients information obtainable from various senior agencies. Becoming aware of a citizen distrust of filters alone, with seniors requesting water in addition. State and local ombudsmen checking on nursing homes to verify the use of bottled water there—these facilities are all mapped in GIS, so the info is available. (Capt. Kelenske: Must broaden messaging to build trust in filters. Jackie Hampton: Are be able to test filtered water, to build that confidence? Jen Wolf DEQ: All samples received are being tested, so filtered water samples won't be turned back, but the lab doesn't want to ask for samples of filtered water. Nicole Lisabeth PIO: hadn't heard about testing filtered water – official info should be distributed if it's to be done.)

MSP ([redacted] in SEOC): Truck shipments, tracking on map, three or more trucks requested. Comparing deployment with supply.

MDMVA (Chad Randall[redacted]): Researching the resources available to fill requests.

MDTMB (Jeannette Doll): Reached out to Meijer, found that they'd already been shifting their filter supply toward their Flint stores. Checking into Amazon as another source. Three trucks with drives are to arrive tomorrow. A 50' trailer is to be procured. (Jackie Hampton: drivers needed 7a to 10p). Emergency can allow extension of the normal 14 hour limit that drivers can be on the road. About 30,000 palm cards being printed.

Capt. Kelenske: All state agency resources are available and can be brought to bear. Any resistance can be overcome through authorities of/in the SEOC. For example, "any" state employee can go door-to-door [i.e. minus those with physical/health limitations]. But logistics do need to be sorted through.

MSP ([redacted]) Team (Brianna Briggs): Presented info in Flint and answered questions. Two kits were given out in some cases instead of just one (per household), when concerns were brought up about filtered water quality. Local volunteers are many. If state agencies do need to eventually contribute more staff, they'll be notified.

PIO (Nicole Lisabeth): Currently stressing the use of filters as the most efficient way to secure good drinking water for each household, long-term. Backed by Dr. Eden Wells in this—announced at about 6pm last night. A warehousing and inventory management system ([redacted]) for an

inventory system. There's a parking issue re: media, but teams are getting out in the field, with instructions not to be delayed/distracted by media inquiries or activities. Teams are not to engage with media, but just to focus squarely upon their assigned tasks. All media are to be referred to the PIOs and the JIC. (Capt. Kelenske: A standard statement to this effect is to be used by workers—not even a "no comment" response, but that all media requests are to go through the PIO/JIC.) The Governor's office is sending daily emails to Flint, advising to use water filters, and that teams are going door-to-door. 2-1-1 is available to call there, a public service announcement (PSA) video has been made, a website is available. Working with Comcast to show the PSA video and to place filter instructions on a public access channel there. Billboards are going up in Flint to inform about the availability of 2-1-1 and of the website. Mailed cards are going out. Working on an Arabic translation for information cards. Getting information on churches to participate—by the weekend? Inquiries obtained regarding any Pb issues in other areas of the state. It's important to have city and county PIOs in the JIC. Some 2-1-1 rumors of lead in bottled water were dismissed/discouraged. Some calls were reported as being made to the FEMA national headquarters, involving concerned agencies such as the NAACP. Questions were also received on how corporations can make donations. (Capt. Kelenske: 2-1-1 is very important. Verify the staffing and system in place there; minimize chance of a shortfall.)

MSP Planning (Amanda Bresler): Updating the 204 form. Working to improve the local tracking sheet for resources at Flint area fire stations.

Local EOC (Mark DuCharm[redacted]): Volunteers are needed at both warehouses. Don't refer to the new warehouse as "Diplomat" – because there is an existing business it may be confused with.

Capt. Kelenske: Give that warehouse a generic name, not even "DHHS warehouse." Overall, fine job so far. Focus on what we <u>can</u> do, and remember to take a breath or to step back occasionally so that there aren't problems with stress interfering. The smallest detected slip will be portrayed as a significant news event. The next state agency update will be at 4pm at the latest – might occur sooner.

State Agency

- ICS204 due 1430
- 1400 – tactics meeting
- 1600 – planning meeting
- 1800 – sitrep due

- LARA
  - Working to include home-based day-care centers in situational awareness and assessing their needs.
- DHHS – DCH
  - CHEC level 2
  - Processing warehouse request and setting up details
    - Need more info. Regarding large vs. small storage – what is long term and what is short-term at this time
    - When will shipments begin arriving at DHHS warehouse
    - Need to determine the role of the locals in supporting the warehouse
    - CHEC queried potential volunteers in the area
- DHHS – HS
  - All about filters/logistics/warehouse
  - Updated activity log about filters on-hand, delivery ETA is at 10am due to weather delays. Requested to know where the truck is, moving at 35mph
  - 700 23 cup pitchers being picked up – complete numbers in Activity Log
  - Dupont(?) - NO
- DHHS-Field Teams
  - Teams preparing for distro
  - Main focus procuring filters and assisting requests from teams
- Agency on Aging
  - Delivered 1400 addresses of seniors who receive aging services in-home
  - Working to get information in coordination with Valley Area on Aging
  - Asked policy colleagues to help secure home help and adult community placement services
  - Seniors are calling requesting water even though they have filters – distrust over filter working
    - JIC – may need to broaden messaging on filters and developing trust of the filter
    - Test kits may be used for filtered and unfiltered water, any water sample accepted by DEQ
  - Valley Area Agency on Aging can help facilitate distro of resources to clients

    - State Ombudsman checked with local Ombudsman and local had surveyed nursing homes. They are using bottled water, may be using filters. Need to follow-up with status of assisted living facilities and ensure they have filters.
- DMVA
    - Continuing cost estimates for box trucks
    - Potential equipment issues at warehouse – pallet jacks, high/lows, etc.
- Recovery
    - Primarily covered already
    - Working MSP to ramp up teams- assessing capability
    - Training yesterday went well and mission was clear, filters first – then water
        - If concern expressed over filtered water, teams instructed to provide two test kits.
- Local EOC
    - Need RC at both warehouses, prefer to call the new warehouse something generic
    - Nothing else
- Concluded at 1020

FAUCET - DRINKING FOUNTAN REPLACEMENT PROPOSAL January 8, 2016

FREEMAN ELEMENTARY, 401 Ogema Street, Flint

This proposal is for the replacement of all of the faucets/drinking fountains in Freeman Elementary School, Flint, MI, that were found to have elevated lead content in the water from the *~~report issued~~ **faucets tested** on October 24,2015, by the Department of Environmental Quality. This proposal also is for the replacement of any brass valve or copper fitting used in the water supply pipe and fittings where 50% lead/50% tin solder was used for the joints.

At Freeman Elementary, 31 faucets were tested using a series of four samples each. Twenty-two outlets did not show elevated lead exposure, but nine faucets came back with initially high results.

Those nine outlets involve brass components, indicating the problem involves the fixtures or plumbing immediately surrounding the fixture. The DEQ report listed the lead content of the water from the nine faucets as greater than 15 parts per billion.

Retesting the nine faucets with high lead levels after new faucets are installed could demonstrate that that the old faucets significantly contributed to the high levels. The retest will be administered identically to the original test of the school.

Results from this pilot program to retest Freeman could affect the State of Michigan's long term strategy of ensuring clean drinking water in Flint Schools and the City of Flint

LARA plans on funding this proposal for the replacement of the faucets/fountains and piping.*

Replacement faucets/fountain and piping are to be certified with no lead.

- 3 sink faucets- $200 each: $600
- 6 bubblers - $100 each: $600
- 9 Water supply valves/pipe fittings - $100 each: $900
- Labor/installation - $625 each for 9 sites $5,625

Estimated total $ 7,725.00

*The faucets and bubblers replaced are to be equal to the original faucets/fountains installed in Freeman Elementary.

Fixture Replacement Process

- Permit submitted by the school to the State.
- State approves and issues permit.
- Michigan licensed plumber installs fixture. LARA's Plumbing Division employees can do this work.
- State inspects new fixture and approves.

Under a State of Emergency the Governor has the ability to waive permit and inspection fees

Based on the results of the pilot, if successful, the state could consider staged expansion of the program with funding coming from multiple sources - including emergency funding as well as seek out donations from corporate (i.e. Delta, Moet.) as well as workers (plumbers and pipefitters union).

This proposal was prepared by the Department of Licensing and Regulatory Affairs, Plumbing Division.

*Proposal amended on January 11, 2016

Flint Water Lead Project

Michigan Department of Health and Human Services
Situation Report for January 8, 2016

Governor Snyder declares a state of emergency for Genesee County due to the health and safety issues related to lead in city of Flint drinking water.

****NOTE: Contains potentially Identifiable Information- REDACT AS INDICATED****
New items for the day listed first and in bold print.

***Daily Briefing and Situation Report** prepared by Linda Dykema*

Surveillance Indicators: People Tested 10/1/2015 to 12/18/2015: 2,182;
Children less than 6 years old ≥ 5 µg/dl since 10/1/2015: 23
Children 6 to 17 years old ≥ 5 µg/dl since 10/1/2015: 7
Adults 18 years and older ≥ 5 µg/dl since 10/1/2015: 13
Severity Indicators: Hospitalized/Discharged-1/1; Deaths- 0

DAILY ACTIVITY SUMMARY

<u>Elevated Blood Level (EBL) Environmental Investigations</u> – ETC Contractors, Wes Priem, Courtney Wisinski

- EBL report through 1/6/2016
  - 21 families contacted
  - 14 EBL investigations completed.
  - **14 Water sampling completed.**
  - **7 EBL Reports Received.**
    - **6 homes with lead dust hazards**
    - 3 homes with lead in soil hazards
    - 5 homes with lead-based paint hazards
    - 2 homes with lead detected in tap water
      - 0 homes with lead water levels >5 ppb
      - 0 homes with lead water levels >15 ppb
  - 5 investigations scheduled.
  - 5 applications received for the Lead Safe Homes Program, 1 family enrolled.

<u>MDHHS/Genesee County Health Department (GCHD) Case Management (CM) Services</u> – Nancy Peeler

- Families that have moved to other counties
  - GCHD forwarded a list of 40 families they were unable to contact: CLPPP staff identified updated contact information for 39 of the 40 families and forwarded that information to GCHD on 1/5/16.
  - GCHD is utilizing the updated information. They have already identified a family that has relocated to Ingham County, and another that relocated to Florida. Nancy has reached out to Mark Miller to initiate contact with Ingham for follow-up with that family.
- CM report through 12/31/15:
  - # of contacts attempted: 186 (0-5 year olds) and 12 (6-17 year olds)
  - # offered CM: 109 (0-5 year olds) and 6 (6-17 year olds)
  - # CM started: 25 (0-5 year olds) and 2 (6-17 year olds)
  - # of children receiving CM who live in Flint: 25 (0-5 year olds) and 2 (6-17 year olds)
  - # billed to Medicaid: 14 (0-5 year olds) and 1 (6-17 year olds)
  - # other disposition: 23 (0-5 year olds) and 1 (6-17 year olds)

Epidemiology/Surveillance – Corinne Miller, Patti McKane, Martha Stanbury, Bob Scott, Jessica Cooper

- **The data specifications and metrics were developed for a report to measure blood lead testing of children in Flint who are enrolled in Medicaid. The preliminary report will be reviewed week of 1/11/15.**
- **Additional Zip code-specific blood lead data on children in Flint was provided in response to a request from the MDHHS Director.**
- Pending: hiring 2 epidemiologists to provide BLL surveillance support.

Filter & Water Distribution Sheryl Thompson

Filter Distribution 10/1/15 to 1/6/15			
	Received	Distributed	Remaining
Water Filters	15,000	11,587	3,413
Water Pitchers	720	251	469
Replacement Cartridges - Brita	9,000	1,704	7,296
Replacement Cartridges – PUR*	5,706	33	5,603
Replacement Cartridges - Zero	375	8	367

*The PUR replacement cartridges are being made available in all locations for the convenience of residents. Once the PUR cartridges are exhausted and more are needed DHHS will purchase additional ones. The current supply was given to DHHS and GCCARD by United Way.

Communications/Information Sharing – Linda Dykema, Eden Wells

- **Weekly (Friday, 10:00 am) meeting with DEQ, LARA and the city of Flint.**

Health Education Resources Updates - *Michelle Bruneau, Emily Houk*

- The State Emergency Operations Center (SEOC) opened a Joint Information Center (JIC). Angela Minicuci is the primary HHS contact to the JIC. All public information documents related to the Flint water response must be routed for approval through the JIC.
- Continuing to write and coordinate additions to the EBL Case Manager Binder, now known as the MDHHS Lead Safe Family Guide Book. (MB)

Toxicology - Kory Groetsch, Lisa Quiggle, Jennifer Gray

- Working on method(s) to convert lead dust wipe sample results into an intake metric compatible with the IEUBK model.
- Working on Child EBL Access database, which will be used to ensure that each child/family is offered all available SOM services and activities related to EBL cases.

WIC

- No updates.

Healthcare/Providers

- No updates

DEQ Information - Linda Dykema as Liaison

- No updates

Mike Sobocinski's notes on January 11, 2015 SEOC briefing (9:30am):

MSP Planning Section Chief Tom Weber leads the meeting, reads list of objectives from IAP. A state agency briefing is occurring every afternoon now. The SEOC was open on both Saturday and Sunday this past weekend.

MSP EMHSD Jackie Hampton: Agencies need to stay focused on completing form 204 and their critical tasks. Those who are speaking in the SEOC should now stand to present their information into the microphone.

National Weather Service (Jim [redacted]): During the next 48 hours will get challenging. Fairly tame light snow right now, but from 8pm onward there will be more snow coming in with winds. About 2 to 3 inches are expected in the Flint area from 5pm today to 8pm tomorrow evening. The expected temperatures will be in the teens. Blowing snow will mean that it will be hard to keep roads clear, creating hazardous travel conditions. Temperatures will be cold and will result in wind chill factors below 0 degrees F. Frostbite would be expected on skin exposed for times less than ½ hour. From Wednesday to Friday, only occasional light snow is expected, but the cold temperatures will continue.

MDHHS (Jennifer [redacted]): The CHECC has been opened, with a partial activation. Subject matter experts will be brought in as needed.

MDARD (Justin Henderson): He refers to yesterday's update [as if everyone was here yesterday], and no change to that update. [Several other agencies simply reported no significant change, or didn't mention anything that sounded specific and important enough for me to include here. Some phone-in agencies might have been too brief or garbled to be included.]

MDEQ (Jen Wolf): Coordination between their lab and various other agencies (city of Flint, DTMB, MDARD, DHHS, etc.) on test bottles, kits, and instruction sheets. Seeking appropriate dispersion of bottles within Flint, to match actual local needs (rather than too many at locations whose needs are not as great as others').

MDHHS (Richard Thelen): Things are proceeding on track. Setting up for 1pm training at (site?). Getting arrival time estimates on all orders, establishing filter quantities, gave some info to GIS for processing.

American Red Cross: Has staffed distribution sites at 5 fire stations, 9 churches, and helped to organize more (for water and filter distribution). Some larger sites are needed.

Adult Services (Steve [redacted]): Pulling together the list of addresses for Flint seniors who are at higher risk. Exploring the role that could be played by their nutrition network, in response to a "food desert" concern that was raised. The Department of Education feeds children. Better framing is needed for nutritional needs issues. (Jackie: DHHS is working on it.) [My comment: In my experience, the "food desert" concept was completely overblown, applying an exaggerated name and limited definitions that failed to recognize the true variety and accessibility of foods through various transportation options and exaggerating the low quality of food that is readily available locally, fixating upon particular ideas of raw fruits and vegetables while downplaying the substitutability of frozen vegetables, packaged mixes, etc.

But this is actually the topic that Kari Day had researched for her master's degree, and so we should make use of her expertise on this if she's interested. I mentioned this to her as she was leaving for Flint and she did say that she's interested in coordinating and providing her expertise on the topic. My own views are merely rooted in theoretical and methodological skepticism, and my own experiences, but she is the one who's done actual research on the subject in Detroit and although she might agree with some of my critiques, I might be off-base in others and certainly don't have her experience in researching the topic. There are legends circulating widely on this topic, typically involving a mythical Detroit grocer selling bad apples for $7 each, and I've pointed out at meetings that such a concept doesn't make any economic sense for a store owner, and that it makes no sense to dismiss the availability of cheap but nutritious frozen vegetables and decently fresh ingredients which are available at places like Subway – but the sole emphasis upon gardens and raw produce grocers, and the offhand dismissal of everything that certain researchers have labeled as "fast food" has horribly overstated the problem in most areas. At some point, these debates could be resolvable through actual data. Much of my own criticism stems from personal experience at finding nutritious foods while living in poverty for a couple of years without a car in the middle of Lansing. Although Lansing is obvious not a worst-case scenario, certain principles still apply elsewhere. If transportation available through bus routes, those who can use the bus usually have access to major grocery stores. For those who don't want to take a bus, various substitutes can be found which aren't considered in the dubious research designs I've seen on the subject. For those who are simply stuck at home, it might not matter if they have a garden and store one block away, since immobility is immobility.]

MSP (Matt Bolger): Tomorrow, there will be a walking tour in Flint. Electronic tablets would be useful for data entry, rather than the traditional paper forms.

MDTMB (Jeannette Doll): Cards have been printed for the Governor's conference this morning. Trucks are going to Flint, with transport arranged for all this week. Parking improvements are being organized.

Recovery Branch (Brianna Briggs): Working through MSP (Amy Dehner[illegible]) and going to Flint to provide information, attend training session. Contact lists are being made for teams in Flint. Will coordinate with the JIC and PIO.

SEOC Logistics ([illegible] [person didn't stand]): Four new churches will serve as distribution points. People should specifically label new requests as such when entering/sending the info in. Do not use the Resource Tracking Board (in MI CIMS) to send notes to oneself.

SEOC Finance (Penny Burger): A hotel is set up for direct billing in the Flint area – unsure how many are traveling there. Would like lists of staff who might stay in Flint, to ensure that a room is available there. Some have made their own arrangements, which could be okay, but Finance can help with overnight lodging.

PIO (Nicole [illegible]): Flyer was sent to MDTMB. A Spanish version is being completed. 2:30pm County Office Building media briefing will take place in Flint. News release for that is going out today. Governor Snyder, Capt. Kelenske, and the MDEQ director are speaking, plus others. Video public service

announcement being arranged for Comcast Cable (30 seconds long), similar to radio PSAs—MDHHS worked on these, being broadcast soon.

SEOC Planning: 3:30 agency situation reports and summaries submission deadline. 4pm afternoon agency briefing will occur.

Tony Katarsky: Replacement staffing is underway. It's okay to not overwork, to take time off as needed, although the official leave time may feel limited at this time.

Query results for in-state plants that have active (expiring 4/30/2016) licenses for bottled water

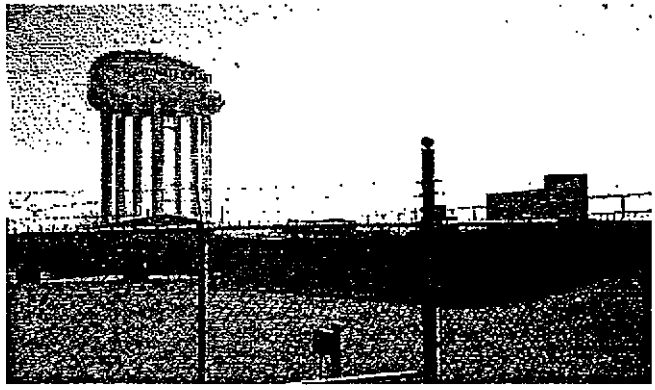
1. Incident Name: 2015-10-01 Flint Water	2. Operational Period to be covered by IAP (Date / Time): From: 01/06/2016 08:00:00 To: 01/08/2016 17:00:00	IAP Cover Sheet

3. Approved by:

FOSC:	
SOSC:	Joe Hampton
RPIC:	
State SEOC Director	Capt. Chris Kelenske Chris Kelenske

Incident Action Plan



4. Prepared by: Tom Weber Date / Time: 01/07/2016 07:58:32

Incident

1. Incident name: 2015-10-01 Flint Water
2. Operational Period from: 01/06/2016 08:00:00to: 01/08/2016 17:00:00

3. Objective(s)

13. Establish and disseminate cost center information for the incident.
12. Monitor MI CIMS for resource requests and address as appropriate.
11. Establish a Joint Information Center and develop a public information strategy.
10. Provide technical assistance and facilitate the local Damage Assessment process.
9. Facilitate and coordinate technical assistance among state agencies and to local agencies.
8. Coordinate response and recovery activities and identify mission areas with MIVOAD.
7. Identify critical resources for acquisition and allocation.
6. Develop a comprehensive GIS strategy.
5. Investigate and identify available programs for assistance with direct or related impacts.
4. Establish operational period and hours of operations.
1. Activate the State Recovery Task Force
2. Ensure coordination between the City of Flint, Genesee County, state and federal agencies, and appropriate subject matter experts.
3. Obtain and maintain situational awareness and common operating picture of all activities.

4. Operational Period Command Emphasis:

1. Provide regular local and technical briefings
2. Identify life safety issues.
3. Identify priorities.
4. Provide policy direction by observance of SEOC SOPs.
5. Seek technical guidance from relevant federal agencies.
6. Provide regular legislative/congressional briefings.

General Situational Awareness:

By early May 2014, the City of Flint switched from the Detroit Water and Sewerage Department (DWSD) to water from its own water treatment plant drawn from the Flint River as its primary water source. The different characteristics of the water resulted in leaching of lead from lead pipes in the city's water infrastructure into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels and elevated blood lead levels in young children were observed in the City of Flint and confirmed by the State Chief Medical Officer.

On October 1, 2015 the Genesee County Health Department declared a Public Health Emergency due to the elevated blood lead levels in citizens. In response to this the City of Flint declared a local State of Emergency on December 15, 2015 and activated their Emergency Operations Center.

To mitigate the effects of the new source of water on the infrastructure in the City of Flint, the city switched back to DWSD water on October 16, 2015. Funding to reconnect to DWSD was provided from the City of Flint, the Charles Stewart Mott Foundation, and the State of Michigan. Water is now treated with a supplemental phosphate addition to rebuild the protective layer in the distribution system and reduce the leaching of lead into the water supply.

Planning Meeting/SEOC Briefing

Meeting started at 1601

- Will review each objective and the state agency will review the tactics
- Objective 1: Ensure all households with...blah blah blah
    - Planning Section:
        - Identify and report resource shortfalls
        - Coord. distribution
        - Find POC
        - Report numbers to SEOC
        - Establish reporting times/procedure
    - Ops Section:
        - Establish teams
        - Identify warehouse
    - Logistics:
        - Locate facility for warehouse
        - Secure location, accessible, etc.
    - Health and Environment
        - Establish water testing
        - Identify need for contracts
        - Whole bunch of water samples, more to come
    - Human Services
        - Coordinate RC volunteers
        - Needs to be updated
- Objective 2: Monitor commodities
    - Logistics
        - Appoint warehouse manager
        - Safety plan
        - Appropriately certified
        - Tracking method
        - Coordinate with local/private partners
    - Planning
        - Develop current inventory
        - Identify commodity updates procedure
        - Daily staus report
    - PIO
        - Continue promotion of water resource sites via meidia, social media
        - Announce resource teams
        - Update news releases
        - Issue daily news release
        - Establish opt-in email with daily updates of response

        - Plan/conduct daily media availabilities
        - Air PSAs for water resources
        - Identify info to churches/fire distro points
        - Print 5000 door hangers for distro
        - Establish JIC in flint on Monday
        - *Daily contact list*
        - Develop and print bi-lingual handouts
        - Determine staffing needs
        - Identify embedded PIO with resource teams
        - Identify photographer
        - Secure location for Monday media availability
        - Contact Comcast, DISH, etc. for continual channel to filter changing process
- Objective 4
    - Health and Envir
        - Identify long-term priorities with local health care dpet
        - Blood testing
        - Case management
- Objective 5
    - Logistics
        - Develop staffing plan
        - Staffing spreadsheet
        - Poll section chiefs, identify staff
        - Create sign-in sheet
        - Assess local EOC staffing
- Objective 6
    - Recovery
        - Continue research of state agencies
        - Coord with federal liaison
- Objective 7
    - Planning
        - Identify needs for overlays
        - Potential resources for data collection
        - Clearinghouse
        - Spaicl analytics
- Objective 8
    - Ops
        - Daily calls
        - Constant comms.
        - Maintain local EOC staff
        - Long-term strategy for church distro
        - Legislative/congressional updates

- Objective 9
    - Planning
        - Daily briefings
        - Monitor MI CIMS
        - Produce maps
        - Daily sit rep
- Objective 10
    - Recovery
        - Identify SMEs to assist in development of plan
        - Work with state agencies to identify long-term impacts

State Agency Briefing

- Ops
    - JIC relocating
- DEQ
    - Nothing to report
- DCH
    - JIC/PIO messaging on 211 coordinated
    - CHEC activation to level 2 tomorrow anticipated
    - ECC more digital. Need to coordinate DCH and DHS CHEC services
- DHS
    - Filters, water, etc. inbound. ETA available tomorrow
    - DHHS offices open normal hours tomorrow
    - Training for Clio staff for field teams – 16 employees
- DOE
    - State BOE meeting Tuesday, 0930, Dr. Wells making presentation about Flint
- Civil Rights
- Red Cross
    - Provided volunteers at 14 PODs.
    - Arranged deliveries of water and filters this morning
    - Maintaining county and SEOC reps.
    - Instructions at station 6 were not included. Resolved by making copies and are being delivered to the stations.
    - Plan to provide coverage for next 7 days at FDs
    - 6 pallets of water inbound tomorrow
- LARA
    - Nothing
- DTMB
    - Provided contact info. of UM-Flint for media rooms

- Mail and Delivery on the roads delivering filters and water
- 4 cube trucks and drivers available starting Tuesday
- Purchasing filters on the area at the moment
- Will be ordering door hanger/flyer when available
- *Need to confirm if we have enough filters, water, etc.*
  - Michelle K. says they are out of replacement filters, by 5pm supplies should be ordered per Capt.
  - Station 8 has no water (dispensed over 4 pallets in one day) Concerns over controlling system abuse. Need to evaluate procedure of address cards. Must ensure sites are not out of supplies-public information issue. Having issues with Red Cross reporting supply numbers.

- MSP
  - Established 830-1700, Tuesday – Friday at this time, door-to-door operations. One trooper with each team
  - Be careful while traveling and be aware of frost-bite concerns.
- Recovery
  - Working with Lt. Johnson on resource teams.
  - Getting assistance tomorrow, Kristi Davis, focusing on filter availability
  - Training scheduled with DEQ trainer to teach about testing services, MSP for safety and security, DHHS will also have someone there.
- PIO
  - Media availability went very well...good coverage
  - Fire Chief mentioned that one person fell at water resource site. No injury but mentioned that they would sue if they were hurt.
  - Concerns over FD staffing to stay open until 9pm
  - Sherriff still operating strike teams
  - Another media availability tomorrow
  - Working with 211 providing daily information about POD changes
  - Established daily email service, opt-in
  - Getting flyer into bi-lingual
  - Google: requested exact contact with them
  - Requested PSA on radio. Script approved and working with MAB.
  - Requested that resource teams report how many resources are used and that information is provided to JIC
  - State PIO is being embedded with water resource team
- Logistics
  - Working on inventory assessment
  - Need instructions for water testing in pdf version
- Planning
  - Working on finalizing IAP and SitRep
  - Finish GIS strategy

    - Work on process for inventory transferring to Resource Unit
- Local EOC
    - Continuing to distribute resources
    - Deploying additional DC, Russo, tomorrow
    - Need to set benchmark of resource minimums at PODs

Genesee County Health Department
Water Filter Database Report

1/11/2016 11:47:59 AM

Total Filters Given:	25,132	**Total Pitchers Given:**	437

2015-10-01-City of Flint-Water Contamination/Shortage

State Briefing – 01/10/2016

- Fire stations open 9am to 9pm
- Confirming we can keep churches through the week, 9 chur
- 2:30pm media briefing at FD
- New incident objectives will be worked through planning

State Agencies

- Operations – new OP starting at 0800, 10/11/2015.
- ICS 204s being tasked today. Today is a planning day
- Branch Directors being assigned:
    - Thelen – Overseeing Human Services
    - Jen Lixey – Health and Environment
- Security at front gate as it is broken

- LARA
    - No update.
    - 10,000 without power statewide, Cherry Land Electric COOP primarily. No impacts within Flint area at this time.
- DEQ
    - No update
- MDHHS - HS
    - Conversation with volunteer coord. this morning – need shifts for 4pm-9pm at FD
    - Donation Coord. Monitoring supplies – enough for next couple of days
    - *Ordered 93 pallets of water from SC. Should be delivered within the week.*
    - Some filters should be here Wednesday.
- MSP
    - Expanding hours for troopers going along with door to door to 6pm
    - Security at front door or Collins until 6pm
    - Weather update – remember to have kit in vehicle, hat, gloves, etc.
    - Will get updated safety plan
- DTMB
- ED
    - Assessing child nutrition programs and feeding within schools and child care centers
    - Cooking with bottled water
    - Identifying child care institutions and need for additional water and filters

- MDARD
- OSA
    - Working to find footprint of Flint Water Authority – GIS has layer with water mains available. Working on getting water flow dataset. Wants to cross check coverage area with facilities in the area.
- Treasury
- Local Liaison
    - Long-term storage logistics work, have a building, need equipment and staffing, Red Cross offered assistance and expertise
    - Inventory of FD and church water resources being coordinated
    - Holmes coordinated with Kuzera
- Other
- Logistics
    - Made several assignments – supplies, extra volunteers at churches and FDs
    - Penny researching flyer payment, Jeanette getting quotes
    - Getting more address cards
    - Researching warehouse manager duties – credentialing, inventory, etc.
    - Keep putting tasks and resources into MI CIMS
- Finance
    - Make sure to report costs
    - Arranged hotel for state staff in Flint area – Holiday Inn (get address)
    - Working for lunch for JIC and local EOC
- Recovery Branch
    - Looking at expanding operations, covering safety concerns
    - Working with local EOC where hot spots are that need assistance, reduce duplication of effort
- PIO
    - Flyer for churches approved – going to Logistics (waiting for black and white version)
    - Door hangers ready for teams tomorrow – may need to be picked up
    - Media availability at 2:30pm, Mr. Harvey Holland, Michigan Office of Urban and Metropolitan Initiatives Director, Spl/F/Lt. David Kaiser, Michigan State Police, Mayor Karen Weaver, City of Flint, Chief David Cox, City of Flint Fire Department, Capt. Casey Tafoya, Genesee County Sherriff's Office.
    - Good press on PODs
    - Working on signage for PODs
    - 211 advised about influx of calls – let JIC know if issues arise
    - Social media messaging continuing
    - Finalizing JOB Battle Rhythm
    - News release likely going out tomorrow regarding canvassing in neighborhoods
    - Tuesday – embed state PIO with one of the canvassing teams to liaison with media
    - Google PR offered any available assistance, mapping-warehousing-transportation

    - JIC moving tomorrow to Flint, likely need hotels, media room requirements to DTMB
    - Materials being transferred into bi-lingual (Spanish) using Civil Rights resources
- Planning
    - Meeting w/ tactics people
    - SitRep updates by 1430
- Capt.
    - Thank you everyone
    - Warehousing – first one short term fix, would like to utilize private sector resources who do this regularly
    - Need timeframe for warehouse – would prefer moving in supplies today, maybe this afternoon
    - *Would like Spanish hanger ready for Tuesday canvassing*

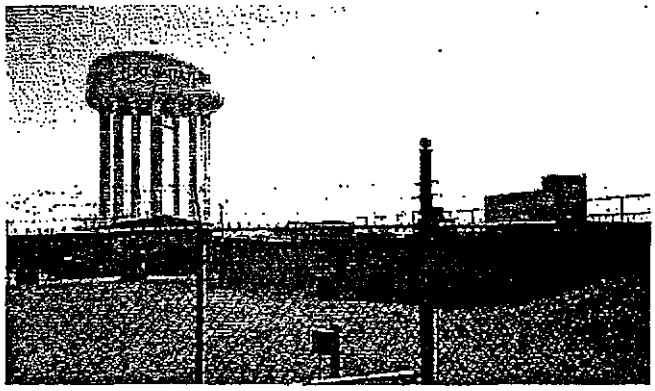
RPIC:	
State SEOC Director	Capt. Chris Kolonska Chris A. Kolonska

Incident Action Plan



4. Prepared by: Zachary Baker Date / Time: 01/10/2016 12:32:16

Incident

1. Incident name: 2015-10-01 City of Flint-Water Contamination/Shortage
2. Operational Period from: 01/11/2016 08:00:00to: 01/13/2016 08:00:00

3. Objective(s)

1. Ensure all households within impacted community have required resources.
2. Ensure accurate tracking and accounting of all commodities.
3. Improve and maintain public information strategy.
4. Develop a long term public health and services plan.
5. Ensure adequate staffing to support operational requirements.
6. Identify possible assistance programs.
7. Develop an approved GIS strategy.
8. Maintain coordination between partner agencies and organizations.
9. Enhance situational awareness and common operating picture of all activities.
10. Develop a comprehensive Recovery Plan.

4. Operational Period Command Emphasis:

1. Provide regular local and technical briefings
2. Identify life safety issues.
3. Identify priorities.
4. Provide policy direction by observance of SEOC SOPs.
5. Seek technical guidance from relevant federal agencies.
6. Provide regular legislative/congressional briefings.

General Situational Awareness:

By early May 2014, the City of Flint switched from the Detroit Water and Sewerage Department (DWSD) to water from its own water treatment plant drawn from the Flint River as its primary water source. The different characteristics of the water resulted in leaching of lead from lead pipes in the city's water infrastructure into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels and elevated blood lead levels in young children were observed in the City of Flint and confirmed by the State Chief Medical Officer.

On October 1, 2015 the Genesee County Health Department declared a Public Health Emergency due to the elevated blood lead levels in citizens. In response to this the City of Flint declared a local State of Emergency on December 15, 2015 and activated their Emergency Operations Center.

To mitigate the effects of the new source of water on the infrastructure in the City of Flint, the city switched back to DWSD water on October 16, 2015. Funding to reconnect to DWSD was provided from the City of Flint, the Charles Stewart Mott Foundation, and the State of Michigan. Water is now treated with a supplemental phosphate addition to rebuild the protective layer in the distribution system and reduce the leaching of lead into the water supply.

For the mitigation of negative health effects, over 24,000 water filters and replacement cartridges have been distributed to residents in the City of Flint. Approximately 13,000 water filters, water pitchers and replacement cartridges were distributed by the Michigan Department of Health and Human Services (MDHHS) in the timeframe of October 1 to December 31, 2015 alone.

MDHHS has increased surveillance of blood lead levels in children and is addressing water issues in environmental investigations to identify lead sources in the environment of affected children and provide health education and information to residents, health care providers, and daycare/educational institutions.

Local nonprofit organizations have provided potable water to Flint residents. MSP/EMHSD GIS staff is supporting county and local GIS staff by consolidating data from local sources into comprehensive databases and providing mapping services to support incident analysis and forecasting. Data and maps regarding the location of water pipes, affected schools, filter distribution locations, water monitoring results, and predictive blood lead levels for affected areas will be made available with demographics.
Before December 16, 2015, $9.35 million was provided by the State of Michigan and $6 million by local agencies and nonprofit partners to manage the effects of the corroded pipes. While the source water has been switched back to DWSD, water in the City of Flint is still not safe to drink, unless specifically filtered.

SAFETY MESSAGE/PLAN (ICS 208)

1. Incident Name:	2. Operational Period:	Date From: 01/11/2016	Date To: 01/13/2016
City of Flint - 2015-10-01-City of Flint-Water Contamination / Shortage GC EOC		Time From: 08:00:00	Time To: 08:00:00

3. Safety Message/Expanded Safety Message, Safety Plan, Site Safety Plan:

All personnel should be aware of personal safety risks in the community. A daily safety briefing will be conducted by MSP prior to morning departure from the GCCARD for delivery operations. Door to door operations in the community will be accompanied with law enforcement escort.

Exposure to sub freezing temperatures and strong winds can lead to cold exposure and hypothermia. Wear appropriate winter clothing to cover exposed skin to mitigate against the affects of cold exposure. Wear appropriate footwear and ensure solid footing to mitigate against slip, trip, and fall hazards related to snow and ice covered ground surfaces.

Current conditions on major expressways (I-69 I-475) and city streets is poor, with slush expected to re-freeze with low overnight temperatures on 01/10. As of 01/10 at 1700 HRS, most city side streets and sidewalks have not been cleared, making for difficult travel.

When driving in poor weather conditions keep a safe distance between your vehicle and the vehicle in front of you. Allow extra stopping distance as the roads may be snow covered and icy. Ensure your vehicle contains an ice scraper, extra windshield wiper fluid, and an emergency road kit.

Specific to Fire Station #6 (716 W. Pierson Road) Firefighters at the station have advised that should there be a call, they have concerns for the safety of the volunteers without their presence. Genesee County Sheriff and Dispatch are aware of the situation, and should there be a fire call for station 6, a marked police unit would be pulled to have a presence at the station until firefighters returned.

4. Site Safety Plan Required? Yes ☐ No ☑

ASSIGNMENT LIST (ICS 204)

1. Incident Name:	2. Operational Period:		3. Branch: Division: Group: Staging Area:
Public Information (Obj.3)-2015-10-01-City of Flint-Water Contamination/Shortage	Date From: 01/11/2016	Date To: 01/13/2016	
	Time From:08:00:00	Time To: 08:00:00	

4. Operations Personnel:	Name	Contact Number(s)
Operations Section Chief:	Jackie Hampton	
Branch Director:		
Division/Group Supervisor		

5. Resources Assigned:		# of Persons	Contact (e.g., phone, pager, radio, frequency, etc.)	Reporting Location, Special Equipment and Supplies, Remarks, Notes, Information
Resource Identifier	Leader			

6. Work Assignments:

Objective 3: Improve and maintain public information strategy.

Task(s):
-Continue promotion of water resource sites.
-Announce water resource teams beginning Tuesday, and ongoing efforts
-Issuing news release to reiterate information shared throughout operational period
-Established an opt-in email citizens can subscribe to receive for daily updates on the state's response. Opt-in added to the website and first email being sent today.
-Plan and conduct daily media avails to provide ongoing actions.
-Work with MAB to air radio Public Service Announcements with information on how to get water resources. MDHHS PIO taking the lead.
-Identify and distribute information to churches, distribution points: post to the website, hand out at media avails, and continue to share with stakeholders.
-Print 5,000 door hangers for water resource teams to distribute.
-Print additional door hangers to disseminate, as needed.
-Establish JIC in Flint. Hotels have been secured. Lunch will be provided.
-Develop contact list daily and provide to SEOC.
-Issue social media content across agency accounts to share new information.
-Develop and print bilingual handouts in Spanish
-Determine JIC staffing needs for this week.
-Arrange a PIO to be embedded with a media resource team beginning on Tuesday.
-Identify a photographer to take photos of resource teams in the field.
-Work to establish a contact with local television providers to push public information message.

7. Special Instructions:

8. Communications (radio and/or phone contact numbers needed for this assignment):

Name/Function		Primary Contact: indicate cell, pager, or radio (frequency/system/channel)
Nicole Lisabeth	/JIC PIO Lead	
Jane Yount	/SEOC JIC Liaison	
	/	
	/	

9. Prepared by: Name: Zachary Baker	Position/Title: Documentation Unit	Date/Time: 01/10/2016 11:32:17

ASSIGNMENT LIST (ICS 204)

1. Incident Name:	2. Operational Period:		3. Branch: Division: Group: Staging Area:
Health and Environment Branch (Obj. 4)-2015-10-01-City of Flint-Water Contamination/Shortage	Date From: 01/11/2016	Date To: 01/13/2016	
	Time From:08:00:00	Time To: 08:00:00	

4. Operations Personnel:	Name	Contact Number(s)
Operations Section Chief:	Jackie Hampton	
Branch Director:	Jennifer Lixey	
Division/Group Supervisor		

5. Resources Assigned:		# of Persons	Contact (e.g., phone, pager, radio, frequency, etc.)	Reporting Location, Special Equipment and Supplies, Remarks, Notes, Information
Resource Identifier	Leader			
CHECC Duty Officer				

6. Work Assignments:

Objective 4: Develop a long term public health and human services plan.

Tactics:
-Coordination through the Community Health Emergency Coordination Center (CHECC) to identify priorities for long term public health planning and tactics.
-Coordinate with local health department to determine what has been accomplished to date.
-Communicate with the healthcare providers regarding blood testing.
-Support local health with case management.

7. Special Instructions:

8. Communications (radio and/or phone contact numbers needed for this assignment):

Name/Function		Primary Contact: indicate cell, pager, or radio (frequency/system/channel)
Jennifer Lixey Terrill		

9. Prepared by: Name: Zachary Baker	Position/Title: Documentation Unit	Date/Time: 01/10/2016 11:36:56

ASSIGNMENT LIST (ICS 204)

1. Incident Name:	2. Operational Period:		3. Branch: Division: Group: Staging Area:
Logistics Section (Obj.5)-City of Flint-Water Contamination/Shortage	Date From: 01/11/2016	Date To: 01/13/2016	
	Time From:08:00:00	Time To: 08:00:00	

4. Operations Personnel:	Name	Contact Number(s)
Operations Section Chief:	Jackie Hampton	
Branch Director:	Wendy Galbreath	
Division/Group Supervisor		

5. Resources Assigned:		# of Persons	Contact (e.g., phone, pager, radio, frequency, etc.)	Reporting Location, Special Equipment and Supplies, Remarks, Notes, Information
Resource Identifier	Leader			
Logistics Section Chief	Wendy Galbreath			Logistics Chief rotates, may not always be Wendy

6. Work Assignments:

Objective 5. Ensure adequate staffing to support operational requirements.

Tactic(s):
Develop staffing plan for operational period.
Develop a staffing spreadsheet indicated required positions.
Poll Section Chief's for personnel available to work.
Notify selected staff of their assignments.
Send staffing spreadsheet to assigned personnel.
Create a sign-in sheet for SEOC sign-in.
Assess staffing needs in the local EOC.
Deploy state staff to local EOC, if needed.
Ensure all assigned staff check in and are tracked via MiCIMS.

Objective 6: Identify Possible Assistance Programs

Tactic(s):

1. Continued research being performed by identified state agencies.
2. Assist with questions as needed.
3. Coordinate with Federal Liaison.
4. *Compile data as received.*

7. Special Instructions:

All programs have been given a deadline of Friday January 15, 2016.

Incident

1. Incident name: 2015-10-01 City of Flint-Water Contamination/Shortage
2. Operational Period from: 01/11/2016 08:00:00to: 01/13/2016 08:00:00

3. Objective(s)

1. Ensure all households within impacted community have required resources.
2. Ensure accurate tracking and accounting of all commodities.
3. Improve and maintain public information strategy.
4. Develop a long term public health and services plan.
5. Ensure adequate staffing to support operational requirements.
6. Identify possible assistance programs.
7. Develop an approved GIS strategy.
8. Maintain coordination between partner agencies and organizations.
9. Enhance situational awareness and common operating picture of all activities.
10. Develop a comprehensive Recovery Plan.

4. Operational Period Command Emphasis:

1. Provide regular local and technical briefings
2. Identify life safety issues.
3. Identify priorities.
4. Provide policy direction by observance of SEOC SOPs.
5. Seek technical guidance from relevant federal agencies.
6. Provide regular legislative/congressional briefings.

General Situational Awareness:

By early May 2014, the City of Flint switched from the Detroit Water and Sewerage Department (DWSD) to water from its own water treatment plant drawn from the Flint River as its primary water source. The different characteristics of the water resulted in leaching of lead from lead pipes in the city's water infrastructure into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels and elevated blood lead levels in young children were observed in the City of Flint and confirmed by the State Chief Medical Officer.

On October 1, 2015 the Genesee County Health Department declared a Public Health Emergency due to the elevated blood lead levels in citizens. In response to this the City of Flint declared a local State of Emergency on December 15, 2015 and activated their Emergency Operations Center.

To mitigate the effects of the new source of water on the infrastructure in the City of Flint, the city switched back to DWSD water on October 16, 2015. Funding to reconnect to DWSD was provided from the City of Flint, the Charles Stewart Mott Foundation, and the State of Michigan. Water is now treated with a supplemental phosphate addition to rebuild the protective layer in the distribution system and reduce the leaching of lead into the water supply.

For the mitigation of negative health effects, over 24,000 water filters and replacement cartridges have been distributed to residents in the City of Flint. Approximately 13,000 water filters, water pitchers and replacement cartridges were distributed by the Michigan Department of Health and Human Services (MDHHS) in the timeframe of October 1 to December 31, 2015 alone.

MDHHS has increased surveillance of blood lead levels in children and is addressing water issues in environmental investigations to identify lead sources in the environment of affected children and provide health education and information to residents, health care providers, and daycare/educational institutions.

Local nonprofit organizations have provided potable water to Flint residents. MSP/EMHSD GIS staff is supporting county and local GIS staff by consolidating data from local sources into comprehensive databases and providing mapping services to support incident analysis and forecasting. Data and maps regarding the location of water pipes, affected schools, filter distribution locations, water monitoring results, and predictive blood lead levels for affected areas will be made available with demographics.
Before December 16, 2015, $9.35 million was provided by the State of Michigan and $6 million by local agencies and nonprofit partners to manage the effects of the corroded pipes. While the source water has been switched back to DWSD, water in the City of Flint is still not safe to drink, unless specifically filtered.

5. Site Safety Plan Required?

Yes ☐ No ☑

Approved Site Safety Plan(s) Located at:

SAFETY MESSAGE/PLAN (ICS 208)

1. Incident Name:	2. Operational Period:	Date From: 01/11/2016	Date To: 01/13/2016
City of Flint - 2015-10-01-City of Flint-Water Contamination / Shortage GC EOC		Time From: 08:00:00	Time To: 08:00:00

3. Safety Message/Expanded Safety Message, Safety Plan, Site Safety Plan:

All personnel should be aware of personal safety risks in the community. A daily safety briefing will be conducted by MSP prior to morning departure from the GCCARD for delivery operations. Door to door operations in the community will be accompanied with law enforcement escort.

Exposure to sub freezing temperatures and strong winds can lead to cold exposure and hypothermia. Wear appropriate winter clothing to cover exposed skin to mitigate against the affects of cold exposure. Wear appropriate footwear and ensure solid footing to mitigate against slip, trip, and fall hazards related to snow and ice covered ground surfaces.

Current conditions on major expressways (I-69 I-475) and city streets is poor, with slush expected to re-freeze with low overnight temperatures on 01/10. As of 01/10 at 1700 HRS, most city side streets and sidewalks have not been cleared, making for difficult travel.

When driving in poor weather conditions keep a safe distance between your vehicle and the vehicle in front of you. Allow extra stopping distance as the roads may be snow covered and icy. Ensure your vehicle contains an ice scraper, extra windshield wiper fluid, and an emergency road kit.

Specific to Fire Station #6 (716 W. Pierson Road) Firefighters at the station have advised that should there be a call, they have concerns for the safety of the volunteers without their presence. *Genesee County Sheriff and Dispatch are aware of the situation, and should there be a fire call for* station 6, a marked police unit would be pulled to have a presence at the station until firefighters returned.

Resource Identifier	Leader			
Water Test Sampling Kits	Kirby Shane	1	shanek@michigan.gov	Lab

6. Work Assignments:

Objective1: Ensure all households within impacted community have required resources.

Critical Task: Coordinate, conduct, and analyze water testing.

Task:
MDARD Pick up 500 water sampling test kits 1/11/16
Ship 1000 water sampling test kits to Flint 1/11/16, transported by DTMB transporting (pick up at 1200)
Order additional 3000 water sampling test kits and ship them directly to Flint 1/11/16
Identified potential contract issues.
Continue working with DTMB ensure contingencies are in place if needed.
2500 water samples taken and analyzed from schools so far.
750 water samples not from the schools, analyzed at lab to date.

7. Special Instructions:

Kirby Shane (DEQ) to contact test kit vendor tomorrow morning. Contract issues will be identified then.

Resource Identifier	Leader			
Warehouse #1	Michelle Kuzera	1		

6. Work Assignments:

Objectives 1: Ensure all households within impacted community have required resources.

Critical Task: Identify, staff, and maintain a local warehouse.

Task (ex.):
1. Locate facility large enough to hold a large amount of supplies to keep distribution sites stocked. 100,000 sq. ft. or more.
2. Location must be in the city of Flint and close in proximity to distribution sites.
3. Location must be secure.
4. Ensure accessibility to vehicles and pallets
5. Assess resource needs (fork lifts, pallet jacks, packing tape, scissors, etc.)

7. Special Instructions:

1. Ensure staff are properly trained and certified to operate equipment.
2. Create a Safety plan.
3. Site safety plan must be followed.
4. All injuries reported to Safety Officer
5. Create necessary forms for tracking items coming in and leaving the warehouse.
6. Create receipts for donated individuals.
7. Create daily inventory reports

Water Resource Training Lead	DEQ/DHHS			

6. Work Assignments:

Objective 1: Ensure all households within impacted community have required resources.

Critical Task: Assemble, coordinate, and monitor neighborhood canvassing teams.

Tactics:
1. Determine hours of operation for teams in coordination with MSP due to safety concerns.
2. Develop and refine tracking sheet for Water Resource Teams to use in the field.
3. Finalize the training agenda/content.
4. Develop a long term strategy to meet the needs of canvassing objective.
4. Work with the local EOC to determine areas of need and locations in the city to place the teams on Tuesday morning.
5. Deploy teams to pre-identified locations.
6. Determine the safety and security needs of the teams.
7. Ensure logistics are being arranged through the current resource requests to the local EOC.
8. Conduct training for water resource teams at 1pm on Monday January 11, 2016 at the local DHHS office (4809 Clio Rd Flint, MI) by DHHS and DEQ.
9. Pre-deployment briefing to include deployment locations and safety briefing at GCCARD.

7. Special Instructions:

Any safety information, report in requirements, information to share/not to share, etc.

A Water Resource Team consists of 2 volunteers (currently DHHS employees), 1 trooper, trooper vehicle, locally provided vehicle. The teams will have stock of water, filters/replacement cartridges/pitchers, water sampling kits, and door hangers.

Warehouse #1	Michelle Kuzera	1		
Local EOC Donations Management	Ginna Holmes	1		

6. Work Assignments:

Objective 2: Ensure accurate tracking and accounting of all commodities.

Critical Task: Coordinate the ordering, tracking, delivery, and inventory of resources to warehouse operations.

Tactics:
Find and appoint a warehouse manager (and supporting staff, if necessary)
Develop inventory process.
Ensure staff are properly trained and certified to operate equipment.
Create a Safety plan.
Site safety plan must be followed.
All injuries reported to Safety Officer
Create necessary forms for tracking items coming in and leaving the warehouse.
Create receipts for donated individuals.
Assess training needs/requirements for heavy equipment operation.
Create daily inventory reports
Coordinate with public/private partners and local rep to maintain local donations management.

Planning Section (Obj. 9)- 2015-10-01-City of Flint- Water Contamination/Shortage	Date From: 01/11/2016	Date To: 01/13/2016	
	Time From:08:00:00	Time To: 08:00:00	

4. Operations Personnel:	Name	Contact Number(s)
Operations Section Chief:	Jackie Hampton	
Branch Director:	Tom Weber	
Division/Group Supervisor		

5. Resources Assigned:		# of Persons	Contact (e.g., phone, pager, radio, frequency, etc.)	Reporting Location, Special Equipment and Supplies, Remarks, Notes, Information
Resource Identifier	Leader			
GIS Unit	Jim Tchorzynski	3		ArcGIS
Resource Unit	Amanda Bresler	1		
Documentation Unit	Zach Baker	1		

6. Work Assignments:

Objective 9: Enhance situational awareness and common operating picture of all activities.

Tactics:
A. Conduct daily briefings with state agency emergency managers. (PSC)
B. Monitor MCIMS to maintain situational awareness and develop reports. (All)
C. Produce maps to include bottled water, water filter, and pitcher, filter distribution, affected areas and infrastructure, and method of distribution. (GIS)
D. Complete and produce daily situation reports. (PSC)

7. Special Instructions:

8. Communications (radio and/or phone contact numbers needed for this assignment):

Name/Function		Primary Contact: indicate cell, pager, or radio (frequency/system/channel)
	/	
	/	
	/	
	/	

9. Prepared by: Name: A.Bresler | Position/Title: PSC | Date/Time: 01/10/2016 10:43:52

ASSIGNMENT LIST (ICS 204)

1. Incident Name:	2. Operational Period:		3. Branch: Division: Group: Staging Area:
Planning Section (Obj. 2)-2015-10-01-City of Flint-Water Contamination/Shortage	Date From: 01/11/2016	Date To: 01/13/2016	
	Time From:08:00:00	Time To: 08:00:00	

4. Operations Personnel:	Name	Contact Number(s)
Operations Section Chief:	Jackie Hampton	
Branch Director:	Tom Weber	
Division/Group Supervisor		

5. Resources Assigned:		# of Persons	Contact (e.g., phone, pager, radio, frequency, etc.)	Reporting Location, Special Equipment and Supplies, Remarks, Notes, Information
Resource Identifier	Leader			

6. Work Assignments:

Objective 2: Ensure accurate tracking and accounting of all commodities.

Critical Task: Coordinate the tracking and inventory or resources on-scene and advise Logistics Section of needs.

Tactics:
1. Develop current situational awareness of inventory of on-scene resources.
2. Work with SEOC and local logistics to identify times for daily commodities updates to the resource unit lead.
3. Develop daily resource status report

7. Special Instructions:

Coordinate with Logistics

8. Communications (radio and/or phone contact numbers needed for this assignment):

Name/Function		Primary Contact: Indicate cell, pager, or radio (frequency/system/channel)
	/	
	/	
	/	
	/	

9. Prepared by: Name: Robb Morford	Position/Title: Documentation Unit Leader	Date/Time: 01/10/2016 11:40:34

ASSIGNMENT LIST (ICS 204)

1. Incident Name:	2. Operational Period:		3. Branch: Division: Group: Staging Area:
Public Information (Obj.3)-2015-10-01-City of Flint-Water Contamination/Shortage	Date From: 01/11/2016	Date To: 01/13/2016	
	Time From:08:00:00	Time To: 08:00:00	

4. Operations Personnel:	Name	Contact Number(s)
Operations Section Chief:	Jackie Hampton	
Branch Director:		
Division/Group Supervisor		

5. Resources Assigned:		# of Persons	Contact (e.g., phone, pager, radio, frequency, etc.)	Reporting Location, Special Equipment and Supplies, Remarks, Notes, Information
Resource Identifier	Leader			

6. Work Assignments:

Objective 3: Improve and maintain public information strategy.

Task(s):
-Continue promotion of water resource sites.
-Announce water resource teams beginning Tuesday, and ongoing efforts
-Issuing news release to reiterate information shared throughout operational period
-Established an opt-in email citizens can subscribe to receive for daily updates on the state's response. Opt-in added to the website and first email being sent today.
-Plan and conduct daily media avails to provide ongoing actions.
-Work with MAB to air radio Public Service Announcements with information on how to get water resources. MDHHS PIO taking the lead.
-Identify and distribute information to churches, distribution points: post to the website, hand out at media avails, and continue to share with stakeholders.
-Print 5,000 door hangers for water resource teams to distribute.
-Print additional door hangers to disseminate, as needed.
-Establish JIC in Flint. Hotels have been secured. Lunch will be provided.
-Develop contact list daily and provide to SEOC.
-Issue social media content across agency accounts to share new information.
-Develop and print bilingual handouts in Spanish
-Determine JIC staffing needs for this week.
-Arrange a PIO to be embedded with a media resource team beginning on Tuesday.
-Identify a photographer to take photos of resource teams in the field.
-Work to establish a contact with local television providers to push public information message.

7. Special Instructions:

8. Communications (radio and/or phone contact numbers needed for this assignment):

Name/Function		Primary Contact: Indicate cell, pager, or radio (frequency/system/channel)
Nicole Lisabeth	/JIC PIO Lead	
Jane Yount	/SEOC JIC Liaison	
	/	
	/	

9. Prepared by: Name: Zachary Baker	Position/Title: Documentation Unit	[illegible]0/2016 11:32:17

ASSIGNMENT LIST (ICS 204)

1. Incident Name:	2. Operational Period:		3. Branch: Division: Group: Staging Area:
Health and Environment Branch (Obj. 4)-2015-10-01-City of Flint-Water Contamination/Shortage	Date From: 01/11/2016	Date To: 01/13/2016	
	Time From:08:00:00	Time To: 08:00:00	

4. Operations Personnel:	Name	Contact Number(s)
Operations Section Chief:	Jackie Hampton	
Branch Director:	Jennifer Lixey	
Division/Group Supervisor		

5. Resources Assigned:		# of Persons	Contact (e.g., phone, pager, radio, frequency, etc.)	Reporting Location, Special Equipment and Supplies, Remarks, Notes, Information
Resource Identifier	Leader			
CHECC Duty Officer				

6. Work Assignments:

Objective 4: Develop a long term public health and human services plan.

Tactics:
-Coordination through the Community Health Emergency Coordination Center (CHECC) to identify priorities for long term public health planning and tactics.
-Coordinate with local health department to determine what has been accomplished to date.
-Communicate with the healthcare providers regarding blood testing.
-Support local health with case management.

7. Special Instructions:

8. Communications (radio and/or phone contact numbers needed for this assignment):		
Name/Function		Primary Contact: indicate cell, pager, or radio (frequency/system/channel)
Jennifer Lixey Terrill

Division/Group Supervisor		

5. Resources Assigned:		# of Persons	Contact (e.g., phone, pager, radio, frequency, etc.)	Reporting Location, Special Equipment and Supplies, Remarks, Notes, Information
Resource Identifier	Leader			
Logistics Section Chief	Wendy Galbreath			Logistics Chief rotates, may not always be Wendy

6. Work Assignments:

Objective 5. Ensure adequate staffing to support operational requirements.

Tactic(s):
Develop staffing plan for operational period.
Develop a staffing spreadsheet indicated required positions.
Poll Section Chief's for personnel available to work.
Notify selected staff of their assignments.
Send staffing spreadsheet to assigned personnel.
Create a sign-in sheet for SEOC sign-in.
Assess staffing needs in the local EOC.
Deploy state staff to local EOC, if needed.
Ensure all assigned staff check in and are tracked via MICIMS.

7. Special Instructions:

8. Communications (radio and/or phone contact numbers needed for this assignment):

State Agency Briefing
1/9/2016 0930

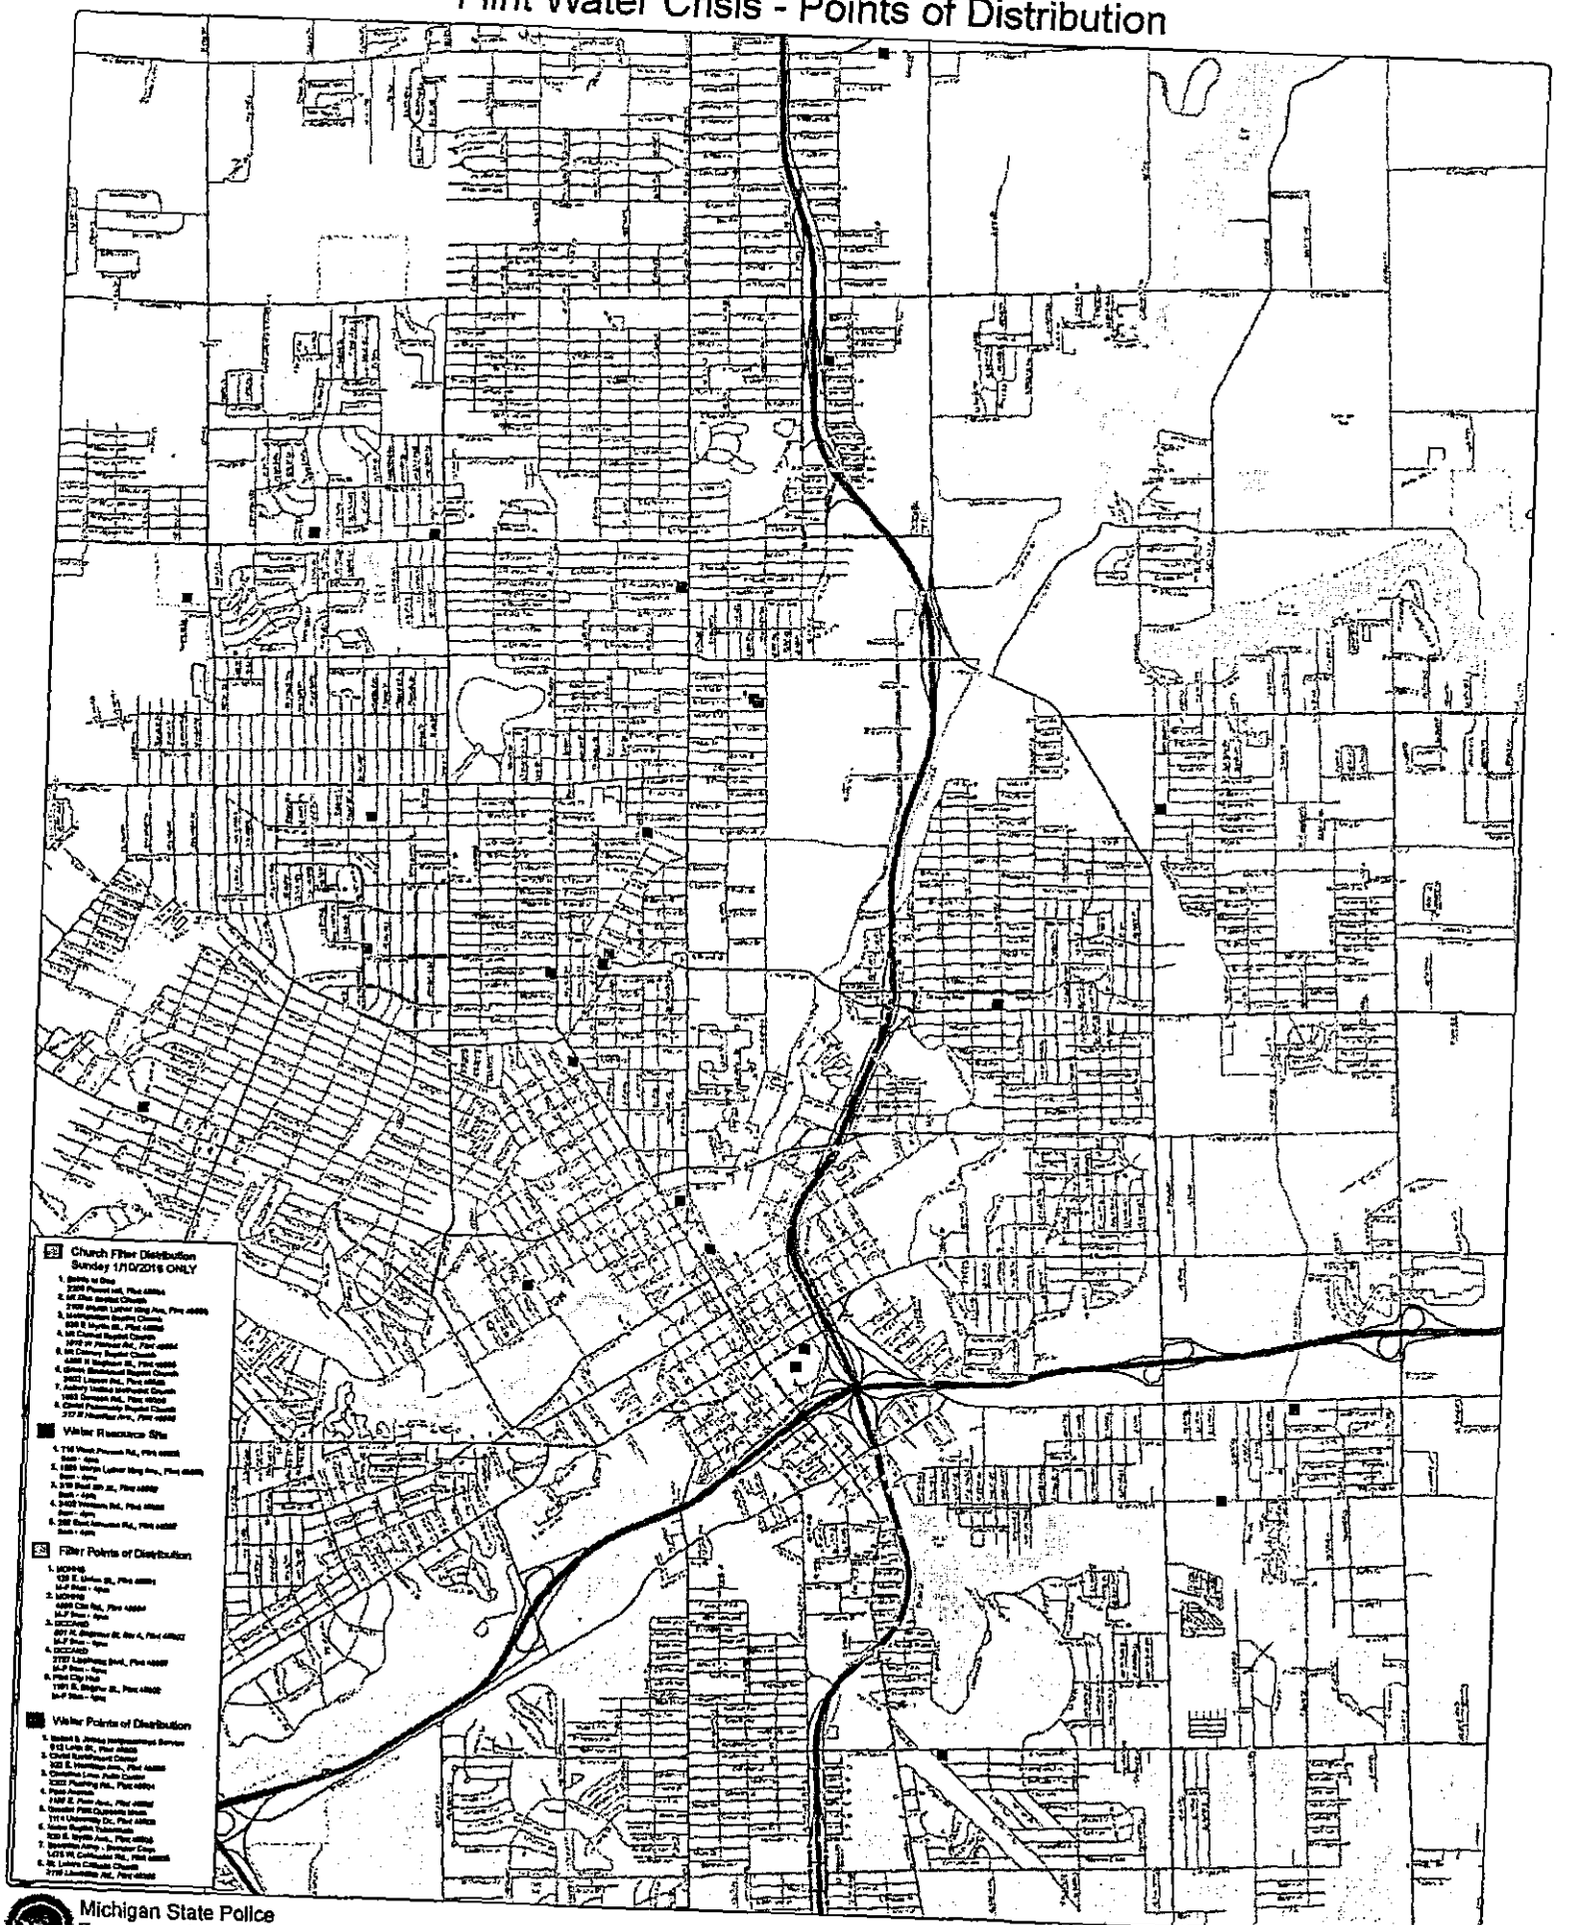
- **Priorities:**
    1. JIC Messaging- press releases, community flyers, door hangers, and streamline of 211 process
    2. Gathering and distribution of resources (filters, water, cartridges) throughout Flint
    3. *Identify church distribution sites and volunteers for tomorrow*
    4. Assembling recovery teams to canvas and distribute resources in the community, starting Tuesday
- State agency workers should not be driving state vehicles with DEQ and DHHS on the side in the county. If they are wearing a logo shirt they should take a jacket.
- **Operations:** Five fire departments will be established as site for distribution of water, filters, and cartridges, Red Cross is on site to assist, at least two volunteers per station.
    - 2000 kits are available for distribution at 10 local churches on Sunday. SEOC is currently working on logistics to identify church locations and Red Cross volunteers.
    - Working to identify safety officer from MSP.
    - Food Pantry not in a great location for citizens to get to.
- Services to Aging: Nothing new
- **MDARD:** Working with health department for guidance on regulatory requirements.
    - Submitted messaging information to the JIC.
    - Working to identify animals that are not tracked VIA LARA that would house animals. The shelter director also pulling animal holding facility list.
    - MDARD and DHHS provided information on nutrition for JIC message.
- ARC: Sent volunteers to support sheriff's distribution.
    - Will have at least two individuals today and tomorrow at each fire station.
    - Disaster Recovery Operation started yesterday. DRO number is 608-16.
    - Looking for additional volunteers based on the number of sites for tomorrow.
    - Will begin to work with local Red Cross at County EOC to coordinate volunteers.
- Ed: High level national organizations have inquired on the current events,
    - Engaged national level organizations with the JIC.
    - Contacted each child nutrition program and provided information forwarding them to the website.
- DEQ: Has mobilized DEQ staff to assist in Incident Command at the EOC, as state resources
    - IAP established at local level through Monday.
    - Field employees are aware of current safety concerns.
- LARA: coordinating with DEQ on additional water testing at the schools, plan will be developed this morning.
- *DTMB: Driver onsite in flint picked up water, filters, and cartridges to drop at the fire stations* today. Will be available to deliver materials to churches tomorrow.
- MSP: In route to SEOC for safety officer.

- DHHS: Deployed community service commission for volunteer coordination and donations management.
    - *Recruited staff for Door to door operations. Conference room confirmed and set up at* Clio Rd office for training on Monday of the 40 volunteers.
    - Obtained 1000 filters for fire stations, 2000 churches, ordered another 5,000 filters to be delivered Wednesday. An additional 10,000 filters and 10,000 cartridges to be delivered in the near future.
    - Working to identify current funding levels.
- DCH- CHEEC currently activated at level 1.
    - Developed health care provides list for the county.
    - Working to streamline the 211 process. Working on messaging to ensure that all questions from the citizen should be directed to 211 and local health care providers Sent information to JIC for finalizing door hanging.
    - Request has been sent to Linda Dykema, Division Director of Epidemiology, to have two individuals for ETC Lead Investigator working on the environmental investigations be housed at the Genesee County Health Department's Burton site, starting on Monday, January 11, 2016, until the lead investigations being conducted are complete. Resource request was submitted by Genesee County Health department to Genesee County EOC.
- Logistics: Working with Red Cross to recruit volunteers at churches.
    - Address cards have been developed and distributed to Flint Fire Department for tracking. Information from the address card is continuously being entered by MDHHS employee. Updates will be sent to SEOC Human Services POC throughout the day.
    - Make sure information is being entered into MI CIMS.
    - Logistics is working with DTMB to get the door-to-door flyers printed.
- JIC: Working on getting together door hanger, single page sheet similar to the website with additional information.
    - *Setting up emails for internal JICmanager@michigan.gov and external* JICnews@michigan.gob
- Recovery: On the ground operations will begin Tuesday morning.
    - Working to develop a request for vehicles for to transport people and resources during the community distribution. Is researching the possibility of the vehicle requests being filled through the public/private partnerships-possibly with GM.
    - GIS provided a list of current locations that have received resources.
    - Staff is working to develop a process from for field team to report contact or distribution of resources during daily neighborhood canvas.
- PSC: SIT report from agencies and Section Chiefs by 3:30 for daily situation report.
- Winter storm coming in to night, 1 pm webinar and call in. Overnight from up 40 to lower 20s, 3-5am snow starting in the Flint area. Snow will continue on and off all day, travel will be very hazardous. Monday-Thursday 15-20 will lows at 10, wind chill values below 0, additional snow

Monday-Tuesday, will put a big damper on travel both days. Contact information for NWS is MI CIMS

- Capt: Make sure everyone is keeping healthy.
    - Weather message- Please make sure people going out are taking hazardous weather in to considerations
    - Information has to be logged into MI CIMS to help answer questions throughout the day.
    - JIC needs to be on the call daily to get more messaging out instead of the media telling the story.
    - If any agency has push back on staffing please make Capt aware, we need to keep moving forward.
- Next call will be 0930 Sunday, January 10

Flint Water Crisis - Points of Distribution



Michigan State Police
Emergency Management and
Homeland Security Division

Genesee County EOC – 2015-10-01-City of Flint-Water Contamination / Shortage Situation Report #1, 01/08/2016

Operational Period:

Operational Period Begin:	01/04/2016 08:00:00
Operational Period End:	01/08/2016 17:00:00
Situation Report No.	1
EOC Status:	Partial
EOC Hours of Operation Begin:	08:00:00
EOC Hours of Operation End:	17:00:00

Situational Awareness:

On April 25, 2014, the City of Flint switched their primary water source from the Detroit Water and Sewerage Department (DWSD). Introduction of corrosive river water into city infrastructure caused leaching of lead from pipes into the water supply. Increased exposure to lead can cause immediate and long-term negative health effects, including developmental and cognitive delays, and behavioral disorders in children. Elevated blood lead levels that exceeded past seasonal levels were observed in City of Flint children, and were subsequently confirmed by Michigan Department of Health and Human Services (MDHHS) epidemiologists.

To mitigate the effects of river water on the infrastructure in the city, the City of Flint reconnected to DWSD as their primary water source on October 16, 2015. Water is treated with a supplemental phosphate addition to rebuild the protective layer in the distribution system and reduce leaching of lead into the water supply.

In response to these conditions, Genesee County declared a public health emergency on October 1, 2015. The City of Flint declared a Local State of Emergency and activated their Emergency Operations Center (EOC) and response plans on December 15, 2015. Genesee County declared a Local State of Emergency and requested a Governor's Emergency/Disaster declaration on January 4, 2016. Governor Snyder declared a State of Emergency for Genesee County and the City of Flint on January 5, 2016. The State Emergency Operations Center (SEOC) was activated on January 5, 2016 to coordinate state response.

The Genesee County EOC was activated following the declaration of a Local State of Emergency on January 4, 2016, and operates on weekdays between 08:00AM and 17:00PM.

Objectives:

For 01/04-01/08 Operational Period:

- Ensure coordination between local, state and federal stakeholders, and appropriate subject matter experts.
- Obtain and maintain situational awareness and common operating picture of all activities.
- Identify critical resources for acquisition and allocation.
- Enter resource requests into MI CIMS as needed.
- Coordinate response and recovery activities volunteer agencies.
- Assess damages. –**Completed assessment for physical (infrastructure) damage, TBD for health impacts**
- Establish operational period and hours of operations. – **Complete.**

Objectives for 01/11-01/15 Operational Period will be established on Friday, January 8, if possibe.

Summary of Response Actions:
The following actions have been coordinated and supported through the Genesee County EOC since activation:

Genesee County Sheriff's Office:
- Distribute filter and water to affected population (172 attempted contacts with 27 personnel on 01/07/2016).
- Provide security at EOC and incident facilities.
- Sheriff Pickell is serving as the PIO for Genesee County.
- Operate EOC and manage incident through Emergency Management & Homeland Security Office.

Genesee County Health Department:
- Developing messaging (health education) for affected population.
- Provide nutritional counseling.
- Elevated blood level case management.
- Provide IT support for filter distribution database and GIS mapping.
- Developing Lead Poison Prevention Plan.

Genesee County Equalization Department:
- Provide addresses, demographic, socioeconomic data for incident planning and forecasting.
- Provide GIS mapping services.
- Preliminary assessed damages on public and private infrastructure impacts in coordination with City of Flint.

Genesee County Community Action Resource Department (GCARD):
- Warehousing/staging of filters for distribution to affected population.
- Distribution of filters to affected population from two locations in the City of Flint.

City of Flint Fire Department:
- 5 Fire stations will serve as PODs for water and filter equipment on Saturday, 01/08/2016, 0900AM to 1600PM.

Flint Community Schools:
- ...

Michigan Department of Health and Human Services:
- Filter distribution at one location in the City of Flint.

United Way of Genesee County:
- Receive and manage donations (cash and goods).
- Public information through 211.
- Facilitating coordination and control among local agencies.

Foodbank of Eastern Michigan:
- Warehousing/staging of water for distribution to affected populations.
- Identify and operate PODs for water (8 sites identified by 12:00 noon, 01/08/2016).
- Water inventory by end of day, 01/07/2015:
  6 pallets @ 28 cases 6 gallons a case = 1,008 gallons
  2 pallets @ 32 cases 6 gallons a case = 384 gallons
  3 pallets @ 48 cases 40 bottles a case = 5,760 bottles

Hurley Medical Center:

- ...

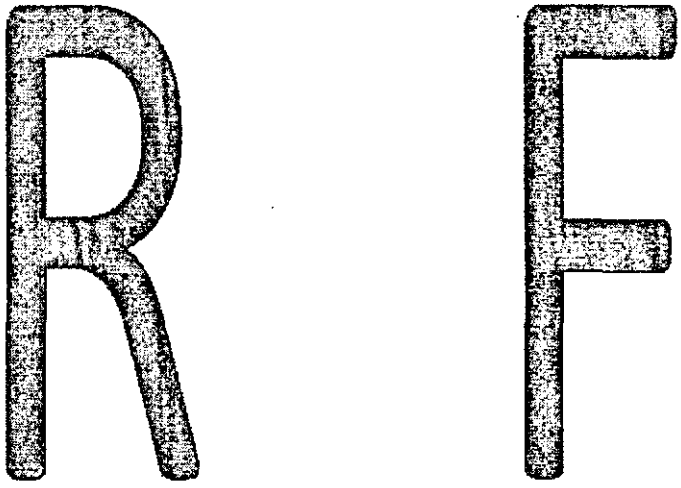
The county EOC has issued five resource requests to the SEOC (all in progress) by 12:00 noon on 01/08/2016.

Damage Assessment:

Physical Damage Assessment
Preliminary estimates for infrastructure damage in City of Flint:

Private Damage	$ 54,619,500
Public Damage	$712,800,000
Total Damage	**$767,419,500**

Health Damage Assessment
Health damages will be assessed after methodology for determining health effects have been determined in coordination with SEOC staff, and information has been received from local agencies/SMEs.

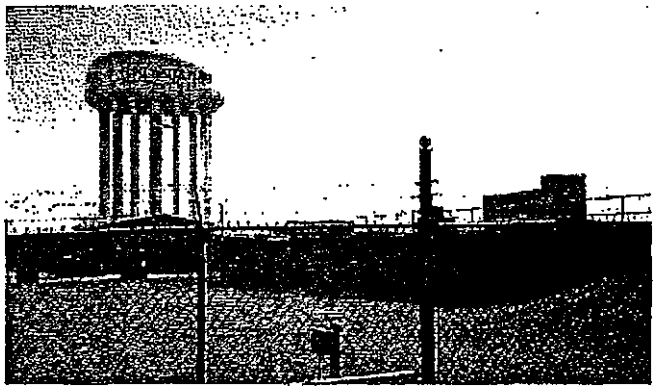


1. Incident Name: 2015-10-01 City of Flint-Water Contamination/Shortage	2. Operational Period to be covered by IAP (Date / Time): From: 01/11/2016 08:00:00 To: 01/13/2016 08:00:00	IAP Cover Sheet

3. Approved by:

FOSC:	
SOSC:	Jacqueline Adkins
RPIC:	
State SEOC Director	Capt. Chris Kefenske

Incident Action Plan



4. Prepared by: Zachary Baker Date / Time: 01/10/2016 12:32:16

Incident

1. Incident name: 2015-10-01 City of Flint-Water Contamination/Shortage
2. Operational Period from: 01/11/2016 08:00:00to: 01/13/2016 08:00:00

3. Objective(s)

1. Ensure all households within impacted community have required resources.
2. Ensure accurate tracking and accounting of all commodities.
3. Improve and maintain public information strategy.
4. Develop a long term public health and services plan.
5. Ensure adequate staffing to support operational requirements.
6. Identify possible assistance programs.
7. Develop an approved GIS strategy.
8. Maintain coordination between partner agencies and organizations.
9. Enhance situational awareness and common operating picture of all activities.
10. Develop a comprehensive Recovery Plan.

4. Operational Period Command Emphasis:

1. Provide regular local and technical briefings
2. Identify life safety issues.
3. Identify priorities.
4. Provide policy direction by observance of SEOC SOPs.
5. Seek technical guidance from relevant federal agencies.
6. Provide regular legislative/congressional briefings.

General Situational Awareness:

By early May 2014, the City of Flint switched from the Detroit Water and Sewerage Department (DWSD) to water from its own water treatment plant drawn from the Flint River as its primary water source. The different characteristics of the water resulted in leaching of lead from lead pipes in the city's water infrastructure into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels and elevated blood lead levels in young children were observed in the City of Flint and confirmed by the State Chief Medical Officer.

On October 1, 2015 the Genesee County Health Department declared a Public Health Emergency due to the elevated blood lead levels in citizens. In response to this the City of Flint declared a local State of Emergency on December 15, 2015 and activated their Emergency Operations Center.

To mitigate the effects of the new source of water on the infrastructure in the City of Flint, the city switched back to DWSD water on October 16, 2015. Funding to reconnect to DWSD was provided from the City of Flint, the Charles Stewart Mott Foundation, and the State of Michigan. Water is now treated with a supplemental phosphate addition to rebuild the protective layer in the distribution system and reduce the leaching of lead into the water supply.

For the mitigation of negative health effects, over 24,000 water filters and replacement cartridges have been distributed to residents in the City of Flint. Approximately 13,000 water filters, water pitchers and replacement cartridges were distributed by the Michigan Department of Health and Human Services (MDHHS) in the timeframe of October 1 to December 31, 2015 alone.

MDHHS has increased surveillance of blood lead levels in children and is addressing water issues in environmental investigations to identify lead sources in the environment of affected children and provide health education and information to residents, health care providers, and daycare/educational institutions.

Local nonprofit organizations have provided potable water to Flint residents. MSP/EMHSD GIS staff is supporting county and local GIS staff by consolidating data from local sources into comprehensive databases and providing mapping services to support incident analysis and forecasting. Data and maps regarding the location of water pipes, affected schools, filter distribution locations, water monitoring results, and predictive blood lead levels for affected areas will be made available with demographics.
Before December 16, 2015, $9.35 million was provided by the State of Michigan and $6 million by local agencies and nonprofit partners to manage the effects of the corroded pipes. While the source water has been switched back to DWSD, water in the City of Flint is still not safe to drink, unless specifically filtered.

5. Site Safety Plan Required?

Yes ☐ No ☑

Approved Site Safety Plan(s) Located at:

6. Incident Action Plan (the items checked below are included in this Incident Action Plan):

☑ ICS 202	☐ ICS 206

SAFETY MESSAGE/PLAN (ICS 208)

1. Incident Name:	2. Operational Period:	Date From: 01/11/2016	Date To: 01/13/2016
City of Flint - 2015-10-01-City of Flint-Water Contamination / Shortage GC EOC		Time From: 08:00:00	Time To: 08:00:00

3. Safety Message/Expanded Safety Message, Safety Plan, Site Safety Plan:

All personnel should be aware of personal safety risks in the community. A daily safety briefing will be conducted by MSP prior to morning departure from the GCCARD for delivery operations. Door to door operations in the community will be accompanied with law enforcement escort.

Exposure to sub freezing temperatures and strong winds can lead to cold exposure and hypothermia. Wear appropriate winter clothing to cover exposed skin to mitigate against the affects of cold exposure. Wear appropriate footwear and ensure solid footing to mitigate against slip, trip, and fall hazards related to snow and ice covered ground surfaces.

Current conditions on major expressways (I-69 I-475) and city streets is poor, with slush expected to re-freeze with low overnight temperatures on 01/10. As of 01/10 at 1700 HRS, most city side streets and sidewalks have not been cleared, making for difficult travel.

When driving in poor weather conditions keep a safe distance between your vehicle and the vehicle in front of you. Allow extra stopping distance as the roads may be snow covered and icy. Ensure your vehicle contains an ice scraper, extra windshield wiper fluid, and an emergency road kit.

Specific to Fire Station #6 (716 W. Pierson Road) Firefighters at the station have advised that should there be a call, they have concerns for the safety of the volunteers without their presence. Genesee County Sheriff and Dispatch are aware of the situation, and should there be a fire call for station 6, a marked police unit would be pulled to have a presence at the station until firefighters returned.

4. Site Safety Plan Required? Yes ☐ No ☑

Approved Site Safety Plan(s) Located At:

Water Resource Team 3	Tpr. TBD	3		GCCARD
Water Resource Team 4	Tpr. TBD	3		GCCARD
MSP EMC	F/Lt. Mike Johnson	1		
Local EOC Safety Officer	Lt. Amy Dehner			
Water Resource Training Lead	DEQ/DHHS			

6. Work Assignments:

Objective 1: Ensure all households within impacted community have required resources.

Critical Task: Assemble, coordinate, and monitor neighborhood canvassing teams.

Tactics:
1. Determine hours of operation for teams in coordination with MSP due to safety concerns.
2. Develop and refine tracking sheet for Water Resource Teams to use in the field.
3. Finalize the training agenda/content.
4. Develop a long term strategy to meet the needs of canvassing objective.
4. Work with the local EOC to determine areas of need and locations in the city to place the teams on Tuesday morning.
5. Deploy teams to pre-identified locations.
6. Determine the safety and security needs of the teams.
7. Ensure logistics are being arranged through the current resource requests to the local EOC.
8. Conduct training for water resource teams at 1pm on Monday January 11, 2016 at the local DHHS office (4809 Clio Rd Flint, MI) by DHHS and DEQ.
9. Pre-deployment briefing to include deployment locations and safety briefing at GCCARD.

7. Special Instructions:

Any safety information, report in requirements, information to share/not to share, etc.

A Water Resource Team consists of 2 volunteers (currently DHHS employees), 1 trooper, trooper vehicle, locally provided vehicle. The teams will have stock of water, filters/replacement cartridges/pitchers, water sampling kits, and door hangers.

8. Communications (radio and/or phone contact numbers needed for this assignment):

Division/Group Supervisor		

5. Resources Assigned:		# of Persons	Contact (e.g., phone, pager, radio, frequency, etc.)	Reporting Location, Special Equipment and Supplies, Remarks, Notes, Information
Resource Identifier	Leader			

6. Work Assignments:

Objective 3: Improve and maintain public information strategy.

Task(s):
-Continue promotion of water resource sites.
-Announce water resource teams beginning Tuesday, and ongoing efforts
-Issuing news release to reiterate information shared throughout operational period
-Established an opt-in email citizens can subscribe to receive for daily updates on the state's response. Opt-in added to the website and first email being sent today.
-Plan and conduct daily media avails to provide ongoing actions.
-Work with MAB to air radio Public Service Announcements with information on how to get water resources. MDHHS PIO taking the lead.
-Identify and distribute information to churches, distribution points: post to the website, hand out at media avails, and continue to share with stakeholders.
-Print 5,000 door hangers for water resource teams to distribute.
-Print additional door hangers to disseminate, as needed.
-Establish JIC in Flint. Hotels have been secured. Lunch will be provided.
-Develop contact list daily and provide to SEOC.
-*Issue social media content across agency accounts to share new information.*
-Develop and print bilingual handouts in Spanish
-Determine JIC staffing needs for this week.
-Arrange a PIO to be embedded with a media resource team beginning on Tuesday.
-Identify a photographer to take photos of resource teams in the field.
-Work to establish a contact with local television providers to push public information message.

Resource Identifier	Leader			
Logistics Section Chief	Wendy Galbreath			Logistics Chief rotates, may not always be Wendy

6. Work Assignments:

Objective 5. Ensure adequate staffing to support operational requirements.

Tactic(s):
Develop staffing plan for operational period.
Develop a staffing spreadsheet indicated required positions.
Poll Section Chief's for personnel available to work.
Notify selected staff of their assignments.
Send staffing spreadsheet to assigned personnel.
Create a sign-in sheet for SEOC sign-in.
Assess staffing needs in the local EOC.
Deploy state staff to local EOC, if needed.
Ensure all assigned staff check in and are tracked via MiCIMS.

6. Work Assignments:

Objective 6: Identify Possible Assistance Programs

Tactic(s):

1. Continued research being performed by identified state agencies.
2. Assist with questions as needed.
3. Coordinate with Federal Liaison.
4. Compile data as received.

7. Special Instructions:

All programs have been given a deadline of Friday January 15, 2016.

Incident

1. Incident name: 2015-10-01 City of Flint-Water Contamination/Shortage
2. Operational Period from: 01/11/2016 08:00:00to: 01/13/2016 08:00:00

3. Objective(s)

1. Ensure all households within impacted community have required resources.
2. Ensure accurate tracking and accounting of all commodities.
3. Improve and maintain public information strategy.
4. Develop a long term public health and services plan.
5. Ensure adequate staffing to support operational requirements.
6. Identify possible assistance programs.
7. Develop an approved GIS strategy.
8. Maintain coordination between partner agencies and organizations.
9. Enhance situational awareness and common operating picture of all activities.
10. Develop a comprehensive Recovery Plan.

4. Operational Period Command Emphasis:

1. Provide regular local and technical briefings
2. Identify life safety issues.
3. Identify priorities.
4. Provide policy direction by observance of SEOC SOPs.
5. Seek technical guidance from relevant federal agencies.
6. Provide regular legislative/congressional briefings.

General Situational Awareness:

By early May 2014, the City of Flint switched from the Detroit Water and Sewerage Department (DWSD) to water from its own water treatment plant drawn from the Flint River as its primary water source. The different characteristics of the water resulted in leaching of lead from lead pipes in the city's water infrastructure into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels and elevated blood lead levels in young children were observed in the City of Flint and confirmed by the State Chief Medical Officer.

On October 1, 2015 the Genesee County Health Department declared a Public Health Emergency due to the elevated blood lead levels in citizens. In response to this the City of Flint declared a local State of Emergency on December 15, 2015 and activated their Emergency Operations Center.

To mitigate the effects of the new source of water on the infrastructure in the City of Flint, the city switched back to DWSD water on October 16, 2015. Funding to reconnect to DWSD was provided from the City of Flint, the Charles Stewart Mott Foundation, and the State of Michigan. Water is now treated with a supplemental phosphate addition to rebuild the protective layer in the distribution system and reduce the leaching of lead into the water supply.

For the mitigation of negative health effects, over 24,000 water filters and replacement cartridges have been distributed to residents in the City of Flint. Approximately 13,000 water filters, water pitchers and replacement cartridges were distributed by the Michigan Department of Health and Human Services (MDHHS) in the timeframe of October 1 to December 31, 2015 alone.

MDHHS has increased surveillance of blood lead levels in children and is addressing water issues in environmental investigations to identify lead sources in the environment of affected children and provide health education and information to residents, health care providers, and daycare/educational institutions.

Local nonprofit organizations have provided potable water to Flint residents. MSP/EMHSD GIS staff is supporting county and local GIS staff by consolidating data from local sources into comprehensive databases and providing mapping services to support incident analysis and forecasting. Data and maps regarding the location of water pipes, affected schools, filter distribution locations, water monitoring results, and predictive blood lead levels for affected areas will be made available with demographics.
Before December 16, 2015, $9.35 million was provided by the State of Michigan and $8 million by local agencies and nonprofit partners to manage the effects of the corroded pipes. While the source water has been switched back to DWSD, water in the City of Flint is still not safe to drink, unless specifically filtered.

5. Site Safety Plan Required?

Yes ☐ No ☑

Approved Site Safety Plan(s) Located at:

SAFETY MESSAGE/PLAN (ICS 208)

1. Incident Name:	2. Operational Period:	Date From: 01/11/2016	Date To: 01/13/2016
City of Flint - 2015-10-01-City of Flint-Water Contamination / Shortage GC EOC		Time From: 08:00:00	Time To: 08:00:00

3. Safety Message/Expanded Safety Message, Safety Plan, Site Safety Plan:

All personnel should be aware of personal safety risks in the community. A daily safety briefing will be conducted by MSP prior to morning departure from the GCCARD for delivery operations. Door to door operations in the community will be accompanied with law enforcement escort.

Exposure to sub freezing temperatures and strong winds can lead to cold exposure and hypothermia. Wear appropriate winter clothing to cover exposed skin to mitigate against the affects of cold exposure. Wear appropriate footwear and ensure solid footing to mitigate against slip, trip, and fall hazards related to snow and ice covered ground surfaces.

Current conditions on major expressways (I-69 I-475) and city streets is poor, with slush expected to re-freeze with low overnight temperatures on 01/10. As of 01/10 at 1700 HRS, most city side streets and sidewalks have not been cleared, making for difficult travel.

When driving in poor weather conditions keep a safe distance between your vehicle and the vehicle in front of you. Allow extra stopping distance as the roads may be snow covered and icy. Ensure your vehicle contains an ice scraper, extra windshield wiper fluid, and an emergency road kit.

Specific to Fire Station #6 (716 W. Pierson Road) Firefighters at the station have advised that should there be a call, they have concerns for the safety of the volunteers without their presence. Genesee County Sheriff and Dispatch are aware of the situation, and should there be a fire call for station 6, a marked police unit would be pulled to have a presence at the station until firefighters returned.

Water Test Sampling Kits	Kirby Shane	1	shanek@michigan.gov	Lab

6. Work Assignments:

Objective1: Ensure all households within impacted community have required resources.

Critical Task: Coordinate, conduct, and analyze water testing.

Task:
MDARD Pick up 500 water sampling test kits 1/11/16
Ship 1000 water sampling test kits to Flint 1/11/16, transported by DTMB transporting (pick up at 1200)
Order additional 3000 water sampling test kits and ship them directly to Flint 1/11/16
Identified potential contract issues.
Continue working with DTMB ensure contingencies are in place if needed.
2500 water samples taken and analyzed from schools so far.
750 water samples not from the schools, analyzed at lab to date.

7. Special Instructions:

Kirby Shane (DEQ) to contact test kit vendor tomorrow morning. Contract issues will be identified then.

8. Communications (radio and/or phone contact numbers needed for this assignment):

9. Prepared by: Name: Wendy Galbreath	Position/Title: Logistics Section Chief	Date/Time: 01/10/2016 11:26:02

ASSIGNMENT LIST (ICS 204)

1. Incident Name:	2. Operational Period:		3. Branch: Recovery Division: Group: Staging Area:
Recovery Branch (Obj. 1)-2015-10-01-City of Flint-Water Contamination/Shortage	Date From: 01/11/2016	Date To: 01/13/2016	
	Time From:08:00:00	Time To: 08:00:00	

4. Operations Personnel:	Name	Contact Number(s)
Operations Section Chief:	F/Lt. Gabe Covey	
Branch Director:	Brianna Briggs	
Division/Group Supervisor		

5. Resources Assigned:		# of Persons	Contact (e.g., phone, pager, radio, frequency, etc.)	Reporting Location, Special Equipment and Supplies, Remarks, Notes, Information
Resource Identifier	Leader			
Water Resource Team 1	Tpr. Rick Jones	3		GCCARD
Water Resource Team 2	Tpr. TBD	3		GCCARD
Water Resource Team 3	Tpr. TBD	3		GCCARD
Water Resource Team 4	Tpr. TBD	3		GCCARD
MSP EMC	F/Lt. Mike Johnson	1		
Local EOC Safety Officer	Lt. Amy Dehner			
Water Resource Training Lead	DEQ/DHHS			

6. Work Assignments:

Objective 1: Ensure all households within impacted community have required resources.

Critical Task: Assemble, coordinate, and monitor neighborhood canvassing teams.

Tactics:
1. Determine hours of operation for teams in coordination with MSP due to safety concerns.
2. Develop and refine tracking sheet for Water Resource Teams to use in the field.
3. Finalize the training agenda/content.
4. Develop a long term strategy to meet the needs of canvassing objective.
4. Work with the local EOC to determine areas of need and locations in the city to place the teams on Tuesday morning.
5. Deploy teams to pre-identified locations.
6. Determine the safety and security needs of the teams.
7. Ensure logistics are being arranged through the current resource requests to the local EOC.
8. Conduct training for water resource teams at 1pm on Monday January 11, 2016 at the local DHHS office (4809 Clio Rd Flint, MI) by DHHS and DEQ.
9. Pre-deployment briefing to include deployment locations and safety briefing at GCCARD.

7. Special Instructions:

Any safety information, report in requirements, information to share/not to share, etc.

A Water Resource Team consists of 2 volunteers (currently DHHS employees), 1 trooper, trooper vehicle, locally provided vehicle. The teams will have stock of water, filters/replacement cartridges/pitchers, water sampling kits, and door hangers.

8. Communications (radio and/or phone contact numbers needed for this assignment):		
Name/Function		Primary Contact: indicate cell, pager, or radio (frequency/system/channel)
Brian Wilson	/DHHS	Cell - 555-555-5555

1. Incident Name:	2. Operational Period:		3. Branch: Division: Group: Staging Area:
Logistics Section (Obj. 2)-2015-10-01-City of Flint-Water Contamination/Shortage	*Date From: 01/11/2016*	*Date To: 01/13/2016*	
	Time From:08:00:00	Time To: 08:00:00	

4. Operations Personnel:	Name	Contact Number(s)
Operations Section Chief:	Jackie Hampton	
Branch Director:	Wendy Galbreath	----
Division/Group Supervisor		

5. Resources Assigned:		# of Persons	Contact (e.g., phone, pager, radio, frequency, etc.)	Reporting Location, Special Equipment and Supplies, Remarks, Notes, Information
Resource Identifier	Leader			
Warehouse #1	Michelle Kuzera	1		
Local EOC Donations Management	Ginna Holmes	1		

6. Work Assignments:

Objective 2: Ensure accurate tracking and accounting of all commodities.

Critical Task: Coordinate the ordering, tracking, delivery, and inventory of resources to warehouse operations.

Tactics:
Find and appoint a warehouse manager (and supporting staff, if necessary)
Develop inventory process.
Ensure staff are properly trained and certified to operate equipment.
Create a Safety plan.
Site safety plan must be followed.
All injuries reported to Safety Officer
Create necessary forms for tracking items coming in and leaving the warehouse.
Create receipts for donated individuals.
Assess training needs/requirements for heavy equipment operation.
Create daily inventory reports
Coordinate with public/private partners and local rep to maintain local donations management.

5. Resources Assigned:		# of Persons	Contact (e.g., phone, pager, radio, frequency, etc.)	Reporting Location, Special Equipment and Supplies, Remarks, Notes, Information
Resource Identifier	Leader			

6. Work Assignments:

Objective 3: Improve and maintain public information strategy.

Task(s):
-Continue promotion of water resource sites.
-Announce water resource teams beginning Tuesday, and ongoing efforts
-Issuing news release to reiterate information shared throughout operational period
-Established an opt-in email citizens can subscribe to receive for daily updates on the state's response. Opt-in added to the website and first email being sent today.
-Plan and conduct daily media avails to provide ongoing actions.
-Work with MAB to air radio Public Service Announcements with information on how to get water resources. MDHHS PIO taking the lead.
-Identify and distribute information to churches, distribution points: post to the website, hand out at media avails, and continue to share with stakeholders.
-Print 5,000 door hangers for water resource teams to distribute.
-Print additional door hangers to disseminate, as needed.
-Establish JIC in Flint. Hotels have been secured. Lunch will be provided.
-Develop contact list daily and provide to SEOC.
-Issue social media content across agency accounts to share new information.
-Develop and print bilingual handouts in Spanish
-Determine JIC staffing needs for this week.
-Arrange a PIO to be embedded with a media resource team beginning on Tuesday.
-Identify a photographer to take photos of resource teams in the field.
-Work to establish a contact with local television providers to push public information message.

7. Special Instructions:

8. Communications (radio and/or phone contact numbers needed for this assignment):		
Name/Function		Primary Contact: Indicate cell, pager, or radio (frequency/system/channel)
Nicole Lisabeth	/JIC PIO Lead	
Jane Yount	/SEOC JIC Liaison

Damage Assessment and Emergency Status Report

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

Operational Period

Operational Period Begin:	01/06/2016 08:00:00
Operational Period End:	01/06/2016 17:00:00
Situation Report No.	2
SEOC Status:	Full
SEOC Hours of Operation Begin:	01/07/2016 08:00:00
SEOC Hours of Operation End:	01/07/2016 17:00:00

Executive Summary

By early May 2014, the City of Flint switched from the Detroit Water and Sewerage Department (DWSD) to water from its own water treatment plant drawn from the Flint River as its primary water source. The different characteristics of the water resulted in leaching of lead from lead pipes in the city's water infrastructure into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels and elevated blood lead levels in young children were observed in the City of Flint and confirmed by the *State Chief Medical Officer.*

On October 1, 2015 the Genesee County Health Department declared a Public Health Emergency due to the elevated blood lead levels in citizens. In response to this the City of Flint declared a local State of Emergency on December 15, 2015 and activated their Emergency Operations Center.

To mitigate the effects of the new source of water on the infrastructure in the City of Flint, the city switched back to DWSD water on October *16, 2015. Funding to reconnect to DWSD was provided from the City of Flint, the Charles Stewart Mott Foundation, and the State of* Michigan. Water is now treated with a supplemental phosphate addition to rebuild the protective layer in the distribution system and reduce the leaching of lead into the water supply.

For the mitigation of negative health effects, over 24,000 water filters and replacement cartridges have been distributed to residents in the City of Flint. Approximately 13,000 water filters, water pitchers and replacement cartridges were distributed by the Michigan Department of Health and Human Services (MDHHS) in the timeframe of October 1 to December 31, 2015 alone.

MDHHS has increased surveillance of blood lead levels in children and is addressing water issues in environmental investigations to identify lead sources in the environment of affected children and provide health education and information to residents, health care providers, and daycare/educational institutions.

Local nonprofit organizations have provided potable water to Flint residents. MSP/EMHSD GIS staff is supporting county and local GIS staff by consolidating data from local sources into comprehensive databases and providing mapping services to support incident analysis and forecasting. Data and maps regarding the location of water pipes, affected schools, filter distribution locations, water monitoring results, and predictive blood lead levels for affected areas will be made available with demographics.
Before December 16, 2015, $9.35 million was provided by the State of Michigan and $6 million by local agencies and nonprofit partners to manage the effects of the corroded pipes. While the source water has been switched back to DWSD, water in the City of Flint is still not safe to drink, unless specifically filtered.

On January 6, 2016, Governor Snyder declared a State of Emergency for the City of Flint and Genesee County. Genesee County requested the Governor's declaration on January 5, 2016, following the declaration of a State of Emergency in the county in response to the presence of lead in the public water supply and the detection of elevated blood lead levels exceeding governmental standards.

MSP/EMHSD GIS Section Update

Accomplished Today:
- Reproduced Socio-Economic Status Map
- Reproduced Predicted Affected Populations Map
- Cleansed old data and reports for water filter distributions
- Created draft map of water filter distributions (Refinement needed before releasing final product)
- Scheduled on-site visit with Flint GIS Department and Genesee County GIS Department
- Formatted databases to host content
- Researched service line database creation and scheduled meeting with U of M Flint to discuss timelines and resource needs
- Generated water infrastructure map (does not include building service lines)

Tasks for Tomorrow:
- Meet with Flint City GIS
- Meet with Genesee County GIS
- Meet with U of M Flint GIS
- Finalize water filter distributions map
- *Finalize plan for data distribution methods*

Incident Response/Recovery Priorities/Objectives

1. Activate the State Recovery Task Force
2. Establish and maintain coordination between the City of Flint, Genesee County, state and federal agencies, and appropriate medical experts.
3. Obtain and maintain situational awareness and common operating picture of all activities.
4. Establish SEOC operational period and hours of operations.

5. Investigate and identify all available programs for assistance with direct or related impacts, including the federal Lead Pipe Replacement Program.
6. Develop a comprehensive GIS strategy.
7. Coordinate response and recovery activities with MIVOAD and identify potential mission areas.
8. Establish and coordinate routine communication between SMEs and coordinate technical assistance among state agencies and to local agencies.
9. Provide technical assistance to the local Damage Assessment process.
10. Establish a Joint Information Center (JIC) and develop a public information strategy.
11. Monitor MI CIMS for resource requests and address as appropriate.
12. *Establish and disseminate cost center information for the incident.*

Agency Summaries

Joint Information Center / Public Information Officer

The Joint Information Center (JIC) was operational at 1 p.m. on Jan. 6 and operational from 8 a.m. to 5 p.m. on Jan. 7. State agencies at the JIC included the Departments of Licensing and Regulatory Affairs, Health and Human Services, Agriculture and Rural Development, Environmental Quality, and Michigan State Police.

During the 8 a.m. to 5 p.m. operational period, Gov. Rick Snyder held a press availability with Flint Mayor Karen Weaver. In addition, a round-table press briefing occurred at 1 p.m. at the 4000 Collins Road facility.

Objectives included:

- Oversaw and managed the state of Michigan public information duties due to emergency declaration.
- Held a 4 p.m. conference call with Genesee County PIO Sheriff Robert Pickell and city of Flint PIO Lead Sean Kammer.

Information Gathering
- Created media monitoring reports about the disaster as needed.
- Crafted talking points about the ongoing disaster, including a better description of the emergency declaration process.
- Crafted social media posts about state efforts underway during the disaster recovery process.
- Created graphics for social media efforts.

Information Dissemination
- Answered phones and manage media inquiries in regards to the Flint Water situation.
- Worked to establish a GovDelivery account; post link of website to sign up.
- Finalized details, media invite list and host a media roundtable.

External Affairs
- Worked on planing a conference call between command staff and affected state legislators and congressional Jan. 8, 2015.

Administrative
- Worked on filling staffing for the next operational period.

Logistics
- Worked on fixing email accounts.
- Worked to established a location with Genesee County and the city of Flint for a Unified Joint Information Center by the end of the week.
- Established a conference call line for the media roundtable.

Agriculture and Rural Development (MDARD)

Two areas MDARD is monitoring:
1). Water usage in food processing, food retail, and food service (restaurants). Guidance document has been available since October; MDARD surveyed food processors in October and did not find issues.
2). Water consumption by pets / animals. There has been some evidence of lead toxicity in dogs, and there has been guidance about pets & water included in the Q & A.
Jan 7th 2016 4pm update:
MDARD and Genesee Local Health Dept. agreed to move guidance on water to a regulatory requirement. New language (after JIC approval) will be going out to retail food establishments and restaurants with follow up inspections and sampling. Planning will continue on logistics for sampling.
Animals - call into the Genesee County Animal Control Shelter not yet returned; will try again tomorrow.

American Red Cross (ARC)

The MSP/EMHSD planners asked the American Red Cross to brainstorm and come up with possible ways in which MI-VOAD, the Red Cross and other NGOs might be able to assist in the response and recovery phases of the Flint Water Contamination. We are working on this and calling upon Red Cross colleagues to contribute to it. We've briefed Red Cross Regional and Divisional management on this incident. The Red Cross will provide situational awareness regarding the services related to the water contamination that individual NGOs are providing to Flint residents.

Civil Rights (MDCR)

Monitor and support agencies with issues surrounding outreach and engagement of marginalized populations within the City of Flint impacted by the current water crisis.

Corrections (MDOC)

Approximately 75 staff members are working in the affected area. Potable water has been provided to the offices in the affected area since the beginning of this situation and will continue to be provided. This water is available for people working there and those that have been required to go the office. We will continue to monitor this situation for any developing issues.

Environmental Quality (MDEQ)

The Michigan Department of Environmental Quality (DEQ) staff continue to conduct testing in the Flint Schools.

Human Services (MDHS)

Summary for both Health & Human Services
Participated in 9:30 State Agency briefing.
Attended Recovery Task Force / Recovery Branch meeting.
Coordinating between CHECC and JIC.
Local MDHHS staff active in local EOC.
Participated in MDHHS 12:30 Flint Water Lead Project call
Gathering information on water filter acquisition, distribution, installation, life span and replacement.
Providing update to Executives
CHECC remains at Level 1 Activation - Normal Operations

Licensing and Regulatory Affairs (LARA)

LARA upgraded to a mandatory department for this incident

Attached is a Point of Contact (POC) List

Attached is a Work Report indicating what work LARA has done today in City of Flint

National Weather Service (NWS)

Jim Maczko from NWS Grand Rapids participating in morning SEOC briefings via phone call and will coordinate support with local forecast office that serves Flint - NWS Detroit/Pontiac.

Natural Resources (MDNR)

MDNR is fully participating in all SEOC activities. Situational awareness is being maintained and the department stands ready to assist as needed.

Services to the Aging (OSA)

Valley Area Agency on Aging - Region 5 (VAAA), in partnership with other local community agencies such as the Genesee County Health Department and MDHHS, has helped organize local meetings and distribute water and water filters. VAAA is an access point for receiving calls from homebound seniors who are not able to pick up water filters or need assistance installing water filters. VAAA reports they continue to receive calls from seniors who need assistance.

VAAA has distributed 2 bottles of water with each home delivered meal to each HDM client within the City of Flint. Water. VAAA also provided water to homebound seniors who needed water to prepare food as they had limited support to pick up bottled water. Congregate meal participants also have access to water and filters as needed. Once water filters were installed, VAAA discontinued including water with home delivered meals.

VAAA also contacted the Grandparents Raising Grandchildren program to ensure that they were aware of educational efforts and confirm the program had received water filters to distribute to program participants.

State Police (MSP)

Insp. Bolger is monitoring the incident via MICIMS and participating in State Agency Briefings.

Supreme Court

January 6, 2015:
08:50 - State Judiciary EMC John Ort reported to the SEOC regarding the Flint water emergency. Nothing to report from the Judiciary regarding the emergency. DEQ website resources shared with our State Court Administrative Office (attn: Region II) in case our Genesee County courts have any questions regarding the emergency.

Technology, Management and Budget (MDTMB)

Provided update to management on morning briefing.
DTMB tasked with finding co-location site for the Joint Information Center within the Flint State Office Building. DTMB conference room is available to be used for the JIC with a media meeting room also available. DTMB Network and Telecommunications Division working on installation of additional telephone and data lines.

Incident Related Images

Mike Sobocinski's notes on January 8, 2015 SEOC briefing (9:30am):

Tom Weber leads meeting, Captain joining later by phone and in person at the end.

MSP Operations (Jaqueline Hampton): *Had conference call with local jurisdictions.* Water tests are needed. Only about 600 homes have been tested, out of about 45,000. There's a drop-off test kit – samples to be taken in the morning, after the water has sat for at least 6 hours during the night.

American Red Cross: Contacted by county [and?] sheriff, to assist with the distribution of resources/needs.

State Office on Aging: Requested addresses of Flint seniors who are receiving services—the area office on aging is working on that. The Genesee County health department is a local partner. Flint Township is on the water system? (Tom Weber: GIS will sort through which jurisdictions are involved – probably at least 3 other jurisdictions.)

MDARD: A new regulatory requirement is being worked on which would involve water handling information for relevant agencies and establishments.

MI Dept of Education (Louie Burgess): *Everyone with an approved child nutrition program is being* contacted to learn where water is obtained from, how it's handled, and whether they've received the relevant information about it.

MDEQ (Jennifer Wolf): More water sampling will occur through collaboration with other agencies. Kits must be dropped off at homes, due to 6 hour requirement [see MSP Operations reference at top]. MDEQ lab capacity involves the handling of up to 400 samples per day, 7 days per week. Only about 670 samples processed so far.

MDHHS (Richard Thelen): Have received many resource requests for filters. Working on orders and delivery arrangements. Also, to assist with food and nutrition, improving the healthfulness of foods that are available in the short-term.

MDTMB (Jeannette Doll): A co-located JIC location has been found within a Flint state office building. A toll-free phone line is to begin operation at noon today, both at the new JIC and in Lansing.

NWS [didn't catch his name]: Anticipating some snowfall, perhaps from 2 to 4 inches, with winds from 15 to 30 miles per hour expected over this weekend. Much of next week, we'll have cold air, with daily high temperatures in the 20s or below.

PIO (Ron Leix): Preparing for the transition to the Flint JIC. At 3pm today there will be a meeting of the key PIOs—the first face-to-face meeting rather than through a conference call. There are 4 major topics for public information: (1) Water filters, (2) Water testing, (3) Blood lead level testing, (4) Bottled water. Explanations of who, how, when, why, where are being provided. The web site is good, but we need to go beyond that to access *those who are not online (e.g. seniors). Media coverage: some has been good,* some bad. The Rachel Maddox show focused on various issues.

MSP Logistics (Michele Kuzera): Verifying equipment and staff for on-site Flint activity. Two MSP staff are in the local EOC, representing planning and logistics.

Tom Weber: Incident Action Plan objectives can have suggestions submitted to the Planning Group Chief by 1pm. Agency situation reports should be submitted by 3:30pm in MI CIMS and/or to the Planning Section.

MSP Ops (Jackie Hampton): The SEOC will be open tomorrow (Saturday) from 8a to 5p.

Capt. Kelenske: He'll be obtaining an important requested document on the subject of water distribution. Staff must update MI CIMS with an ongoing log of their activities. Sunday operation of the SEOC will be determined in the future.

Michigan State Police
Emergency Management and
Homeland Security Division

By early May 2014, the City of Flint switched from the Detroit Water and Sewerage Department (DWSD) to water from its own water treatment plant drawn from the Flint River as their primary water source. The different characteristics ~~Untreated corrosive river~~ of the water ~~in the city's water infrastructure~~ resulted in ~~caused the~~ leaching of lead from lead pipes in the city's water infrastructure into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels and elevated blood lead levels in young children were observed in the City of Flint and confirmed by the State Chief Medical Officer.

On October 1, 2015 the Genesee County Health Department declared a Public Health Emergency due to the elevated blood lead levels in citizens. In response to this the City of Flint declared a local State of Emergency on December 15, 2015 and activated their Emergency Operations Center.

To mitigate the effects of the new source of ~~corrosive river~~ water on the infrastructure in the City of Flint, the city switched back to DWSD water on October 16, 2015. Funding to reconnect to DWSD was provided from the City of Flint, the Charles Stewart Mott Foundation, and the State of Michigan. Water is now treated with a supplemental phosphate addition to rebuild the protective layer in the distribution system and reduce the leaching of lead into the water supply.

For the mitigation of negative health effects, over 24,000 water filters and replacement cartridges have been distributed to residents in the City of Flint. Approximately 13,000 water filters, water pitchers and replacement cartridges were distributed by the Michigan Department of Health and Human Services (MDHHS) in the timeframe of October 1 to December 31, 2015 alone.

MDHHS has increased surveillance of blood lead levels in children and is addressing water issues in environmental investigations to identify lead sources in the environment of affected children and provide health education and information to residents, health care providers, and daycare/educational institutions.

Local nonprofit organizations have provided potable water to Flint residents. MSP/EMHSD GIS staff is supporting county and local GIS staff by consolidating data from local sources into comprehensive databases and providing mapping services to support incident analysis and forecasting. Data and maps regarding the location of water pipes, affected schools, filter distribution locations, water monitoring results, and predictive blood lead levels for affected areas will be made available with demographics.

Before December 16, 2015, $9.35 million was provided by the State of Michigan and $6 million by local agencies and nonprofit partners to manage the effects of the corroded pipes. While drops in lead levels have been observed since reconnecting to the DWSD system, water in the City of Flint is still not safe to drink without filtration.

On January 6, 2016, Governor Snyder declared a State of Emergency for the City of Flint and Genesee County. Genesee County requested the Governor's declaration on January 5, 2016, following the declaration of a State of Emergency in the county in response to the presence of lead in the public water

supply and the detection of elevated blood lead levels exceeding governmental standards.

RETAIN THIS IMAGE
RETAIN THIS IMAGE
RETAIN THIS IMAGE

Mike Sobocinski's notes on January 7, 2015 SEOC briefing (9:30am):

Tom Weber: situation report #1 was published. ICS202 to be completed shortly (Capt: that document will be for internal use only). *Disaster Recovery Unit is being established within Operations Section.*

American Red Cross (phone): coordination of some kind [unclear]

DHHS (Richard Thelen): outreach and education to local health care providers. JIC is operational. Web MD Medscape – available [extra details unclear]. Distribution of filters and replacement cartridges continues. Two local MDHHS offices and two Genesee County Community Action Resource Department (GCCARD) offices are involved in this. [looked GCCARD up online to find and verify its correct name; some other local government office was also named, but I didn't catch it]

MSP GIS section: Coordinating with city and county. Online dissemination of mapped info looks likely soon through a viewer that allows users to browse the information themselves. Currently mapping filter locations. MSU extension socioeconomic data is available for city residents, to represent spatially. Pipelines and service entry points (at homes) are mappable. Lead(ing) service lines to homes are mappable. 44,000 records to be worked on through coordination with University of Michigan Flint campus, to make the information digital (probably contracted by the city to do so). Latency time in pipes correlates with lead concentration in homes, so an analysis could be performed with information on pipe and service line locations/lengths...

Capt. Kelenske: Genesee County Sheriff Department using about 50 persons with trucks to distribute about 5,000 filters (of the "screw-on type") to the high-risk areas of the city.

Tom Weber: Genesee County GIS is coordinating with the area's United Way (and) Food Bank.

MDARD (Brad Deacon): the local health departments inspect restaurants, while the DARD oversees local pop and ice machines.

MI Dept. of Education (Louis Burgess): Crafting a message to the Genesee Intermediate School District regarding all involved schools, including public, private, charters, academies, which have food centers or food programs. To inquire with all who run these regarding their water sources and use. The text of this message is to be reviewed by the state before its local distribution. The Department of Education PIO is needed in the JIC, and will be called.

MI Dept. of Corrections [person not known]: nothing new; precautions taken since last year, with coolers and jugged water being served. Have messages been sent to state employees who work in Flint, especially a general notification to all state employees so that even those who temporarily go to Flint can be informed regarding water?

MDTMB (Jeannette Doll): notes that bottled water is available at the state offices.

Aging and Adult Services Agency (AASA) (Steve Betterly): Outreach to the (Genesee) Valley Area Office on Aging to find/seek a list of seniors.

MSP Operations section: Establishing a State Recovery Task Force, to be headed by Joel Pepper. Establishing a Recovery Branch, to be headed by Brianna Briggs and to involve MIVOAD, DHHS coordination. Use of available subject matter experts, to include Dr. Eden Wells of DHHS and Dr. Mona Hanna-Attisha.

MSP Logistics section: Tracking quantity of water needed, trucks, etc. Two logistics staff from MSP being deployed to the local EOC.

PIO Ron Leix: JIC fully operational as of yesterday afternoon. JIC News Release #1 completed. An 800 number is to be used, and a top-level web site can be found at www.michigan.gov/flintwater. A 9am meeting is occurring between Governor Snyder and the Flint Mayor [Karen Weaver], with a media session to follow. At 1pm, a media roundtable presentation will occur in the Presentation Room at Collins Road, followed by a tour of the SEOC. Tomorrow, legislative and congressional calls.

Capt K: State agency SEOC physical presence this afternoon from 1pm onward.

[Unknown agency] Jeremy Hedges: coordination with MSHDA, potential to provide planning services? (Tom Weber: MSHDA to be included in the State Recovery Task Force.)

Capt K: FEMA has 2 liaison officers arriving about 3pm. These are not Federal Coordinating Officers (FCOs) but are merely to assist the Captain. MI CIMS activity log entries are needed from the PIO and the GIS section. The daily briefings are to occur at 9:30am until otherwise announced.

Executive Summary

On January 6, 2016, Governor Snyder declared a State of Emergency for the City of Flint and Genesee County. Genesee County requested the Governor's declaration on January 5, 2016, following the declaration of a State of Emergency in the county in response to the presence of lead in the public water supply, and the detection of elevated blood lead levels exceeding governmental standards. These conditions exist in the City of Flint, which declared a local State of Emergency and activated local response plans and their Emergency Operations Center on December 15, 2015. A public health emergency was declared by the Genesee County Health Department on October 1, 2015.

By early May 2014, the City of Flint switched from the Detroit Water and Sewerage Department (DWSD) to the Flint River as their primary water source. The corrosive river water caused the leaching of lead from lead pipes into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Elevated blood lead levels that exceeded past seasonal levels were observed in ~~a significant sampling of young children~~ in ~~the~~ City of Flint children, and these were subsequently confirmed by the ~~State Chief Medical Officer~~Michigan Department of Health and Human Services (MDHHS) epidemiologists.

To mitigate the negative effects of corrosive river water on the water infrastructure in the City of Flint, the city switched back to DSWD as their primary water source on October 16, 2015. Funding to reconnect to DWSD was provided from the City of Flint, the Charles Stewart Mott Foundation, and the State of Michigan. Water is treated with a supplemental phosphate addition to rebuild the protective layer in the distribution system and reduce the leaching of lead into the water supply.

For the mitigation of negative health effects, over 24,000 water filters and replacement cartridges have been distributed to residents in the City of Flint. Approximately 13,000 water filters, water pitchers and replacement cartridges were distributed by the ~~Michigan Department of Health and Human Services~~MDHHS ~~(MDHHS)~~ in the timeframe of October 1 to December 31, 2015 alone. MDHHS has increased surveillance of blood lead levels in children, is addressinge~~s~~ water issues in the environmental investigations facilitated to identify lead sources in the environment of affected children, and providinge health education and information to residents, health care providers and daycare/educational institutions. Local nonprofit organizations have provided potable water to Flint residents.

Before December 16, 2015, $9.35 million were provided by the State of Michigan, and $6 million by local agencies and nonprofit partners to manage the effects of the corroded pipes. While the source water has been switched back to the DWSD~~drops in lead levels have been observed since reconnecting to the DWSD system~~, water in the City of Flint is still not safe to drink, unless specifically filtered.

Flint Water Lead Project

Michigan Department of Health and Human Services

Situation Report for January 6, 2016

Governor Snyder declares a state of emergency for Genesee County due to the health and safety issues related to lead in city of Flint drinking water.

****NOTE: Contains potentially Identifiable Information- REDACT AS INDICATED*****

New items for the day listed first and in bold print.

Daily Briefing and Situation Report prepared by Linda Dykema

Surveillance Indicators: People Tested 10/1/2015 to 12/18/2015: 2,182;
Children less than 6 years old ≥ 5 µg/dl since 10/1/2015: 23
Children 6 to 17 years old ≥ 5 µg/dl since 10/1/2015: 7
Adults 18 years and older ≥ 5 µg/dl since 10/1/2015: 13
Severity Indicators: Hospitalized/Discharged-1/1; Deaths- 0

DAILY ACTIVITY SUMMARY

<u>Elevated Blood Level (EBL) Environmental Investigations</u> – ETC Contractors, Wes Priem, Courtney Wisinski

- EBL report through 1/6/2016
  - 20 families contacted
  - 13 EBL investigations completed.
  - 11 Water sampling completed.
  - 6 EBL Reports Received.
    - 4 homes with lead dust hazards
    - 3 homes with lead in soil hazards
    - 6 homes with lead-based paint hazards
    - 2 homes with lead detected in tap water
  - 6 investigations scheduled.
  - 5 applications received for the Lead Safe Homes Program, 1 family enrolled.
- *HHS staff will accompany contractors on investigations to confirm compliance with protocols.* Scheduled for 1/6/16.

<u>MDHHS/Genesee County Health Department (GCHD) Case Management (CM) Services</u> – Nancy Peeler

- Families that have moved to other counties
  - **GCHD forwarded a list of 40 families they were unable to contact: CLPPP staff identified updated contact information for 39 of the 40 families and forwarded that information to GCHD on 1/5/16.**
  - **GCHD have already identified a family that has relocated to Ingham County, and another that relocated to Florida. Nancy has reached out to Mark Miller to initiate contact with Ingham for follow-up with that family.**
- CM report through 12/31/15:
  - # of contacts attempted: 186 (0-5 year olds) and 12 (6-17 year olds)
  - # offered CM: 109 (0-5 year olds) and 6 (6-17 year olds)
  - # CM started: 25 (0-5 year olds) and 2 (6-17 year olds)
  - # of children receiving CM who live in Flint: 25 (0-5 year olds) and 2 (6-17 year olds)
  - # billed to Medicaid: 14 (0-5 year olds) and 1 (6-17 year olds)
  - # other disposition: 23 (0-5 year olds) and 1 (6-17 year olds)

<u>Epidemiology/Surveillance</u> – Corinne Miller, Patti McKane, Martha Stanbury, Bob Scott, Jessica Cooper

- MDHHS IRB approved Dr. Hanna-Attisha's research project.
- Pending: hiring 2 epidemiologists to provide BLL surveillance support.

Filter & Water Distribution Sheryl Thompson

Filter Distribution 10/1/15 to 1/6/15			
	Received	Distributed	Remaining
Water Filters	15,000	11,587	3,413
Water Pitchers	720	251	469
Replacement Cartridges - Brita	9,000	1,704	7,296
Replacement Cartridges – PUR*	5,706	33	5,603
Replacement Cartridges - Zero	375	8	367

*The PUR replacement cartridges are being made available in all locations for the convenience of residents. Once the PUR cartridges are exhausted and more are needed DHHS will purchase additional ones. The current supply was given to DHHS and GCCARD by United Way.

Communications/Information Sharing – Linda Dykema, Eden Wells

- GCHD (Jim Henry) is working with Flint residential child care facility to further evaluate lead levels in tap water. All current residents are > 6 years of age and have had venous blood tests: the highest was 2.3 mg/dL, most were <0.5 mg/dL.

Health Education Resources Updates - Michelle Bruneau, Emily Houk

- **The State Emergency Operations Center (SEOC) opened a Joint Information Center (JIC). Angela Minicuci is the primary HHS contact to the JIC. All public information documents related to the Flint water response must be routed for approval through the JIC.**
- Provided final/updated versions of the final documents to Angela Minicuci for posting on the MDEQ website (MB)
    - Phosphate Fact Sheet
    - How to Clean your Aerator Fact Sheet
    - Hey Flint, It's Safe to Wash poster (update)
- Continuing to write and coordinate additions to the EBL Case Manager Binder, now known as the MDHHS Lead Safe Family Guide Book. (MB)
- Pending: Filter cartridge changing fact sheet; clarifying uses of filtered/vs unfiltered water (MB)
- Pending: Lead and Nutrition fact sheet and Flint Parent Letter revisions.

Toxicology - Kory Groetsch, Lisa Quiggle, Jennifer Gray

- **Working on method(s) to convert lead dust wipe sample results into an intake metric compatible with the IEUBK model**
- Working on Child EBL Access database, which will be used to ensure that each child/family is offered all available SOM services and activities related to EBL cases.
- Reviewing copper drinking water action level.

WIC

- No updates.

Healthcare/Providers

- Medical Services Administration: Letter L 15-73, dated December 30, 2015, Blood Lead Guidelines to Address the City of Flint Residents' Potential Exposure to Lead, was sent to Practitioners, Clinics, Laboratories and Maternal Infant Health Program (MIHP) Providers in the City of Flint.

DEQ Information - Linda Dykema as Liaison

- The DEQ laboratory will notify HHS (Linda Dykema) of water sampling results > 100 ppb to allow for immediate public health actions to interdict exposure to high lead levels in Flint drinking water. Notification will only be provided for results from the free water testing offered by the city, not the public schools where taps have been taken out of use.
- DEQ has completed water sampling at 10 Flint Public School facilities. 3 reports are completed and posted. 10 private schools and/or day care centers are on the waiting list. DEQ filmed sampling and will post the completed video on their web page as a demonstration of the intensity and completeness of the plumbing evaluation and water sampling efforts.
- The DEQ reported lead water levels of 213 and 2,516 ppb in a residential Flint child care facility. DEQ contacted the facility on 12/30/15 and instructed them not to use those taps for drinking water consumption.

STATE OF MICHIGAN
DISASTER LOGISTICS AND DONATIONS MANAGEMENT PLAN
EXECUTIVE SYNOPSIS

PURPOSE: Provide an organizational and operational framework for the State of Michigan to:

- Assess the need for, request, receive, and distribute disaster relief supplies, equipment, and other material and technical assistance (hereafter generically called "commodities" or "disaster commodities"), as well as donations necessary to respond to and recover from natural and human-caused disasters and emergencies, including acts of terrorism.

- *Manage the flow of unsolicited, unexpected, and unwanted goods and services, and keep them out of the disaster area* to the extent possible, so that they don't unnecessarily disrupt incident response and recovery operations.

- Manage spontaneous / emergent, unaffiliated volunteers, maximizing the value of these resources while at the same time minimizing any potential negative consequences to incident response and recovery operations.

- Provide technical and/or direct operational assistance to a local jurisdiction (or jurisdictions) in managing disaster commodities and/or disaster donations – including volunteers – in a manner that maximizes the value and utility of such resources and results in their efficient, time- and cost-effective, and coordinated delivery to those in need.

This plan is based on the generally-accepted logistics management goal of delivering the right items, in the right quantities, at the right time and price, to the right end users.

SCOPE: Activities related to the efficient, effective, and timely identification of need for, solicitation, procurement, receipt, storage, staging, registration / inventorying, transportation, distribution, and accounting of disaster commodities and donations (including volunteer labor).

INITIATING CONDITIONS: A severe and/or widespread disaster or other catastrophic incident that significantly impacts the general population and/or functional needs populations, and that attracts regional and national media exposure. Typically, such incidents will be declared a major disaster under the federal Stafford Act (Public Law 93-288, as amended) and will result in the activation of the federal Public Assistance Grant Program (PAGP), and specifically Category B (Emergency Protective Measures) under the PAGP, to provide possible funding assistance for operational activities taken before, during, and after the disaster to save lives, protect public health and safety, and prevent damage to improved public and private property. (Some disaster logistics and donations management activities may be eligible for Category B assistance.) The areas affected by the incident will also likely be included in a "State of Disaster" or "State of Emergency" declaration by the Governor under the Michigan Emergency Management Act (1976 Public Act 390, as amended).

IMPLEMENTION: The Michigan State Police, Emergency Management and Homeland Security Division (MSP/EMHSD) is primarily responsible for implementation of those plan elements pertaining to disaster logistics management. The Michigan Department of Human Services (MDHS) is primarily responsible for implementation of those plan elements pertaining to disaster donations management – including volunteer management. It is expected that both agencies will work together in a joint, cooperative manner to implement their respective areas of responsibility. Other plan partners (see next section below) will provide timely administrative and/or operational support, as required by incident conditions and as prescribed in the plan.

INVOLVED ENTITIES: The following state agencies and nongovernmental organizations (NGOs) have potential roles and responsibilities identified in the Michigan Disaster Logistics and Donations Management Plan:

- MSP/EMHSD
- Michigan Department of Agriculture and Rural Development (MDARD)
- Michigan Department of Community Health (MDCH)
- MDCH / Michigan Office of Services to the Aging (MOSA)
- Michigan Department of Corrections (MDOC)
- Michigan Department of Human Services (MDHS)
- MDHS / Michigan Community Service Commission (MCSC)
- Michigan Department of Technology, Management and Budget (MDTMB)
- Michigan Department of Military and Veterans Affairs (MDMVA)
- Michigan Department of Natural Resources (MDNR)
- Michigan Department of State Police (MSP)
- Michigan Department of Transportation (MDOT)
- Michigan Voluntary Organizations Active in Disaster (MIVOAD)
- Michigan Citizen Corps (MCC)
- American Red Cross (ARC)
- State Animal Response Team (SART)

INVOLVED FACILITIES: Depending on incident circumstances, the following facilities may be activated / established in a combined disaster logistics and donations management operation:

- State Emergency Operations Center (SEOC)
- Emergency Operations Centers (EOCs) of affected local jurisdictions
- State Disaster Logistics and Donations Management Center – part of SEOC structure
- Local Disaster Logistics and Donations Management Centers – part of affected local EOC structures
- Joint Field Office (JFO) – federally-selected / managed facility with state representation
- Federal Disaster Logistics and Donations Management Center – part of JFO structure
- Control Check Points – local and state selected / managed facilities
- Staging Areas / Warehouses – local and state selected / managed facilities
- Base / Camps – local and state selected / managed facilities
- Points of Distribution – locally-selected / managed facilities

MISSION: Upon request of affected local jurisdictions, the MSP/EMHSD and the aforementioned state agencies and NGOs will provide direct management and/or technical / materiel assistance to local disaster logistics and donations management operations. This assistance may include, but is not limited to, any or all of the following activities:

- *Contact and coordinate with FEMA and other federal agencies / officials.*

- Contact and coordinate with other states in providing assistance under the national Emergency Management Assistance Compact (EMAC).

- Assist in identifying the life sustainment needs of affected populations. If appropriate, procure specific types of commodities (donated, purchased, or requested) to fill those identified needs.

- Activate the State Disaster Logistics and Donations Management Team / Center as part of the State Emergency Operations Center (SEOC) structure.

- Assist in determining commodity distribution priorities.

- Assist in establishing required facilities and providing supplemental personnel, vehicles, equipment, materials, and technical expertise to support operations as required.

- Assist in establishing work schedules, a communications plan, and a health and safety plan for involved work crews.

- Ensure compliance with public health laws and regulations, as required.

- Coordinate logistics and donations management operations.

- Assist in determining applicant, work, and cost eligibility for Emergency Protective Measures (Category B) work under the PAGP.

- Assist in developing and disseminating public information releases about the logistics and donations management operation, with emphasis on stemming the flow of unneeded, unwanted, and unsolicited goods and volunteer services.

- Assist in implementing contracts with involved resource providers (e.g., under the EMAC, through NGOs, procured through the private sector, etc.) in a manner consistent with federal, state, and local guidelines and requirements.

- Assist in managing the flow of paperwork involved in the logistics and donations management operation.

- Assist in supervising, coordinating, and monitoring work activities.

- Address issues that may arise related to possible hazardous / contaminated commodities and/or donations in the event of an incident that involves potential biological or WMD contamination.

- Ensure that all involved parties complete required work on time and in accordance with local, state, and federal regulations.

- Assist in closing out operations once distribution and/or final disposition of commodities / donations has been accomplished.

EXECUTION: As incident circumstances dictate and/or upon request of affected local jurisdictions, the MSP/EMHSD will execute the Michigan Disaster Logistics and Donations Management Plan. As appropriate, the MSP/EMHSD will establish the State Disaster Logistics and Donations Management Team and Center as part of the SEOC structure. The Michigan

Department of Human Services (MDHS) will implement and manage the donations management element of the operation – to include volunteer management. The various involved state agencies and NGOs will be tasked to provide administrative and/or operational support as required and as prescribed in the plan. This may include direct technical and/or materiel assistance to local disaster logistics and donations management operations as required. The MSP/EMHSD, as the designated lead agency for disaster logistics management in Michigan, will coordinate the disaster logistics management element of the operation. The MSP/EMHSD and MDHS will work together in a joint, cooperative manner to ensure that the disaster logistics and donations management operation adequately meets the needs of the affected jurisdictions and populations.

Whenever feasible, the State will seek value-added donations of goods and services to help meet some or all of the identified life sustainment needs of the affected populations. If targeted, value-added donations are not possible in a timely manner, the State will procure the required commodities through existing MDTMB vendor contracts or other private sector purchase, through the EMAC (as applicable), or through FEMA under National Response Framework (NRF) mission assignment as part of a federal Stafford Act declaration.

The MSP/EMHSD will contact and coordinate with FEMA and other involved federal agencies as appropriate for the situation. As required by incident circumstances, the MSP/EMHSD will prepare the request for and coordinate activities with FEMA related to a federal major disaster or emergency declaration under the Stafford Act. If such a declaration is granted and the PAGP is authorized for implementation, the MSP/EMHSD will work directly with FEMA in the establishment, management, and administration of the PAGP in Michigan to potentially fund some disaster logistics and donations management activities. The MSP/EMHSD will implement the PAGP in accordance with the State of Michigan Administrative Plan for the PAGP – a separate yet related support plan to the Michigan Disaster Logistics and Donations Management Plan.

The MDHS, MOSA, and other state agencies, affected local jurisdictions, and NGO partners will provide timely information on the requirements of functional needs populations so that appropriate commodities (donated or otherwise) and services may be targeted to these populations to meet their basic life sustainment needs.

TIME FRAME: This plan will be implemented during the response phase of the incident, as soon as the need is identified. Many of the activities will continue well into the long-term recovery phase (i.e., several weeks to several months or years after incident occurrence).

LOCAL COORDINATION: It is expected that all involved local jurisdictions will have developed a counterpart local Disaster Logistics and Donations Management Plan based on the guidance provided in MSP/EMHSD Publication 107a – "Local Disaster Logistics and Donations Management Planning Handbook." The organizational and operational structures, systems, and processes described in the local plans should be consistent with those described in the Michigan Disaster Logistics and Donations Management Plan. This coordinated planning effort is critically important to the ultimate success of the joint local-state disaster logistics and donations management operation.

COMMAND AND CONTROL: Command and control responsibilities pertaining to a disaster logistics and donations management operation are prescribed as follows in the Michigan Emergency Management Plan (MEMP) and/or Michigan Disaster Logistics and Donations Management Plan:

- The MSP/EMHSD is the primary coordinating agency for overall SEOC operations, and for the disaster logistics management elements of the disaster logistics and donations management operation.
- The MDHS is the primary coordinating agency for the disaster donations management elements of the disaster logistics and donations management operation.
- State support agencies and NGO partners have prescribed task assignments in one or both plans, and may receive additional task assignments from the MDHS and/or MSP/EMHSD as incident circumstances dictate.
- Involved NGOs maintain management control over their personnel and resources through their own internal management structures.
- Affected local jurisdictions maintain control over their local disaster logistics and donations management operation through their local EOC and established logistics and donations management facilities.
- The State of Michigan Administrative Plan for the PAGP will govern the implementation, management, and administration of the PAGP by the MSP/EMHSD. Supplemental federal guidance documents provided by FEMA and/or the requirements set forth by other federal agencies will be adhered to as appropriate for the PAGP.

CLOSEOUT: The MDHS and MSP/EMHSD will jointly close out the logistics and donations management operation, and the PAGP with FEMA, once all activities related to each have been completed. This process could take from several months to several years to complete, depending on incident circumstances. The MSP/EMHSD will coordinate any post-incident / declaration audit activities with federal and state auditors, as required.

ACRONYM GUIDE

The following acronyms are used in this document. For consistency and brevity purposes, acronyms are used extensively for frequently appearing terms once they have been initially identified in the document text. Certain terms may not have an acronym if an acronym is not commonly used in place of the term or using an acronym would prove unnecessarily confusing for readers.

AAA ..... Area Agency on Aging
AAR ..... *After-Action Report*
ARC ..... American Red Cross – Michigan
CBRNE ..... Chemical, Biological, Radiological, Nuclear, or Explosive / Incendiary (Weapon)
CEM ..... Comprehensive Emergency Management
CEO ..... Chief Elected Official
CERT ..... Community Emergency Response Team
CIMS ..... Critical Incident Management System
DC ..... District Coordinator (of the MSP/EMHSD)
DDMC ..... Disaster Donations Management Coordinator (Local or State)
DDMT ..... Disaster Donations Management Team (Local)
DHS ..... U.S. Department of Homeland Security
DIPC ..... Donations Intake and Processing Center (Local or State)
DLDMC ..... Disaster Logistics and Donations Management Center (Local or State)
DLDMT ..... Disaster Logistics and Donations Management Team (Local or State)
DLMC ..... Disaster Logistics Management Coordinator (Local or State)
DLMT ..... *Disaster Logistics Management Team (Local)*
DOC ..... U.S. Department of Commerce
DOD / DoD ..... U.S. Department of Defense
DOE ..... U.S. Department of Energy
DOI ..... U.S. Department of the Interior
DOT ..... U.S. Department of Transportation
EAG ..... Emergency Action Guidelines
EM ..... Emergency Management
EMAC ..... Emergency Management Assistance Compact
EMC ..... Emergency Management Coordinator
EO ..... Executive Order
EOC ..... Emergency Operations Center
EOP ..... Emergency Operations Plan
ESF ..... Emergency Support Function
FAQ ..... Frequently Asked Questions
FCO ..... *Federal Coordinating Officer*
FIAO ..... Federal Individual Assistance Officer
FPAO ..... Federal Public Assistance Officer
FEMA ..... Federal Emergency Management Agency
GIS ..... Geographic Information System
GSA ..... U.S. General Services Administration
HHS ..... U.S. Department of Health and Human Services
HMA ..... Hazard Mitigation Assistance
IA ..... Individual Assistance
IAP ..... Incident Action Plan
IC ..... Incident Commander
ICP ..... Incident Command Post
ICS ..... Incident Command System
IHP ..... Individuals and Households Program
IMS ..... Incident Management System
IMT ..... *Incident Management Team*
JFO ..... Joint Field Office
JIC ..... Joint Information Center
JIT / JPIT ..... Joint Information Team (a.k.a. Joint Public Information Team)
MCC ..... Michigan Citizen Corps

WMD	Weapon of Mass Destruction

KEY BACKGROUND NOTES:

The differences between disaster commodities and disaster donations. Although disaster commodities and disaster donations both involve goods and services which need to be properly managed and ultimately targeted to specific end users, there are distinct differences between the two:

Commodities. Disaster commodities are **appropriately solicited** goods, materials, equipment, supplies, technical expertise, and other resources needed to assist in carrying out required disaster response and recovery operations, to make necessary and immediate repairs to damaged facilities, to protect the affected population from further harm, and/or to provide for the basic life-sustaining needs of the affected population. Disaster commodities are goods and services which are specifically requested. Commodities may be purchased in the private sector, provided through disaster assistance mechanisms (e.g., state and federal government, American Red Cross or other NGO, EMAC, etc.), borrowed or provided through mutual aid, or donated (i.e., a donation which is specifically requested, and is provided in "value-added" form – see description below in "Donations"). Disaster commodities should always be requested in accordance with the typed resources list established under the National Incident Management System (NIMS) by the federal Department of Homeland Security. Disaster logistics management is concerned with the management of solicited, desired commodities.

Donations. Disaster donations are **unsolicited** goods and services that have not been requested by government officials and/or voluntary disaster relief organizations, which are sent to the affected area spontaneously and/or arrive unexpectedly during a disaster. These undesignated, unrequested donations often arrive in a non- "value-added" form, meaning the donation is not properly packaged and ready for distribution to specific recipients. Unsolicited donations can also include "spontaneous" or "emergent" volunteers – individuals who are not formally associated with a recognized voluntary disaster relief organization (i.e., "unaffiliated") but who show up to the disaster area wanting to "help." Spontaneous / emergent, unaffiliated volunteers often arrive without adequate provisions (i.e., work clothing and gear, food and water, bedding / shelter, etc.) to be self-sustaining for at least a few days. As a result, they can quickly become more of a burden than an asset – if the value they provide to the recovery effort does not exceed the "cost" of their care and supervision. A "value-added" disaster donation is: 1) needed and requested by the State or disaster-stricken community; 2) appropriate to the culture of the community; 3) transported by the donor to the community, free of charge; and 4) clearly sorted, packed and labeled for distribution to end-users in need. Perishable food is not a value-added donation and will always be discouraged. A "value-added" volunteer is: 1) needed and requested by the State or disaster-stricken community; 2) skilled in and equipped to provide a service needed for incident conditions, free of charge; 3) affiliated with a recognized voluntary disaster relief organization; 4) self-sustaining for at least 72 hours (three days), or ideally longer; and 5) willing to work in the conditions present in the community, and for the time frames required for the particular service they are providing.

Disaster donations management is concerned with the management of unsolicited, unexpected, (and often unwanted) donations of goods and services. The ultimate aim of the donations management function is to manage the flow of unsolicited, unexpected, unwanted goods and services – and keep them out of the disaster area to the extent possible – so that they don't unnecessarily disrupt response and recovery operations. Failure to do this may result in a "second disaster" – that being, an influx of goods and services which requires considerably more resources to manage than benefit is derived from their arrival.

The commonalities between logistics management and donations management: Disaster logistics management and donations management can be combined operationally because they have common goals and operational elements and processes. Both functions involve activities related to the efficient, effective, and timely identification of need for, solicitation, receipt, storage, staging, registration / inventorying, transportation, distribution, and accounting of commodities – be they procured, or donated by third parties. Both functions have the ultimate common goal of delivering the right items, in the right quantities, at the right time and cost, to the right end users, in the most efficient, time- and cost-effective and coordinated manner necessary to appropriately respond to and recover from disaster and emergencies. Both functions need to be managed by a dedicated team of knowledgeable individuals, from a dedicated management center, using common support facilities such as Warehouses, Staging Areas, and Points of Distribution. Both functions, if not adequately managed and coordinated from very early in the incident response, can cause undue problems for the State and affected community in terms of lost operational effectiveness and efficiency, unnecessary diversion of valuable resources, bad public relations, and potential adverse impacts to the public health, safety and general welfare. Finally, both functions include the sub-functions of material management, property management, facility management, and transportation management.

State assistance to local operations: The State's planning guidance for local communities, MSP/EMHSD Publication 107a, "Local Disaster Logistics and Donations Management Planning Handbook," advocates the use of a single organizational structure for both disaster logistics and disaster donations management. Whether or not a jurisdiction chooses to manage both functions using a single organizational structure and set of support facilities will ultimately be dictated by a number of factors. Each jurisdiction will weigh the pros and cons of joint and separate operations and decide which course of action is best for their jurisdiction. When providing technical and/or direct operational assistance to a local jurisdiction under this plan, there may be a need for the State to simultaneously participate in separate logistics and donations management operations. If that occurs, the State will divide its efforts along functional lines, making sure to maintain close coordination between the two operations through the use of on-site liaison positions and continuous information sharing. Refer to the Tasks and Execution section for details.

STATE OF MICHIGAN
DISASTER LOGISTICS AND DONATIONS MANAGEMENT PLAN

PLAN PURPOSE AND SCOPE:

Purpose. This plan provides an organizational and operational framework for the State of Michigan to assess the need for, request, receive, and distribute disaster relief supplies, equipment, and other material and technical assistance (hereafter generically called "commodities" or "disaster commodities"), as well as donations necessary to respond to and recover from natural and human-caused disasters and emergencies, including acts of terrorism. It is based on the generally accepted logistics management goal of delivering:

- The right items;
- In the right quantities;
- At the right time and price;
- To the right end users.

Rationale. The State of Michigan is obligated – under the basic principles of comprehensive emergency management – to provide for an organized and time-effective delivery of needed goods and services to afflicted areas to support and/or facilitate necessary incident response and recovery operations. The efficient and rapid management of disaster logistical needs helps protect the health and safety of citizens, minimizes threats to the environment, provides essential services and maintains essential systems, and ensures that critical response and recovery activities can proceed in a timely and unencumbered manner. The nature and scope of logistical needs for any particular disaster is a function of the location and kind of incident experienced as well as its magnitude, duration, and intensity. In cases of a widespread and/or particularly severe disaster or other catastrophic incident, the State of Michigan may not have the necessary materials, supplies, equipment and expertise to rapidly and adequately respond to and meet its full range of short and/or long-term recovery and basic life sustainment needs. The State of Michigan will necessarily turn to a variety of potential resource providers subsequent to a widespread and/or particularly severe disaster or other catastrophic incident if needed resources become scarce or are unavailable. Potential resource providers include other states (under the umbrella of the national Emergency Management Assistance Compact – EMAC), local mutual aid jurisdictions, private contractors, volunteers and voluntary agencies, and ultimately the federal government. This plan, when implemented, will provide for the timely, effective, and organized delivery of needed disaster commodities to the State of Michigan.

Hazards and Threats. Although Michigan typically does not have the large-scale / catastrophic types of incidents (e.g., major hurricanes, earthquakes, etc.) that completely overwhelm the ability of the State and local governments to meet the basic life sustainment needs of the affected population, it does occasionally experience disasters of sufficient scope, magnitude and severity to severely tax those capabilities. In addition, Michigan is at risk from a wide array of terrorist threats – any one of which could result in a catastrophic incident under the right circumstances – which typically would result in a Presidential major disaster or emergency declaration under the federal Stafford Act. These types of situations can easily create the need for the rapid delivery and distribution of significant quantities of disaster commodities and lend themselves to a large influx of unsolicited disaster donations. When that occurs, a logistics / donations management element will be established within the State Emergency Operations Center (SEOC) and this plan will be implemented by that element to the extent appropriate for the incident circumstances.

Managing Unsolicited Donations. This plan will also provide an organizational and operational framework for the State of Michigan to manage the flow of unsolicited donations of materials, goods, labor, and services subsequent to a large-scale and/or severe disaster or emergency. The development of this donations management framework is based on the recognition that unsolicited donations of materials, goods, labor, and services in time of disaster can place a terrible burden on the State of Michigan and its agencies and affected local governments. Americans have traditionally been very generous in donating time and material goods to assist disaster survivors in their time of need. However, sometimes that generosity can result in an outpouring of goods and services that are either not needed or inappropriate for the circumstances of the disaster. This massive amount of donated goods can quickly become a "second disaster" and siphon off valuable resources and personnel time from other needed response and recovery activities.

Managing Out-of-State Donations. In addition to addressing incidents in or affecting Michigan, this plan is also applicable in those situations in which a catastrophic incident has occurred elsewhere in the country and Michigan's state and local governmental agencies, NGOs, businesses and industries, and private citizens wish to offer donations to aid the affected states and localities in responding to and recovering from the incident. In those instances, the State of Michigan is obligated to provide the most organized and time-effective delivery of needed goods and services to the afflicted areas so as not to unnecessarily disrupt ongoing incident response and recovery operations. Managing the flow of donations from Michigan to the afflicted area through a centralized donations management system that is coordinated with the afflicted area is the best way to ensure that Michigan does not create a "second disaster" situation by haphazardly sending donations that disrupt the incident response and recovery.

Scope. This plan defines and assigns the policies, procedures, responsibilities and methods for the implementation of disaster logistics and donations management functions in the State of Michigan subsequent to a severe and/or widespread disaster or other catastrophic incident. The plan provides a framework for organizing the time- and cost-effective, safe, and situationally-appropriate distribution of disaster commodities. The plan also:

- Sets forth the administrative organization and responsibilities of state officials and agencies for disaster logistics and donations management operations.
- Establishes coordination and liaison procedures with the U.S. Department of Homeland Security / Federal Emergency Management Agency – hereafter called FEMA, other federal agencies and states, applicable NGOs, business and industry, affected local governments, and the media, with regard to disaster logistics and donations management.
- Establishes methods and procedures for identifying and articulating state-determined needs, desires, and requirements (category, kind, type, and quantities) for disaster commodities (including donations).
- Establishes administrative procedures for soliciting, procuring, storing, registering / inventorying, transporting, distributing, and accounting for disaster commodities (including donations).
- Provides for the establishment of a state-level Disaster Logistics and Donation Management Team (DLDMT) and Disaster Logistics and Donations Management Center (DLDMC) within the SEOC or other appropriate emergency coordination center to manage disaster logistics and disaster donations functions.
- Establishes methods and procedures for educating the public on where and how they can receive needed disaster commodities.
- Establishes methods and procedures for educating the public on where and how they can best provide assistance (cash and/or needed donations) to disaster survivors, thereby minimizing problems related to the receipt of unwanted and unsolicited donations to the greatest degree possible.
- Establishes methods and procedures for educating the public on where and how they can volunteer (donated services) to aid in incident recovery.
- Provides a system for distributing unneeded or leftover commodities (including donations) at the conclusion of disaster recovery operations.
- Provides for the development and annual update of a disaster logistics and donations management support plan as dictated by the needs of comprehensive emergency management.

Execution. This plan will be implemented jointly by the Michigan State Police / Emergency Management and Homeland Security Division (MSP/EMHSD) and Michigan Department of Human Services (MDHS), utilizing state resources organized by Emergency Support Function (ESF) as prescribed in the Michigan Emergency Management Plan (MEMP). This Disaster Logistics and Donations Management Plan is a stand-alone Support Plan to the MEMP, and also serves as the state-level counterpart to Disaster Logistics and Donations Management Plans developed by Michigan's county and municipal emergency management program jurisdictions. The MSP/EMHSD is responsible for coordination of the logistics management operations of this plan; the MDHS, for coordination of the donations management operations. The two agencies will cooperate to manage their respective functions, in accordance with this plan, as part of the SEOC incident response and recovery structure. Depending on incident circumstances, this plan may be implemented for statewide or regional logistics and/or donations management operations, or to provide technical and/or direct management assistance to logistics and/or donations operations implemented by a local jurisdiction.

Definitions.

ACCESS CONTROL POINT: A point established by law enforcement officials to control access to a hazardous or potentially hazardous area.

AMERICORPS: *An umbrella term that refers to programs that are designated by the Corporation for* National and Community Service as national service programs and the participants in them. AmeriCorps programs provide participants with a full- or part-time service experience, a living stipend, and an education award.

AREA COMMAND (UNIFIED AREA COMMAND): An organization established to: 1) oversee the management of multiple incidents that are each being handled by an Incident Command System (ICS) organization; or 2) oversee the management of large or multiple incidents to which several Incident Management Teams (IMTs) have been assigned. Area Command has the responsibility to set overall strategy and priorities, allocate critical resources according to priorities, ensure that incidents are properly managed, and ensure that objectives are met and strategies followed. Area Command becomes Unified Area Command when incidents are multi-jurisdictional. Area Command may be established at an Emergency Operations Center (EOC) facility or at some location other than an Incident Command Post (ICP).

CATASTROPHIC INCIDENT (EVENT): Any natural or manmade incident, including terrorism, which results in extraordinary levels of mass casualties, damage, or disruption severely affecting the population, infrastructure, environment, economy, national morale, and/or government functions. A catastrophic incident could result in sustained national impacts over a prolonged period of time; almost immediately exceeds resources normally available to state, local, tribal and private sector authorities in the impacted area; and significantly interrupts governmental operations and emergency services to such an extent that national security could be threatened.

CBRNE WEAPONS: Weapons of Mass Destruction are also commonly referred to as "CBRNE" Weapons – an acronym for chemical, biological, radiological, nuclear and explosives / incendiary devices. (Refer to "Weapons of Mass Destruction" for a more detailed definition.)

CITIZEN CORPS: A national initiative to engage citizens in specific homeland security efforts in communities throughout the country. The volunteer initiatives, led at the local level by Citizen Corps Councils, include the Medical Reserve Corps, Volunteers in Police Service Program, Neighborhood Watch, and Community Emergency Response Teams.

COMMAND STAFF: In an incident management organization, the Command Staff consists of the Incident Command and the special staff positions of Public Information Officer, Safety Officer, Liaison Officer, and other positions as required, who report directly to the Incident Commander. They may have an assistant or assistants, as needed.

COMMODITY: See "Disaster Commodities."

COMMUNITY-BASED ORGANIZATION: A private nonprofit organization (including a church or other religious entity) that is representative of a community or a significant segment of a community and is engaged in meeting human, educational, environmental, or public safety community needs.

COMPREHENSIVE EMERGENCY MANAGEMENT (CEM): An integrated approach to the management of programs and activities that encompasses all phases (prevention, mitigation, protection, preparedness, response, and recovery) of incident management, all types of emergencies and disasters (natural, technological, human-related, and WMD attack), all levels of government (local, state, and federal), nongovernmental organizations, and the private sector. (Note: CEM was a commonly used term prior to development of the National Response Framework. Now, the term "domestic incident management" is preferred. However, CEM is still widely used in the emergency management field and the two terms mean essentially the same thing.)

CONSUMPTION RATE: The amount of commodities distributed per day at a Point of Distribution, expressed in the appropriate unit of measure for each commodity, e.g., bottles, boxes, cases, gallons, pallets, units. (For example: 5,000 bottles of water; 1,000 tarps; 2,000 boxes of dry cereal; 3,000 gallons of milk; etc.). Only one unit of measure can be used for each commodity. (The consumption rate is also commonly referred to as the "distribution rate," "issue rate," and "burn rate." All of these terms mean essentially the same thing.)

CONTROL CHECK POINT: Officially designated locations where trucks and other transport vehicles containing unsolicited donated goods can be inspected and directed to an appropriate volunteer agency or other location for processing, storage, and distribution. Unaffiliated volunteers from outside the disaster area wishing to provide services can also be interviewed at these locations. Examples of possible Control Check Point locations include toll booths, weigh stations, roadside parks, truck stops, state parks and recreation areas, county fairgrounds, highway rest areas, armories, and other governmental facilities (located in close proximity to major transportation routes) that have large parking areas for vehicle inspections.

COUNTY OR LOCAL EMERGENCY MANAGEMENT COORDINATOR (EMC): A person appointed pursuant to Act 390, PA 1976, as amended, to coordinate emergency management activities for a county or municipal emergency management program jurisdiction. Also commonly called County or Local "Emergency Manager."

DAMAGE ASSESSMENT: The systematic process of determining and appraising the nature and extent of the loss, suffering, or harm to a community resulting from an emergency/disaster.

DEPARTMENT OF HOMELAND SECURITY (DHS): A Cabinet-level agency established within the federal government in 2002 to coordinate and report directly to the President on all issues related to domestic terrorism preparedness. The mission of the Department of Homeland Security is to oversee and coordinate a comprehensive national strategy to safeguard the country against terrorism and other homeland security threats, and to respond to any attacks that may occur.

DISASTER: An occurrence or threat of widespread or severe damage, injury, or loss of life or property resulting from a natural or human-made cause, including, but not limited to, fire, flood, snowstorm, ice storm, tornado, windstorm, wave action, oil spill, water contamination, utility failure, hazardous peacetime radiological incident, major transportation accident, hazardous materials incident, epidemic, air contamination, blight, drought, infestation, explosion, or hostile military or paramilitary action, or similar occurrences resulting from terrorist activities, riots, or civil disorders, as defined in Act 390, PA 1976, as amended.

DISASTER COMMODITIES (State Definition): Goods, materials, equipment, supplies, technical expertise, and other resources needed to assist in carrying out required disaster response and recovery operations, to make necessary and immediate repairs to damaged facilities, to protect the affected population from further harm, and/or to provide for the basic life-sustaining needs of the affected population. (Note: for the purposes of this plan, disaster commodities will be requested in accordance with the typed resources list established under the National Incident Management System [NIMS] by the federal Department of Homeland Security.)

DISASTER DONATIONS MANAGEMENT COORDINATOR (DDMC, State-Level): The Michigan Department of Human Services employee who is responsible for managing the disaster donations operation on behalf of the State of Michigan. Also may be known as "Disaster Donations Manager" or simply "Donations Manager."

DISASTER DONATIONS MANAGEMENT TEAM (DDMT): The team made up of representatives of local governmental agencies and nongovernmental relief organizations to manage unsolicited donated goods and voluntary services on behalf of a Michigan local jurisdiction. Its mission is to implement the donations management elements of the jurisdiction's Disaster Logistics and Donations Management Plan, with the ultimate aim of effectively managing disaster donations and minimizing the influx of unsolicited, unneeded, and unwanted goods and services into the disaster area. The team is typically managed by a local human service agency or organization. (See background note in green shaded box below for additional information regarding organizational options for local-level disaster logistics and disaster donations management teams.)

Background Note: The Disaster Donations Management Team (DDMT) and Disaster Logistics Management Team (DLMT) have distinct functions, but for operational efficiency may be combined into a Disaster Logistics and Donations Management Team (DLDMT). Because there are sufficient commonalities between the two functions and there is a need to coordinate their activities, the State of Michigan has opted for a combined team. The combined team option is also suggested for local jurisdictions in MSP/EMHSD Publication 107a, "Local Disaster Logistics and Donations Management Planning Handbook." However, there is still a compelling need for separate coordinators for the two functions; as a result, the State of Michigan (and Publication 107a) advocate for the separate positions of Disaster Logistics Management Coordinator (DLMC) and Disaster Donations Management Coordinator (DDMC). Local jurisdictions, as part of their planning, will consider these and other options and develop an organizational structure that best meets their operational needs and makes maximum use of local personnel and facility resources. The State of Michigan will adjust its technical and/or direct assistance efforts as required to accommodate whatever organizational structure is in place in the affected local jurisdictions.

DISASTER LOGISTICS MANAGEMENT (State Definition): The process of planning, preparing, implementing, and evaluating all functions that support the determination of need and request for, and the assessment, procurement, receipt, transport, staging, storage, and distribution of needed disaster commodities to appropriate end-users in an efficient, time- and cost-effective and coordinated manner. Logistics management functions may include materiel management, property management, facility management, and transportation management.

DISASTER LOGISTICS MANAGEMENT COORDINATOR (DLMC, State-Level): The Michigan State Police / Emergency Management and Homeland Security Division employee who is responsible for managing the disaster logistics operation on behalf of the State of Michigan. Also may be known as "Disaster Logistics Manager" or simply "Logistics Manager."

DISASTER LOGISTICS AND DONATIONS MANAGEMENT CENTER (DLDMC, State-Level): The *facility* established at or near the State Emergency Operations Center from which state-level disaster logistics and donations management functions are coordinated. (See background note in green shaded box below for additional information regarding local-level organizational options for disaster logistics and disaster donations management centers.)

Background Note: Some local jurisdictions may wish to separate the two functions and establish two management centers – one for logistics management and one for donations management. Because there are sufficient commonalities between the two functions and there is a need to coordinate their activities, the State of Michigan has opted for a combined center. The combined center option is also suggested for local jurisdictions in MSP/EMHSD Publication 107a, "Local Disaster Logistics and Donations Management Planning Handbook."

DISASTER LOGISTICS AND DONATIONS MANAGEMENT SYSTEM (State-Level): The personnel, facilities, technical expertise, and material resources which are designated for use in disaster logistics and donations management operations. The disaster logistics and donations management system is designed to facilitate the assessment of need and request for, and receipt, storage, processing and distribution of, needed disaster commodities (including donated goods and services, if applicable). The State of Michigan disaster logistics management system consists of: 1) the Disaster Logistics and Donations Management Team; 2) the Disaster Logistics and Donations Management Center; 3) required support facilities such as Control Check Points, Warehouses, Staging Areas, the Base / Camps, and Points of Distribution; and 4) the available material resources and expertise of the stakeholder partners listed in the Michigan Disaster Logistics and Donations Management Plan which can be devoted to logistics and donations management operations.

DISASTER LOGISTICS AND DONATIONS MANAGEMENT TEAM (State-Level): The team made up of representatives of state governmental agencies and nongovernmental organizations to manage disaster commodities and disaster donations on behalf of the State of Michigan. Its mission is to implement the Michigan Disaster Logistics and Donations Management Plan – a stand-alone Support Plan to the Michigan Emergency Management Plan. The Michigan State Police / Emergency Management and Homeland Security Division coordinates the logistics management operations of the team; the Michigan Department of Human Services coordinates donations management operations. The two agencies will cooperate to manage their respective functions, in accordance with the Michigan Disaster Logistics and Donations Management Plan, as part of the State Emergency Operations Center incident response and recovery structure. Depending on incident circumstances, the team may be required to implement statewide or regional logistics and/or donations management operations, or provide technical and/or direct management assistance to logistics and/or donations operations implemented by a local jurisdiction.

DISASTER LOGISTICS MANAGEMENT TEAM (DLMT): The team made up of representatives of local governmental agencies and nongovernmental organizations to manage disaster commodities on behalf of a Michigan local jurisdiction. Its mission is to implement the logistics management elements of the jurisdiction's Disaster Logistics and Donations Management Plan, with the ultimate aim of ensuring the efficient, time-effective, and cost-effective delivery of disaster commodities to those in need. The team is typically managed by a local human service agency or organization. (See background note in green shaded box below for additional information regarding organizational options for local-level disaster logistics and disaster donations management teams.)

Background Note: The Disaster Donations Management Team (DDMT) and Disaster Logistics Management Team (DLMT) have distinct functions, but for operational efficiency may be combined into a Disaster Logistics and Donations Management Team (DLDMT). Because there are sufficient commonalities between the two functions and there is a need to coordinate their activities, the State of Michigan has opted for a combined team. The combined team option is also suggested for local jurisdictions in MSP/EMHSD Publication 107a, "Local Disaster Logistics and Donations Management Planning Handbook." However, there is still a compelling need for separate coordinators for the two functions; as a result, the State of Michigan (and Publication 107a) advocate for the separate positions of Disaster Logistics Management Coordinator (DLMC) and Disaster Donations Management Coordinator (DDMC). Local jurisdictions, as part of their planning, will consider these and other options and develop an organizational structure that best meets their operational needs and makes maximum use of local personnel and facility resources. The State of Michigan will adjust its technical and/or direct assistance efforts as required to accommodate whatever organizational structure is in place in the affected local jurisdictions.

DISTRIBUTION CENTER – a.k.a. POINT OF DISTRIBUTION (POD): A facility operated by a local government, local church or other faith-based organization, community-based organization, or voluntary agency for providing needed commodities (donated and/or procured) directly to disaster survivors. Most commonly called "Point of Distribution or POD;" however, either name is acceptable as long as it is used consistently. This facility can be set up indoors (i.e., inside a building) or outdoors (i.e., in a parking lot or large, open paved or gravel space).

DISTRICT COORDINATOR: The Michigan State Police, Emergency Management and Homeland Security Division employee serving at any of seven State Police District Headquarters, whose primary job is to work with local communities on emergency management and homeland security activities.

DONATIONS INTAKE AND PROCESSING CENTER (DIPC): A functional element of the Disaster Logistics and Donations Management Center (DLDMC) which is equipped and staffed to receive, record, and process donation offers received via telephone or online. At a very minimum, the DIPC must have one dedicated phone line and one computer terminal. Large-scale / catastrophic disasters may require a multi-line phone bank and multiple computers.

EMERGENCY: Any occasion or instance in which assistance is needed to supplement efforts to save lives, protect property and public health and safety, or to lessen or avert the threat of a catastrophe.

EMERGENCY MANAGEMENT ACT: Refer to "Michigan Emergency Management Act."

EMERGENCY MANAGEMENT ASSISTANCE COMPACT (EMAC): The interstate agreement that streamlines the assistance one governor can lend to another after a natural, technological or human-caused disaster (including a terrorist attack) by providing a framework for flexible response. The EMAC was first introduced in 1993 and the National Emergency Management Association (NEMA) administers the program on behalf of the member states. The EMAC is an arrangement of the states, by the states, and for the states. It addresses all the issues associated with requesting assistance, reimbursement of services, worker's compensation insurance, and liability in advance of a disaster. (In January 2001, Michigan became the 43rd state to join the EMAC.) The Michigan State Police / Emergency Management and Homeland Security Division (MSP/EMHSD) is the coordinating agency for EMAC assistance in the State of Michigan.

EMERGENCY MANAGEMENT COORDINATOR (EMC): The person appointed pursuant to Act 390, PA 1976, as amended, to coordinate emergency management activities for an emergency management program jurisdiction. Also commonly called State Departmental, County or Local "Emergency Manager."

EMERGENCY MANAGEMENT AND HOMELAND SECURITY DIVISION (MSP/EMHSD): The division within the Department of State Police that coordinates the comprehensive emergency management and homeland security activities (prevention, mitigation, protection, preparedness, response, and recovery) of state and local government and maintains the Michigan Emergency Management Plan and Michigan Disaster Logistics and Donations Management Plan.

EMERGENCY MANAGEMENT PROGRAM: The basic emergency planning and operational entity at the local government level. Each county has an appointed emergency manager and enabling legislation creating an emergency management program. In accordance with the provisions of Act 390, PA 1976, as amended, municipalities with a population of 10,000 or more may elect to also appoint an emergency manager and maintain a separate emergency management program from the county in which they are located.

EMERGENCY OPERATIONS CENTER (EOC): The local site at which the coordination of information and resources to support incident management activities normally takes place. The logistics and donations management functions would typically be managed from this location. Refer to "State Emergency Operations Center" for the state-level facility definition.

EMERGENCY OPERATIONS PLAN (EOP): The plan developed and maintained by a Michigan county or municipal emergency management program jurisdiction, as a counterpart to the Michigan Emergency Management Plan, for the purpose of organizing and coordinating the emergency management activities of the county or municipality and the support jurisdiction(s) under the plan. An EOP usually consists of a basic plan or other introductory section with various supporting annexes for each service or function. The disaster logistics management and donations management functions are typically found under the Resource Support or Human Services (or similar) sections of the plan. (Note: In MSP/EMHSD Publication 201, "Local Emergency Planning Workbook," EOPs are also referred to as "Emergency Action Guidelines" or "EAGs." Although differing slightly in format and level of content, EOPs and EAGs are, for all intents and purposes, identical documents.)

EMERGENCY PUBLIC INFORMATION: Information that is disseminated primarily in anticipation of an emergency or during an emergency.

EMERGENCY SUPPORT FUNCTION (ESF): A grouping of governmental and nongovernmental capabilities into an organizational structure to provide the support, resources, program implementation, and services that are most likely to be needed to prevent injuries, save lives, protect property and the environment, restore essential services and critical infrastructure, and help survivors and communities return to normal, when feasible, following a disaster or emergency. Capabilities can include but are not limited to personnel, equipment, material goods, professional knowledge and expertise, financial resources, legal authorities, and facilities. Each ESF is headed by a Lead Agency, with one or more agencies designated as Support Agencies based on their resources and capabilities to support the function. The ESFs serve as the primary operational-level mechanism through which local or state agencies and their partner organizations provide assistance to citizens in need.

EVACUATION: A population protection strategy that provides for the orderly movement of people away from an actual or potential hazard.

EXECUTIVE DIRECTIVE 2005-9: A Michigan Executive Directive issued by Governor Jennifer Granholm on September 29, 2005 that adopted the National Incident Management System (NIMS) as the state standard for incident management in Michigan.

FEDERAL COORDINATING OFFICER (FCO): *The federal officer appointed by the President to manage federal* resource support activities related to Stafford Act major disasters and emergencies – including the provision of individual assistance, public assistance, and hazard mitigation assistance. The FCO is responsible for coordinating the timely delivery of federal disaster assistance resources and programs to the affected state and local governments, individuals and families, and the private sector.

FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA): The primary federal agency that coordinates emergency planning, preparedness, mitigation, response and recovery within the federal government, and administers the President's Disaster Relief Program. FEMA is housed within the federal Department of Homeland Security.

FEDERAL-STATE AGREEMENT: The document that states the understandings, commitments, and conditions for assistance under which FEMA disaster assistance shall be provided. This agreement imposes binding obligations on FEMA, the State, and local governments in the form of conditions for assistance which are legally enforceable.

FORCE ACCOUNT LABOR: State, tribal, or local government employees engaged in logistics and/or donations management activities.

HEAVY EQUIPMENT LOG: A record of heavy equipment (trucks, trailers, forklifts, etc.) that has been rented from a private source that is used for disaster logistics and/or donations management activities. When local and state resources are not available, it may be necessary to lease equipment such as this.

INCIDENT: An occurrence or event, natural or human-caused, which requires an emergency response to protect life or property. Incidents can include major disasters, emergencies, terrorist attacks and terrorist threats.

INCIDENT ACTION PLAN (IAP): An oral or written plan containing general objectives reflecting the overall strategy for managing an incident. It may include the identification of operational resources and assignments, as well as attachments that provide direction and important information for management of the incident during one or more operational periods.

INCIDENT COMMAND POST (ICP): The field location at which the primary tactical-level, on-scene incident command functions are performed. The ICP may be co-located with other incident facilities and is normally identified by a green rotating or flashing light.

INCIDENT COMMAND SYSTEM (ICS) – a.k.a. INCIDENT MANAGEMENT SYSTEM (IMS): A standardized on-scene emergency management construct specifically designed to provide for the adoption of an integrated organizational structure that reflects the complexity and demands of single or multiple incidents, without being hindered by jurisdictional boundaries. The ICS is the combination of facilities, equipment, personnel, procedures, and communications operating with a common organizational structure, designed to aid in the management of resources during incidents. The ICS is used for all types of emergencies and is applicable to small as well as large and complex incidents.

INCIDENT COMMANDER (IC): The individual responsible for all incident activities, including the development of strategies and tactics and the ordering and release of resources. The IC has overall authority and responsibility for conducting incident operations and is responsible for the management of all incident operations at the incident site.

IN-KIND DONATIONS: Donations other than cash (usually materials or professional services) for disaster survivors and/or rescue workers and other relief staff.

JOINT FIELD OFFICE (JFO): A temporary federal facility established locally (i.e., in or close to a federally-designated disaster area) to provide a central point for federal, state, local and tribal officials with responsibility for incident oversight, direction and/or assistance to effectively coordinate protection, prevention, mitigation, preparedness, response and recovery actions.

JOINT INFORMATION CENTER (JIC) – a.k.a. JOINT PUBLIC INFORMATION CENTER (JPIC): A facility established to coordinate all incident-related public information activities. It is the central point of contact for all news media at the scene of the incident. Public information officials from all participating agencies and organizations are co-located at the JIC. (Note: JIC is the preferred name; JPIC is now obsolete.)

LOCAL GOVERNMENT (Federal Definition): 1) Any county, city, village, township, district, regional authority, public college or university, or other political subdivision of any state, any Indian Tribe or authorized tribal organization, or Alaskan native village or organization; and 2) Any rural community or unincorporated township or village or any other public entity for which an application for assistance is made by a state or political subdivision.

LOCAL STATE OF EMERGENCY: A declaration by a county or municipality with an appointed emergency management coordinator (pursuant to Act 390, PA 1976, as amended) when circumstances indicate that the occurrence or threat of widespread or severe damage, injury, or loss of life or property from natural or human-made cause exists.

MAJOR DISASTER: Any natural catastrophe (including any hurricane, tornado, storm, high water, wind driven water, tidal wave, tsunami, earthquake, volcanic eruption, landslide, mudslide, snowstorm, or drought), or, regardless of cause, any flood, fire, or explosion, in any part of the United States which in the determination of the President cause damage of sufficient severity and magnitude to warrant major disaster assistance under the Stafford Act to supplement the efforts and available resources of states, local governments, and disaster relief organizations in alleviating the damage, loss, hardship, or suffering caused thereby.

MICHIGAN EMERGENCY MANAGEMENT ACT – a.k.a. EMERGENCY MANAGEMENT ACT: Act 390, PA 1976, as amended, the basic state emergency management enabling legislation. This Act prescribes the power and duties of the Governor and certain state and local agencies and officials related to preparing for, responding to, recovering from, and mitigating disasters and emergencies; prescribes immunities and liabilities related to disaster relief work; and establishes the organizational framework for the emergency management system used in the state. (Note: Emergency Management Act is the official name; however, it is most often referred to as the Michigan Emergency Management Act.)

MICHIGAN EMERGENCY MANAGEMENT ASSISTANCE COMPACT (MEMAC): The statewide mutual-aid assistance compact, authorized under 1976 PA 390, as amended, that allows participating jurisdictions to render or receive assistance in time of crisis and share vital public safety services and resources more effectively and efficiently. The MEMAC is designed specifically for those situations in which a participating jurisdiction has exhausted its local resources (including those available through local / regional mutual aid or reciprocal aid compacts or agreements), or its resources are inadequate or overwhelmed in response to a threat or event being faced, and it requires additional resources (provided in a timely manner) to protect public health and safety, property or the environment. (The Emergency Management and Homeland Security Division, Department of State Police [MSP/EMHSD] administers the MEMAC on behalf of the State of Michigan and is responsible for processing requests for resources by participating jurisdictions.)

MICHIGAN EMERGENCY MANAGEMENT PLAN (MEMP): The plan developed and continuously maintained by the Emergency Management and Homeland Security Division, Department of State Police (MSP/EMHSD), pursuant to 1976 PA 390, as amended, for the purpose of coordinating the emergency management and homeland security activities of prevention, mitigation, preparedness, response and recovery within the state. The MEMP consists of two introductory sections (i.e., Planning Preliminaries; Emergency Management System), eight Emergency Support Functions (ESFs), 23 Disaster-Specific Procedures, and three primary Support Plans (i.e., Evacuation and Mass Shelter Support; Animal Care Support; Recovery Support). The MEMP is supported by other state-level, function-specific plans, including but not limited to those that address: 1) continuity of government and continuity of operations; 2) disaster logistics and donation management; 3) disaster debris management; 4) hazard mitigation; 5) emergency repatriation; 6) damage assessment; and 7) mass fatality management.

MICHIGAN VOLUNTARY ORGANIZATIONS ACTIVE IN DISASTER (MIVOAD): The Michigan chapter of the National Voluntary Organizations Active in Disaster (NVOAD), an umbrella organization of established and experienced voluntary organizations that provide disaster services in all phases of emergency management, but with emphasis on response and recovery. The MIVOAD fosters cooperation, communication, coordination, and collaboration among its Michigan-based voluntary organizations. In the response and recovery phases, each individual organization functions independently, yet cooperatively. The MIVOAD serves as a clearinghouse and coordinating body for the provision of support services to a variety of response and/or recovery operations (including disaster donations and disaster logistics management), working in coordination and cooperation with other involved state departments / agencies and nongovernmental organizations in the State Emergency Operations Center or Alternate State Emergency Operations Center. The MIVOAD may also work directly with affected local government Emergency Operations Centers in disaster donations and/or disaster logistics management, and/or other incident response and/or recovery support activities.

MOBILIZATION CENTER: A temporary federal facility at which response personnel, equipment, and resources (disaster commodities) are received and pre-positioned for deployment to an incident Logistics Base, a Warehouse or Staging Area, or directly to a Point of Distribution or other designated location, as required. A Mobilization Center may provide temporary support services, such as food and billeting, for response personnel prior to their assignment, release, or re-assignment.

MONITORING: Actions taken to ensure that a contractor (involved in disaster donations and/or logistics management work) complies with the contract scope-of-work.

MUTUAL AID AGREEMENT: A written agreement between agencies, organizations, and/or jurisdictions that indicates that they will assist one another upon request by furnishing personnel, equipment, materials, and/or expertise in a specified manner.

NATIONAL INCIDENT MANAGEMENT SYSTEM (NIMS): A system mandated by Homeland Security Presidential Directive (HSPD)-5 that provides a consistent nationwide approach for federal, state, tribal, and local governments to work effectively and efficiently together to prepare for, respond to, and recover from domestic incidents (which includes terrorist attacks, major disasters, and other emergencies), regardless of their cause, size or complexity. To provide for interoperability and compatibility among federal, state and local capabilities, the NIMS includes a core set of concepts, principles, and terminology. HSPD-5 identifies these as the incident command system; multi-agency coordination systems; unified command; training; identification and management of resources (including systems for classifying types of resources); qualifications and certifications; and the collection, tracking, and reporting of incident information and incident resources.

NATIONAL RESPONSE FRAMEWORK (NRF): The plan developed by the federal Department of Homeland Security (DHS) to replace the National Response Plan (NRP) which had been effect since January 6, 2005. The National Response Framework officially replaced the NRP on March 22, 2008. The National Response Framework provides the guiding principles by which all response personnel prepare for and provide a unified national response to disasters and emergencies.

NONGOVERNMENTAL ORGANIZATION (NGO): A private nonprofit entity that is based on interests of its members, individuals, or institutions and that is not created by a government but may work cooperatively with government. Such organizations serve a public purpose, not a private benefit. Examples include faith-based charity organizations and the American Red Cross.

POINT OF DISTRIBUTION (POD) – a.k.a. DISTRIBUTION CENTER: A facility operated by a local government, local church or other faith-based organization, community-based organization, or voluntary agency for providing needed commodities (donated and/or procured) directly to disaster survivors. Also commonly called "Distribution Center;" however, Point of Distribution is currently the preferred name. (Either name is acceptable, as long as it is used consistently.) This facility can be set up indoors (i.e., inside a building) or outdoors (i.e., in a parking lot or large, open paved or gravel space).

PRELIMINARY DAMAGE ASSESSMENT (PDA): An assessment conducted by teams of federal, state and local officials (and tribal, if affected) to determine the severity and magnitude of a disaster and also to identify capabilities and resources of state, local, tribal and other federal agencies.

PRINCIPAL FEDERAL OFFICIAL (PFO): The federal official designated by the Secretary of Homeland Security to act as his/her representative locally to oversee, coordinate and execute the Secretary's incident management responsibilities under HSPD-5. The PFO ensures consistency of federal support as well as the overall effectiveness of federal incident management. The PFO interfaces with federal, state, tribal, local, and nongovernmental / private sector officials regarding the federal incident management strategy, and serves as the primary federal spokesperson for coordinating public communications related to the incident. The PFO position is normally only established for catastrophic or unusually complex incidents requiring extraordinary coordination.

PRIVATE NONPROFIT ORGANIZATION: Any nongovernmental agency or entity that currently has:

- An effective ruling letter from the U.S. Internal Revenue Service, granting exemption under section 501(c), (d), or (e) of the Internal revenue Service Code of 1954; or
- Satisfactory evidence from the State that the non-revenue producing organization or entity is a nonprofit one organized or doing business under state law.

RESOURCE SUPPORT ESF: The Emergency Support Function (ESF) in the Michigan Emergency Management Plan that is concerned with the provision of supplemental human, material, facility, equipment and financial resources to support emergency operations. Disaster logistics and disaster donations management fall under the purview of the Resource Support ESF.

Note: In some local Emergency Operations Plans or Emergency Action Guidelines, the disaster logistics and disaster donations management functions may fall under the Human Services ESF or human services function or agency.

RECEPTION CENTER: A center established to register evacuees and assess their disaster-related needs. This facility may also, under certain circumstances, be used to receive specific commodities (donated and/or procured) such as food, water, clothes and building supplies.

RECOVERY: Recovery, in this document, includes all types of emergency actions dedicated to the continued protection of the public or to promoting the resumption of normal activities in the affected area.

REGIONAL RESPONSE COORDINATION CENTER (RRCC): A standing facility at each FEMA regional office that is activated to coordinate regional response efforts and implement local federal program support until a Joint Field Office (JFO) is established.

RESPONSE: Activities that address the short-term, direct effects of an incident. Response includes immediate actions to save lives, protect property, and meet basic human needs. Response also includes the execution of emergency operations plans and of incident mitigation activities designed to limit the loss of life, personal injury, property damage, and other unfavorable outcomes.

ROBERT T. STAFFORD DISASTER RELIEF AND EMERGENCY ASSISTANCE ACT: (See "Stafford Act.")

SHELTER: A facility in an area safe from the effects of a hazard that may be used to house and care for evacuees.

STAFFORD ACT: The Robert T. Stafford Disaster Relief and Emergency Assistance Act, PL 100-707, signed into law November 23, 1988. The Stafford Act renamed and amended the Disaster Relief Act of 1974, PL 93-288. The Stafford Act was subsequently amended by the Disaster Mitigation Act of 2000, P.L. 106-390 (October 30, 2000), as well as several Acts signed into law in October of 2006 (i.e., Department of Homeland Security Appropriations Act of 2007, P.L. 109-295, October 4, 2006; Pets Evacuation and Transportation Standards Act of 2006, P.L. 109-308, October 6, 2006; and Security and Accountability for Every Port Act of 2006, P.L. 109-347, October 13, 2006).

STAGING AREA: A large parking lot or other suitable open area to provide a base for registration, unloading and transfer of resources, assembly of persons, and a rally point for mutual aid forces. For logistics / donations management purposes, a staging area could be officially designated points such as vacant commercial lots, warehouse facilities (governmental, NGO), armories, county fairgrounds, highway / public works maintenance garages, airports, parks and recreation areas, or possibly shopping center parking lots (providing there is written permission from the owner).

STATE COORDINATING OFFICER (SCO): The person appointed by the Governor to manage all aspects of a federally-declared major disaster or emergency under the Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act). The Division Commander or Assistant Division Commander of the Emergency Management and Homeland Security Division, Department of State Police (MSP/EMHSD) is normally appointed to this position. The SCO works in cooperation with the Federal Coordinating Officer (FCO) – generally an employee of the Federal Emergency Management Agency (FEMA).

STATE DIRECTOR OF EMERGENCY MANAGEMENT AND HOMELAND SECURITY (SDEMHS): The Director of the Department of State Police or his/her authorized representative. The Division Commander of the Emergency Management and Homeland Security Division, Department of State Police (MSP/EMHSD) is the designated Deputy State Director of Emergency Management and Homeland Security.

STATE EMERGENCY OPERATIONS CENTER (SEOC): The primary center for coordination of state government response and recovery operations in time of disaster or emergency. The SEOC is maintained and operated by the Emergency Management and Homeland Security Division, Department of State Police (MSP/EMHSD).

STATE INDIVIDUAL ASSISTANCE OFFICER (SIAO): The person appointed by the State Coordinating Officer to serve as the primary point of contact with FEMA, other federal and state departments / agencies, and private, voluntary (nongovernmental) agencies and organizations in the provision of disaster relief assistance to individuals and families.

STATE OF DISASTER OR STATE OF EMERGENCY: A declaration by executive order or proclamation by the Governor under the provisions of Act 390, PA 1976, as amended, which activates the response and recovery aspects of state and local emergency operations plans.

STATE PUBLIC ASSISTANCE OFFICER (SPAO): The person appointed by the State Coordinating Officer (SCO) to manage the Public Assistance Grant Program on behalf of the State.

TERRORISM: An intentional, unlawful use of force, violence or subversion against persons or property to intimidate or coerce a government, the civilian population, or any segment thereof, in furtherance of political, social, or religious objectives.

UNAFFILIATED VOLUNTEER: Also known as a "spontaneous" or "emergent" volunteer; an individual who is not formally associated with a recognized voluntary disaster relief organization.

UNDESIGNATED GOODS: *Largely unsolicited, donated items that are not addressed to a specific recipient.*

UNIFIED COMMAND: An application of the Incident Command System (ICS) used when there is more than one agency with incident jurisdiction or when incidents cross political jurisdictions. Agencies work together through the designated members of the Unified Command to establish their designated Incident Commanders at a single Incident Command Post (ICP) and to establish a common set of objectives and strategies and a single Incident Action Plan (IAP).

UNSOLICITED GOODS: Donated items that have not been requested by government officials, voluntary disaster relief organizations, or other donations-related personnel.

VALUE-ADDED DONATION: A disaster donation (goods or service) that has been properly prepared for shipping, receiving, distribution, and use. Generally, value-added donations are: 1) needed by the disaster-stricken community; 2) appropriate to the culture of the community; and 3) clearly sorted, packed and labeled for distribution and eventual use. Perishable food is not a value-added donation and should be discouraged.

VOLUNTEER: For emergency management and/or homeland security purposes, any individual accepted to perform services by an appropriate governmental agency which has authority to accept volunteer services, when the individual performs services without promise, expectation, or receipt of compensation for services performed.

VOLUNTEER REGISTRATION CENTER (VRC): A designated location where spontaneous, unaffiliated volunteers may go to register for disaster work; have their education, training and skill sets assessed; receive an incident overview and expedient training, if applicable; and receive disaster work assignments.

WAREHOUSE: Any available, large enclosed storage area (ideally 25,000 – 200,000 square feet in size, located on a secured / fenced site) with sufficient area to park and unload trucks and other vehicles carrying disaster donations or commodities. Examples of facilities that can be used as warehouses include but are not limited to vacant commercial warehouse space, governmental and nongovernmental organization warehouse facilities, armories, county fairground buildings, ice arenas, highway / public works maintenance garages, airport hangers, community recreation centers, etc.

WEAPON OF MASS DESTRUCTION (WMD): Under Title 18, U.S.C. § 2332a, "(1) Any explosive, incendiary, or poison gas, bomb, grenade, rocket having a propellant charge of more than four ounces, or missile having an explosive or incendiary charge of more than one-quarter ounce, or mine or similar device; (2) any weapon that is designed or intended to cause death or serious bodily injury through the release, dissemination, or impact of toxic or poisonous chemicals or their precursors; (3) any weapon involving a disease organism; or (4) any weapon that is designed to release radiation or radioactivity at a level dangerous to human life." Weapons of Mass Destruction are also commonly referred to as "CBRNE" Weapons – an acronym for chemical, biological, radiological, nuclear and explosives / incendiary devices.

SITUATION AND ASSUMPTIONS:

Initiating Disaster Conditions. Most disasters in Michigan do not completely overwhelm state and local capabilities to meet the short- and/or long-term recovery and basic life sustainment needs of the affected population. As a result, substantial disaster logistics and donations management operations in Michigan are rarely activated at the state or local levels. Normally, the need for a large influx of disaster commodities from outside Michigan would only be expected in the most widespread, severe, or catastrophic of incidents. Those situations typically would result in: 1) significant structural, property, and/or environmental damage; 2) severe and prolonged impacts to large numbers of individuals – and especially to functional needs populations; 3) severe impacts to animal populations; 4) severe curtailment or cessation of critical economic, social, and/or life support systems, services, institutions and sectors – to such an extent that basic human needs cannot be met using in-state resources alone; and 5) the need for extended protective measures and mass sheltering / temporary housing for affected individuals.

Media Portrayal. Such events would also likely generate a high level of prolonged regional and/or national media interest (including social media networks) which would inevitably focus on the ability of the State and the affected local governments to meet the basic health, medical, safety, sanitation, and life sustainment needs of the impacted population. In terms of unsolicited disaster donations, if the disaster circumstances are portrayed by the media and social media networks in a manner that exudes confidence that the needs of disaster survivors are being adequately met by local, state and federal response assets, then donations likely will be minimized. Conversely, if the portrayal of events gives the impression basic needs are not adequately being met or the incident response / recovery is in any way falling short of expectations, then unsolicited disaster donations are likely to occur (and especially from persons and organizations located outside the affected area).

Likely Trigger Events. Based on the experiences in Michigan and in other states, the types of disasters most likely to require the activation of a substantial logistics management operation (including a disaster donations element, if required) in Michigan are:

- A nuclear military attack against the United States.
- A terrorist attack in a major metropolitan area that involves a weapon of mass destruction and which results in significant injury, loss of life, and property damage.
- A series of severe and damaging windstorms, tornadoes, or floods that occur within a short timeframe and that affect a large portion of the state or the entire state.
- A prolonged electrical power outage or other energy emergency (e.g., natural gas shortage) that affects a large portion of the state or the entire state, especially during a period of extreme hot or extreme cold temperatures.
- A catastrophic hurricane, earthquake, tornado, terrorist attack, or fire in another state (widely covered by the media) which results in widespread and/or severe physical damage leading to a large influx of displaced evacuees into Michigan.
- A pandemic or other biological incident that requires quarantine of a large segment of the population and/or significant hospitalization, and which results in shortages of food and medical supplies and a curtailment or cessation of critical systems, services, and sectors.

- A major hazardous material or nuclear power plant accident that requires prolonged mass evacuation and sheltering operations.
- A prolonged local, state, region, or nationwide shortage of critical life-sustaining resources due to any cause.

These disasters would normally be beyond the collective response and recovery capabilities of local jurisdictions and the State – even with resource augmentation by private sector entities within the state and/or other states under the national EMAC. Only the federal government – working in conjunction with NGOs, the national private sector, and perhaps even international entities under the umbrella of the National Response Framework (NRF) – possesses the financial resources and logistics capability to meet the significant logistics needs of such disasters in a timely manner.

Major Planning Assumptions. In addition to the basic planning assumption outlined above pertaining to initiating disaster conditions, the following additional planning assumptions have guided the development of this plan:

- The successful management of disaster commodities requires a united, cooperative and coordinated effort by local, state, tribal (as applicable) and federal agencies, NGOs, business and industry, public and private institutions, and the general public.

- Large-scale / catastrophic disasters will likely overwhelm local and state resources, necessitating that supplemental life-sustaining commodities be acquired for those in need. The supplemental commodities may be procured through state and federal government channels, through NGOs and/or the private sector, through the EMAC, filled through voluntary disaster donations, or any or all of these options.

- Full use of existing local, tribal, state, NGO and private sector resources (including donations and mutual aid) should occur before federal assistance is sought.

- Assistance under the EMAC will be sought as appropriate. However, it is recognized that many initiating disaster conditions may affect entire regions of the United States or even the entire country, rendering the EMAC useless in many cases as a vehicle for obtaining needed disaster commodities.

- If adequate disaster commodities cannot be procured, in a time- and cost-effective manner through non-federal sources, then federal assistance will be sought through FEMA, under the umbrella of the NRF.

- Logistics / donations management response activities may be necessary before a Presidential major disaster declaration, as rapid coordination efforts are often required to mitigate potential problems in the response phase of disaster operations.

- In the event of a particularly severe disaster that causes significant injuries, loss of life, destruction of property, and the need for mass care for a large population, a wide array of disaster commodities will be necessary to meet the basic life support requirements of those in need.

- Affected individuals and families will have, at best, basic provisions to be self-sufficient for no more than three days (72 hours). The vast majority of those affected will not even have this basic level of preparedness and will require immediate attention.

- Offers of assistance (donations) from citizens and the private sector will be made to all levels of government (federal, state, local, and tribal) as well as to NGOs.

- Functional needs populations (e.g., the elderly, homebound individuals, persons with disabilities, severely impoverished individuals, institutionalized individuals, young children, pregnant women, persons with pets, etc.) will require particular attention and must be quickly identified early in the disaster response so that needed commodities can be targeted to them as required.

- In anticipation of a catastrophic incident, FEMA may elect (with or without a state request for assistance) to pre-stage disaster commodities at designated locations (Mobilization Centers) to ensure the rapid distribution of needed life-sustaining commodities to disaster survivors in the immediate aftermath of the incident.

- In the immediate aftermath of a catastrophic incident where there is a clear need for disaster commodities, FEMA may elect (without a state request for assistance) to deliver life-sustaining disaster commodities to designated locations (Points of Distribution, shelters, care facilities, etc.) for rapid distribution to disaster survivors. In these situations, every reasonable effort will be made to coordinate such actions with the State and affected local jurisdictions. However, if such coordination is not possible, FEMA is authorized to unilaterally make such decisions and to carry out those actions that are required to protect the public health and safety and/or facilitate rapid response and recovery operations.

- The American Red Cross (an NGO) is Congressionally-mandated to provide disaster relief assistance to persons and areas in need. This includes the provision of certain types of life-sustaining disaster commodities. It is expected, then, that the ARC (along with other NGOs) will be able to meet some but not all of the life sustainment needs of the population affected by a major disaster or other catastrophic incident.

- NGOs involved in the relief effort (e.g., ARC, MIVOAD) will coordinate their relief actions through the affected local Emergency Operations Centers (EOCs) and the State Emergency Operations Center (SEOC). Such coordination is necessary to ensure maximum efficiency of the logistics / donations management operation, and to ensure that the needs of the affected population are being adequately met.

- To the extent possible, all field facilities required for a successful logistics / donations management operation (i.e., Control Check Points, Warehouses, Staging Areas, the Base / Camps, Points of Distribution) should be located within, or in close proximity to, the affected jurisdiction.

- Usable surplus commodities (including donations) will have to be properly dispensed of at the conclusion of disaster response and recovery operations. The federal government (FEMA) will determine the appropriate final disposition of any surplus federal commodities. Any unused commodities provided by the State of Michigan, as well as those provided by private sector entities (including voluntary donations), will be properly disposed of through the SEOC and affected local EOC(s).

- Any and all commodities provided by the federal government will be done so in accordance with the appropriate elements of the NRF, including but not limited to: 1) ESF #5 (Information and Planning Annex); 2) ESF #6 (Mass Care, Emergency Assistance, Temporary Housing and Human Services Annex); 3) ESF #7 (Logistics Annex); 4) the Private-Sector Coordination Annex; and 5) the Catastrophic Incident Annex. In addition, commodities will be typed in accordance with the National Mutual Aid and Resource Management Initiative under the National Incident Management System (NIMS).

- Federal agencies and NGOs providing disaster commodities to the State of Michigan may not, in many cases, provide personnel, equipment, materials or other resources to aid in the transport, storage, inventorying, movement or distribution of those commodities. In those cases, logistics management assets must be provided by the State of Michigan and/or the affected local governments, or by volunteers, contractors or agents working on behalf of the State of Michigan and/or the affected local governments. Technical assistance may be provided by FEMA or other participating federal agencies or relief organizations, at their discretion.

- Mobile homes / temporary housing assets provided to the State of Michigan or its affected local governments must be installed and operated in accordance with applicable state laws / regulations and local ordinances related to the establishment and operation of temporary housing quarters.

- In federally-declared major disasters or emergencies under the Stafford Act, certain disaster logistics / donations management costs directly related to the protection of the health, safety and general welfare of the affected population may be reimbursable as an "emergency protective measure" under Category B of the federal Public Assistance Grant Program (PAGP). All such costs, if allowed, would be eligible on at least a 75% federal / 25% non-federal basis.

- Hazardous material / environmental issues will have to be addressed throughout the logistics / donations management operation.

- Once emergency conditions in the disaster area are known (typically via the media), individuals and relief organizations from outside the disaster area will begin to collect materials and supplies and organize teams to assist the devastated region. Often, officials in the disaster area may not be aware of such assistance efforts.

- Individuals and organizations will feel compelled to go to the disaster area to offer material goods and/or services.

- In the event of a particularly damaging disaster causing significant injuries, loss of life, and destruction of property, donors will offer a wide variety of assistance – including cash, goods, equipment and loan of equipment, and the services of individuals.

- Cash donations to recognized nonprofit voluntary organizations with disaster experience are generally preferable to in-kind donations or material donations (including volunteer services).

- Large-scale and/or "high visibility" disasters will likely require some level of state involvement and assistance in logistics / donations management operations. In smaller-scale disasters, these activities, if required, can normally be handled by voluntary organizations and local agencies, working in concert with each other.

- NGOs have most of the expertise, experience, and capability for disaster donations management. The State of Michigan, in general, does not possess the infrastructure, personnel, facilities, expertise, and experience to manage a large-scale, prolonged disaster logistics / donations management operation without involvement and assistance by voluntary relief organizations.

- Non-useful and unwanted (unsolicited) donations can be expected. Such items may include unsorted dirty or climate-inappropriate clothing, used mattresses, highly perishable foods, worn-out or cast-off items (junk), etc. These items must be planned for and disposed of in a manner that would not be considered offensive to the giving party. (Such disposal activities should not be publicized in any manner.)

OPERATIONS AND ORGANIZATION:

Damage Assessment / Needs Assessment. The Michigan Emergency Management Plan (MEMP) / Information and Planning ESF, and MSP/EMHSD Publication 901 – "Michigan Damage Assessment Handbook," describe the damage assessment system used by state agencies and local governments in Michigan. That system helps determine the extent of loss or harm from natural and human-made disasters. Part of the analysis that occurs during the process of collecting and compiling the damage assessment data involves identifying the anticipated needs of the communities and individuals affected by the disaster. This "needs assessment" portion of the process is crucial because of its direct relationship to organized action by response and long-term recovery / relief personnel.

The anticipated need for disaster commodities to supplement existing local, state, NGO, and private sector resources is a critical part of the needs assessment. So too is the likelihood of receiving unsolicited donations from outside parties due to incident conditions (real or perceived). If it is determined that disaster commodities are required due to severe resource and/or capability shortfalls, that determination will likely come from the needs assessment portion of the damage assessment process. Similarly, the damage / needs assessment process will help in identifying, 1) the likely need for disaster donations to fill anticipated resource requirements, and 2) the likelihood that disaster donations will become an issue that needs to be dealt with early in the incident response.

With regard to disaster commodities, the needs assessment should provide timely answers to the following critically important questions:

- What commodities are needed (category, kind, type)?
- When are they needed?
- Where are they needed, and by whom (are functional needs populations affected)?
- How much is needed (quantities)?
- For how long will they be needed?

These determinations are typically made by the individual local governments and state agencies that submit their assessment data to the MSP/EMHSD through the SEOC. Other times, it is the SEOC Planning Section and Operations Section and/or other MSP/EMHSD or state agency staff that makes those determinations, based on the collective data submitted by local governments and state agencies. In either event, once the determination is made that supplemental disaster commodities are required, the SEOC Incident Commander must make the decision whether or not to activate the DLDMT and DLDMC as part of the SEOC structure.

Direct Resource Requests. Apart from the initial damage assessment / needs assessment process described above, local governments in Michigan can also articulate resource requirements to the SEOC throughout the incident response and recovery phases via the Critical Incident Management System (CIMS or MI-CIMS). Within the CIMS menu of reports and forms is a "Resource Request" form which can be completed by a local government requesting a specific resource, and then submitted to the SEOC for review, analysis and follow up action. Such resource requests would typically be made when the resource in question was not readily available locally or regionally through existing mutual aid or assistance agreements.

Prioritization of Resource Sources. Once the resource request is submitted to the SEOC, it typically will be filled by one of the following methods – listed in general order of consideration by SEOC staff:

- By the applicable state agency, using the agency's existing resources;
- By an NGO, using the organization's existing or acquired resources;
- By disaster donations provided by private entities and/or the public;
- By a vendor under contract to the Michigan Department of Technology, Management and Budget (MDTMB);
- By resources provided through the nationwide (interstate) EMAC or (intrastate) MEMAC; or
- By a federal agency under mission assignment by FEMA, through the National Response Framework.

Resource requests are another mechanism to help establish the need for disaster commodities and provide direction to state agency staff regarding the categories, kinds, types and quantities of commodities that must be acquired through one or more of the avenues listed above. Appeals to the public and the business community for donations can then be tailored to meet the specific needs of the affected local governments and/or state agencies, as articulated in their resource requests.

Disaster Logistics / Donations Management Operations: Roles and Responsibilities:

Local Government. Local government is the first to respond to disasters and emergencies. Response efforts are first directed to activities that protect lives, such as evacuations, sheltering, fire fighting, utility restoration, and debris clearance from roadways. Key initial response efforts of local government with regard to logistics management include determining:

- The life sustainment needs of the affected population;
- The materiel and technical assistance needs of the response and recovery operation;
- The ability of the community to meet those needs based on existing resources and capabilities; and
- The likelihood that disaster donations will become an issue that needs to be dealt with during response and recovery operations.

Mutual Aid. Local governments are strongly encouraged to enter into mutual aid agreements to provide assistance to one another during a disaster or emergency. The agreements should either stipulate reciprocal services or set labor and equipment rates. In order for emergency assistance provided under a mutual aid agreement to be eligible for reimbursement by FEMA, the agreement must be in writing and in place before the incident occurs. Additional requirements for FEMA eligibility include:

- The assistance should be directly related to the disaster and meet other FEMA eligibility requirements;
- The mutual aid agreement should not be contingent upon federal funding or a declaration of major disaster by the federal government;
- The eligible applicant receiving aid must request the grant from FEMA, and the entity providing aid may not apply for a grant directly; and
- The applicant must be able to provide documentation that aid was requested, that aid was received and costs were incurred by the entity providing aid.

State Government. The State of Michigan can provide supplemental assistance to stricken local communities when the required response efforts overwhelm local capabilities. Such assistance is requested through the MSP/EMHSD by following the processes specified in MSP/EMHSD Publication 901 – "Michigan Damage Assessment Handbook," and the MEMP with regard to declaring a local "state of emergency" and requesting state assistance.

If state assistance for logistics and/or donations management purposes is required, it can be authorized by the Governor upon the declaration of a "state of disaster" or "state of emergency" under 1976 PA 390, the Michigan Emergency Management Act. In some cases, state assistance may also be provided under a state agency's separate legal authorities. Assistance may include, but is not limited to:

- Overall management of the logistics / donations operation;
- Technical assistance with various aspects of the operation;
- Provision of equipment and personnel to provide direct assistance in operations;
- Possible financial assistance (under Section 19 of 1976 PA 390, or by direct legislative appropriation); or
- Any combination of these forms of assistance.

All such assistance will be provided through the SEOC and coordinated by the MSP/EMHSD, in accordance with the MEMP.

If state logistics / donations management capabilities (including activation of mutual aid and use of private sector resources) are overwhelmed, the State of Michigan has two other options available to it for supplemental logistics / donations management assistance: 1) seek assistance from other states via the nationwide EMAC – the state-to-state mutual aid agreement; and/or 2) seek assistance from the federal government through FEMA.

EMAC Assistance. All assistance requested under the EMAC must go through the MSP/EMHSD – the steward agency for the EMAC within the State of Michigan. Based on identified logistics / donations management needs, the MSP/EMHSD will request the assistance using the standard process required by the EMAC. Assistance for logistics / donations management purposes under the EMAC may include, but is not limited to:

- Professional expertise for overall management of the operation;
- Equipment and operators for the transportation, storage, sorting, or distribution of commodities and/or unsolicited donations;
- Technical assistance with specific aspects of the operation; or
- Any combination of these forms of assistance.

The State of Michigan can either accept or decline the assistance proposals provided by other states, depending on such factors such as cost, timing of assistance, and the logistical requirements of the providing entity. All assistance provided under the EMAC will be coordinated through the SEOC by the MSP/EMHSD and other involved state agencies.

Federal Government. If the response and recovery effort is beyond the combined capabilities of the affected local government(s) and the State of Michigan – even when supplemented by mutual aid – it will likely be necessary to request federal disaster relief assistance under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, Public Law 93-288, as amended. Such requests are made by the Governor, through the FEMA Region V office (in Chicago, Illinois), to the President. Under the Stafford Act, the President may declare that a "major disaster" or "emergency" exists within the affected areas of Michigan and provide disaster relief assistance to meet the specific needs of the situation.

Federal assistance with logistics / donations management activities may include:

- Provision of disaster commodities to meet the identified life sustainment needs of the affected population and the operational needs of the response and recovery effort;
- Technical assistance in the actual management of the logistics / donations operation; and
- Financial assistance for state and locally-managed logistics / donations operations.

The provision of disaster commodities can be accomplished via direct assistance provided by FEMA (or another federal agency under mission assignment by FEMA) under the National Response Framework. Technical assistance with logistics / donations management operations can be provided by FEMA. Federal financial assistance for state- and locally-managed operations may be available (subject to eligibility) under the Public Assistance Grant Program (PAGP) – Category B (Emergency Protective Measures). These forms of assistance must be specifically requested in the Governor's declaration request letter. All such assistance provided by the federal government is coordinated through the SEOC and/or the established Joint Field Office (JFO) by the MSP/EMHSD and other involved state agencies.

Pre-Staging of Federal Commodities. For slowly evolving incidents or incidents in which there is sufficient prior notice of likely occurrence (e.g., steadily increasing flood, pandemic, prolonged resource shortage), FEMA may elect (with or without a state request for assistance) to pre-stage disaster commodities in anticipation of their need once the incident actually occurs. FEMA and other federal agencies are authorized to take such unilateral actions as a precautionary step to ensure that those commodities that are typically needed immediately after a catastrophic incident are available near the disaster area to provide immediate life-sustaining support to disaster survivors. FEMA will pre-stage these commodity caches at designated federal Mobilization Centers at no cost to the State of Michigan or the affected local governments. If the commodities are needed, they can be delivered by federal contractors and/or state and local transportation assets to the designated Control Check Points, Warehouses, Staging Areas, Points of Distribution (a.k.a., Distribution Centers), or other locations in a rapid and organized manner. If the commodities are not needed because the incident did not occur and/or other resources were used, they will be returned to federal repositories and/or private sector suppliers by the designated federal contractors.

Disaster Logistics / Donations Management System. The state disaster logistics / donations management system is designed to determine:

- The need for supplemental disaster commodities;
- The category, kind, type, and quantity of commodities required to meet the life sustainment needs of the affected population, as well as the needs of the response and recovery operations;
- The locations where commodities are needed;
- How long supplemental commodities will be required;
- The likely need for disaster donations to fill anticipated resource requirements;
- How commodities (including those met by donations) will be received, stored, staged, registered / inventoried, transported, distributed, and accounted for;
- The likelihood that disaster donations will become an issue that needs to be dealt with early in the incident response; and
- The number and types of workers (and their qualifications) necessary to successfully implement a disaster logistics / donations management operation based on incident circumstances.

The system consists of: 1) the DLDMT; 2) the DLDMC; 3) other facilities required to support the logistics / donations management effort; and 4) the available supporting resources and expertise of state agencies and NGOs that are part of the DLDMT.

Lead Agencies for Logistics / Donations Management. In accordance with the MEMP, the Michigan Department of Human Services (MDHS) is responsible for the management of disaster donations operations, and the MSP/EMHSD is responsible for management of disaster logistics operations. These two agencies will serve as the designated leads for their respective functions, and they will jointly implement this plan.

A Disaster Donations Management Coordinator (DDMC) will be appointed from within the MDHS to manage and coordinate the donations management function at the state level. Similarly, a Disaster Logistics Management Coordinator (DLMC) will be appointed from within the MSP/EMHSD to manage and coordinate the logistics management function. Together, these two individuals will manage and coordinate the DLDMT and DLDMC – each having equal authority and responsibilities within their designated functional areas.

Disaster Logistics / Donations Management Team. The DLDMT consists of appropriate representatives of the following Michigan state agencies and NGOs:

- Michigan Voluntary Organizations Active in Disaster (MIVOAD) – (facility, labor and transportation resources; technical expertise)
- American Red Cross (ARC) Michigan – (facility, labor and transportation resources; technical expertise; identification of needs)
- Michigan Citizen Corps (MCC) – (labor resources – volunteers)
- State Animal Response Team (SART) – (advice on animal-related commodity needs; value-added donations for animal care needs from individual and/or corporate donors)
- Michigan Department of Human Services (MDHS) – (overall management and coordination of disaster donations operations; labor resources; functional needs populations needs / issues)
- MDHS / Michigan Community Service Commission (MCSC) – (labor resources through the Michigan AmeriCorps and other programs and Volunteer Michigan website; credentialing of volunteers)
- MSP/EMHSD (overall management and coordination of disaster logistics operations; State Individual Assistance Officer; State Public Assistance Officer; Public Information Officer; plan development / revision services; federal resource requests; liaison to FEMA/DHS; Michigan Citizen Corps resources; incident coordination)
- Michigan Department of Agriculture and Rural Development (MDARD) – (SART activation / coordination; USDA / agricultural industry liaison; facility resources – fairgrounds and agricultural industry)
- Michigan Department of Community Health (MDCH) – (labor resources – volunteers through the Michigan Volunteer Registry; advice on health / medical commodity needs)
- MDCH / Michigan Office of Services to the Aging (MOSA) – (senior citizen-related needs and issues; labor resources – senior volunteers)
- Michigan Department of Corrections (MDOC) – (facility, labor and transportation resources)
- Michigan Department of Technology, Management and Budget (MDTMB) – (facility, labor and transportation resources)
- Michigan Department of Military and Veterans Affairs (MDMVA) – (facility, labor and transportation resources; technical expertise; security at facilities)
- Michigan Department of Natural Resources (MDNR) – (facility, labor and transportation resources)
- Michigan State Police (MSP) – (security at facilities; supplemental intrastate transportation resources)
- Michigan Department of Transportation (MDOT) – (facility, labor and transportation resources; overweight and/or oversize vehicle permitting)

The exact composition of the DLDMT for each disaster will be determined by the SEOC Incident Commander and/or Operations Section Chief, based on the disaster conditions and the anticipated scope, magnitude, and duration of the logistics / donations management effort. For most disaster situations involving a disaster logistics / donations operation, the entire membership of the DLDMT will not be needed. However, particularly severe or catastrophic incidents may require the full activation. (Refer to Attachment C, "Disaster Logistics / Donations Management Team – Membership Roster / Contact List," for a listing of and contact information for DLDMT members.)

The DLDMT serves the following basic functions:

- Assisting in the identification of needed disaster commodities (procured and/or donated);
- Providing for the overall management, coordination, and troubleshooting of the logistics / donations management operation;
- Providing technical expertise in all facets of the logistics / donations management operation;
- Providing / coordinating resource support to the logistics / donations management operation (personnel, equipment, materials, vehicles, facilities, communications);
- Requesting / procuring needed disaster commodities;
- Establishing / managing needed support facilities such as Control Check Points, Warehouses, Staging Areas, the Base / Camps, and Points of Distribution;
- Coordinating commodity receipt, storage, staging, registering / inventorying, transporting, distributing, and accounting and final disposition;

- Coordinating with involved contractors, federal and local agencies, NGOs, tribal governments (as applicable); and donors (if commodities are donated, at the request of the State and/or involved jurisdiction);
- Monitoring / tracking the activities and progression of the logistics / donations management operation;
- Identifying and resolving issues as they arise (troubleshooting / problem solving);
- Maximizing the use of donations offers (goods and volunteer services) by ensuring that they are appropriate for the incident circumstances and in value-added form, are properly registered and inventoried, and are directed to the areas / populations most in need;
- Coordinating with Public Information regarding media releases about the availability and distribution of needed disaster commodities, disaster donations preferences and donating instructions, and instructions for spontaneous, unaffiliated volunteers; and
- Providing operation-specific information for required reports, briefings, media inquiries, etc.

Disaster Logistics / Donations Management Center Overview. The DLDMC serves as the central coordination point for all state-level disaster logistics / donations management activities and operations. It is the location in which the DLDMT works. The DLDMC will be activated by the SEOC Incident Commander when centralized management of the logistics / donations operation is required. If possible, the DLDMC will be physically located in the SEOC. In cases of crowding in the SEOC, the DLDMC may be located immediately adjacent to the SEOC in an existing office or conference room, or it may be located at another facility with direct phone links to the SEOC. The configuration of the DLDMC will change from disaster to disaster, based on the situational needs and anticipated level of activity. At a minimum, the DLDMC will require one computer terminal and one telephone, with workspace and seating for each DLDMT member. (Some situations may require multiple telephones and computers to handle a larger staff and a larger volume of activity.)

Space and Proximity Issues. Space in or adjacent to the SEOC may be particularly limited if state-level disaster debris management or other staff-intensive response or recovery operations are ongoing. These functions will also require dedicated space, computers, and telephones for their staffs. In some cases, it may be possible for the various functions to share physical space, with each function maintaining its own dedicated computers and telephone lines. This will be addressed on a case-by-case basis based on incident circumstances. There is great benefit to having these various function-specific centers co-located with the SEOC (for ease of access and to enhance coordination), and every reasonable effort will be taken to make that happen. However, situations which result in a particularly large SEOC staffing pattern may force the function-specific centers to locate elsewhere. In accordance with SEOC procedures, the SEOC Logistics Section Chief is ultimately responsible for designating the space that will be made available for the DLDMC and the other function-specific centers (if activated).

Duration of Activities. Generally, disaster logistics / donations management operations will take several weeks to complete and closeout. The DLDMC will remain open, and the DLDMT will remain activated, for as long as is required to distribute commodities (and donations, as applicable) and close-out the involved support facilities. Many closeout activities will continue after the incident response has been completed and long-term recovery is underway. However, it may not be necessary to staff the DLDMC through the final stages of the distribution process. The decision on when to terminate the DLDMC and to de-activate the DLDMT will be made by the SEOC Incident Commander, based on input received from the Team and the affected local governments.

Disaster Logistics / Donations Management Function within the SEOC Structure. Administratively, the Disaster Logistics / Donations Management function will be placed under the SEOC Operations Section and will be under the purview of the SEOC Operations Section Chief, who will oversee both the DLDMT and DLDMC.

SEOC Support. The DLDMC will be established under the Operations Section as a Logistics / Donations Management Branch. It will be staffed by the DLDMT and other required support staff. The DLDMC will be supported by the SEOC Planning Section, which has responsibilities related to the initial assessment and estimation of need for disaster logistics and/or donations management, and for the collection and compilation of operational data related to logistics / donations management. In addition, the SEOC Finance / Administrative Section is responsible for tracking costs related to the logistics / donations management operation, with the support and assistance of the other involved sections. The SEOC Incident Management Section will provide general strategic direction and oversight of the logistics / donations management operation, and make policy decisions as required. The Incident Management Section is also responsible for all public information related to the logistics / donations management operation.

Coordination of Disaster Logistics and Donations Management Functions. Coordination of disaster logistics and donations management operations is critically important because disaster donations can, in many cases, help address some (or all) of the identified needs for disaster commodities. It may be possible to fill many needs directly with disaster donations in lieu of requesting disaster commodities from the federal government, through the EMAC, or purchasing them through private vendors.

Coordination will be accomplished through direct verbal exchanges, joint meetings (formal and informal), CIMS information, e-mail, and written SEOC status reports. If circumstances will not allow the logistics and donations management functions to be co-located in the same facility, it will be necessary to rely more on CIMS information, e-mail, written status reports, and telephone exchanges. It also may be desirable to establish liaison positions at each facility to ensure that information and activities are coordinated. The SEOC Incident Commander and Operations Section Chief will determine if liaison staffing is required, based on the unique needs of each situation.

Disaster Logistics and Donations Management Support Facilities. In addition to the DLDMC and depending on the situational circumstances, the following facilities may be established to directly support the logistics / donations management operation:

- Local DLDMC(s);
- Control Check Points;
- Staging Area(s) / Warehouse(s);
- Base / Camp(s);
- Points of Distribution (a.k.a., Distribution Centers);
- Volunteer Registration Center;
- Federal Disaster Logistics Management Center (Joint Field Office – established by FEMA only if a federal declaration is made and logistics management is being addressed directly by federal forces, or under the Public Assistance Grant Program);
- Federal Disaster Donations Management Center (Joint Field Office – established by FEMA only if a federal declaration is made and donations management is being addressed directly by federal forces).

Background Note: Federal disaster logistics and disaster donations management facilities may be co-located in the Joint Field Office, at FEMA's discretion.

Figures 3-5 in Attachment AA depict the relationship between these crucial facilities. Following is a summary of the specific requirements and functions of each support facility:

Local DLDMC. *This facility is similar in nature and function to the State DLDMC but would be used to coordinate* local logistics / donations management activities. The Local DLDMC may be physically located in the local Emergency Operations Center (EOC), at or near the resource support function. It may also be located adjacent to or in close proximity to the EOC, or it may be located at another facility with direct communication links to the resource support function in the EOC. Like the State DLDMC, the configuration of the Local DLDMC will be based on the disaster situation and the anticipated duration and level of activity. At a minimum, the DLDMC will require one computer terminal and one telephone, with workspace and seating for each DLDMT member.

Refer to the "Local Roles and Responsibilities" section for a description of the logistics / donations management organizational structure that may staff the Local DLDMC.

Control Check Points (for disaster donations). Depending on the nature, scope and magnitude of the disaster and the anticipated volume of unsolicited donations, Control Check Points may be utilized to "filter" incoming goods and services before they reach the disaster area. Control Check Points are officially designated locations where trucks and other transport vehicles containing unsolicited donated goods can be inspected and directed to an appropriate volunteer agency or other location for processing, storage, and distribution. Unaffiliated volunteers from outside the *disaster area wishing to provide services can also be interviewed at these locations, or they may be referred to a* central Volunteer Registration Center (VRC). Items or services needed immediately, as well as those that may be needed in the long-term, can be directed to those locations in which they are needed. Unneeded or unwanted items or volunteers can be turned back at these points, although it is expected that some unneeded / unwanted items and volunteers will make their way through to the disaster area. A well-managed system of Control Check Points can help reduce congestion in the disaster area, as well as logistical and administrative headaches for the staff at Warehouses, Staging Areas, the Base / Camps, and Points of Distribution.

Background Notes: Examples of possible Control Check Point locations include weigh stations, roadside parks, truck stops, state parks and recreation areas, county fairgrounds, highway rest areas, armories, and other governmental facilities (located in close proximity to major transportation routes) that have large parking areas for vehicle inspections. Private facilities such as large shopping center parking lots can also be used, but only with the expressed written permission of the owner. Such permission should be carefully documented to avoid potential future problems with regard to legal claims, etc. Each Control Check Point should be staffed with at least two individuals, although more staff may be needed to handle anticipated large volumes of donations. Staffing will be handled through local agencies and NGOs, supplemented by state and federal staff – if such assistance is made available as a result of a state or federal declaration.

In other states, toll booths are sometimes used as Control Check Points. However, the only toll booths on Michigan's transportation system are at the international border crossings and the Mackinac Bridge. These are "choke points" on the system already with very limited space, and some are owned and/or controlled by private companies and U.S. Customs. As a result, the State of Michigan and/or federal government will authorize the use of toll booths as Control Check Points only if there are absolutely no other credible options available, and the perceived benefits of the Control Check Points outweigh the obvious difficulties that such facilities would pose to the State's transportation system and border safety and security. At no time will border safety and security be compromised for the sake of disaster donations management.

Staging Areas / Warehouse(s). Staging Areas can be any available, large outdoor area (ideally 1-25 acres in size, with fencing or other security provisions) with sufficient area to temporarily park vehicles, equipment, personnel and goods that are ready for deployment to the affected area to aid in the logistics management operation, provide volunteer disaster relief services, and/or other disaster response and recovery operations. (Vehicles and equipment might include dump trucks, front-end loaders, bulldozers, buses, cargo trucks, etc.). Staging Areas should have adequate parking spaces for a large number of workers at any time, and (ideally) covered space (e.g., permanent building, tent) to shelter workers and goods from the weather and provide a measure of security. Staging Areas should also have provisions in place for temporarily lodging, feeding, and caring for workers (that are ready for deployment) and for addressing their basic sanitation concerns (i.e., port-a-johns, portable showers, and hand washing facilities). Either a permanent building, tent space on the grounds, or a combination of both may meet the temporary lodging requirements. (An alternative is to provide shuttle service for workers to and from motels and hotels, or a nearby Base / Camp set up to provide for the lodging, food, water, and sanitation needs of personnel. See description below.)

Warehouse facilities can be any available, large enclosed storage area (ideally 25,000 – 200,000 square feet in size, located on a secured / fenced site) with sufficient area to park and unload trucks and other vehicles. Warehouses are needed to receive, unload, sort, inventory, package, stage, store, and dispatch goods to Points of Distribution and/or designated voluntary agencies. These facilities can be used for both short- and longer-term storage, although it is usually best to designate one or two locations exclusively for longer-term storage and staging use. Warehouses should be located in relative proximity to the disaster area, and be available for use on a 24-hour basis if necessary.

Background Notes: Possible locations for use as Staging Areas include vacant commercial lots, governmental and/or NGO warehouse facilities, armories, county fairgrounds, highway / public works maintenance garages, airports, parks and recreation areas, or possibly shopping center parking lots (providing there is expressed written permission from the owner). Possible facilities for use as Warehouses include vacant commercial warehouse space, governmental and/or NGO warehouse facilities, armories, county fairground buildings, ice arenas, highway / public works maintenance garages, airport hangers, community recreation centers, etc. Ideally, using the facility as a Warehouse will not greatly interfere with its normal, day-to-day use. Warehouses should be capable of supporting a staff of up to 40 people, and have the capability of supporting a computer, facsimile machine, and telephone. Warehouses should also have adequate climate control capabilities, a restroom, and loading / unloading areas.

Base / Camps. The incident Base is the location where primary incident support logistics functions are coordinated and administered and equipment / personnel support operations are conducted. This includes equipment maintenance, repair, reorder and procurement activities, as well as other support services such as supply, medical, food / water, overnight lodging, sanitation, and communications. The affected local jurisdiction will establish and operate the incident Base. The Base will be designed to support operations at multiple incident sites (if possible). Support may be requested from the State (via the MSP/EMHSD) if local resources are not sufficient to operate the Base. This may include a request for the State to assist in establishing and operating Camps as a way of supplementing the capabilities and/or capacity of the Base.

Camps may be established if additional support locations are required due to incident size (geographically) or complexity. Camps are temporary locations within the general incident area which are equipped and staffed to provide food, water, sleeping areas, and sanitation services for workers who are currently not on call for deployment. Camps may be used in those situations where overnight / multi-day accommodations are required for volunteers, work crews, equipment operators, and other deployed resources under the disaster logistics / donations management operation that cannot be adequately (or efficiently) handled at the incident Base. Camps may be

utilized, at the discretion of the affected local jurisdiction and the MSP/EMHSD, in lieu of local hotel / motel or other accommodations. Camps are particularly suited for certain situations, such as when:

- There is a shortage of nearby hotel / motel rooms or other suitable accommodations for deployed resources.
- Large numbers of resources have been deployed from outside the incident area (e.g., EMAC resources).
- The incident area is particularly large or widely-dispersed.

Background Notes: Possible facilities for use as the Base / Camps include county fairgrounds, state / local parks and recreation areas, local campgrounds, military bases, college campuses, school grounds (if tents are used), community centers or community recreation centers, etc. Ideally, using the facility as a Base / Camp will not greatly interfere with its normal, day-to-day use. Staffing of the Base / Camps will be handled through local agencies and NGOs, supplemented by state and federal staff – if such assistance is made available as a result of a state or federal declaration. In most cases, NGOs will be relied upon to assist in meeting the material and supply needs of the Base / Camp operations. This includes the provision of food and water, bedding, and basic sanitation services. FEMA may be able to provide advice and technical assistance in the establishment and operation of the Base / Camps.

Points of Distribution. Points of Distribution are local facilities operated by the local jurisdiction, churches and other faith-based organizations, and community-based and voluntary organizations, to provide goods (commodities) directly to disaster survivors. Points of Distribution will be located at a site the public recognizes and can easily locate, and will generally have controlled access and security provisions, restrooms, adequate lighting and parking, and access for handicapped individuals. Points of Distribution can be set up indoors (i.e., inside a building) or outdoors (i.e., in a parking lot or other large, open paved or gravel space to accommodate heavy vehicular traffic).

Background Notes: Possible locations for use as Points of Distribution include churches and other faith-based facilities, schools, recreation centers, community centers, senior centers, armories, county fairgrounds, and other similar type facilities. Vacant commercial space can also be used, as long as it is in a location that is well known to the general public. However, there is usually a cost associated with renting commercial space, even on a short-term basis. Staffing of Points of Distribution is the exclusive responsibility of the affected local jurisdiction (using local agency and/or NGO personnel). Normally, state governmental personnel will not be used to staff Points of Distribution except as a last resort under extraordinary circumstances.

It must be stressed that Points of Distribution are not the only means of distributing commodities to persons in need. In many cases, commodities can be distributed directly to designated facilities (e.g., shelters, care centers) and/or agencies, in lieu of Points of Distribution.

Joint Field Office / Federal Disaster Logistics and Donations Management Center. If an incident results in a major disaster or emergency declaration under the federal Stafford Act, the federal government (FEMA) will establish a logistics (and/or donations, as applicable) management presence in the JFO if there are logistics and/or donations management issues that require federal assistance – either through direct assistance by a federal agency (e.g., Army Corps of Engineers or FEMA) and/or through activation of the Public Assistance Grant Program for assistance under Category B (Emergency Protective Measures). If this occurs, the State will provide appropriate liaison to that facility to coordinate activities and to maximize the efficiency and effectiveness of the delivery of logistics and/or donations management assistance to affected local jurisdictions and the State. The MSP/EMHSD will determine which state agency should provide liaison to the JFO based on operational needs and incident circumstances. The affected local jurisdiction(s) will also provide liaison to the JFO, at the request of the MSP/EMHSD, if operational circumstances dictate that such liaison is desirable for effectiveness and efficiency purposes.

Activation of Disaster Logistics / Donations Management Functions. The MSP/EMHSD will determine if and when the disaster logistics and/or donations management functions will be activated. This decision will be made by the SEOC Incident Commander, in concert with the MDHS (if donations are involved), the Governor's Office, the various SEOC Section Chiefs and other involved state agencies, and FEMA. As much lead time as possible will be provided to allow involved agencies and personnel time to mobilize the required resources; however, in rapidly developing and/or particularly catastrophic incidents, lead time for activation may be minimal or non-existent.

Background Note: In catastrophic incidents, FEMA is authorized to activate the logistics management function and unilaterally deploy needed commodities to an area in order to provide for the life-sustaining needs of the affected population and/or to facilitate critical response and recovery operations. Although every reasonable attempt will be made to properly coordinate the provision of such assistance with the State and affected local governments, if need be FEMA can take unilateral action under its pre-delegated authorities in the NRF to ensure the rapid delivery and distribution of commodities to those in need.

MSP/EMHSD. MSP/EMHSD staff involved in logistics / donations management operations will be notified and activated by pager, CIMS, e-mail, telephone, facsimile, verbally, or by some combination of these means.

DLDMT. Members of the DLDMT will be notified and activated by pager, CIMS, e-mail, telephone, verbally, or by some combination of these means.

Local Governments. Affected local governments will be notified and activated for logistics / donations management operations by the MSP/EMHSD (normally the District Coordinator) by pager, CIMS, telephone, facsimile, verbally, or by some combination of these means.

FEMA. FEMA will be notified by the MSP/EMHSD of the need to activate a logistics and/or donations management operation. Typically that notification will be by pager, CIMS, telephone, facsimile, verbally, or by some combination of these means. Formal request for activation of logistics / donations management assistance will be included as appropriate in the Governor's letter of request to the President for federal disaster relief assistance under the Stafford Act. Typically, the federal logistics / donations management operation will be activated by FEMA prior to (but in anticipation of) the formal approval of the Governor's request for federal assistance.

Background Note: As indicated above, FEMA is authorized to pre-deploy and/or distribute needed disaster commodities absent a formal request by the State, in those rare circumstances where a timely request by the State for such assistance is not forthcoming. In most incidents, the State will request such assistance very early in the response effort, when the need for supplemental disaster commodities first becomes known.

Pre-Activation Briefing. In most cases prior to the activation of a disaster logistics (and/or donations, as applicable) management operation involving FEMA and federal response assets, a Pre-Activation Briefing will be held between FEMA and involved state and local officials to map out the essential elements of the operation and coordinate activities. Ideally, this briefing will be held face-to-face but in some circumstances that may not be possible so a teleconference or video conference may be held instead. The MSP/EMHSD and FEMA will jointly determine the date, time, location, and means of this briefing and communicate this information to all involved parties.

Logistics / Donations Management in Presidentially-Declared Incidents. Incidents in Michigan that result in a major disaster or emergency declaration under the federal Stafford Act are the most likely situations to require the provision of supplemental disaster commodities, and the most likely situations to generate unsolicited donations. If a large number of individuals and families are adversely affected, or the public perception is such, unsolicited donations are very likely to occur.

Federal Assistance. Federal assistance with logistics / donations management activities can be provided through:

- Direct provision of commodities by FEMA or another federal agency such as the U.S. Army Corps of Engineers (via mission assignment under the NRF or the agency's own enabling legislation);
- Provision of logistics / donations management technical assistance by FEMA; or
- Reimbursement for eligible logistics / donations management costs under the federal PAGP, Category B (Emergency Protective Measures).

These forms of assistance must be specifically requested in the Governor's declaration request letter, which will be based in part on the logistics / donations management assessment information provided by the affected local jurisdictions. Activation of the FEMA logistics and/or donations management element(s) makes available a wide variety of federal, NGO, and private sector assets to assist in state and local logistics / donations management operations, including facilities, communications infrastructure, equipment, personnel, transportation services, technical expertise, and emergency contracting capabilities. All such assistance provided by the federal government is coordinated through the SEOC by the MSP/EMHSD and the DLDMT.

Background Notes: In accordance with the Logistics Annex (ESF #7) to the National Response Framework, the federal role in logistics management operations is to "...provide support to the affected population as well as support to the incident management effort." Federal logistics management support is coordinated by FEMA, with assistance provided by a number of other support agencies, including:

- Department of Agriculture (USDA) – Mobilization Center staffing;
- Department of Commerce (DOC) – technical assistance on structural surveys and procurement of consulting services;
- Department of Defense (DOD) – execution of ESF #3 (Public Works and Engineering) activities, provision of resources under ESF #7, and Mobilization Center staffing;
- Department of Energy (DOE) – coordination with energy industries under ESF #12 (Energy) to assist in meeting critical fuel, lubricant, and electrical power needs;
- Department of Health and Human Services (HHS) – under ESF #8 (Public Health and Medical Services) provide medical supplies and response teams, and staff field hospitals;
- Department of the Interior (DOI) – management and support of Mobilization Centers, and assist in transportation tracking and supply accountability;
- Department of Transportation (DOT) – staff Movement Coordination Center (MCC) and manage transportation resources under ESF #1 (Transportation);
- Veterans Administration (VA) – technical assistance in identifying / procuring medical supplies and medical services;
- General Services Administration (GSA) – contracting, regional telecommunications, facilities, supplies, and other services under ESF #7; and
- National Aeronautics and Space Administration (NASA) – space, buildings, airports, and telecommunications for emergency support operations.

In accordance with the Volunteer and Donations Management Support Annex to the National Response Framework, the federal role in donations management is to "...support the State in ensuring the most efficient and effective use of unaffiliated volunteers, unaffiliated organizations, and unsolicited donated goods..." Federal support provided by FEMA (as the federal coordinating agency for donations management) and other federal agencies may include:

- Enhanced voluntary organization coordination;
- Assistance in establishing a donations management element as part of the DLDMC;
- Technical and managerial support;
- A national network of information and contacts to assist donations specialists in the field; and
- Donations management software and communications support as necessary.

Joint Field Office Organization. The MEMP prescribes the formation of a disaster organizational structure in the JFO aimed at fully utilizing the federal disaster assistance provided by the Stafford Act. This organizational structure is depicted in Figure 1 in Attachment AA.

Liaison Position(s). As required, local liaison will be provided to state-level disaster logistics and disaster donations officials in the JFO. These individuals will work closely with the State Individual Assistance Officer (SIAO) and State Public Assistance Officer (SPAO), as applicable, in representing and advocating for their jurisdictions on all issues related to disaster logistics and donations management under the federal PAGP. These liaison positions will be staffed for as long as necessary to adequately address disaster logistics and donations management issues and concerns. When the JFO closes, these individuals will continue to coordinate activities (from normal work locations) with federal and state officials until logistics and donations management operations are closed out.

Background Note: In some cases, the same individual may be able to adequately handle liaison responsibilities for both logistics management and donations management. The community must decide if its operations warrant the designation of two individuals, and/or if it has available one individual with the knowledge and skill sets required to handle both functions simultaneously.

Disaster Donations Preferences. Standard donations management doctrine stipulates that cash donations made to recognized nonprofit voluntary organizations with disaster experience are generally preferable to in-kind (material or professional / voluntary service) donations. Cash donations enable the receiving organization to purchase those goods and services actually needed by the disaster survivors, in the quantities and types most appropriate for the disaster situation. The State of Michigan concurs with this doctrine, and as a result, every effort will be made to encourage potential donors to send cash donations in lieu of in-kind donations. To that end, a vigorous public information campaign will be initiated early on in those disaster situations likely to generate donations, requesting that donations be cash only. (Refer to the "Public Information Regarding Donations Preferences" section below.) Exceptions for specific types of desired donations (i.e., value-added donations required to meet the basic needs of survivors) will be noted in the public information releases.

Even with that effort, however, it is likely that unsolicited in-kind donations will still be made. Those situations will be addressed by the DLDMT as they occur. Limited federal resources may be available to assist in managing the receipt, processing and distribution of value-added donations, and the proper disposition / disposal of surplus and/or unwanted or unusable items. However, the majority of the resources required for such operations will have to be provided by the State and/or locally.

Public Information Regarding Donations Preferences. As soon as possible after it becomes apparent that donations management may become an issue in a disaster, the State Public Information Officer (SPIO) and/or MSP/EMHSD and MDHS PIOs, members of the DLDMT, and FEMA (if involved) will cooperate to issue public information releases, requesting in most cases that potential donors make cash contributions in lieu of in-kind donations. These releases will be issued to major media outlets and posted on the State of Michigan and/or MSP/EMHSD and MDHS web and social media sites, and other involved agency / organization web sites as appropriate. In addition, the ARC and other NGOs routinely run public service announcements on radio and television, and web and social media sites, requesting cash donations for disaster relief purposes.

As appropriate, the public information releases may be tailored to request specific types of value-added, in-kind donations, when damage and needs assessments and/or direct resource requests have indicated the need for such resources over cash donations.

(Refer to Attachment B, "Sample Public Information Materials – Donations Preferences," for various sample press releases and public service announcements that can be used to disseminate donations information to the public.)

Logistics Management Operations for Federally-Provided Commodities. Logistics management operations during federally-declared incidents and involving federally-provided commodities necessarily involve the coordination of actions driven at the federal, state, and local levels of government, as well as those of involved NGOs. Following are synopses of the major phases of a logistics management operation in Michigan involving federally-provided disaster commodities:

Transportation and Receipt of Commodities. Commodities provided by FEMA will be transported by FEMA contractors and/or the military to one or more designated federal Mobilization Centers in Michigan. Depending on the type of commodity involved and incident circumstances, transportation could be by military aircraft (C-130, C-141, or C-5), by semi-trailer / truck, or by some combination of these two methods. (In rare cases, commodities may be delivered to the affected area by commercial aircraft or possibly even freight rail service and then trucked to the designated Mobilization Center(s) from the initial point of arrival.) These Mobilization Centers are located at:

- Selfridge Air National Guard Base (Mt. Clemens – Macomb County)
- W.K. Kellogg Airport – Air National Guard Station (Battle Creek – Calhoun County)
- Grayling Army Airfield (Grayling – Roscommon County)

These three sites have been selected by FEMA as the most optimal locations within Michigan for the delivery and temporary storage of disaster commodities. All three are military-controlled locations capable of handling C-130, C-141, and C-5 aircraft, and all have space available for the temporary storage of commodities and a fleet of federally-contracted delivery trucks. Depending on the commodity involved and incident circumstances, disaster commodities will be flown and/or delivered by truck to one or more of these designated locations for eventual distribution to state-designated Staging Areas or Warehouses, or directly to Points of Distribution or other designated locations. In the event that these designated federal Mobilization Centers are unusable for any reason, additional Mobilization Centers have been identified. Refer to Attachment X.

Upon arrival at the Mobilization Center, the commodities will be inventoried by federal personnel (or federally-designated contractors) and this information will be relayed to the State of Michigan through the designated state on-scene staff and/or the SEOC. The federal government will then rely on the instructions provided by the State regarding further delivery and distribution of the commodities. Such decisions will be made in the SEOC by the SEOC Incident Commander, Operations Section Chief, and the DLDMT, and will be based on incident circumstances and needs. The options available to the State include: 1) delivery of commodities directly to local Points of Distribution and/or other designated locations and distribution networks for immediate distribution to the affected population, or 2) delivery of commodities to intermediate Warehouses and/or Staging Areas for temporary storage / staging and a phased distribution / deployment through Points of Distribution and/or other designated locations and distribution networks.

Once the commodities are delivered to the designated Mobilization Center, they will remain in the custody of federal officials at the Center and/or the federal contractors acting on behalf of the federal government, until such time as a State of Michigan official (as designated by the DLDMT or the MSP/EMHSD) accepts the commodities and directs them to the appropriate state-designated Warehouse / Staging Area, Point of Distribution, or other location. The commodities will not be accepted from federal custody until a need for the commodities has been identified and substantiated, the commodities have been inventoried by state officials, and a distribution network is in place to get the commodities to their intended final end users.

The commodities will be transported from the federal Mobilization Centers to state-designated facilities by the federal government and/or its contractors. State, local, and NGO transportation assets (trucks and drivers) will only be used in a supplemental mode, or in the absence of viable federally-provided transportation assets. In all cases, the federal government has primary responsibility for the transportation and delivery of commodities to state-designated locations once the commodities have entered the State of Michigan. If federal transportation assets are not provided or are unavailable (for whatever reason), the federal government will compensate the State of Michigan and eligible local governments and NGOs for the transportation of commodities that are necessary to sustain life and/or facilitate critical response and recovery operations. This compensation (for eligible transportation work) will be provided under the federal PAGP, if activated, under Category B (Emergency Protective Measures).

All such assistance is provided on a 75% federal, 25% non-federal cost share basis. Strict applicant, work, and cost eligibility requirements must be met under the PAGP. (Refer to the "Finance and Accounting" section below for additional details.)

Staging / Warehousing of Commodities. Depending on the type of commodity involved and the incident circumstances, disaster commodities may take any of the following distribution paths:

- Transported directly from a federal agency or federally-designated contractor to state-identified end users and/or Points of Distribution (skipping the federal Mobilization Center);
- Transported directly from the federal Mobilization Center to state-identified end users for targeted distribution;
- Transported directly from the federal Mobilization Center to Points of Distribution for general distribution; or
- Transported from the federal Mobilization Center to a state-designated Warehouse / Staging Area for temporary storage and phased delivery / deployment to state-identified end users and/or Points of Distribution.

The SEOC / DLDMT will ultimately decide how and when commodities will be distributed, based on appropriate consultation with FEMA, the affected local governments, and other involved agencies and NGOs. These decisions will be made early in the logistics operation, either prior to arrival of commodities at the federal Mobilization Centers or shortly thereafter. In those cases where specific end users and/or Points of Distribution have been identified early on, the commodities will be delivered directly to those locations by federally-arranged transportation systems.

Security of Commodities and Logistics Operations. The federally-designated Mobilization Centers are located at airport facilities that are under the control of the U.S. military. Security is provided on a round-the-clock basis. Any additional security required at these Mobilization Centers will be the responsibility of the federal government and will be provided by appropriate federal agencies and/or federally-provided security contractors. If supplemental state and/or local security assets are required, such activities will generally be eligible for reimbursement under the federal PAGP, Category B – Emergency Protective Measures. (Refer to the "Finance and Accounting" section below for more details.)

Distribution of Commodities to Affected Areas and End-Users. Commodities will be distributed locally in the following manner:

- Directly to identified end-users (e.g., specific facilities or functional needs populations) using existing networks such as Area Agencies on Aging, Meals on Wheels, churches or other faith-based organizations, or the facility staff; or
- To Points of Distribution (e.g., schools, churches or other faith-based facilities, recreation centers, community centers, senior centers, armories, county fairgrounds, etc.) for general distribution to persons in need.

In most situations, local distribution will be accomplished using both methods. The vast majority of the affected population can be served by general commodities distribution through Points of Distribution. However, others must be served directly because they are unable to go to a Point of Distribution to pick up what they need. Local human service networks (e.g., Area Agencies on Aging, Meals on Wheels, Department of Human Services, ARC / Salvation Army, homeless shelters, etc.) will be relied on heavily to identify those populations under their stewardship that will require direct delivery of disaster commodities. This will be done primarily through the EOC as part of the damage / needs assessment process. Some commodities (e.g., medications, certain foods, ice, etc.) will require special handling and storage to maintain quality and ensure safety. These considerations will be properly addressed in the distribution process as required.

Public Information. As early as possible after the decision has been made to make disaster commodities available to disaster survivors, the MSP/EMHSD PIO (acting for the SPIO) and DLDMT will coordinate with the affected local government(s), FEMA, and involved agencies and NGOs to issue public information releases regarding commodities distribution. The releases will describe the types of commodities available, and where, when and how they will be distributed. The releases will be issued to major media outlets, posted on the State of Michigan and other appropriate web and social media sites, and distributed through human service networks. FEMA will also issue its own public information releases through its standard information dissemination processes. (Refer to Attachment A, "Sample Public Information Materials – Commodities Distribution," for various sample press releases and public service announcements that can be used to disseminate disaster commodities information to the public.)

Inventorying and Tracking. At the Warehouses, Staging Areas, and Points of Distribution, there is a need to inventory and track commodities (to the extent possible). If these facilities are established and managed by the State of Michigan, this will (ideally) be done electronically using the "Points of Distribution (POD)" input form found in the CIMS. However, it may not always be possible to make CIMS available to all logistics support facilities, or even to have access in some cases to computer technology. Therefore, there is a need to have provisions for backup (hardcopy) inventory tracking. The format used in such instances should be consistent with the CIMS "Points of Distribution (POD)" input form, which will be used in the DLDMC for commodities inventorying and tracking. The simple, modified version of the "Points of Distribution (POD)" input form found in Attachment U, "Points of Distribution Commodity Inventory Form," can be used by staff at the support facilities to keep an accurate, running accounting of the receipt, storage, and distribution of commodities at the facility.

Background Note: FEMA has its own internal inventorying / tracking system to manage its commodities delivery and distribution processes. Likewise, involved NGOs may also have their own inventorying / tracking systems to monitor the delivery and distribution of commodities provided by the organization. These systems are primarily for their own internal management purposes. These organizations will provide the SEOC / DLDMT with regular updates on commodity inventories, availability, and movement. The DLDMT will incorporate that information into the CIMS as appropriate. For the State of Michigan and involved local governments, all disaster commodities inventorying and tracking will be done within the CIMS.

Disposition of Unused Commodities. Any commodities provided by FEMA or other federal agencies (through FEMA), or contractors acting on behalf of FEMA or other federal agencies, remain the property of the federal government and will be disposed of by the federal government or its contractors, in accordance with federal specifications, at the conclusion of the logistics management operation. The SEOC / DLDMC will work with FEMA to identify the locations of the unused commodities for pickup and final disposition. If needed, state transportation assets may be used to supplement federally-provided transportation assets. At FEMA's discretion, unused commodities may also be donated to recognized NGOs or to state and local human service agencies for distribution to persons, facilities, or organizations in need of such items. Items that have no reuse value will be disposed of in accordance with FEMA specifications. Certain costs associated with the final disposition / disposal of unused commodities may be eligible for reimbursement under the federal PAGP, Category B (Emergency Protective Measures). The SPAO from the MSP/EMHSD will work with FEMA to determine the eligibility of final disposition / disposal related costs.

Finance and Accounting. The DLDMC will work closely with the SEOC Finance and Administration Section and FEMA to track all costs associated with the disaster logistics / donations management operation. This includes personnel costs, equipment costs, facility costs, transportation costs, final disposition / disposal costs, and any other applicable costs.

MSP/EMHSD Role and Responsibilities. The MSP/EMHSD staffs the SEOC Finance and Administration Section. It will be responsible for collecting, compiling, analyzing, and reporting on all state disaster logistics / donations management costs. This includes all costs for possible reimbursement under the federal PAGP, Category B (Emergency Protective Measures). The SEOC Finance and Administration Section will determine the forms and formats that must be used by state agencies involved in the logistics / donations management operation to report cost data. This information will be communicated to state agencies early in the operation to ensure that cost data is captured in the manner required.

State Agency Roles and Responsibilities. *State agencies involved in the logistics / donations management* operation (either as a member of the DLDMT or providing support services) are responsible for tracking and compiling all costs related to their involvement in the operation. Agencies must provide this information to the SEOC Finance and Administration Section in accordance with the prescribed formats and submittal timeframes.

Weapons of Mass Destruction Attacks – Special Considerations. In the event of an incident involving potential biological or WMD contamination, the DLDMT will work closely with FEMA and other commodity providers (i.e., through the EMAC or the private sector) and staff at the various support facilities to ensure that commodities for use in Michigan are not contaminated by checking their place of origin and route of transport. Commodities that are potentially contaminated will not be accepted for distribution until verification can be made that the commodities are free of contamination. Any technical expertise required to make that determination (i.e., through sampling / testing) will be arranged through the SEOC and/or JFO.

Emergency Communications Plan. The DLMC and DDMC will work with all other involved parties to develop an incident-specific emergency communications plan for work crews involved in the logistics / donations management operation. At a minimum, this plan will address the following issues and considerations:

- The type(s) of communications methods that will be used in the operation, and for what purposes;
- Communications equipment assigned to work crews;
- Frequencies, channels, and use protocols for 800 MHz radio communications;
- Repair or replacement of damaged, inoperable, missing or stolen communications equipment; and
- Reporting formats, times, and intervals for status updates and coordination calls, as appropriate;

If possible, standard Incident Command System reports found in the CIMS will be used to record part of this information – specifically reports ICS 205-OS (Incident Radio Communications Plan) and ICS 205a-OS (Communications List). The remainder of the plan will be in narrative and/or tabular format. The completed plan will be posted in the CIMS as a Reference Document and be available to all involved parties at any time.

Health and Safety Plan. The DLMC and DDMC will work with all other involved parties to develop an incident-specific health and safety plan for work crews involved in the logistics / donations management operation. The ultimate purpose of the plan is to help work crews avoid accidents during operations and to protect workers from exposure to hazardous materials. At a minimum, this plan will address the following issues and considerations:

- Methods for disseminating safety information to all workers involved in logistics / donations management operations;
- Minimum safety standards that are to be followed at all times;
- Monitoring procedures to ensure compliance with the minimum safety standards;
- *Corrective actions for incidents of non-compliance with the minimum safety standards;*
- Known hazards / potential hazards at all logistics / donations management facilities;
- Safe use of / safe presence around heavy equipment used at logistics / donations management facilities;
- Safe handling of potentially hazardous materials;
- Proper use of personal protective equipment; and
- *How to identify and report hazardous / potentially hazardous conditions (process to be followed and person to* report to at each facility).

If possible, standard Incident Command System reports found in the CIMS will be used to record part of this information – specifically report ICS 206-OS (Medical Plan). The remainder of the plan will be in narrative and/or tabular format. The completed plan will be posted in the CIMS as a Reference Document and be available to all involved parties at any time.

Public Information Plan. The MSP/EMHSD PIO (acting on behalf of the SPIO) will work with the DLDMT, affected local government(s), and other appropriate parties to develop an incident-specific public information plan for the logistics / donations management operation. At a minimum, this plan will address the following issues and considerations:

- The method(s) that will be used to distribute commodities (and value-added donations) to those in need (direct distribution to targeted facilities / populations and/or general distribution via Points of Distribution);
- Specifics regarding dates, hours, locations, routes, etc. for Point of Distribution operations;
- Specifics regarding support facilities that will be in use in the jurisdiction (i.e., Control Check Points, Staging Areas, Warehouses, the Base / Camps, Volunteer Registration Center), their dates and hours of operation, what the public should expect regarding traffic, noise, after-dark operations and other potential issues of concern, etc.;
- Multi-lingual (non-English) requirements for the affected population(s);
- The methods that will be used to disseminate the information (e.g., electronic and print media, internet sites, public forums, direct mail / direct distribution, billboards, flyers within billings, door-to-door campaigns, functional needs advocacy organizations, etc.); and
- Where public concerns, complaints, and questions can be directed (e.g., DLDMC, web / social media site(s), specific governmental office, etc.).

The completed plan (in narrative and/or tabular format) will be posted in the CIMS as a Reference Document and be available to all involved parties at any time. Refer to the task assignment lists for the PIO, as well as Attachment A, "Sample Public Information Materials – Commodities Distribution," for additional information and resources.

Record Keeping. Accurate and timely record keeping helps ensure that: 1) eligible costs are documented for possible reimbursement by the federal government; 2) information is readily available for incident reporting purposes; and 3) information is available to validate activities and operations as part of a state and/or federal audit or other program or financial review. To the extent possible, the DLDMT will use standard reporting forms developed by FEMA (for record keeping purposes under the PAGP) to document eligible costs and operational information. Refer to Attachment P, "Logistics and Donations Management Record Keeping," for a list of forms that will be used.

Post-Joint Field Office Operations. It is likely that most, if not all, of the logistics / donations management activities will be completed prior to the JFO being closed. However, final disposal / disposition of surplus items may still be ongoing after the JFO closure. In most cases, the DLDMT and DLDMC will be de-activated at the time of the JFO closure, if not before (the decision rests with the SEOC Incident Command). Any remaining activities will be coordinated by the DLMC and DDMC from their normal work location(s).

Post-Incident Review / After-Action Report. As appropriate, the MSP/EMHSD and MDHS will conduct a post-incident review of logistics / donations management and operations with the DLDMT and other involved agencies and organizations (including private contractors), and then develop a summary of the findings for inclusion in the incident after-action report (AAR).

Plan Review and Maintenance. The MSP/EMHSD and MDHS will jointly review this plan annually and develop / disseminate updated material as required.

Training. The DLMC and DDMC will provide or facilitate logistics and donations management training to members of the DLDMT on an as-needed basis. The DLMC and DDMC will determine the training content and delivery method(s) based on anticipated operational needs and federal / state requirements. The training may consist of classroom training, online training, video training, field training, self-help training packets, or a combination of these methods. The training will incorporate the National Incident Management System (NIMS) and review the essential elements of disaster logistics and disaster donations management operations as described in this plan. It will also address current federal and state processes, procedures, requirements and regulations related to Category B (Emergency Protective Measures) work under the federal PAGP.

TASKS AND EXECUTION:

Federal Roles and Responsibilities – Logistics Management.* Federal activities are coordinated by FEMA, which will:

1. Make early contact with the MSP/EMHSD (Michigan POC) to determine if disaster logistics management assistance is required under the federal Stafford Act declaration. If assistance is required, appoint a federal Logistics Coordinator to work directly with state officials in the timely provision of that assistance.

2. Establish a logistics management element at the Region V Regional Response Coordination Center (RRCC) to coordinate with the State.

3. (At the SEOC or other state facility, or the JFO), assist the State (as required) in:

   - Establishing the logistics management elements of the DLDMT;
   - Establishing a DLDMC;
   - Ensuring that appropriate logistics management support facilities are established and operating effectively;
   - Coordinating with JIC staff on public service announcements, press releases, and other media-related support;
   - Coordinating with appropriate federal logistics management elements (e.g., Mobilization Center staff, RRCC logistics management staff, ESFs, the Defense Coordinating Officer, etc.) regarding Michigan's needs and operations; and
   - Preparing input for situation / status reports, briefings, and VIP visits, as necessary.

4. If requested by the State, activate required Individual Assistance (IA) programs to provide needed disaster commodities (and other required types of assistance) to affected persons within the declared area. Provide a Federal Individual Assistance Officer (FIAO) and support staff to coordinate the IA in conjunction with the designated State Individual Assistance Officer (SIAO), the DLDMT, and other state support staff involved in IA operations.

5. If requested by the State, activate the PAGP to provide reimbursement under Category B (Emergency Protective Measures) for required logistics management activities, as well as other categories of assistance (e.g., debris removal and damage to public facilities) as dictated by the needs and circumstances of the disaster. Provide a Federal Public Assistance Officer (FPAO) and support staff to coordinate the PAGP in conjunction with the designated SPAO, the DLDMT, and other state support staff involved in PA operations.

6. Notify the SEOC / DLDMT of the federal Mobilization Center(s) and transportation systems that will be used to deliver the requested disaster commodities to Michigan.

7. Provide support and technical assistance to the State, especially regarding:

   - Identification and establishment of Staging Areas, Warehouses, the Base / Camps (if required by incident circumstances), Points of Distribution, and other required local distribution networks;
   - Transportation / delivery of commodities;
   - Inventorying / tracking of commodities;
   - Disposition of unneeded / unused commodities.

Background Note: The State will determine if intermediate Staging Areas and Warehouses will be established to facilitate a phased distribution / deployment of commodities. If such facilities are not established, commodities will be delivered directly from the federal Mobilization Centers (or the source) to identified local Points of Distribution and/or distribution networks.

8. Coordinate with other federal ESFs under the NRF to provide vital logistics management support services, including but not limited to:

   - Supplemental transportation and telecommunications assets and guidance;
   - Needed commodities – to include supplies, materials, equipment, personnel, guidance, and technical assistance;

- Facilities to temporarily store and personnel to inventory delivered commodities;
- Coordination with private sector organizations for incident management support; and
- Technical / operational assistance for delivery of commodities into potentially contaminated areas.

*Important Background Note: The federal government will only become involved in disaster logistics management operations subsequent to a major disaster or emergency declaration under the Stafford Act that includes: 1) activation of IA programs; and 2) a clear need for the provision of disaster commodities and/or technical / operational assistance in disaster logistics management operations.

Federal Roles and Responsibilities – Donations Management.* Federal activities are coordinated by FEMA, which will:

1. Make early contact with the key Donations Coordinators of involved national voluntary organizations, other affected states in Region V, and the MDHS (Michigan POC), for a donations situation assessment.

2. Provide, as required and appropriate, federal donations management guidance and technical assistance, a federal Donations Coordinator, training support, and other forms of assistance as dictated by Michigan's operational needs and the incident circumstances.

3. In particular, provide support and technical assistance to the State regarding international offers of assistance, large corporate offers, or other organized collection drives of a regional, national or international nature.

4. Coordinate with appropriate federal agencies regarding the expedited entry of approved individuals and/or donated items targeted specifically for use in disaster relief operations.

5. As appropriate, establish a donations management element at the Region V Regional Response Coordination Center (RRCC) to coordinate with the State.

6. (At the SEOC or other state facility, or the JFO), assist the State (as required) in:

   - Establishing the donations management elements of the DLDMT;
   - Establishing a DLDMC;
   - Ensuring that appropriate donations management facilities are established and operating effectively;
   - Coordinating with JIC staff on public service announcements, press releases, and other media-related support;
   - Coordinating with appropriate federal donations management elements (e.g., the Voluntary Agency Liaison [VAL], congressional affairs, community relations, logistics, the Defense Coordinating Officer, etc.) regarding Michigan's needs and operations; and
   - Preparing input for situation / status reports, briefings, and VIP visits, as necessary.

7. Coordinate with the appropriate federal ESFs under the NRF to provide vital donations management support services, including but not limited to:

   - Supplemental transportation and telecommunications assets and guidance;
   - Coordination with private sector organizations offering donations; and
   - Logistical support (to include, as necessary, technical assistance, supplies, services, equipment and facilities).

*Important Background Note: The federal government will only become involved in disaster donations management operations subsequent to a major disaster or emergency declaration under the Stafford Act that includes: 1) activation of IA programs; and 2) a clear need for the provision of technical / operational assistance in disaster donations management operations.

State Roles and Responsibilities. The following state agency roles and responsibilities related to logistics and donations management are consistent with each agency's task assignments in the MEMP:

MSP/EMHSD. The MSP/EMHSD coordinates state-level emergency management activities and provides overall direction and guidance to state disaster relief forces. In that role, the MSP/EMHSD is responsible for the following logistics / donations management-related tasks:

1. In accordance with the Information and Planning ESF in the MEMP, coordinate the collection, compilation, review, synthesis, analysis, and verification of state and local damage assessment data, to include an assessment of the anticipated needs of the communities and individuals affected by the disaster.

2. In accordance with the Direction and Control ESF in the MEMP, coordinate the establishment of the SEOC and other emergency coordination facilities necessary to effectively manage the disaster or emergency situation. (This includes the DLDMC and other logistics / donations management support facilities such as Control Check Points, Staging Areas / Warehouses, and local Points of Distribution.) The MSP/EMHSD will coordinate all logistical needs related to facility establishment and operation through the SEOC Logistics Section. The SEOC Logistics Section will take care of equipment and equipment installation needs, facility issues, food, water, medical needs, staffing issues and needs (in conjunction with appropriate state agencies), and other necessary resources.

3. Establish communications links with affected local jurisdictions (through the local EOC).

4. Mobilize state agency personnel to staff SEOC positions and provide direct assistance to affected local jurisdictions.

5. Request a Governor's disaster or emergency declaration (under Act 390, PA 1976, as amended), as required.

6. If circumstances warrant, activate the DLDMT and DLDMC as part of the SEOC structure. Activate members of the DLDMT as appropriate for the situation.

7. Request federal technical and disaster relief assistance as required.

8. Map the status of the disaster logistics / donations management operation in a Geographic Information System (GIS) for use in reports and for display in the SEOC, DLDMC, JFO, and other emergency coordination facilities as appropriate.

9. As required, request additional volunteers through the Michigan Citizen Corps, MDHS Community Service Commission (and Volunteer Michigan website), or MDCH Michigan Volunteer Registry to supplement state, local, and NGO labor forces involved in disaster logistics / donations management operations.

10. As appropriate, conduct a post-incident review of logistics / donations management operations and then develop a summary of the findings for inclusion in the disaster after-action report.

11. Jointly with the MDHS, review this plan annually and update it as required. Provide updated copies to all DLDMT members.

In addition to these general responsibilities, the following disaster positions with the MSP/EMHSD have specific logistics and/or donations management roles and responsibilities:

State Coordinating Officer (SCO). The Governor normally appoints the Commanding Officer of the MSP/EMHSD or another designated MSP/EMHSD staff person to serve as the State Coordinating Officer subsequent to a major disaster or emergency declaration under the federal Stafford Act. The SCO is in charge of all disaster planning, response, recovery and mitigation operations within this state. The SCO will work directly with the Federal Coordinating Officer (FCO), normally from FEMA, in the provision of all Individual, Public, and Hazard Mitigation Assistance provided under the federal declaration. (Logistics and donations management falls under the purview of the Individual Assistance element of the President's Disaster Assistance Program.)

The SCO is responsible for appointing appropriate staff to serve in disaster positions, including appointment of a State Individual Assistance Officer (SIAO) and necessary support staff for the provision of disaster assistance. The SCO also keeps the Governor advised of all events and progress as the disaster unfolds and as recovery takes place. The status of logistics and/or donations management efforts is part of that progress report.

State Individual Assistance Officer (SIAO). The SCO will appoint a person from within the MSP/EMHSD to serve as the State Individual Assistance Officer. Specific responsibilities of the SIAO as they relate to logistics and/or donations management are as follows:

1. Assist the MSP/EMHSD State Planner and designated MDHS staff in developing and revising this plan as a Support Plan to the MEMP.

2. Identify and assist in training appropriate MSP/EMHSD and other state agency staff in state logistics and donations management operations as part of the DLDMT within the SEOC and/or JFO structure.

3. Coordinate with the designated DLMC (from the MSP/EMHSD) and DDMC (from the MDHS), and the federal Donations Coordinator and Logistics Coordinator from FEMA, in the establishment and operation of the DLDMT and DLDMC.

4. Work with the DLDMT and FEMA to ensure that the logistics and donations management functions are being adequately addressed to meet the human services needs of the affected population as well as the operational needs of the recovery effort.

5. Advise the SCO and other appropriate officials on logistics / donations management issues throughout the disaster period.

6. In the event of an incident involving potential biological or WMD contamination, work with the DLDMT, FEMA, other commodity providers (i.e., through the EMAC or the private sector), and staff at the various support facilities (i.e., DLDMC, Control Check Points, Staging Areas / Warehouses, the Base / Camps, Points of Distribution, and Volunteer Registration Centers) to ensure that commodities / donations for use in Michigan are not contaminated by checking their place of origin and route of transport.

7. Provide continuous, updated information on state IA efforts for inclusion in disaster situation / status reports, press releases, and the disaster after-action report.

State Public Information Officer (SPIO). In accordance with the Information and Planning ESF in the MEMP, the SPIO is the Governor's Press Secretary. This position is not logistics or donations management specific, but rather handles all aspects of media relations and press announcements related to a disaster or emergency. All public information related to logistics / donations management is released through the SPIO, in conjunction with the DLDMT and FEMA press officers, and on behalf of the Governor.

Background Note: The SPIO normally delegates public information responsibilities related to disasters and emergencies to the MSP/EMHSD PIO, who will act on the SPIO's behalf.

1. Develop and maintain pre-scripted press releases and public service announcements pertaining to disaster logistics / donations management, for inclusion in this plan. (Refer to Attachments A and B.)

2. Coordinate the development and release of all information related to logistics / donations management operations, in conjunction with the affected local government(s), the DLDMT, FEMA, and the Joint Information Team (JIT).

3. Serve as the primary state point of contact for the media on all matters pertaining to logistics / donations management.

4. Work with appropriate state agency staff to post pertinent logistics / donations management information on the State of Michigan and/or individual agency web and social media sites, and provide linkages to other sites as appropriate.

Disaster Logistics Management Coordinator (DLMC) and SEOC Logistics / Donations Management Branch Director. The DLDMC will be established under the SEOC Operations Section as a Logistics / Donations Management Branch. The SCO will appoint a person from within the MSP/EMHSD to serve as the DLMC, who by virtue of position is also the designated Branch Director and manager of the DLDMT and DLDMC. Specific responsibilities of the DLMC are as follows:

1. Assist the MSP/EMHSD State Planner and designated MDHS staff in developing and revising this plan as a Support Plan to the MEMP.

2. Identify and assist in training appropriate MSP/EMHSD and other state agency staff in state disaster logistics management operations as part of the DLDMT within the SEOC and/or JFO structure.

3. Coordinate with the DDMC (from the MDHS), SEOC Incident Commander and Operations Section Chief, and other support staff from state agencies and FEMA, in the establishment and operation of the DLDMT and DLDMC.

4. Coordinate with the DDMC, SEOC Logistics Section Chief and Operations Section Chief, and other appropriate officials to identify and mobilize state agency staff to provide supplemental support to local and NGO efforts to manage and operate disaster logistics / donations support facilities.

5. Work with the DLDMT, SEOC Incident Commander, SEOC Operations Section Chief and Logistics Section Chief, and FEMA (if the incident is federally-declared under the Stafford Act) to:

    - Determine, or assist in determining, disaster commodity distribution priorities;
    - Establish work schedules, communication protocols, and safety procedures for involved staff / work crews;
    - Assist local officials, as required, in establishing support facilities in the affected area(s);
    - Establish, as appropriate, state-managed support facilities in support of local operations;
    - As appropriate, assist in identifying and establishing direct distribution networks for functional needs populations and other targeted recipients;
    - Manage the flow of paperwork associated with the logistics management aspect of the operation;
    - Supervise and coordinate the work activities of logistics management personnel; and
    - Determine, or assist in determining, the final disposition of unused / unneeded commodities – including donated goods. (If possible, this should be done before the actual distribution begins.)

6. In the event of an incident involving potential biological or WMD contamination, work closely with the SIAO, DDMC, FEMA, other commodity providers (i.e., through the EMAC or the private sector), and staff at the various support facilities (i.e., Control Check Points, Staging Areas / Warehouses, the Base / Camps, Points of Distribution, and Volunteer Registration Centers) to ensure that commodities for use in Michigan are not contaminated by checking their place of origin and route of transport.

7. Provide continuous, updated information on disaster logistics management efforts for inclusion in disaster situation / status reports, press releases, and the disaster after-action report.

Volunteer Coordinator (VC). The SEOC Incident Commander will appoint a person from within the MSP/EMHSD or MDHS to serve as the state Volunteer Coordinator. The role of the VC, in this context, is strictly a manager of spontaneous, unaffiliated volunteers as well as volunteers vetted through the Michigan Volunteer Registry, Michigan Community Service Commission (and Volunteer Michigan website), or other appropriate organization, during incident response and/or recovery operations. As such, this individual is not responsible for non-incident, day-to-day recruitment, screening, selection, training and supervision of volunteers for emergency management and/or homeland security purposes. Specific responsibilities of the VC as they relate to logistics and/or donations management are as follows:

1. If state-level management of volunteers is required, and upon direction of the SEOC Operations Section Chief or DLMC (acting as SEOC Logistics / Donations Management Branch Director), establish and operate a Volunteer Registration Center (VRC) to register, screen, coordinate, and direct spontaneous, unaffiliated volunteers as well as properly vetted volunteers. (Refer to Attachment J, "Volunteer Registration Center Layout," for a potential diagram of this facility.)

Background Notes: The VRC should provide physical space for spontaneous, unaffiliated volunteers as well as properly vetted volunteers to assemble and be interviewed by screeners. The VRC may also have a virtual component (i.e., a web and/or social media site for initial registration), but it is important that the VRC provide a "place" for volunteers to report to and talk to someone about their skills, capabilities, work desires, and support needs. This space will likely be nothing more than a room in a conveniently-located building, although it could also be a covered outdoor space (e.g., large tented area, park pavilion, dedicated section of a parking ramp) *or even a designated vehicle in a parking area* (although the latter would clearly be considered a last-resort option).

Depending on needs and circumstances, the VRC may be a state-managed and operated facility, it may be jointly managed by the State and the affected local jurisdiction(s), or it may be locally-managed. In the latter situation, the state VC will provide technical and operational assistance to the local VC but will not actively manage the VRC.

2. With the assistance of the JIT or PIO, monitor social media outlets and other avenues, as appropriate, to identify potential, emerging, or actual volunteer efforts intended for the incident.

3. Coordinate with the Michigan 211 (United Way) human service telephone referral system, Michigan Citizen Corps, Michigan Volunteer Registry, and Michigan Community Service Commission (and Volunteer Michigan website) regarding procedures for referrals of spontaneous, unaffiliated volunteers.

4. Supervise VRC staff to ensure that the facility operates efficiently and effectively.

5. Work with the SEOC Logistics Section Chief and/or DLMC to ensure that spontaneous, unaffiliated volunteers who are utilized in the incident response and/or recovery have adequate housing provisions and basic support services (i.e., food, water, appropriate work clothing, etc.).

6. As directed by the SEOC Operations Section Chief or DLMC (acting as SEOC Logistics / Donations Management Branch Director), or dictated by incident conditions, work with the MIVOAD, ARC, trade associations, and appropriate community-based organizations to identify additional volunteers and volunteer resources to aid in incident response and/or recovery efforts.

State Public Assistance Officer (SPAO). If the PAGP is activated under a federal declaration, the SCO will appoint a person from within the MSP/EMHSD to serve as the State Public Assistance Officer. Specific responsibilities of the SPAO as they relate to disaster logistics / donations management are as follows:

1. Assist the MSP/EMHSD State Planner and other involved stakeholders in developing and revising this plan as a Support Plan to the MEMP.

2. Identify and quantify state and local disaster logistics / donations management activities that may be eligible for reimbursement under the PAGP, Category B (Emergency Protective Measures). Work with involved local governments, state agencies, eligible NGOs, and the Federal Public Assistance Officer (FPAO) and federal PA staff to develop Project Worksheets for such activities.

MSP/EMHSD District Coordinator (for affected area). The primary responsibilities for the MSP/EMHSD District Coordinator (for the affected area) as they relate to disaster logistics / donations management are as follows:

1. Assist in identifying local jurisdictions and populations in need of disaster commodities. Ensure this information is adequately communicated to the MSP/EMHSD and SEOC in a timely manner via the damage / needs assessment process and other appropriate means.

2. Assist local officials and involved NGOs in establishing and staffing necessary disaster logistics / donations management support facilities (e.g., Points of Distribution, etc.) as prescribed in MSP/EMHSD Publication 107a, "Local Disaster Logistics / Donations Management Planning Handbook."

3. Assist local officials and involved NGOs in establishing direct distribution networks to get needed disaster commodities to targeted functional needs populations (e.g., homebound seniors) and/or facilities (e.g., shelters, nursing homes) in the most expedient manner possible.

4. Assist in resolving any problems that may occur with regard to the distribution of needed disaster commodities and/or the management of donations within the affected area.

5. Ensure that all relevant disaster logistics / donations management information is reported to the SEOC in a timely manner for inclusion in disaster situation / status reports, press releases, and the disaster after-action report.

SEOC Incident Management Section Chief. Specific responsibilities of the SEOC Incident Management Section Chief (hereafter referred to as the SEOC Incident Commander) from the MSP/EMHSD as they relate to disaster logistics / donations management are as follows:

1. Serve as SCO for the incident, or designate a staff person of sufficient authority from within the MSP/EMHSD to serve in that capacity. (The SCO must appoint staff from within the MSP/EMHSD to serve in several key disaster positions, including SIAO, SPAO, and DLMC.)

2. Work with the SEOC Planning Section Chief to ensure that an adequate and timely damage / needs assessment is conducted by the affected local jurisdictions and state agencies. This process will help in determining if there is a need for supplemental disaster commodities to meet the life sustainment requirements of the affected population and/or the operational needs of the response and recovery effort. In addition, the damage / needs assessment process will help in identifying the likely need for disaster donations to fill anticipated resource requirements, and/or the likelihood that disaster donations will become an issue that needs to be dealt with early in the incident response.

3. Work with the SEOC Operations Section Chief to ensure that the DLDMT and DLDMC are established and operational within an acceptable timeframe, and that appropriate coordination links have been established with the FEMA logistics and/or management element(s) at the RRCC and/or JFO.

4. Work with the SEOC Planning Section Chief and other SEOC Section Chiefs in developing and continuously maintaining an Incident Action Plan (IAP) that outlines the strategic goals and objectives of the incident response and recovery effort. Disaster logistics / donations management operations should be an integral part of that IAP.

5. Provide overall direction and management of the incident response and recovery, including the disaster logistics / donations management operation.

SEOC Operations Section Chief. Specific responsibilities of the SEOC Operations Section Chief from the MSP/EMHSD as they relate to disaster logistics / donations management are as follows:

1. Work with the SEOC Incident Commander to establish a Logistics / Donations Management Branch within the SEOC Operations Section. The DLDMT and DLDMC will operate under this framework.

2. Monitor the DLDMT and DLDMC to ensure that disaster logistics / donations management operations are timely and appropriate for the incident circumstances and are adequately meeting the needs of the affected population and the response / recovery effort.

3. Ensure that the Logistics / Donations Management Branch and Field Operations Branch are adequately coordinating activities related to disaster logistics / donations management operations.

4. Ensure that the DLDMT and DLDMC are providing the SEOC Planning Section with continuous, updated operational information for inclusion in disaster situation / status reports, press releases, and the disaster after-action report.

SEOC Operations Section / Field Operations Branch. Specific responsibilities of the SEOC Operations Section / Field Operations Branch Director (from the MSP/EMHSD) as they relate to disaster logistics / donations management are as follows:

1. Work with the MSP/EMHSD District Coordinator for the affected area to identify local jurisdictions and populations in need of disaster commodities. Ensure this information is adequately communicated to the SEOC Planning Section for compilation, synthesis, analysis, reporting, and operational decision making by key SEOC staff.

2. Work with the MSP/EMHSD District Coordinator for the affected area and the DLDMT / DLDMC to support the establishment and staffing of necessary disaster logistics / donations management support facilities (i.e., Control Check Points, Staging Areas / Warehouses, the Base / Camps, Points of Distribution, and Volunteer Registration Centers).

3. Coordinate disaster logistics / donations management field activities with the Logistics / Donations Management Branch.

4. Provide the SEOC Planning Section with continuous, updated operational information for inclusion in disaster situation / status reports, press releases, and the disaster after-action report.

SEOC Logistics Section Chief. Specific responsibilities of the SEOC Logistics Section Chief (from the MSP/EMHSD) as they relate to disaster logistics / donations management are as follows:

1. As required by the operational needs of the incident, establish and equip the SEOC and other necessary emergency coordination facilities. This includes the DLDMC (as part of the Logistics / Donations Management Branch within the SEOC Operations Section) as well as any required logistics management support facilities (e.g., Staging Areas, Warehouses, etc.) in support of local disaster logistics / donations operations.

2. Work with the various SEOC Section Chiefs and the DLDMT to determine the short- and long-term operational needs of the SEOC and other activated emergency coordination facilities, and whether or not supplemental disaster commodities (including donations) will be required to sustain those operations. Communicate these findings to the SEOC Incident Commander in a timely manner for appropriate follow up decision making.

3. Provide the SEOC Planning Section with continuous, updated operational information for inclusion in disaster situation / status reports, press releases, and the disaster after-action report.

4. As required, provide staff to aid in the dismantling, clean- up, and restoration of facilities used in state-level disaster logistics / donations management operations.

SEOC Planning Section Chief. Specific responsibilities of the SEOC Planning Section Chief (from the MSP/EMHSD) as they relate to disaster logistics / donations management are as follows:

1. Work with affected local jurisdictions and state agencies to conduct an adequate and timely damage / needs assessment for the incident. This process will help in determining if there is a need for supplemental disaster commodities to meet the life sustainment requirements of the affected population and/or the operational needs of the response and recovery effort. In addition, the damage / needs assessment process will help in identifying the likely need for disaster donations to fill anticipated resource requirements, and/or the likelihood that disaster donations will become an issue that needs to be dealt with early in the incident response.

2. Assist the SEOC Incident Commander and other SEOC Section Chiefs in developing and continuously maintaining an Incident Action Plan (IAP) that outlines the strategic goals and objectives of the incident response and recovery effort. Disaster logistics / donations management operations should be an integral part of that IAP.

3. Collect, compile, synthesize, analyze, and continuously update information about the disaster logistics / donations management operation (and other aspects of the incident). Use this information to develop disaster situation / status reports, press releases (if assistance is requested by the JIT/PIO), and the disaster after-action report.

4. Work with the SEOC GIS staff to develop and continuously update maps and other displays that show the status of the disaster logistics / donations management operations. Use these in reports and for display in the SEOC, DLDMC, JFO, and other emergency coordination facilities as appropriate.

5. As required, establish and staff a Resource Unit within the SEOC Planning Section to monitor and track the availability and usage of resources in the incident response and recovery – including any supplemental disaster commodities and/or donations. (The CIMS can be used for this purpose.)

SEOC Planning Section / Resource Unit. Specific responsibilities of the SEOC Planning Section / Resource Unit as it relates to disaster logistics / donations management are as follows:

1. At the direction of the SEOC Planning Section Chief, monitor and track the availability and usage of resources in the incident response / recovery – including any supplemental disaster commodities and/or donations that are made available through FEMA, other states, NGOs, and private donors. (The CIMS can be used for this purpose.)

2. Periodically compile this information (in a format determined by the SEOC Planning Section Chief) and make it available for use in disaster situation / status reports, press releases (if requested by the JIT/PIO), and the disaster after-action report.

SEOC Geographic Information System (GIS) Specialist. Specific responsibilities of the SEOC GIS Specialist (from within the SEOC Logistics Section) as it relates to disaster logistics / donations management are as follows:

1. At the general direction of the SEOC Planning Section Chief or Logistics Section Chief, develop and continuously update maps and other displays with disaster logistics / donations management operational information for use in reports and for display in the SEOC, DLDMC, JFO, and other emergency coordination facilities as appropriate.

2. Geo-locate all facilities (i.e., federal, state, local, tribal, NGO, private) used in the disaster logistics / donations management operation and display this information on maps and/or in other appropriate formats.

Disaster Logistics and Donations Management Team (DLDMT). Depending on the incident circumstances, the following state agencies may be called upon to serve as part of the DLDMT in the SEOC and/or JFO. These agencies will, if activated:

Michigan Department of Agriculture and Rural Development (MDARD).

1. Assist in the analysis of state and local damage assessment data to determine the anticipated need for supplemental disaster commodities (i.e., food).

2. Coordinate with county officials and/or fairground operators for the use of county fairgrounds facilities for disaster logistics / donations management operations.

> **Background Note:** Fairgrounds facilities could potentially be used as Control Check Points, Staging Areas, Warehouses, Incident Bases or Camps, Points of Distribution, or a combination of these facilities. These facilities either are part of, or would supplement, the facilities identified in Attachment W, "Pre-Identified Logistics / Donations Management Facilities."

3. As necessary, assist in food procurement and the identification and establishment of warehousing and feeding facilities (with the USDA and/or the agricultural industry, the Michigan Department of Human Services, and NGOs such as the American Red Cross) to sustain the population affected by the incident.

4. As necessary, coordinate with appropriate governmental agencies and NGOs (under the umbrella of the State Animal Response Team – SART) to provide for the rescue, sheltering, and care for animals adversely impacted by the incident. (This includes determining the specific commodities required to support such activities.)

5. Assist with sanitation, food safety, and food protection / security issues related to food commodities / donations obtained through the disaster logistics / donations management operation.

6. As appropriate, provide information on MDARD disaster logistics / donations management issues and efforts for inclusion in disaster situation / status reports, press releases, and the disaster after-action report.

Michigan Department of Community Health (MDCH).

1. As required, work through the Michigan Volunteer Registry to recruit appropriate volunteers to supplement state, local, and NGO labor forces involved in disaster logistics / donations management operations.

2. As required, advise on needed health / medical commodities (to supplement existing resources) to provide for life sustainment of the affected population and support of response and recovery efforts.

3. As appropriate, provide information on MDCH disaster logistics / donations management issues and efforts for inclusion in disaster situation / status reports, press releases, and the disaster after-action report.

MDCH / Michigan Office of Services to the Aging (MOSA).

1. As required, assist in the analysis of state and local damage / needs assessment data to determine the anticipated needs of the senior population for disaster commodities – with particular focus on the needs of homebound frail seniors.

> **Background Note:** The damage / needs assessment is normally conducted with the assistance of the Area Agencies on Aging [AAAs] across the state. The AAAs typically contribute assessment data as part of the local human services organization during time of disaster or emergency. The AAAs and other involved local human service agencies help determine if adequate resources are available to meet the life sustainment needs of the affected population for the first week or two after the disaster. If not, then it may be necessary to augment the existing resource base with governmental and/or private sector disaster commodities, disaster donations, or both.

2. As required, assist the affected local jurisdictions in assembling a cadre of senior volunteers (through the AAAs) to staff local Points of Distribution and to provide direct distribution to functional needs populations (e.g., homebound frail seniors) through established networks such as Meals on Wheels, AAAs, and senior centers.

3. Continuously monitor the provision of assistance (disaster commodities) to the senior population (and particularly to homebound frail seniors) to ensure that their life sustainment needs are being adequately met by the response / recovery effort. If it is determined that there is a need for additional disaster commodities, provide this information immediately to the SEOC / DLDMC for appropriate follow-up.

4. Provide continuous, updated information on MOSA and AAA disaster logistics / donations management issues and efforts for inclusion in disaster situation / status reports, press releases, and the disaster after-action report.

Michigan Department of Corrections (MDC).

1. Provide personnel (inmate work crews), supervisors (guards), and vehicles and facilities (as available and required) to support disaster logistics / donations management operations.

> **Background Note:** Task assignments may include but are not limited to: identifying and making facilities ready for logistics / donations management operations; providing materials and supplies for the Base / Camps; loading, unloading, inventorying, and transporting commodities; providing security at facilities; managing facility operations; and direct distribution of commodities to end users.

2. As appropriate, provide information on MDC disaster logistics / donations management issues and efforts for inclusion in disaster situation / status reports, press releases, and the disaster after-action report.

Michigan Department of Human Services (MDHS).

1. Assist in the analysis of state and local damage / needs assessment data to determine the anticipated needs of the affected population for disaster commodities.

> **Background Note:** The damage / needs assessment is normally conducted with the assistance of the MDHS County Offices across the state. The MDHS County Offices typically contribute assessment data as part of the local human services organization during time of disaster or emergency. The MDHS County Offices and other involved local human service agencies help determine if adequate resources are available to meet the life sustainment needs of the affected population for the first week or two after the disaster. If not, then it may be necessary to augment the existing resource base with governmental and/or private sector disaster commodities, disaster donations, or both.

2. Appoint, from within the MDHS, a Disaster Donations Management Coordinator (DDMC) to perform or coordinate the following specific responsibilities:

   - Assist the MSP/EMHSD State Planner in developing and revising this plan as a Support Plan to the MEMP.

- Identify and assist in training appropriate MDHS and other state agency staff in state disaster donations management operations as part of the DLDMT within the SEOC and/or JFO structure.

- Coordinate with the DLMC (from the MSP/EMHSD), SEOC Incident Commander and Operations Section Chief, and other support staff from state agencies and FEMA, in the establishment and operation of the DLDMT and DLDMC.

> **Background Note:** The MDHS is the designated lead agency for disaster donations management in Michigan, and the DDMC is co-manager (along with the DLMC) of the DLDMC. Disaster donations may be used to meet some, or all, of the disaster commodities needs identified in the state and local damage / needs assessment process.

- Coordinate with the DLMC, SEOC Logistics Section Chief and Operations Section Chief, and other appropriate officials to identify and mobilize state agency staff to provide supplemental support to local and NGO efforts to manage and operate disaster logistics / donations support facilities.

- If state-level management of donations is required, establish, as a functional element of the DLDMC, a Donations Intake and Processing Center (DIPC) to receive, record, acknowledge, and process donations offers (solicited and unsolicited) received online and by telephone, as well as unsolicited, value-added donated goods which are brought to the disaster area through established Control Check Points.

- If state-level management of volunteers is required, establish a Volunteer Registration Center (VRC) to register, screen, coordinate, and direct spontaneous, unaffiliated volunteers. See Volunteer Coordinator task assignments.

- Work with the DLDMT, SEOC Incident Commander, SEOC Operations Section Chief and Logistics Section Chief, and FEMA (if the incident is federally-declared under the Stafford Act) to:

  - Determine, or assist in determining, the need for value-added donated goods and/or services to help meet the life sustainment requirements of the affected population and/or to aid in incident response or recovery operations;
  - Determine disaster donations preferences and donating instructions;
  - Establish work schedules, communication protocols, and safety procedures for involved staff / work crews;
  - Assist local officials, as required, in establishing support facilities in the affected area(s);
  - Establish, as appropriate, state-managed support facilities in support of local operations;
  - As appropriate, assist in identifying and establishing direct distribution networks for functional needs populations and other targeted recipients;
  - Manage the flow of paperwork associated with the donations management aspect of the operation;
  - Supervise and coordinate the work activities of donations management personnel; and
  - Determine, or assist in determining, the final disposition of unused / unneeded commodities – including donated goods. (If possible, this should be done before the actual distribution begins.)

- In the event of an incident involving potential biological or WMD contamination, work closely with the SIAO, DLMC, FEMA, donors, and staff at the various support facilities (i.e., Control Check Points, Staging Areas / Warehouses, the Base / Camps, Points of Distribution, and Volunteer Registration Centers) to ensure that donations for use in Michigan are not contaminated by checking their place of origin and route of transport.

- Provide continuous, updated information on disaster donations management efforts for inclusion in disaster situation / status reports, press releases, and the disaster after-action report.

3. As required, work with the Michigan Community Service Commission (MCSC) to recruit volunteers through the AmeriCorps and other programs (including the Volunteer Michigan website) to supplement state, local, and NGO labor forces involved in disaster logistics / donations management operations.

4. Work with other human service agencies / organizations to continuously monitor the provision of assistance (disaster commodities) to the affected population (and particularly to functional needs populations such as the elderly, homeless individuals, impoverished individuals, persons of ill health, etc.) to ensure that their life sustainment needs are being adequately met by the response / recovery effort. If it is determined that there is a need for additional disaster commodities, provide this information immediately to the SEOC / DLDMC for appropriate follow-up.

5. Provide continuous, updated information on MDHS disaster logistics /donations management efforts for inclusion in disaster situation / status reports, press releases, and the disaster after-action report.

MDHS / Michigan Community Service Commission (MCSC).

1. As required, recruit volunteers through the AmeriCorps and other programs (including the Volunteer Michigan website) to supplement state, local, and NGO labor forces involved in disaster logistics / donations management operations.

Michigan Department of Technology, Management and Budget (MDTMB).

1. Provide personnel (work crews), vehicles, and state facilities (as available and required) to support disaster logistics / donations management operations.

> **Background Note:** Task assignments may include but are not limited to: identifying and making facilities ready for logistics / donations management operations; providing materials and supplies for the Base / Camps; loading, unloading, inventorying, and transporting commodities; providing security at facilities; managing facility operations; and direct distribution of commodities to end users.

2. Provide technical assistance in emergency procurement procedures to facilitate or aid disaster logistics / donations management operations.

3. For federally-declared incidents, review and submit supplemental appropriation requests to the Michigan Legislature to provide the required state share for eligible costs associated with the disaster logistics / donations management effort.

4. In conjunction with the SPIO, MSP/EMHSD PIO, and JIT, develop and activate a disaster donations web page for use on the State of Michigan and/or specific agency web and social media sites. (Attachment B provides sample materials which can be incorporated into the web page design, as appropriate.)

> **Background Note:** This web page could be similar to the one used in the September 2005 Hurricane Katrina response effort to provide information on donation options for private citizens and corporate donors.

5. As appropriate, provide information on MDTMB disaster logistics / donations management issues and efforts *for inclusion in disaster situation / status reports, press releases, and the disaster after-action report.*

Michigan Department of Military and Veterans Affairs (MDMVA).

1. Provide personnel (soldiers), vehicles, and MNG facilities (as available and required) to support disaster logistics / donations management operations.

> **Background Note:** Task assignments may include but are not limited to: identifying and making facilities ready for logistics / donations management operations; providing materials and supplies for the Base / Camps; loading, unloading, inventorying, and transporting commodities; providing security at facilities; managing facility operations; and direct distribution of commodities to end users.

2. As required, provide technical logistics management expertise to aid in the disaster logistics management elements of the operation.

3. As required, provide the services of the 51st WMD Civil Support Team to aid in detecting potential biological or WMD contamination of commodities / donations.

4. As required, provide supplemental communications support to disaster logistics / donations management operations.

5. As appropriate, provide information on MDMVA disaster logistics / donations management issues and efforts for inclusion in disaster situation / status reports, press releases, and the disaster after-action report.

All requests for MDMVA assistance will be processed in the normal manner via Governor's Executive Order or Proclamation, through the SEOC.

Michigan Department of Natural Resources (MDNR).

1. Provide personnel (work crews), vehicles, and MDNR facilities (as available and required) to support disaster logistics / donations management operations.

> **Background Note:** Task assignments may include but are not limited to: identifying and making facilities ready for logistics / donations management operations; providing materials and supplies for the Base / Camps; loading, unloading, inventorying, and transporting commodities; providing security at facilities; managing facility operations; and direct distribution of commodities to end users.

2. As appropriate, provide information on MDNR disaster logistics / donations management issues and efforts for inclusion in disaster situation / status reports, press releases, and the disaster after-action report.

Michigan Department of State Police (MSP).

1. As required, provide security at facilities being used for disaster logistics / donations management operations.

2. As required, coordinate with the transportation industry (through the Commercial Vehicle Enforcement Division) for the procurement of intrastate transportation assets to aid in disaster logistics / donations management operations.

3. As appropriate, provide information on MSP disaster logistics / donations management issues and efforts for inclusion in disaster situation / status reports, press releases, and the disaster after-action report.

Michigan Department of Transportation (MDOT).

1. Provide personnel (work crews), vehicles, and MDOT facilities (as available) to support disaster logistics management operations.

> **Background Note:** Task assignments may include but are not limited to: identifying and making facilities ready for logistics / donations management operations; providing materials and supplies for the Base / Camps; loading, unloading, inventorying, and transporting commodities; providing security at facilities; managing facility operations; and direct distribution of commodities to end users.

2. Issue permits for oversize and/or overweight vehicles that may be involved in the disaster logistics / donations management operation.

3. Provide information on MDOT disaster logistics / donations management issues and efforts for inclusion in disaster situation / status reports, press releases, and the disaster after-action report.

Local Roles and Responsibilities. The local disaster logistics / donations management system advocated in MSP/EMHSD Publication 107a, "Local Disaster Logistics / Donations Management Planning Handbook," is counterpart to and mirrors in purpose, structure and responsibilities the state system advocated in this plan. The two systems are intended to support each to provide for seamless implementation of disaster logistics / donations management operations on a local, regional, or statewide basis, as conditions require.

In the system advocated in Publication 107a, local disaster logistics management activities fall under the purview of a designated Disaster Logistics Management Coordinator (DLMC). Similarly, disaster donations management activities fall under the purview of a designated Disaster Donations Management Coordinator (DDMC). This structure is identical to the state-level system found in this plan. Typically, the disaster logistics / donations management function is part of the Human Services Group or Resource Support Group within the local EOC structure. The local Emergency Management Coordinator (EMC) is responsible for the overall coordination and direction of the jurisdiction's emergency management activities. The EMC also coordinates the operation of the EOC in time of disaster or emergency. These and other key local agency roles and responsibilities related to disaster logistics / donations management are outlined below:

Refer to Publication 107a for a diagram depicting a suggested local organizational structure for disaster logistics / donations management.

Emergency Management Coordinator (EMC). Specific responsibilities of the local EMC as they relate to disaster logistics / donations management are as follows:

1. In accordance with the assessment guidance found in MSP/EMHSD Publication 201 – "Local Emergency Planning Workbook" and MSP/EMHSD Publication 901 – "Michigan Damage Assessment Handbook," coordinate the collection, compilation, synthesis, review, analysis, and submittal of local damage assessment data to the MSP/EMHSD.

   Background Note: An important part of the assessment effort involves determining the short- and long-term sustainment needs of the various populations within the affected local communities, and the resources required to support ongoing response and recovery operations. More specifically, the needs assessment should identify the types, kinds, and quantities of supplemental disaster commodities required; when and where they are needed, and by whom; and how long they will be needed. In addition, the assessment should address the actual or anticipated influx of unsolicited disaster donations, and the impacts this has, or may, cause to the jurisdiction.

2. As appropriate, coordinate the establishment of the local EOC and other emergency coordination facilities necessary to effectively manage the disaster or emergency situation.

3. Establish communications links with the MSP/EMHSD and (if activated) the SEOC in Lansing, and with other local affected local communities.

4. Mobilize personnel to staff EOC positions and provide direct assistance to affected local areas.

5. As appropriate, declare a local "State of Emergency" and request (through the MSP/EMHSD) a Governor's disaster or emergency declaration to mobilize needed state assistance. If warranted, request federal disaster assistance through the MSP/EMHSD.

6. If circumstances warrant, activate the local DLDMT and DLDMC as part of the EOC structure. Activate members of the DLDMT as appropriate for the situation. (Once activated, the local DLDMT / DLDMC should immediately establish communications links with the state DLDMT / DLDMC, if activated, within the SEOC.)

7. Identify and secure approval for use of local facilities that may be needed in the logistics / donations management operation (i.e., Control Check Points, Staging Areas, Warehouses, and Points of Distribution). Immediately communicate this information to the state DLDMT / DLDMC in the SEOC, and the MSP/EMHSD District Coordinator.

Disaster Logistics Management Coordinator (DLMC).

1. As required, assist the EMC and other officials in developing and revising the local Disaster Logistics and Donations Management Plan.

2. Assist the EMC in identifying and training appropriate staff in logistics management operations.

3. Coordinate with the EMC in the establishment and operation of the local DLDMT and DLDMC.

4. Coordinate with local NGOs (i.e., volunteer, community-based, and faith-based) to solicit their participation in logistics management operations as required.

5. Work with the DLDMT (and involved state and federal staff, if the incident is federally-declared under the Stafford Act) to:

   - Determine disaster commodity distribution priorities;
   - Establish work schedules, communication protocols, and safety procedures for involved work crews;
   - Establish the incident Base and Camps, as required;
   - Establish Staging Areas for resource staging prior to deployment;
   - Establish Warehouses for temporary commodity / donation storage;

- Establish Points of Distribution for general commodities distribution;
- Identify and establish direct distribution networks for functional needs populations and other targeted recipients;
- Manage the flow of paperwork involved in the logistics management aspect of the operation;
- Supervise and coordinate work activities of logistics management personnel; and
- Determine the final disposition of unused / unneeded commodities (including donations). (If possible, determine final disposition responsibilities before the actual commodity distribution begins.)

6. In the event of an incident involving potential biological or WMD contamination, work closely with the DLDMT, involved state and federal management staff, commodity providers (i.e., FEMA/DHS, State of Michigan, EMAC, private companies, donors), and staff at the various support facilities to ensure that commodities are not contaminated by checking their place of origin and route of transport. Any suspected contamination should be reported immediately to the EOC for follow up as required.

7. Provide continuous, updated information on logistics / donations management efforts for inclusion in damage assessment reports, disaster situation / status reports, press releases, and the disaster after-action report.

8. As required, provide regular reports to applicable officials and organizations on the status of local logistics / donations management operations.

Disaster Donations Management Coordinator (DDMC).

1. As required, assist the EMC and other officials in developing and revising the local Disaster Logistics and Donations Management Plan.

2. Assist the EMC in identifying and training appropriate staff in donations management operations.

3. Coordinate with the EMC in the establishment and operation of the local DLDMT and DLDMC.

4. Establish, as a functional element of the DLDMC, a Donations Intake and Processing Center (DIPC) to receive, record, acknowledge, and process donations offers (solicited and unsolicited) received online and by telephone, as well as unsolicited, value-added donated goods which are brought to the disaster area through established Control Check Points.

> **Background Note:** Spontaneous, unaffiliated volunteers will be referred to the Volunteer Registration Center (VRC) for registration, screening, coordination, and direction. See Volunteer Coordinator task assignments below.

5. Coordinate with local NGOs (i.e., volunteer, community-based, and faith-based) to solicit their participation in donations management operations as required.

6. Work with the DLDMT (and involved state and federal staff, if the incident is federally-declared under the Stafford Act) to:

   - Determine disaster donations preferences and donating instructions;
   - Establish work schedules, communication protocols, and safety procedures for involved work crews;
   - Work with the DLMC to establish Staging Areas for donations staging prior to distribution;
   - Work with the DLMC to establish Warehouses for temporary donations storage;
   - Work with the DLMC to establish Points of Distribution for donations distribution;
   - Work with the DLMC to identify and establish direct distribution networks for functional needs populations and other targeted recipients;
   - Establish a Volunteer Registration Center (VRC) to register, screen, coordinate, and direct spontaneous, unaffiliated volunteers;
   - Manage the flow of paperwork involved in the donations management aspects of the operation;
   - Supervise and coordinate work activities of donations management personnel; and
   - Determine the final disposition of unused / unneeded donations. (If possible, determine final disposition responsibilities before the actual distribution of donated goods begins.)

7. In the event of an incident involving potential biological or WMD contamination, work closely with the DLDMT, involved state and federal management staff, donors, and staff at the various support facilities to ensure that donations are not contaminated by checking their place of origin and route of transport. Any suspected contamination should be reported immediately to the EOC for follow up as required.

8. Provide continuous, updated information on logistics / donations management efforts for inclusion in damage assessment reports, disaster situation / status reports, press releases, and the disaster after-action report.

9. As required, provide regular reports to applicable officials and organizations on the status of local logistics / donations management operations.

Volunteer Coordinator (VC).

Background Note: The role of local Volunteer Coordinator, in this context, is strictly a manager of spontaneous, unaffiliated volunteers as well as volunteers vetted through the Michigan Volunteer Registry, Michigan Community Service Commission (and Volunteer Michigan website), or other appropriate organization, during incident response and/or recovery operations. As such, this individual is not responsible for non-incident, day-to-day recruitment, screening, selection, training and supervision of volunteers for emergency management and/or homeland security purposes.

1. Upon direction of the DDMC and/or EMC, establish and operate a Volunteer Registration Center (VRC) to register, screen, coordinate, and direct spontaneous, unaffiliated volunteers as well as properly vetted volunteers. (Refer to Attachment J, "Volunteer Registration Center Layout," for a potential diagram of this facility.)

Background Note: Depending on needs and circumstances, the VRC may be a state-managed and operated facility, it may be jointly managed by the State and the affected local jurisdiction(s), or it may be locally-managed. In the latter situation, the state VC will provide technical and operational assistance to the local VC but will not actively manage the VRC.

2. Monitor social media outlets and other avenues, as appropriate, to identify potential, emerging, or actual volunteer efforts intended for the incident.

3. Coordinate with the Michigan 211 (United Way) human service telephone referral system, Michigan Citizen Corps, Michigan Volunteer Registry, and Michigan Community Service Commission (and Volunteer Michigan website) regarding procedures for referrals of spontaneous, unaffiliated volunteers.

4. Supervise VRC staff to ensure that the facility operates efficiently and effectively.

5. Work with the EMC and/or DLMC to ensure that spontaneous, unaffiliated volunteers who are utilized in the incident response and/or recovery have adequate housing provisions and basic support services (i.e., food, water, appropriate work clothing, etc.).

6. As directed by the EMC and/or DDMC, or dictated by incident conditions, work with the MIVOAD, ARC, trade associations, and other community-based organizations, as required, to identify additional volunteers and volunteer resources to aid in incident response and/or recovery efforts.

Public Information Officer (PIO). The local PIO position is not logistics / donations management specific, but rather handles all aspects of media relations and press announcements related to a disaster or emergency. All public information related to disaster logistics / donations management operations within a local jurisdiction will be released through the local PIO, in conjunction with the PIOs from other involved local, state, and federal agencies and NGOs (the Joint Information Team – JIT).

1. Develop and maintain pre-scripted (in English and appropriate non-English languages) press releases, informational bulletins, handbills and door hangers, public service announcements, and web / social media postings pertaining to disaster commodities distribution and disaster donations. (Refer to Attachments A and B, "Sample Public Information Materials," for examples.) As appropriate, these materials will address the following subjects:

   - What commodities are available (kind / type);
   - When they will be available;

- Where they will be distributed, and by whom;
- How long they will be available;
- Locations and operating hours of Points of Distribution;
- Special provisions for handicapped individuals and other functional needs populations;
- Disaster donations preferences and donating instructions;
- Instructions for spontaneous, unaffiliated volunteers.

2. Work with the JIT and the DLMC and DDMC to develop an incident-specific public information plan for the disaster logistics / donations management operation.

3. Coordinate the development and release of all information related to disaster logistics / donations management, in conjunction with the DLMC, DDMC and JIT.

4. Serve as the primary local point of contact for the media on all matters pertaining to disaster logistics / donations management.

5. Work with the JIT and other appropriate local agency / organization staff to post pertinent disaster logistics / donations management information on the jurisdiction's web and social media site(s), and provide linkages to other sites as appropriate.

6. Work with the DLMC, DDMC, VC, and Michigan 211 (United Way) human service telephone referral system to make available current and accurate information regarding:

   - The availability of supplemental disaster commodities;
   - Current needs regarding disaster donations;
   - How and where to donate value-added goods and/or make a financial contribution; and
   - How and where to volunteer for disaster relief and recovery work, if needed.

EOC Operations Section. The local EOC Operations Section oversees the DLDMT and works with the Department of Human Services, Area Agency on Aging, and other elements of the local human services organization in the EOC to manage the receipt and distribution of disaster commodities and donations.

Background Note: This generalized organizational structure may vary slightly from jurisdiction to jurisdiction, but the core functions will remain essentially the same or be very similar.

Michigan Department of Human Services (MDHS) County Office:

1. Assist in identifying disaster commodity needs and affected populations through the damage / needs assessment process.

2. Assist in coordinating disaster donations management activities with disaster logistics management activities to efficiently maximize the use of available donated goods and minimize the need for disaster commodities from FEMA and other sources.

3. Assist in identifying and mobilizing volunteers to help in the disaster commodities distribution effort. (This includes the general distribution at designated Points of Distribution, and targeted distribution through established distribution networks for functional needs populations.)

4. Work with other human service agencies / organizations to continuously monitor the provision of assistance (disaster commodities) to the affected population (and particularly to functional needs populations such as the elderly, homeless individuals, impoverished individuals, persons of ill health, etc.) to ensure that their life sustainment needs are being adequately met by the response / recovery effort. If it is determined that there is a need for additional disaster commodities, provide this information immediately to the EOC (DLDMC) for appropriate follow-up.

5. Provide continuous, updated information on MDHS disaster logistics and disaster donations management efforts for inclusion in disaster situation / status reports, press releases, and the disaster after-action report.

> **Background Note:** This information should also be provided to the MDHS representative in the SEOC for inclusion in state-level reports as well.

Area Agency on Aging (AAA):

1. Assist in identifying the disaster commodity needs of the senior population (with particular focus on the needs of homebound frail seniors) within the affected area.

> **Background Note:** This assessment will help determine if adequate resources can be brought to bear locally to meet the basic living requirements of seniors for the first week or two after the disaster. If adequate resources cannot be identified, then it will be necessary to augment the existing resource base with donated goods or services, state- and/or federally-provided goods and services, or goods and services provided through local purchase / procurement.

2. Assist in identifying and mobilizing a cadre of senior volunteers to assist in the disaster commodities distribution effort. (This includes the general distribution at designated Points of Distribution, and targeted distribution through established distribution networks for functional needs populations.)

3. Work with other human service agencies / organizations to continuously monitor the provision of assistance (disaster commodities) to the affected senior population (and particularly homebound frail seniors) to ensure that their life sustainment needs are being adequately met by the response / recovery effort. (If it is determined that there is a need for additional disaster commodities, communicate this information to the DLDMC in the EOC for appropriate follow-up.)

4. Provide continuous, updated information on AAA disaster logistics / donations management issues and efforts for inclusion in damage assessment, disaster situation / status reports, press releases, and the disaster after-action report.

> **Background Note:** This information should also be provided to the Michigan Office of Services to the Aging (MOSA) representative in the SEOC for inclusion in state-level reports as well.

Other Human Service Organizations:

> **Background Note:** Applicable organizations may be statewide, regional, or local in operation, and may include but are not limited to: established relief organizations such as the American Red Cross; faith-based organizations such as the Salvation Army, Catholic Social Services, Lutheran Social Services, and Mennonite Disaster Services; and local / community-based organizations such as civic / service clubs, boy and girl scouts, school clubs, and similar entities.

1. Assist in identifying disaster commodity needs and affected populations through the damage / needs assessment process.

2. To the extent possible, provide disaster donations (goods and/or services) from organization assets to meet identified community needs.

3. Provide volunteers to staff Points of Distribution and/or to distribute commodities directly to functional needs populations through established community distribution networks.

4. Continuously monitor the provision of disaster commodities to the affected population to ensure that life-sustaining needs are being adequately met by the response / recovery effort. (Disaster commodity shortfalls should be communicated to the DLDMC in the EOC for appropriate follow-up.)

5. Provide continuous, updated information on organization logistics / donations management efforts for inclusion in disaster situation / status reports, press releases, and the disaster after-action report.

Health Department:

1. Provide expertise and guidance on water and food safety, sanitation, and other public health issues related to the storage, transport, and distribution of water and food commodities obtained through the disaster logistics / donations management operation.

EOC Planning Section. The EOC Planning Section is responsible for collecting, compiling, and analyzing information about the incident, maintaining equipment logs, tracking the use of personnel, and providing information to the Disaster Logistics and Disaster Donations Management Coordinators. The EOC Planning Section manages the Engineering Department, Legal Department, and Environmental Compliance staff.

Background Note: This generalized organizational structure may vary slightly from jurisdiction to jurisdiction, but the core functions will remain essentially the same or be very similar.

Engineering Department:

1. Assist in determining the potential impacts (if any) from traffic, parking, and other concerns at proposed Point of Distribution sites.

2. As required, assist in developing any cost estimates and scopes of work that might be required for public employees, equipment and facilities that are part of the disaster logistics / donations management operation.

Background Note: *Under a federal Stafford Act declaration, some of these costs may be reimbursable under the federal PAGP,* Category B – Emergency Protective Measures.

3. As required, provide assistance in determining proper disposal methods for unused / unneeded disaster commodities.

4. Evaluate impacts (if any) to Points of Distribution caused by disaster commodity distribution activities. Quantify those impacts as appropriate for required follow-up.

Legal Department:

1. Develop and review all disaster logistics / donations management contracts and agreements.

2. Secure all legal authorizations necessary for disaster logistics / donations management activities, including rights-of-entry and hold-harmless agreements.

3. Ensure compliance with all federal, state, and local laws, regulations, and policies in the distribution of disaster commodities and final disposition of unused / unneeded commodities.

Environmental Compliance Staff:

1. Coordinate with applicable federal, state, and local agencies to ensure compliance with environmental, historic preservation, and other applicable laws, regulations, and policies.

2. Maintain adequate documentation / records of environmental transactions for historical and compliance purposes.

EOC Logistics Section. The EOC Logistics Section is responsible for establishing and maintaining any facilities designated for disaster logistics / donations management activities. This includes providing food, office supplies, communication devices, equipment, personnel, and any other necessary supplies. In addition, it also identifies any commodities that are required to sustain the EOC and EOC operations. The EOC Logistics Section provides administrative staff to coordinate these and other required functions.

EOC Finance / Administration Section. The EOC Finance / Administration Section is responsible for ensuring that funds are available for equipment, supplies, and all other expenses associated with the disaster logistics / donations management operation. The Finance / Administration Section manages the Fiscal Administration staff.

> **Background Note:** *This generalized organizational structure may vary slightly from jurisdiction to jurisdiction,* but the core functions will remain essentially the same or be very similar.

Fiscal Administration Staff:

1. Keep records of financial transactions for reimbursement of disaster logistics / donations management activities.
2. *Fund disaster logistics / donations management activities.*
3. Ensure compliance with applicable laws, regulations, and policies.

Nongovernmental Organization Roles and Responsibilities. NGOs play a critical part in disaster logistics / donations management operations. The State of Michigan does not have sufficient personnel, expertise, infrastructure, facilities, or experience to manage a large disaster logistics / donations operation without at least some involvement by NGO volunteers. The following NGOs have, by virtue of their size, mission and/or disaster experience, been identified as key organizations that may be able to provide a cadre of volunteers to assist with disaster logistics / donations management operations in Michigan:

Michigan Voluntary Organizations Active in Disaster (MIVOAD). The MIVOAD is a nationally sanctioned coalition of private and church-based relief organizations dedicated to providing disaster relief assistance to individuals and communities in need. The MIVOAD serves as a clearinghouse for the myriad disaster relief and human service organizations that operate in Michigan and elsewhere across the country. The MIVOAD is governed by an Executive Board, elected by the membership. That Board provides the single point of contact for mobilizing all MIVOAD resources. The MIVOAD member organizations are experienced and skilled in all facets of disaster operations, and can perform a wide variety of functions. Specific responsibilities of the MIVOAD related to disaster logistics / donations management are as follows:

1. As required, assist the MSP/EMHSD in developing and revising this plan as a Support Plan to the MEMP. Upon request, assist local governments in developing and revising the disaster logistics / donations management elements of their EOP or EAGs.
2. As required, identify and assist in training appropriate MIVOAD representatives in disaster logistics / donations management operations as part of the DLDMT within the SEOC, local EOC, and/or JFO structure.
3. As required, provide representatives to report to the SEOC / DLDMC to assist the DLDMT and to coordinate MIVOAD participation in state-level disaster logistics / donations management operations.
4. As required, provide representatives to report to a local EOC / DLDMC to assist the DLDMT and to coordinate MIVOAD participation in local-level disaster logistics / donations management operations.

> **Background Note:** Specific assignments related to tasks #3 and #4 above may include but are not limited to: identifying and making facilities ready for logistics / donations management operations; providing materials and supplies for the Base / Camps; assisting with mass care activities at the Base / Camps (e.g., providing food and water, bedding, sanitation services, etc.); loading, unloading, inventorying, and transporting commodities; providing security at facilities; managing facility operations; and direct distribution of commodities to end users.

5. Provide continuous, updated information on MIVOAD assistance efforts for inclusion in state and/or local damage assessment reports, disaster situation / status reports, press releases, and the disaster after-action report.
6. As required, provide regular reports to the MIVOAD membership and other interested parties on the status of MIVOAD participation in state and/or local disaster logistics / donations management operations.

Background Notes: The above responsibilities are in addition to the MIVOAD's primary role as a provider of human services support such as mass care, sheltering, clothing, mental health services, spiritual care, child care, etc.

The MIVOAD has the following member organizations: Lutheran Social Services of Michigan; Seventh Day Adventist / Adventist Community Services (ACS); United Methodist Committee on Relief (UMCOR); Salvation Army; Mennonite Disaster Services; American Red Cross; Michigan Crisis Response Association; ACCESS; International Aid; Southern Baptist Disaster Response; Church World Service; Michigan 211 (United Way) human service telephone referral system; Church of the Brethren; and Michigan React.

American Red Cross (ARC). Although the ARC is a member of the MIVOAD, the ARC's Congressional Charter requiring it to provide relief assistance to disaster survivors makes it unique among voluntary disaster relief organizations. The ARC has a strategy to scale a disaster relief response through the work of chapters located throughout the state. Red Cross Regional Chapters evaluate the needs of their communities and actively build disaster response capacity. Specific responsibilities of the ARC related to disaster logistics / donations management are as follows:

1. As required, assist the MSP/EMHSD in developing and revising this plan as a Support Plan to the MEMP. Upon request, assist local governments in developing and revising the disaster logistics / donations management elements of their EOP or EAGs.

2. As required, identify and assist in training appropriate ARC representatives in disaster logistics / donations management operations as part of the DLDMT within the SEOC, local EOC, and/or JFO structure.

3. As required, provide representatives to report to the SEOC / DLDMC to assist the DLDMT and to coordinate ARC participation in state-level disaster logistics / donations management operations.

4. As required, provide representatives to report to a local EOC / DLDMC to assist the DLDMT and to coordinate ARC participation in local-level disaster logistics / donations management operations.

Background Note: Specific assignments related to tasks #3 and #4 above may include but are not limited to: identifying and making facilities ready for logistics / donations management operations; providing materials and supplies for the Base / Camps; assisting with mass care activities at the Base / Camps (e.g., providing food and water, bedding, sanitation services, etc.); loading, unloading, inventorying, and transporting commodities; providing security at facilities; managing facility operations; and direct distribution of commodities to end users.

5. Provide continuous, updated information on ARC assistance efforts for inclusion in state and/or local damage assessment reports, disaster situation / status reports, press releases, and the disaster after-action report.

6. As required, provide regular reports to the ARC leadership and other interested parties on the status of ARC participation in state and/or local disaster logistics / donations management operations.

Background Notes: The above responsibilities are in addition to the ARC's primary role as a provider of human services such as mass care, sheltering, feeding, clothing, disaster-related health and mental health services, family reunification, spiritual care, etc.

The ARC serves food at fixed sites such as disaster shelters and in neighborhoods using Emergency Response Vehicles designed for mobile feeding. Additionally, the ARC is prepared to open shelters immediately following a disaster and creates a safe and accommodating environment for parents, caregivers and individuals with disabilities or functional needs. ARC Regional may have partnerships with organizations that have expertise in supporting and caring for children and individuals with disabilities and functional needs. The ARC provides a variety of disaster-specific relief items to help people meet emergency-caused needs and recover. Red Cross casework is flexible and can be used to help a single family after a home fire, or rapidly scaled-up to help hundreds of families after a disaster. Red Cross deploys health and independently-licensed mental health professionals trained to provide: 1) health assessments (including functional needs); 2) illness and injury surveillance; 3) replacement of essential medications and medical equipment lost during a disaster; and 4) triage, mental health assessments and surveillance, crisis intervention, and psychological first aid to victims of disaster.

Michigan Citizen Corps (MCC). If required, volunteers from the Michigan Citizen Corps can be mobilized to provide supplemental labor for disaster logistics / donations management operations. Such assistance will be provided through the various local Citizen Corps Councils / Community Emergency Response Teams (CERTS) around the state. Michigan Citizen Corps volunteers have been trained in various disaster response / recovery functions through the CERT program and are ready to assist local emergency response agencies when the need arises. Specific responsibilities of the Michigan Citizen Corps related to disaster logistics / donations management are as follows:

1. As required, assist the MSP/EMHSD in developing and revising this plan as a Support Plan to the MEMP. Upon request, assist local governments in developing and revising the disaster logistics / donations management elements of their EOP or EAGs.

2. As required, identify and assist in training appropriate Citizen Corps / CERT representatives in disaster logistics / donations management operations as part of the DLDMT within the SEOC, local EOC, and/or JFO structure.

3. As required, provide representatives to report to the SEOC / DLDMC to assist the DLDMT and to coordinate Citizen Corps / CERT participation in state-level disaster logistics / donations management operations.

4. As required, provide representatives to report to a local EOC / DLDMC to assist the DLDMT and to coordinate Citizen Corps / CERT participation in local-level disaster logistics / donations management operations.

> **Background Note:** Specific assignments related to tasks #3 and #4 above may include but are not limited to: identifying and making facilities ready for logistics / donations management operations; providing materials and supplies for the Base / Camps; assisting with mass care activities at the Base / Camps (e.g., providing food and water, bedding, sanitation services, etc.); loading, unloading, inventorying, and transporting commodities; providing security at facilities; managing facility operations; and direct distribution of commodities to end users.

5. Provide continuous, updated information on Citizen Corps / CERT assistance efforts for inclusion in state and/or local damage assessment reports, disaster situation / status reports, press releases, and the disaster after-action report.

6. As required, provide regular reports to the Citizen Corps / CERT membership and other interested parties on the status of Citizen Corps / CERT participation in state and/or local disaster logistics / donations management operations.

State Animal Response Team (SART). In accordance with the MEMP Animal Care Support Plan, the SART will coordinate with and assist involved local, tribal, federal, nongovernmental and private partners in protecting and caring for domestic animals during disasters and emergencies. Part of that role involves identifying and managing the resources required to transport, handle, shelter, feed, and provide basic care for animals whose owners are in mass shelters, have been abandoned or separated from their owners, have been injured by incident conditions, or are otherwise impeding incident response and/or recovery operations. In many cases, these resources will involve donated goods and/or services – solicited or unsolicited. As required, the SART will provide assistance to local agencies and organizations (e.g., Humane Society, animal control and/or shelter office, animal advocacy groups, etc.) in determining the resource needs of the animal care support operation, and in soliciting those resources from appropriate donors (individual and/or corporate). In addition, if the incident is likely to generate significant unsolicited donations targeted for domestic animal care, the SART will work with the same involved parties to determine how to best use the value-added donations, and how to properly dispose of the non-value-added donations.

Specific responsibilities of the SART related to disaster logistics / donations management are as follows:

1. As required, assist the MSP/EMHSD in developing and revising this plan as a Support Plan to the MEMP. Upon request, and within available staff resources, assist local governments in developing and revising those disaster logistics / donations management elements of their EOPs or EAGs which pertain to domestic animal care.

2. As required, identify and assist in training appropriate SART and other animal care organization staff in the animal care-related aspects of disaster logistics / donations management operations as part of the DLDMT within the SEOC and/or JFO structure.

3. Upon request (and based on availability), mobilize appropriate SART representatives to provide assistance with the animal care-related aspects of the logistics / donations management operation. Such assistance may be required at the SEOC and/or JFO, or at support facilities such as Control Check Points, Staging Areas / Warehouses, or Points of Distribution.

4. As appropriate, request assistance (i.e., technical, material, financial, and personnel) from appropriate agencies, organizations, or private sector donors (individuals and/or companies) to supplement existing logistics / donations management efforts pertaining to animal care.

5. Provide continuous, updated information on SART and allied animal care organization logistics / donations management efforts for inclusion in state and/or local damage assessment reports, disaster situation / status reports, press releases, and the disaster after-action report.

6. As required, provide regular reports to the SART membership and other interested parties on the status of SART participation in state and/or local logistics / donations management operations.

Background Notes: Unsolicited disaster donations targeted for domestic animal care can occur in any disaster or emergency in which there has been media coverage focusing on the plight of domestic animals. This can also occur if, absent any media coverage, there is a public perception that there may be a problem with animal care and/or the need for supplemental animal care resources. Donations for animal care may in some cases be financial, but more likely they will be in the form of equipment, supplies, food, or volunteer services (trained or untrained). Oftentimes, these donations will exceed the ability of the affected jurisdiction and its emergency animal care team to make proper use of the resources in a timely manner.

The MSP/EMHSD encourages local jurisdictions to plan for this contingency by identifying domestic animal care organizations which may be able to provide assistance with the management of animal care donations. Depending on circumstances, the SART may be available to provide some assistance, but its personnel assets and capabilities are currently limited and may be stretched thin in multi-jurisdictional incidents. The various Humane Societies in Michigan also should have an integral role in donations management for animal care. Although there is no single, umbrella organization which represents all Humane Societies in Michigan or across the country (each is an independent, private non-profit organization), they are often tied-into the emergency management system and the level of communication and cooperation amongst these entities is generally excellent. In the event of a disaster or emergency which is likely to generate unsolicited donations targeted for domestic animal care, the Humane Societies may be able to assist affected local jurisdictions in managing the donated goods and/or services and in making the best use of the resources provided.

Facility-Specific Roles and Responsibilities. *Positions at the DLDMC and the various support facilities* (state- and locally-established) will be filled by a combination of governmental employees and NGO employees and volunteers, who collectively comprise the DLDMT. Because the disaster logistics / donations management organization and operation are customized to meet the needs of each incident, it is difficult to assign specific personnel to specific positions at each facility. The following task assignments provide basic guidance to the individuals that staff each of the support facilities. These task assignments will be supplemented by expedient training provided or arranged by the DLMC and/or DDMC, with assistance (as required) provided by FEMA (if a federally-declared incident).

DLDMC Staff. The primary responsibilities of the individuals assigned to staff the DLDMC in the SEOC are:

1. Assist SEOC staff in identifying the type, kind, and quantities of disaster commodities needed, based on the results of damage / needs assessments conducted for the affected areas.

2. Coordinate with FEMA and other potential providers regarding the procurement of needed commodities and their transport, unloading, and inventorying.

3. Work with the SEOC Incident Commander to determine the desired destinations of disaster commodities (directly from the vendor, contractor, or donor and/or once they arrive at the designated federal Mobilization Center) and communicate this information to FEMA and state staff at the Mobilization Center or other appropriate facility.

Background Note: The options include transporting the commodities to: a) state- or locally-designated Staging Areas / Warehouses for temporary staging / storage and a phased distribution / deployment; b) state- or locally-designated Points of Distribution for immediate general distribution; or c) specific agencies or facilities for direct distribution to targeted functional needs populations. The federal government and/or its contractors, and most private donors will transport the commodities to the locations specified by the State of Michigan (MSP/EMHSD). State, local, and NGO transportation assets will only be needed if supplemental transportation assets are required. *In most cases, there will not be a need for supplemental transportation assets.*

4. Work with the SEOC Logistics Section to establish and equip needed logistics / donations management support facilities (i.e., Control Check Points, Staging Areas / Warehouses, Points of Distribution, and/or the Base / Camps). Communicate all relevant facility-related information to SEOC staff, FEMA and other federal officials, and the affected local EOCs (DLDMCs) prior to the facility being opened.

5. Record the type, kind, and quantity of commodities received and deployed in the CIMS "Points of Distribution (POD)" input form – based on information provided by staff at the federal Mobilization Center(s), Staging Areas / Warehouses (if established), and Points of Distribution. (Note: Some of this information may be entered directly into the CIMS if the support facilities and staff have CIMS access. Otherwise, it will be entered on hardcopy forms at the support facilities and the information will be submitted to the DLDMC via facsimile, e-mail, or telephone for entry and centralized inventorying / tracking via the CIMS.) Refer to Attachment U, "Points of Distribution Commodity Inventory Form," for the hardcopy form that should be used by the support facilities if CIMS access is not available.

6. Work with Point of Distribution Managers to determine the consumption rates for each Point of Distribution to ensure proper replenishment of commodities.

> **Background Note:** The consumption rate can be determined in several ways: 1) Comparing the beginning and ending commodity inventories per day, i.e., how much the Point of Distribution started with, and how much is left over at the end of the day. (For example, a Point of Distribution that starts with 12,000 bottles of water and ends with 2,000 bottles of water has a distribution rate of 10,000 bottles of water per day.) 2) Multiplying the number of customers per day by the commodity quantities distributed per customer. (For example, 2,500 customers per day X 4 bottles of water per customer = 10,000 bottles of water distributed per day.) 3) Multiplying the number of vehicles that pass through the Point of Distribution per day by the commodity quantities distributed per vehicle (based on one vehicle representing a household of three people). (For example, 835 vehicles per day X 12 bottles of water per vehicle [enough for three people] = 10,020 bottles of water distributed per day; rounding, this example equates to 2,500 total customers and 10,000 bottles per day.) Each of these methods should yield roughly the same numbers if proper distribution, inventory control, and security procedures are followed.

7. Assist the DDMC in establishing, as a functional element of the DLDMC, a Donations Intake and Processing Center (DIPC) to receive, record, acknowledge, and process donations offers (solicited and unsolicited) received online and by telephone, as well as unsolicited, value-added donated goods which are brought to the disaster area through established Control Check Points.

8. Assist the Volunteer Coordinator (VC) in establishing, as a functional but separately located element of the DLDMC, a Volunteer Registration Center (VRC) to register, screen, coordinate, and direct spontaneous, unaffiliated volunteers. (Note: Refer to the VC task assignments, as well as Attachment J, "Volunteer Registration Center Layout," for additional detail.)

9. Maximize the use of donations offers (goods and volunteer services) by ensuring that they are appropriate for the incident circumstances and in value-added form, are properly registered and inventoried, and are directed to the areas / populations most in need.

10. Monitor disaster logistics management operations to ensure that commodities are delivered to their intended facilities and are distributed to those in need in a timely, organized, and efficient manner.

11. Coordinate disaster logistics / donations management activities with other appropriate SEOC elements and with the affected local government EOCs (DLDMCs) to ensure a seamless, organized response and recovery effort.

12. Provide continuous, updated information to the SEOC Planning Section and other SEOC staff regarding all aspects of the disaster logistics / donations management operation. This information may be used in damage assessment reports, disaster situation / status reports, press releases, and the disaster after-action report.

13. Coordinate with the MSP/EMHSD PIO and JIT regarding media releases about the availability and distribution of needed disaster commodities, special provisions for handicapped individuals and other functional needs populations, disaster donations preferences and donating instructions, and instructions for spontaneous, unaffiliated volunteers. (Note: Refer to Attachments A and B, "Sample Public Information Materials," for sample formats that can be used.)

14. Work with all applicable parties to resolve any problems or concerns that may arise related to any aspect of the disaster logistics / donations management operation.

15. Work with applicable parties to determine the proper final disposition of unused or unneeded commodities.

16. In addition to the general tasks outlined above for DLDMC staff, state agency members of the DLDMC are responsible for coordinating the implementation of specific tasks that have been assigned to their agency. Those specific task assignments can be found in the section titled "Disaster Logistics / Donations Management Team" beginning on page 20.

Donations Intake / Processing Specialists.* The primary responsibilities of the Donations Intake / Processing Specialists are:

1. Using the "Donation Offer Form" (a modified and abbreviated version of the CIMS "Donation Management" input form), or the actual CIMS "Donations Management" input form itself, record incoming donation offers. If received by telephone, ensure the form is completely filled out before terminating the call with the donor. (Note: The DDMC will determine which form will be used based on CIMS access, donations volume, and other considerations.)

2. Provide a complete list of charitable relief organizations to telephone callers who wish to donate cash. (Note: This information will also be included in the press releases and public service announcements issued by the PIO.)

3. Discourage offers of items that are not needed, and request the donor to consider donating the items locally instead. (The DDMC and/or SPIO will develop an incident-specific message for this to ensure consistency.)

4. Refer potentially problematic calls or messages, or calls / messages that may require special attention, to the DDMC or other designated DLDMC staff for appropriate follow-up.

> **Background Note:** These may include but are not limited to: plans to start collection drives; international donors; donors that place rigid restrictions on donations; donations that are actually fee-for-service offers; and, in the event of an incident that involves potential biological or WMD contamination, the offer of potentially contaminated goods.

5. Refer top-priority offers to the DDMC or other designated DLDMC staff for immediate processing.

6. Refer callers seeking general incident information or specific information pertaining to response and recovery operations to the appropriate SEOC staff for follow up as needed.

7. As required, field and respond to inquiries from the Michigan 211 (United Way) human service telephone referral system regarding disaster commodities and disaster donations.

> ***Background Note:** Specialists may receive donations offers and disseminate information online or via telephone. The offer is screened and processed in the same manner, regardless of which way it is received.

Volunteer Registration Specialists. The primary responsibilities of the Volunteer Registration Specialists, in providing assistance to the Volunteer Coordinator (VC), are:

1. As requested by the VC, assist in establishing a VRC to register, screen, coordinate, and direct spontaneous, unaffiliated volunteers as well as properly vetted volunteers. (Refer to Attachment J, "Volunteer Registration Center Layout." for a general diagram of this facility.)

2. Assist the VC in monitoring social media outlets and other avenues, as appropriate, to identify potential, emerging, or actual volunteer efforts intended for the incident.

3. Coordinate with the Michigan 211 (United Way) human service telephone referral system, Michigan Citizen Corps, Michigan Volunteer Registry (of the Michigan Department of Community Health), and Michigan Community Service Commission (of the Michigan Department of Human Services – including the Volunteer Michigan website) regarding procedures for referrals of spontaneous, unaffiliated volunteers.

4. Using the CIMS "Volunteers" input form or the "Disaster Volunteer Registration Form" found in Attachment L, register spontaneous, unaffiliated volunteers, as well as properly vetted volunteers, at the VRC. (Note: If possible, provisions will be made to have the "Disaster Volunteer Registration Form" available electronically, on the State of Michigan, MSP/EMHSD, MDCH, MCSC / Volunteer Michigan, or other appropriate web site, for

completion by the volunteer prior to going to the VRC. A possible alternative to this process is to use the volunteer registration form on the Volunteer Michigan website to register volunteers, and then to have those volunteers referred to the VRC for follow-up interview, screening, and placement.)

5. Screen volunteers to determine their skill sets, and to ensure that they have adequate housing provisions and basic support services (i.e., food, water, appropriate work clothing, etc.). (Note: The "Disaster Volunteer Registration Form" has a section for skills, interests, and experiences which can be used for this purpose.)

6. As required, assist the VC in conducting a basic orientation and incident overview to: a) orient volunteers to incident conditions and ongoing incident response and/or recovery efforts; b) advise them of expectations regarding work effort and conduct; and c) direct them to appropriate volunteer opportunities that make the best use of their knowledge, skills and capabilities. (Note: The "Disaster Volunteer Orientation Checklist" found in Attachment N can be used for this purpose.)

Control Check Point Staff. The primary responsibilities of the individuals assigned to staff Control Check Points for disaster donations are:

1. Physically inspect donations shipments to ensure that the goods are actually needed in the relief / recovery effort, and that they are in usable condition and value-added form (i.e., properly contained / packaged, labeled for use, etc.). In the event of an incident involving potential biological or WMD contamination, ensure that the goods are not contaminated by checking their place of origin and route of transport. Non value-added donations (i.e., not needed, not in usable condition or value-added form) must be diplomatically turned away.

> **Background Note:** Donors should not be allowed to simply drop off such items at the Control Check Point and then leave. Contact law enforcement if problems arise.

2. Record the type and quantity of donations in the CIMS "Donations Management" input form (if using the CIMS), or the "Donation Offer Form" if using hardcopy forms. (Note: If using hardcopy, provide the information to the DDMC for centralized inventorying / tracking via the CIMS. Provide a hardcopy receipt to the driver / donor to verify that the donations have been approved at the Control Check Point.)

3. Direct the donation to a designated Warehouse or Staging Area for eventual distribution / deployment, or decline the offer and suggest that the donor instead donate the items locally to established charitable organizations. Provide this information to the DLDMC (Donations Intake / Processing Specialists) for inventorying and tracking purposes.

4. Refer individual spontaneous, unaffiliated volunteers to the VRC for registration and screening, or to a recognized disaster relief organization active in the incident response and recovery (but only if the organization is actively looking for volunteers). Spontaneous, unaffiliated volunteers who do not wish to take either of these steps must be diplomatically turned away. Report any suspicious individuals to the VRC for appropriate follow up investigation by the VC and/or DDMC.

5. Refer individual professional volunteers (e.g., credentialed emergency personnel such as physicians, nurses, emergency medical technicians, and firefighters) and CERT volunteers directly to the VRC for registration and assignment, unless Incident Command has made provisions for such volunteers to go directly to a designated Staging Area for deployment instructions. These volunteers should also be instructed to register with the Michigan Volunteer Registry, on the MDCH web site (www.mivolunteerregistry.org), if they have not already done so.

6. Refer spontaneous, unaffiliated organizations (i.e., ad hoc groups that are formed to provide post-incident assistance) to the VRC for registration, or directly to a recognized disaster relief organization for affiliation and training (but only if the organization is actively looking for volunteers). Spontaneous, unaffiliated organizations that do not wish to take either of these steps must be diplomatically turned away. Report any suspicious organizations to the VRC for appropriate follow up investigation by the VC and/or DDMC.

> **Background Note:** These groups often misrepresent themselves as established voluntary organizations; however, they may not be properly trained or self-sufficient, and they may attempt to collect funds that may or may not ultimately be used for relief purposes.

*Mobilization Center Liaison***.* The primary responsibilities of the individual(s) assigned to provide liaison to federal and state officials and oversee / monitor operations at the designated federal Mobilization Center(s) are:

1. Coordinate with federal officials regarding the receipt and inventorying of disaster commodities as they arrive at the Mobilization Center.

2. Advocate, as appropriate, on behalf of the State of Michigan to ensure that the logistics / donations management operation meets the needs of the affected population and the response / recovery effort.

3. Inform federal officials of the desired destination(s) of disaster commodities. Options include: a) to designated Staging Areas / Warehouses for temporary staging / storage and a phased distribution / deployment; b) to designated Points of Distribution for immediate general distribution; or c) to specific local agencies or facilities for direct distribution to targeted functional needs populations.

> **Background Note:** The federal government and/or its contractors will transport the commodities to the locations specified by the State and the affected local jurisdictions. State, local, and NGO transportation assets will only be needed if supplemental transportation assets are required. In most cases, there will not be a need for supplemental transportation assets.

4. Record the type, kind, and quantity of commodities received and deployed in the CIMS "Points of Distribution (POD)" input form (if using the CIMS), or the "Points of Distribution Commodity Inventory Form" if using hardcopy forms. (Note: If using hardcopy, provide the information to the DLMC for centralized inventorying / tracking via the CIMS.)

5. Provide continuous, updated information to the DLDMC on Mobilization Center activities for inclusion in damage assessment reports, disaster situation / status reports, press releases, and the disaster after-action report.

6. Work with federal officials, federal contractors, and the DLDMC to resolve any problems or concerns that may arise related to the Mobilization Center operation and/or the transportation / delivery of disaster commodities from the Mobilization Center.

7. In the event of an incident involving potential biological or WMD contamination, work with the DLDMC, involved state and federal management staff, commodity providers (i.e., FEMA/DHS, State of Michigan, EMAC, private companies, donors), and staff at other support facilities to ensure that commodities for use in Michigan are not contaminated by checking their place of origin and route of transport. Any suspected contamination should be reported immediately to the DLDMC for follow up as required.

> ****Background Note:** The position of Mobilization Center Liaison will be filled only after appropriate consultation with FEMA and other involved federal officials regarding need based on incident circumstances.

Staging Area / Warehouse Staff. The primary responsibilities of the individuals assigned to staff Staging Areas / Warehouses are:

1. Install temporary signage (as needed) at the facility indicating the locations of loading / unloading areas, parking areas, handicapped person access, restrooms, etc.

2. At Staging Areas, receive, temporarily park, and deploy vehicles, equipment, and personnel that will be used in disaster response / recovery operations.

> **Background Note:** Vehicles, equipment, and personnel (operators, crews, teams) will be sent to a Staging Area for deployment when needed.

3. At Warehouses, receive, unload, sort, inventory, package (as needed), temporarily store, and institute phased delivery of goods, supplies, and materials to: a) Points of Distribution for immediate general distribution to the affected population; or b) local facilities or agencies for direct distribution to targeted functional needs populations using established distribution networks.

Background Notes: Goods, supplies, materials, and other commodities will be sent to a Warehouse for phased delivery to Points of Distribution and targeted distribution networks.

Certain commodities may require refrigeration or other special measures during storage, transport, and distribution to maintain the quality and safety of the commodities. Ensure commodities are maintained in safe and sanitary conditions at all times.

4. In the event of an incident involving potential biological or WMD contamination, work with the DLDMC, involved state and federal management staff, commodity providers (i.e., FEMA/DHS, State of Michigan, EMAC, private companies, donors), and staff at other support facilities to ensure that commodities for use in Michigan are not contaminated by checking their place of origin and route of transport. Any suspected contamination should be reported immediately to the DLDMC for follow up as required.

5. Record the type, kind, and quantity of commodities received and deployed in the CIMS "Points of Distribution" input form (if using CIMS), or the "Points of Distribution Commodity Inventory Form" if using hardcopy forms. (Note: If using hardcopy, provide the information to the DLMC for centralized inventorying / tracking via the CIMS.)

6. For donated goods, if requested by the donor, provide a validated hardcopy receipt of the donation(s) received. The "Donation Offer Form" or CIMS "Donations Management" input form issued at the Control Check Point can be authenticated (signed) by the Warehouse / Staging Area staff to verify the receipt of the donation(s). A photocopy should be made of each receipt issued, and the photocopies should be provided to the DLDMC for recordkeeping purposes.

7. Deploy staged assets at the direction of the DLDMC, SEOC Incident Commander or SEOC Operations Section Chief, in order to meet the operational needs of the response / recovery effort.

8. Monitor site usage to prevent theft, vandalism, or other inappropriate activities.

9. For multi-day operations, open and close the site in accordance with the designated business hours. Properly secure the site at night.

10. Provide continuous, updated information to the DLDMC on Staging Area / Warehouse activities for inclusion in damage assessment reports, disaster situation / status reports, press releases, and the disaster after-action report.

11. Work with federal officials, federal contractors, and the DLDMC to resolve any problems or concerns that may arise related to Staging Area / Warehouse operations and/or the transportation / delivery of disaster commodities from the Mobilization Center.

12. When the operation closes, oversee the cleanup / restoration (as needed) of the site to ensure it is returned to its pre-incident condition. Report any damage or lingering impacts to the DLDMC for appropriate follow up with applicable agencies.

Background Notes: Staging Areas / Warehouses are selected by the local jurisdiction and the MSP/EMHSD and managed by local and/or state government and/or NGO personnel. They will be used in those situations where the SEOC and/or local EOC determine that a phased delivery / deployment of commodities is required. They will provide necessary temporary staging / storage areas for commodities until such time as the commodities can be properly used in the response / recovery effort. In many cases, Staging Areas / Warehouses will not be used at all. Staging Areas / Warehouses could be staffed by state agency personnel, local government personnel, NGO personnel, or some combination of those. The staff's primary responsibilities at these facilities are to: a) receive and temporarily stage / store commodities delivered by the federal government and/or federal contractors, the State, or a donor organization; b) record / verify commodity type, kind and quantity, to the extent possible; c) deploy / deliver commodities at the request of the DLDMC; d) provide information to the DLDMC on Staging Area / Warehouse operations; e) problem-solve onsite, to the extent possible; and f) restore the facility to its pre-incident condition once staging / storage operations have concluded. Federal officials are NOT responsible for management of or security at these facilities; rather, those are local, state or NGO functions.

Base / Camp Staff. The primary responsibilities of the individuals assigned to staff the incident Base / Camps are:

1. Install temporary signage (as needed) at the site(s) indicating the locations of parking areas, registration areas, handicapped person access, dining areas, restrooms, sleeping areas, showers / sanitation services, etc.

2. As appropriate, provide and equip areas at the Base / Camp for vehicle parking, equipment storage, registration, meal preparation, dining, sleeping, sanitation, recreation / relaxation, food / water storage, animal care, and other functions required for the incident circumstances.

Background Note: Required materials, supplies, and equipment may come from a variety of sources, including federal, state and local agencies, NGOs, and private donations. The MSP/EMHSD / SEOC Logistics Section will work with involved agencies and organizations, as required, to stock, staff, and manage the Base / Camps.

3. Ensure Base / Camp operations meet all applicable codes, regulations, and standards related to public health, safety, and sanitation. Report any problems to the DLDMC for investigation and resolution.

4. Register personnel staying at the Base / Camp, using the CIMS "Volunteers" input form or the alternate "Disaster Volunteer Registration Form" found in Attachment L (if the CIMS is not available). (If using the alternate form, promptly provide the information to the DLDMC for centralized personnel tracking via the CIMS.) Spontaneous, unaffiliated volunteers must first be processed at the VRC.

5. Track the number of persons served at the Base / Camps and the type, kind, and quantities of supplies and materials used to support Base / Camp operations. Report this information to the DLDMC for centralized inventorying / tracking via the CIMS. (Note: With appropriate amendment, i.e., electronically revising or otherwise clearly noting that the information is for the Base or a Camp, the "Points of Distribution Commodity Inventory Form" and "Points of Distribution Emergency Worker Activity Report" found in Attachments U and V, respectively, will be used for this reporting.)

6. Deploy personnel / resources from the Base / Camp to the facilities / locations at which they are needed, at the direction of the DLDMC, SEOC Incident Commander or SEOC Operations Section Chief in order to meet the operational needs of the response / recovery effort.

7. Work with the DLDMC, local agencies, and NGOs to request, transport, receive, and store needed materials, equipment, and supplies to support Base / Camp operations.

8. Monitor site usage to prevent theft, vandalism, or other inappropriate activities. Properly secure the site at night.

9. Provide continuous, updated information to the DLDMC on Base / Camp operations for inclusion in damage assessment reports, disaster situation / status reports, press releases, and the disaster after-action report.

10. Work with the DLDMC to resolve any problems or concerns that may arise related to Base / Camp operations and/or the transportation of personnel / resources to their intended work locations.

11. When Base / Camp operations close, oversee the cleanup / restoration (as needed) of the site(s) to ensure it is (they are) returned to pre-incident condition. Report any damage or lingering impacts to the DLDMC for appropriate follow up with applicable agencies.

Background Notes: The affected local jurisdiction will normally select, establish and manage the Base and any required Camps, although there may be situations in which supplemental state assistance will be required. Camps will be used in those situations where the DLDMC determines that the Base does not have sufficient room and/or capabilities to accommodate the resources required for the logistics / donations management operation. Camps may also be established when: a) sufficient hotel / motel rooms or other suitable accommodations for deployed resources are not available in the general incident area, b) large numbers of resources have been activated to participate in incident response / recovery efforts (e.g., EMAC resources), and c) the incident area is particularly large or widely dispersed. Camps are temporary locations at which food, water, sleeping areas, and sanitation services are provided to deployed resources. Possible facilities for use as the Base / Camps include county fairgrounds, state / local parks and recreation areas, local campgrounds, military bases, college campuses, school grounds (if tents are used), community centers or community recreation centers, etc.. Ideally, using the facility as a Base / Camp will not greatly interfere with its normal, day-to-day use.

Staffing of the Base / Camps will be handled through local and state agencies and NGOs. In most cases, NGOs will be relied upon to assist in meeting the material and supply needs of the Base / Camp operations. This includes the provision of food and water, bedding, and basic sanitation services. Under a Stafford Act declaration, the federal government may be able to provide technical and logistical assistance regarding the establishment and operation of the Base / Camps. However, federal officials are NOT responsible for management of or security at the Base / Camps; rather, those are local, state or NGO functions. All federal assistance is obtained and coordinated through the MSP/EMHSD in the SEOC.

Point of Distribution Staff. The primary responsibilities of the various individuals assigned to staff local Points of Distribution are:

Point of Distribution Manager

1. Establish and operate the Point of Distribution, ensuring it runs safely and efficiently. Refer to Attachment Q, "Points of Distribution – Planning and Operational Considerations," for details.

2. Serve as primary Safety Officer, ensuring that Point of Distribution operations are conducted in a safe manner for the staff and customers. This includes ensuring that equipment used onsite has been inspected, maintained, and is used in a safe manner.

3. Provide continuous, updated information to the DLDMC regarding inventory levels, number of commodities distributed, number of customers, problems encountered, etc. This information will be used in damage assessment reports, disaster situation / status reports, press releases, and the disaster after-action report. It will also be used by the DLMC to make commodity replenishment decisions.

4. Account for all personnel, equipment, and supplies at the Point of Distribution.

Support Team Leader

1. Supervise and coordinate all support operations, including traffic control, community relations, security, and site restoration. (The Support Team Leader reports directly to the Point of Distribution Manager.)

2. Install temporary signage (as needed) at the site indicating the locations of loading / unloading areas, distribution areas, parking areas, handicapped person access, restrooms, etc.

Traffic Controller(s)

1. Coordinate supply truck and equipment movement onsite.

2. Coordinate customer parking and movement onsite. (This includes vehicle breakdowns, which may require movement out of active vehicle lanes and parking areas to a location which will allow the vehicle to be towed without blocking the flow of traffic and/or vehicle parking.)

3. *Oversee the safety of loading staff on the vehicle line.*

Community Relations Staff

1. Serve as the central point of contact for media and public relations onsite.

2. Work with Point of Distribution staff and others, as appropriate, to resolve any problems or concerns that may arise related to customers and Point of Distribution operations. (This may include but is not necessarily limited to: issues pertaining to customer dissatisfaction and/or comfort; issues pertaining to handicapped individual access; and community concerns related to operating hours, crowds, noise, traffic, parking, etc.)

Site Security Officer

1. Monitor facility usage to prevent theft, vandalism, or other inappropriate activities.

2. Work with Community Relations staff to safely and diplomatically deal with angered or agitated customers.

3. For multi-day operations, open and close the facility in accordance with the designated business hours. Properly secure the facility at night.

4. Coordinate with local (and/or state, if applicable) law enforcement for assistance.

Loading Team Leader

1. Supervise and coordinate all loading, unloading, and sustainment operations. (The Loading Team Leader reports directly to the Point of Distribution Manager.)

2. Work with state and federal officials, federal contractors, and the DLDMC to resolve any problems or concerns that may arise related to Point of Distribution operations and/or the transportation / delivery of disaster commodities from the Mobilization Centers or Staging Areas / Warehouses.

3. Coordinate Point of Distribution staff sustainment and care, including but not necessarily limited to restrooms, rest areas, feeding, trash removal, and shift schedules.

4. Record the type, kind, and quantity of commodities received and distributed in the CIMS "Points of Distribution (POD)" input form (if using CIMS), or the "Points of Distribution Commodity Inventory Form" if using hardcopy forms. (Note: If using hardcopy, provide the information to the Point of Distribution Manager for submittal to the DLDMC for centralized inventorying / tracking via the CIMS.)

Check-In Specialist(s)

1. Maintain a running count of vehicles that pass through the Point of Distribution, and provide this information to the Loading Team Leader at pre-determined intervals (e.g., hourly, every four hours, daily).

Loading Staff

1. Receive, sort, inventory and package (as needed) disaster commodities received from the Mobilization Center or Staging Areas / Warehouses.

2. Ensure commodities are maintained in safe and sanitary conditions at all times. (Certain commodities may require refrigeration or other special measures during storage, transport, and distribution to maintain the quality and safety of the commodities.)

3. Distribute the allotted amount of commodities to customers.

Equipment Operators (Note: Equipment Operators must be qualified to operate the equipment they are assigned.)

1. Move commodities and/or pallets to and from delivery vehicles and the loading line (Fork Life Operator and Pallet Jack Operator).

2. Monitor equipment usage and performance and notify the Loading Team Leader of any equipment-related problems that arise.

Site Restoration Staff

1. When the facility closes down distribution operations, clean up / reorganize the facility to return it to pre-incident condition. Report any damage or lingering impacts to the DLDMC for appropriate follow up with applicable agencies.

Background Notes: Points of Distribution are selected by the local jurisdiction and the MSP/EMHSD and managed by local and/or NGO staff. Normally, state agency staff will not be involved to a great extent in the actual distribution of commodities to those in need. The MSP/EMHSD will maintain oversight of local Points of Distribution, but the affected local jurisdiction is ultimately responsible for management of the facility. The staff's primary responsibilities at these facilities are to: a) receive commodities delivered by the federal government and/or federal contractors, or state / local / NGO transportation assets; b) record / verify commodity type, kind and quantity, to the extent possible; c) ready the facility for use by the public; d) distribute commodities to those in need, in pre-determined quantities; e) provide information to the DLDMC on Point of Distribution operations; f) problem-solve onsite, to the extent possible; and g) restore the facility to its pre-incident condition once commodity distribution has concluded. State and federal officials are NOT responsible for management of or security at these facilities; rather, those are local and/or NGO functions. However, upon local request, the State can provide supplemental security assistance to aid local law enforcement in securing commodities and facilities and maintaining order.

Transportation Staff. The primary responsibilities of the state agency representatives assigned to transport commodities to Points of Distribution and/or directly to designated local agencies or facilities are:

1. Load and unload commodities from delivery trucks using carts, dollies, and other standard hand devices. Place the commodities at the loading dock in a secure, sheltered position but do not use a forklift or other mechanical device to move the loads, separate packages, or otherwise assist in breaking down or readying commodities for distribution to individuals. (That responsibility rests with the Point of Distribution staff.)

2. Report any difficulties or problems encountered (in the transportation or loading / unloading processes) to the DLDMC for investigation and follow-up resolution.

3. Ensure the types, kinds, and quantities of commodities being transported are accurate. Report any discrepancies immediately to the DLDMC for investigation and follow-up resolution.

Joint Field Office Liaison. The primary responsibilities of the MSP/EMHSD representative(s) assigned to oversee and monitor federal, state, and NGO logistics / donations management support operations at the Joint Field Office are:

1. Coordinate with federal and state officials and NGO representatives regarding the resource and operational assistance needs of Michigan with regard to logistics and/or donations management.

2. Advocate, as appropriate, on behalf of Michigan to ensure that federal, state, and NGO assistance is timely and meets the needs of the affected population and the response / recovery effort.

3. Attend daily coordination meetings and briefings with federal, state, and NGO partners at the JFO to convey information regarding the status of logistics / donations management operations in Michigan, and to receive information regarding federal, state, and NGO support activities. Provide electronic and/or hardcopy of all meeting materials to the DLDMC at the conclusion of each meeting / briefing.

4. Monitor logistics / donations management entries in the CIMS, enter new information where appropriate regarding JFO operations, and convey critical information to JFO partners as deemed appropriate.

5. Provide continuous, updated information to the DLDMC on JFO operations and federal, state, and NGO support activities for inclusion in damage assessment reports, disaster situation / status reports, press releases, and the disaster after-action report.

6. Work with JFO partners and the DLDMC to resolve any problems or concerns that may arise related to the logistics / donations management operation and/or the provision of federal, state, and NGO support.

7. In the event of an incident involving potential biological or WMD contamination, work with the DLDMC, JFO partners, and staff at other support facilities to arrange for and coordinate federal and state contamination control assistance. Report on the status and needs of the contamination control efforts at JFO meetings / briefings, and in the CIMS.

A. SAMPLE PUBLIC INFORMATION MATERIALS – COMMODITIES DISTRIBUTION

SAMPLE PRESS RELEASE #1

(Short Format)

Date

FOR IMMEDIATE RELEASE

FOR MORE INFORMATION CONTACT:
Name / Title of Local (or State, as applicable) Disaster Logistics Management Coordinator
Telephone Number / Facsimile Number / E-Mail Address
(Note: list the hours / days of the week this telephone number is staffed.)

Disaster Commodities Distribution to Begin

Relief efforts are underway in response to (describe disaster conditions) in (name of jurisdiction). Meeting the basic life-support needs of citizens is the most critical element of the recovery effort. (Name of agency) will begin distributing food, drinking water, basic medicines / medical supplies, and other needed supplies in (name of jurisdiction) on (beginning date) and will continue until (end date). Residents that are able to travel are asked to go to one of the locations listed below to pick up the supplies they need to sustain themselves for the next (specify time period – e.g., three days, one week). Ample parking will be available at these locations. Residents that are not able to travel or that have special needs are asked to call (name of agency / telephone number) on (what days / between what hours?) to have arrangements made for needed supplies and care. Family members or caretakers are asked to call on behalf of those that are not able to make the call themselves.

Points of Distribution Locations:

- (Location / Address / Hours of Operation / Commodities Available)
- (Location / Address / Hours of Operation / Commodities Available)
- (Location / Address / Hours of Operation / Commodities Available)
- (Location / Address / Hours of Operation / Commodities Available)

  Etc.

For further information, call (telephone number) or visit the (name of agency) web site at (web site address).

SAMPLE PRESS RELEASE #2

(Long Format – Commodities Listed Individually)

Date

FOR IMMEDIATE RELEASE

FOR MORE INFORMATION CONTACT:
Name / Title of Local (or State, as applicable) Disaster Logistics Management Coordinator
Telephone Number / Facsimile Number / E-Mail Address
(Note: list the hours / days of the week this telephone number is staffed.)

Disaster Commodities Distribution to Begin

Relief efforts are underway in response to (describe disaster conditions) in (name of jurisdiction). Meeting the basic life-support needs of citizens is the most critical element of the recovery effort. (Name of agency) will begin distributing food, drinking water, basic medicines / medical supplies, and other needed supplies in (name of jurisdiction) on (beginning date) and will continue until (end date). Residents that are able to travel are asked to go to one of the locations listed below to pick up the supplies they need to sustain themselves for the next (specify time period – e.g., three days, one week). Ample parking will be available at these locations. Residents that are not able to travel or that have special needs are asked to call (name of agency / telephone number) on (what days / between what hours?) to have arrangements made for needed supplies and care. Family members or caretakers are asked to call on behalf of those that are not able to make the call themselves.

Points of Distribution Locations:

- (Location / Address / Hours of Operation)
- (Location / Address / Hours of Operation)
- (Location / Address / Hours of Operation)
  Etc.

The following commodities will be available at all Points of Distribution:

- **Food** – distributed in (what quantities / units?), which is generally enough to feed a family of four for (how many days?). Food supplies include: (list types of food that will be available).

- **Drinking Water / Ice** – distributed in (what quantities / units? – e.g., individual bottles, gallon bottles, bring your own container). Each adult resident may have up to (what quantity?) of drinking water per (what time period? – e.g., per day? per week?). Ice (for drinks) will be available in (what quantities? – e.g., five pound bags); however, residents must bring their own cooler to store and transport the ice.

- **Medicines / Medical Supplies** – such as aspirin or other pain relievers, cold medications, basic first aid materials, etc. are available in (what quantities / units?) to adult residents.

SAMPLE PRESS RELEASE #2 (continued)

(Long Format – Commodities Listed Individually)

- **Baby Formula, Baby Food, and Diapers** – distributed to residents with infant children only, as follows: (list quantities / units for each item).
- **Tarps / Plastic Sheeting** – distributed in (what quantities / units?), which is generally enough to temporarily repair a damaged roof and/or seal broken windows. Additional quantities may be available on a case-by-case basis, after the basic needs of all other residents have been met.
- **Dry Ice** – distributed in (what quantities / units?), which is generally enough to keep perishable items in a home refrigerator / freezer safe for consumption for (what time period? three days?) if usage directions are properly followed.
- **Cleaning Supplies** – such as disinfectant cleanser, soap, mops, sponges, rubber gloves, plastic buckets, cleaning cloths, brooms, etc. are available in (what quantities / units?) to adult residents to aid in cleaning up / disinfecting damaged homes and businesses.
- **Other Commodities?** – list other commodities that will be made available to affected residents. List by type, available quantity / unit, and general usage, as appropriate.

For further information, call (telephone number) or visit the (name of agency) web site at (web site address).

SAMPLE PUBLIC SERVICE ANNOUNCEMENT #1

(Name of jurisdiction) Office of Emergency Management
OR
Michigan Department of State Police, Emergency Management and Homeland Security Division
(Address)

FOR USE UNTIL (DATE)
DISASTER COMMODITIES DISTRIBUTION
30-45 SECONDS

Relief efforts are underway in response to (describe disaster conditions) in (name of jurisdiction). (Name of agency) will begin distributing food, drinking water, basic medicines / medical supplies, and other needed supplies on (beginning date) and will continue until (end date). Residents that are able to travel are asked to go to one of the following locations to pick up the supplies they need to sustain themselves for the next (specify time period – e.g., three days, one week).

- (Location / Address / Hours of Operation)
- (Location / Address / Hours of Operation)
- (Location / Address / Hours of Operation)

Residents that are not able to travel or that have special needs are asked to call (name of agency / telephone number) on (what days / between what hours?) to have arrangements made for needed supplies and care. *Family members or caretakers are asked to call on behalf of those that are not able to make the call themselves.*

For further information, call (telephone number) or visit the (name of agency) web site at (web site address). Thank you.

SAMPLE PUBLIC SERVICE ANNOUNCEMENT #2

(Name of jurisdiction) Office of Emergency Management
OR
Michigan Department of State Police, Emergency Management and Homeland Security Division
(Address)

FOR USE UNTIL (DATE)
DISASTER COMMODITIES DISTRIBUTION
45-60 SECONDS

Relief efforts are underway in response to (describe disaster conditions) in (name of jurisdiction). (Name of agency) will begin distributing needed supplies to residents on (beginning date) and will continue until (end date). Residents that are able to travel are asked to go to one of the following locations to pick up the supplies they need to sustain themselves for the next (specify time period – e.g., three days, one week).

- (Location / Address / Hours of Operation)
- (Location / Address / Hours of Operation)
- (Location / Address / Hours of Operation)

The following types of supplies will be available at these locations. Quantities will be limited.

- Food
- Drinking Water / Ice
- Medicines / Medical Supplies
- Baby Formula, Baby Food, and Diapers
- Tarps / Plastic Sheeting
- Dry Ice
- *Cleaning Supplies*
- Other Commodities? (specify)

Residents that are not able to travel or that have special needs are asked to call (name of agency / telephone number) on (what days / between what hours?) to have arrangements made for needed supplies and care. Family members or caretakers are asked to call on behalf of those that are not able to make the call themselves.

For further information, call (telephone number) or visit the (name of agency) web site at (web site address). Thank you.

SAMPLE WEB SITE ANNOUNCEMENT AND/OR HANDBILL / DOOR HANGER #1: NOTICE OF DISASTER COMMODITIES DISTRIBUTION

B. SAMPLE PUBLIC INFORMATION MATERIALS – DONATIONS PREFERENCES

SAMPLE PRESS RELEASE #1

Date

FOR IMMEDIATE RELEASE

FOR MORE INFORMATION CONTACT:
Name / Title of Local (or State, as applicable) Disaster Donations Management Coordinator
Telephone Number / Facsimile Number / E-Mail Address
(Note: list the hours / days of the week this telephone number is staffed.)

Disaster Relief Donations Must be Coordinated to Meet Public Needs

There continues to be a great outpouring of individuals, businesses, and service organizations throughout Michigan and the rest of the country that are collecting and donating goods and services to assist disaster survivors in (affected area) due to the recent (describe disaster conditions).

Currently, food and clothing supplies are sufficient. **The most useful form of assistance is donations of money to meet disaster-related expenses.** Check and credit card donations can be made to any of the well-established, charitable organizations that are assisting in the disaster relief effort (see list below). Monetary donations allow charitable organizations the flexibility to purchase items that are needed most, and unlike material donations, cash donations entail little or no transportation, storage, or distribution costs.

Prior to sending any relief items into the state or the affected local communities, donors should contact involved local or national relief organizations (telephone numbers are listed below). Groups wishing to donate should contact the volunteer agency to establish the need and to make the necessary arrangements. Shipments that have not been accepted by a voluntary agency, a specified location, and a contact person may not be unloaded. **PLEASE DO NOT SEND DONATIONS OF GOODS OR SERVICES WITHOUT FIRST MAKING THE PROPER ARRANGEMENTS. DOING SO ONLY MAKES MATTERS WORSE, NOT BETTER!**

The (name of jurisdiction) Disaster Logistics and Donations Management Center can be reached by calling (number), or by visiting online at (web address). The Disaster Logistics and Donations Management Center will determine the extent of the need and coordinate with a responsible agency to receive and distribute donated items. Failure to do this will result in personnel, time, space, and money being wasted to process the uncoordinated items and will further detract from the resources being available to provide direct support to persons in need.

(Insert list of charitable organizations assisting in the disaster relief effort along with appropriate contact information.)

SAMPLE PRESS RELEASE #2

Date

FOR IMMEDIATE RELEASE

FOR MORE INFORMATION CONTACT:
Name / Title of Local (or State, as applicable) Disaster Donations Management Coordinator
Telephone Number / Facsimile Number / E-Mail Address
(Note: list the hours / days of the week this telephone number is staffed.)

Disaster Survivors Need Your Financial Help

Relief efforts are underway in response to (describe disaster conditions) in (affected area). Disaster survivors need your assistance. (Names of organizations) are already beginning work in (affected area) to help affected individuals and families in rebuilding and recovering from this devastating disaster. **Cash contributions are urgently needed to support the relief efforts.**

Cash contributions are needed more than donations of goods or materials at this time. Collecting, sorting, inventorying, packaging, and shipping donated goods and materials is highly labor intensive and expensive. Trained volunteers and local / state responders are busy providing urgently needed services to those most in need. As a result, there may not be personnel available to process unsolicited donations. **YOUR COOPERATION IN NOT SENDING UNSOLICITED DONATIONS OF GOODS AND SERVICES IS APPRECIATED!**

Cash contributions enable relief agencies to purchase bulk supplies of items most urgently needed. This is the most efficient way of meeting the needs of the disaster survivors in a timely manner. In addition, agencies can usually purchase the needed supplies from area merchants, thus helping them begin recovery as well.

Your check or money order may be sent to:

(Name of Organization / Address)

For credit card donations, please call or visit online:

(Telephone Number / Web Site Address)

SAMPLE PRESS RELEASE #3

Date
FOR IMMEDIATE RELEASE
FOR MORE INFORMATION CONTACT:
Name / Title of Local (or State, as applicable) Disaster Donations Management Coordinator
Telephone Number / Facsimile Number / E-Mail Address
(Note: list the hours / days of the week this telephone number is staffed.)

Cash Donations for Disaster Survivors Best Way to Help

Persons interested in helping the survivors of (describe disaster conditions) in (affected area) can best support the relief effort by making a cash donation instead of sending donated goods and services, according to (the MSP/EMHSD? local jurisdiction? Local and/or State Disaster Donations Management Coordinator?).

"Cash donations to voluntary disaster relief organizations enables them to purchase exactly what is most needed by the survivors and helps the local economy recover from the disaster as well," said (name and title of official representative).

(Name of official representative) explained that donated items require voluntary agencies to spend money and considerable time for sorting, inventorying, warehousing, and distribution. Additionally, there is no state or federal transportation for donated goods unless they fill an identified critical need.

There are a number of voluntary agencies receiving cash donations for (name of disaster) relief:

American Red Cross
1-800-RED CROSS (1-800-733-2767)
(www.redcross.org)
Text REDCROSS to 90999

Salvation Army
1-888-803-8858
(http://www.salvationarmyusa.org/usn/www_usn_2.nsf)

United Methodist Committee on Relief
1-800-554-8583
(http://www.umcor.org)

Adventist Community Services
1-517-316-1500
(http://www.miadr.org)

For further information on donations coordination issues in (affected area), please call or visit online:

Michigan Disaster Donations Intake and Processing Center (as applicable)
1-800-??????? (list hours hotline is staffed) or (web address for information)

(Affected Area) Donations Intake and Processing Center
1-800-??????? (list hours hotline is staffed) or (web address for information)

SAMPLE PUBLIC SERVICE ANNOUNCEMENTS

PUBLIC SERVICE ANNOUNCEMENT #1

(Name of jurisdiction) Office of Emergency Management
OR
Michigan Department of State Police, Emergency Management and Homeland Division
(Address)

FOR USE UNTIL (DATE)

DISASTER DONATIONS

15 SECONDS

Due to the recent (describe disaster conditions), the (name of jurisdiction and/or State of Michigan) is coordinating a disaster relief effort in (affected area). At this time, the most pressing need is **cash donations** to enable participating disaster relief organizations to purchase bulk supplies of items most urgently needed. If you would like to make a cash contribution to help with disaster relief, please call (number) or visit online at (web address for donating). Thank you.

PUBLIC SERVICE ANNOUNCEMENT #2

(Name of jurisdiction) Office of Emergency Management
OR
Michigan Department of State Police, Emergency Management and Homeland Security Division
(Address)

FOR USE UNTIL (DATE)

DISASTER DONATIONS

30 SECONDS

In response to the (describe disaster conditions) relief efforts, there have been questions as to what items and services are needed. The (name of jurisdiction and/or State of Michigan) encourages people to give **cash donations** to one of the voluntary organizations involved in the relief operation.

The (name of jurisdiction and/or State of Michigan) is helping to coordinate donations of money, goods, and services with agencies that are able to receive, store, and distribute donated items.

For more information on what and where to donate, contact the (name of jurisdiction or State of Michigan, as applicable) Disaster Logistics and Donations Management Center at (number), or online at (web address for information). Thank you.

C. DISASTER LOGISTICS AND DONATIONS MANAGEMENT TEAM – MEMBERSHIP ROSTER / CONTACT LIST

Note: This table will be populated with names and contact information when an incident occurs or is imminent. The staffing pattern will be commensurate with operational needs, incident conditions, and available personnel. Additional agency-, facility-, and jurisdiction-specific positions will be added as required once the full scope of the operation is determined.

Name	Agency	Role	Phone #	Facsimile #	E-Mail Address
	MSP/EMHSD	Disaster Logistics Management Coordinator	(office); (cell); (pager)

E. DISASTER COMMODITY NEEDS – BY HAZARD

The quantity, kind, and type of disaster commodities required is a function of the type of disaster; its location; its magnitude, duration, and intensity; and the size, characteristics, and needs of the affected population. Because of all of these variables, it is difficult to pre-determine exactly what will be needed, where, when, how much, and for how long. However, based on disaster experience, it is possible to generalize about the major kinds / types of disaster commodities that might be required for various types of disasters. This information is essential for disaster logistics management planning. The following is a list of the disasters in Michigan that are most likely to generate a need for disaster commodities, and the primary kinds / types of commodities that are likely to be required to sustain the affected population through the incident response and early recovery period:

Major Disaster Commodity Needs in Michigan*

Commodity / Disaster	Food	Drinking Water / Ice	Medicines / Medical Supplies	Baby Formula / Food and Diapers	Tarps / Plastic Sheeting	Dry Ice	Cleaning Supplies	Cots / Bedding / Blankets	Personal Care Kits / Towels	Additional Clothing+	Flashlights / Batteries
Tornado / Severe Storm	■	■	■	■	■	■	■	■	■	■	■
Flood	■	■	■	■	■	■	■	■	■	■	■
Terrorist Attack**	■	■	■	■	■	■	■	■	■	■	■
Major Electrical Power Outage*** or Other Energy Emergency	■	■	■	■		■		■	■	■	■

Epidemic / Pandemic or Other Extended Public Health Emergency	■	■	■	■		■	■	■	■	■	■

*Refer to tables titled "Commodity Considerations for Primary Michigan Disasters" on the following pages for descriptions of disaster impacts, commodities generally required, and special considerations.

**A major attack that results in any or all of the following: significant injuries / loss of life; significant physical damage; significant evacuations and/or in-place sheltering; extended mass care / sheltering operations; significant economic impacts; extended disruption to the just-in-time supply chain; serious / extended disruptions to critical facilities / services; other significant impacts that require supplemental commodities to meet the life-support needs of the affected population.

***The outage may be caused by: an accidental infrastructure failure; a natural event such as an ice storm or severe thunderstorm; deliberate sabotage; or a combination of these events.

+including clothing for the public following required decontamination activities.

Disaster Intensity Scales. Disaster Intensity Scales have been developed for various types of disasters that relate the intensity of an event to the anticipated type and magnitude of damage and impact. In general, the greater the intensity of the event the greater the likelihood that supplemental disaster commodities will be required to support population protective measures (mass evacuation or in-place sheltering) and the response / recovery effort. The Fujita Scale (for tornadoes) and the flood and ice storm probability of return periods serve as the best tools to predict large scale natural disasters that may require supplemental disaster commodities. Nuclear power plant accidents and hazardous material incidents also have some measure of intensity which can aid in disaster logistics management planning. By pre-determining the kinds / types of supplemental commodities that are likely to be required for various types of disasters, it may be possible to expedite the request for and delivery of those commodities – making for a more proactive response / recovery effort.

Disaster Intensity Scales for Selected Michigan Disasters

Disaster	Scale	Commodity Indicator (General)
Tornado	Fujita Scale: F6 – Inconceivable tornado (319-379 mph) F5 – Incredible tornado (261-318 mph) F4 – Devastating tornado (207-260 mph) F3 – Severe tornado (158-206 mph) F2 – Significant tornado (113-157 mph) F1 – Moderate tornado (73-112 mph) F0 – Gale tornado (40-72 mph)	The higher the Fujita Scale rating, the more damage / impacts likely to be caused. (For example, an F5 tornado will generally cause more damage and impacts than an F0 tornado. The size and nature of the tornado path will also determine the potential amount and type of commodities that might be required.)
Flood	Probability of return (in a given year): 500-year flood – .2% chance of occurrence 200-year flood – .5% chance of occurrence 100-year flood – 1% chance of occurrence 50-year flood – 2% chance of occurrence 10-year flood – 10% chance of occurrence	The lower the flood probability, the more damage / impacts likely to be caused. (For example, a 500-year flood is likely to cause more damage / impacts than a 100-year flood because it is larger in scope / magnitude and generally much more severe in its damaging capability. Therefore, the potential need for disaster commodities is likely to be greater.)
Ice Storm (Causes Power Outages)	Probability of return (in a given year): 500-year storm – .2% chance of occurrence 200-year storm – .5% chance of occurrence 100-year storm – 1% chance of occurrence 50-year storm – 2% chance of occurrence 10-year storm – 10% chance of occurrence	The lower the storm probability, the more damage / impacts likely to be caused. (For example, a 500-year storm is likely to cause more damage / impacts than a 100-year storm because it is larger in scope / magnitude and generally much more severe in its damaging capability. Therefore, the potential need for disaster commodities is likely to be greater because more extended power outages are likely to occur due to the ice storm damage.)
Nuclear Power Plant Accident	Nuclear Accident Emergency Action Level Classification System (NUREG-0654/FEMA-REP-1): **General Emergency** – events that involve actual or imminent substantial core degradation or melting with potential for loss of containment integrity. Releases can be reasonably expected to exceed EPZ Protective Action Guideline exposure levels off-site for more than the immediate site area. **Site Area Emergency** – events that involve actual or likely major failures of plant functions needed for protection of the public. Any releases not expected to exceed EPZ Protective Action Guideline exposure levels except near site boundary. **Alert** – events that involve actual or potential substantial degradation of the level of safety of the plant. Any releases expected to be limited to small fractions of the EPZ Protective Action Guideline exposure levels. **Unusual Event** – events that indicate a potential degradation of the level of safety of the plant. No releases of radioactive material requiring off-site response or monitoring are expected unless further degradation of safety systems occurs.	The higher the incident classification, the more extensive the impacts that are likely to be caused. Only a General Emergency that causes a long-term evacuation is likely to generate the need for supplemental disaster commodities. Anything less than a General Emergency is not likely to require significant disaster commodities.
Hazardous Material Incident	National Oil and Hazardous Substances Pollution Contingency Plan (NCP) Spill Classifications: ***Major Release*** *– a release of any quantity that poses a substantial* threat to public health, welfare, or the environment or results in significant public concern. **Medium Release** – a release not meeting the criteria for classification as a major or minor release. **Minor Release** – a quantity of release that poses minimal threat to public health, welfare, or the environment.	The higher the release classification, the more extensive the impacts that are likely to be caused. Generally, only a Major Release is likely to generate a need for supplemental disaster commodities – and *then only if a significant long-term evacuation is required to protect the affected* population. Anything less than a Major Release is not likely to require supplemental disaster commodities.

Sources: Federal Emergency Management Agency (FEMA); National Climate Prediction Center (NOAA); Michigan Hazard Analysis; Michigan Emergency Management Plan.

Commodity Considerations. The following chart identifies the commodity considerations associated with the primary disasters in Michigan that are likely to generate the need for disaster commodities. As indicated in the "Disaster Intensity Scales for Selected Michigan Disasters" chart above, the intensity of a disaster (in most cases) has a direct impact on the type, kind, quantity, and expected duration of need of disaster commodities. The purpose of this chart is to describe the typical impacts of these disasters, identify their potential commodity requirements, and highlight any special considerations that may have to be factored into the decision making process during the response / recovery phases.

Commodity Considerations for Primary Michigan Disasters

Tornado / Severe Storm	
Typical Impacts:	Damage from tornadoes is caused by high-velocity rotating winds. The severity of the damage depends on the intensity of the tornado and the length of time the funnel is on the ground. Damage is generally confined to a narrow path extending up to half a mile wide and from a hundred yards to several miles long. Tornadoes typically damage and destroy structures and personal property, down trees and power lines, disrupt electrical power, damage agricultural crops, and cause injuries and deaths. Damage / impacts from severe storms is similar to that of tornadoes, but is generally more widely spread and in most cases less severe.
Commodities Generally Needed:	**To support mass care operations:** Food; Drinking Water / Ice; Medicines / Medical Supplies; Baby Formula / Food and Diapers; Cots (incl. bariatric cots) / Cribs / Bedding / Blankets; Personal Care Kits / Towels; Additional Clothing. **To repair / restore damaged structures:** *Tarps / Plastic Sheeting (for temporary roof / window / wall repairs); Cleaning Supplies.* **If power is out:** Dry Ice; Flashlights / Batteries; Emergency Generators (as applicable).
Considerations:	The type, kind, and quantity of disaster commodities needed (in most cases) is directly tied to the damage and impacts inflicted by either type of storm. Tornadoes and severe storms generally do not result in significant long-term mass care operations. In most cases, disaster commodities would only be required in the most widespread and/or severe events that have resulted in significant property damage and the need for temporary mass care operations.
Flood	
Typical Impacts:	Damage from riverine flooding is generally limited to the area inside the identified floodplain for the intensity of flood that occurs. For example, a 500-year flood generally will damage anything unprotected within the 500-year floodplain. A 100-year flood will cause damage within the 100-year floodplain, and so forth. Great Lakes shoreline floodplains also factor in potential damage caused by storm surges and wave action, which can be substantial. Urban flooding impacts are harder to predict because they typically involve a *failure of some aspect of the storm drainage infrastructure system* – either through physical damage, exceeded capacity, or both. Basement and street flooding are the primary impacts of urban flooding.
Commodities Generally Needed:	**To support mass care operations:** Food; Drinking Water / Ice; Medicines / Medical Supplies; Baby Formula / Food and Diapers; Cots (incl. bariatric cots) / Cribs / Bedding / Blankets; Personal Care Kits / Towels; Additional Clothing. **To repair / restore damaged structures and/or prevent damage:** Tarps / Plastic Sheeting (for temporary sandbag walls); Cleaning Supplies. **If power is out:** Dry Ice; Flashlights / Batteries; Emergency Generators (as applicable).
Considerations:	In general, the more intense the flood (e.g., 500-year event vs. 100-year event), the greater the damage / impacts and likelihood that supplemental disaster commodities will be required to meet the life-sustaining needs of the affected population. The affected area will also dictate, to a large degree, whether or not supplemental disaster commodities will be required. Densely populated / developed urban areas are likely to require significantly more commodities than sparsely populated / developed rural areas because the affected population and number of damaged structures will be much greater. In addition, the number of functional needs individuals is also likely to be greater in urban areas than in rural areas. Flooding may result in significant contamination of structures and the property contained within those structures. *This will require cleanup and restoration efforts which* may necessitate the procurement of large quantities of cleaning supplies.
Terrorist Attack	
Typical Impacts:	Terrorist attacks fall into two categories: those that cause considerable physical destruction and injury / loss of human life (i.e., bombings, nuclear detonation), and those that primarily cause injury or loss of human life but little physical destruction (i.e., bioterrorism, chemical attack). In the event of a terrorist bombing attack, widespread and/or severe physical damage would occur to a limited impact area. The level of physical destruction that can be expected would be similar to that found in a tornado or particularly severe storm. The impacts likely would include damaged and destroyed structures and personal property, injuries, and loss of human life. Supplemental commodity needs would be limited unless the attack resulted in a large-scale evacuation. A nuclear detonation terrorist attack would result in considerably more damage and impact. Such an attack would be unprecedented in U.S. history and would likely require a substantial and possibly long-term infusion of supplemental disaster commodities for the affected area. Impacts would *include considerable physical damage to structures and personal property, numerous injuries and deaths, radioactive fallout with required personal protection and decontamination* measures, and extensive (and perhaps long-term) disruptions to and negative impacts on essential systems and services within the affected area. Extensive in-place sheltering or mass evacuation measures would be required. A wide range of supplemental disaster commodities would be required in the aftermath of a terrorist nuclear detonation attack. Terrorist attacks such as bioterrorism or chemical attacks may cause little physical damage to structures, but would likely result in considerable injuries, loss of human life, and significant (and possibly long-term) disruptions to and negative impacts on essential systems and services within the affected area. In addition, these types of attacks would require extensive public protective measures such as in-place sheltering or mass evacuations. As a result, supply chains are likely to be disrupted – some for possibly extended periods – and resource needs will be considerable. An infusion of supplemental disaster commodities would likely be required to provide for the life-sustaining needs of the affected population and to support the response / recovery effort.
Commodities Generally Needed:	**To support mass care operations:** Food; Drinking Water / Ice; Medicines / Medical Supplies; Baby Formula / Food and Diapers; Cots (incl. bariatric cots) / Cribs / Bedding / Blankets; Personal Care Kits / Towels; Additional Clothing. **To repair / restore damaged structures:** *Tarps / Plastic Sheeting (for temporary roof / window / wall repairs); Cleaning Supplies.* **If power is out:** Dry Ice; Flashlights / Batteries; Emergency Generators (as applicable).

Commodity Considerations for Primary Michigan Disasters (cont.)

Terrorist Attack (cont.)	
Considerations:	Commodity needs would be determined by the nature and size of the attack and the characteristics of the affected area. Attacks affecting densely populated urban areas would likely require more supplemental disaster commodities than would attacks affecting mostly rural, lightly populated areas. Attacks involving radiological, biological, or chemical agents would require extensive population protection measures (in-place sheltering or mass evacuations) and would likely cause significant disruptions to supply chains. Commodity needs for those types of attacks would likely be considerable and possibly long-term.
Major Power Outage / Energy Emergency	
Typical Impacts:	Major power outages may be caused by an accidental infrastructure failure, by a natural event such as an ice storm or severe thunderstorm, by deliberate sabotage, or a combination of these events. Power outages typically do not cause physical damage (to any great extent) but may cause significant disruptions to essential systems and services – including resource supply chains. Depending on the incident circumstances and time of year, major power outages may result in extensive mass care operations for the duration of the outage. Supplemental disaster commodities may be required for a short period of time until power is restored and essential services resume. Ice storms and severe thunderstorms typically cause power outages because utility poles and wires may be severely damaged and/or downed. If cold weather continues after an ice storm, utility restoration may be slowed which may require longer mass care operations. In those situations, the need for supplemental commodities may be greater. A major energy emergency (i.e., for gasoline, natural gas, fuel oil, or propane) may be caused by a number of factors, including: 1) natural disasters such as severe storms, tornadoes, floods, or earthquakes that cause physical destruction to energy production or distribution facilities; 2) sabotage of facilities / processes; 3) human errors, accidents, and equipment failure; 4) curtailment of oil supplies which causes a sharp, sudden escalation in energy prices; and 5) a sudden surge in energy demand caused by a national security emergency involving mobilization of U.S. defense forces. Any of these events, singularly or in combination, may cause a serious, prolonged energy emergency that may necessitate extended mass care operations.
Commodities Generally Needed:	**To support mass care operations:** Food; Drinking Water / Ice; Medicines / Medical Supplies; Baby Formula / Food and Diapers; Cots (incl. bariatric cots) / Cribs / Bedding / Blankets; Personal Care Kits / Towels; Additional Clothing. In winter months, there may also be a significant need for portable indoor heaters. **If power is out:** Dry Ice; Flashlights / Batteries; Emergency Generators (as applicable).
Considerations:	Commodity needs would be determined by the nature, extent, and expected duration of the outage / emergency, the characteristics of the affected area, and the time of year. Outages / emergencies affecting densely populated urban areas would likely require more supplemental disaster commodities than would outages / emergencies affecting mostly rural, lightly populated areas. Outages / emergencies that are longer-term in nature would require more commodities than would shorter-duration outages / emergencies because of the need for mass care operations. Outages / emergencies that occur during times of extreme temperatures (cold or hot) would require more of certain commodities than would outages / emergencies that occur during times of more moderate temperatures.
Extended Hazardous Material Incident	
Typical Impacts:	Hazardous materials are any solid, liquid, or gas that can cause harm to humans and other living organisms due to it being radioactive, flammable, explosive, toxic, corrosive, a biohazard, an oxidizer, an asphyxiant, or capable of causing severe allergic reactions. Although safety precautions are generally taken during the transport, storage, use, and disposal of hazardous materials, incidents occur with some regularity. Incidents can occur at a fixed site such as a manufacturing plant, or they can occur during transport on highways, rail, air or water. Depending on the type and amount of hazardous material that is released, impacts may include injuries, loss of life, property damage at the site and in surrounding areas, environmental contamination, and possibly a temporary curtailment or cessation of essential systems and services. Hazardous material incidents often necessitate evacuations or in-place sheltering of the affected population. Large-scale incidents that reach the "Major Release" level may cause extended evacuations or in-place sheltering operations until the situation can be stabilized and cleanup / recovery operations are substantially completed.
Commodities Generally Needed:	**To support mass care operations:** Food; Drinking Water / Ice; Medicines / Medical Supplies; Baby Formula / Food and Diapers; Cots (incl. bariatric cots) / Cribs / Bedding / Blankets; Personal Care Kits / Towels; Additional Clothing.
Considerations:	Most hazardous material incidents will not require the provision of supplemental disaster commodities. In general, only those incidents that reach the "Major Release" level are likely to require extensive public protective actions (in-place sheltering or mass evacuation) and/or tax existing response / recovery systems. A Major Release may require the provision of supplemental disaster commodities if an extended mass evacuation and sheltering operation occurs.
Nuclear/Military Attack	
Typical Impacts:	A nuclear military attack would likely result in unimaginable devastation for targeted areas. Even a nuclear weapon with a small yield is significantly more powerful than the largest conventional explosives, and a single weapon is capable of destroying or seriously disabling an entire city or area. In addition to the initial blast and heat wave caused by a nuclear explosion, the radioactive fallout that follows would contaminate everything it comes in contact with. Virtually everything and everyone within the direct weapons effects area that is not substantially sheltered / protected would be destroyed. The initial blast would then be followed by a radioactive fallout plume that would cause widespread and long-term environmental contamination. Contaminated areas would have to undergo extensive decontamination before they could be occupied or used again. Virtually all essential systems and services within the affected area would be seriously disrupted (at best) or destroyed.
Commodities Generally Needed:	**To support mass care operations:** Food; Drinking Water / Ice; Medicines / Medical Supplies; Baby Formula / Food and Diapers; Cots (incl. bariatric cots) / Cribs / Bedding / Blankets; Personal Care Kits / Towels; Additional Clothing. **To repair / restore damaged structures:** Tarps / Plastic Sheeting (for temporary roof / window / wall repairs); Cleaning Supplies. **If power is out:** Dry Ice; Flashlights / Batteries; Emergency Generators (as applicable).

Commodity Considerations for Primary Michigan Disasters (cont.)

Nuclear Military Attack (cont.)	
Considerations:	A nuclear military attack would generate an unprecedented need for supplemental disaster commodities to support the surviving population and the response / recovery effort. If other areas of the country were also affected (almost a certainty), the need for commodities would in all likelihood exceed the collective capability of the federal government and the private sector to provide them.
Extended Nuclear Power Plant Accident	
Typical Impacts:	A nuclear accident could result in the release of potentially dangerous levels of radioactive materials into the environment that could affect the health and safety of the public living near the nuclear power plant. The degree and area of environmental contamination could vary greatly depending on the type and amount of radioactivity and the weather conditions. Potential impacts may include injuries or loss of life to those not properly protected, environmental contamination, and a temporary curtailment or cessation of essential systems and services. A nuclear accident may require a mass evacuation or in-place sheltering of the affected population. Large-scale accidents that reach the "General Emergency" level may cause extended evacuations or in-place sheltering operations.
Commodities Generally Needed:	**To support mass care operations:** Food; Drinking Water / Ice; Medicines / Medical Supplies; Baby Formula / Food and Diapers; Cots (incl. bariatric cots) / Cribs / Bedding / Blankets; Personal Care Kits / Towels; Additional Clothing. **To repair / restore contaminated structures:** Cleaning Supplies (to remove radioactive materials). **If power is out (due to reactor shutdown and inability to replace lost generating capacity):** Dry Ice; Flashlights / Batteries; Emergency Generators (as applicable).
Considerations:	Only a "General Emergency" classification is likely to prompt extended public protective actions (in-place sheltering or mass evacuation) and/or tax existing response / recovery systems. A General Emergency will likely require the provision of supplemental disaster commodities if an extended mass evacuation and sheltering operation occurs.
Epidemic / Pandemic or Other Extended Public Health Emergency	
Typical Impacts:	Public health emergencies can take many forms – disease epidemics / pandemics, large-scale incidents of food or water contamination, extended periods without adequate water and sewer services, harmful exposure to chemical / radiological / biological agents, and large-scale infestations of disease-carrying insects or rodents – to name just a few. Public health emergencies can occur as primary events by themselves, or they may be secondary events to another disaster or emergency such as a flood, tornado, or hazardous material incident. The common characteristic of most public health emergencies is that they adversely impact, or have the potential to adversely impact, large numbers of people. Public health emergencies can be worldwide (a pandemic), national, statewide, regional, or localized in scope and magnitude. Potential impacts may include injuries and/or loss of life, environmental contamination, and a temporary curtailment or cessation of essential systems and services – including resource supply chains. Animal diseases can also have serious impacts on the human population. In the event of an outbreak of "mad cow," foot-and-mouth disease, or other wide-spread animal infectious disease, disposal of animal carcasses may be required to prevent disease spread and to protect human health. In particularly severe and/or widespread incidents, the number of carcasses may be in the thousands or possibly even hundreds of thousands.
Commodities Generally Needed:	**To support mass care operations:** Food; Drinking Water / Ice; Medicines / Medical Supplies; Baby Formula / Food and Diapers; Cots (incl. bariatric cots) / Cribs / Bedding / Blankets; Personal Care Kits / Towels; Additional Clothing. **To restore contaminated structures:** Cleaning Supplies (for infection control purposes). **If power is out (due to forced curtailment / cessation of power generation):** Dry Ice; Flashlights / Batteries; Emergency Generators (as applicable).
Considerations:	Disease epidemics / pandemics would be particularly problematic, as they may force a temporary curtailment or cessation of essential systems and services – including resource supply chains. In some instances, segments of the population may have to be quarantined in their homes or at other facilities, which would place additional strains on resource supply chains. Depending on the nature, scope, magnitude, and anticipated duration of the health emergency, it is likely that at least some supplemental disaster commodities would be required until traditional resource supply chains could be restored to their normal capacity. Health / medical commodities would almost certainly be required to provide for the care of the ill population. In addition, mass casualties may require an infusion of supplemental health / medical commodities to help meet temporary body storage and processing needs. *It is likely that most of the health / medical commodities required could be obtained through established programs such as the National Disaster Medical* System (NDMS), the Strategic National Stockpile (SNS) Program, and the Metropolitan Medical Response System (MMRS). These programs have their own established activation protocols and systems and are coordinated through the appropriate state steward agency within the SEOC.

Typical Impacts Sources: Michigan Hazard Analysis; MSP/EMHSD Disaster Files; Department of Homeland Security – National Planning Scenarios.

F. DISASTER COMMODITIES LIST, BY TYPE / KIND – NATIONAL INCIDENT MANAGEMENT SYSTEM (NIMS) TYPING

The National Incident Management System (NIMS) establishes a comprehensive, integrated national mutual aid and resource management system that provides the basis to type, order, and track all (federal, state, and local) response assets. Over 120 different kinds of resources are included within the NIMS. The NIMS' use of standard definitions and terminology provides the standardization required to ensure a seamless, consistent nationwide approach to resource typing. This allows emergency management personnel to identify, locate, request, order, and track outside resources quickly and effectively.

Within the NIMS, the typed resource assets are organized by:

- **Category** – the function for which the resource is most useful (e.g., firefighting, law enforcement, health and medical, etc.).
- **Kind** – the broad class of characterization, such as teams, personnel, equipment, and supplies; metrics have been developed for each kind and are measurements of capability or capacity.
- **Type** – the measure of minimum capabilities to perform its function (e.g., Type I implies a higher capability than Type II).

Whenever possible, the State of Michigan will use the resource definitions found in the NIMS when requesting or otherwise transacting supplemental disaster commodities through FEMA/DHS, from other states through the EMAC, from other Michigan jurisdictions through the MEMAC, or from private sector entities (business / industry and private relief organizations). FEMA Publications 507 ("Glossary of Terms and Definitions") and 508 ("Typed Resource Definitions"), or the most current available guidance if different from Publications 507 and 508, will be used to establish resource definitions, types and categories. When a particular resource asset (commodity) is not listed in the NIMS, the most common name for the item will be used (e.g., tarps, plastic sheeting, sandbags, food, drinking water, etc.).

The most current federal NIMS guidance will be accessed, when required, from the National Integration Center web site at www.fema.gov/nims.

G. LOGISTICS / DONATIONS MANAGEMENT PHASES – PLANNING AND OPERATIONAL CONSIDERATIONS

Management Phase	Primary Planning and Operational Considerations
NORMAL OPERATIONS (prior to a disaster that creates the need for supplemental commodities)	• Designate a DLMC. • Establish and train a DLDMT. • Designate and equip a DLDMC. • Develop / review / update (as appropriate) a Disaster Logistics and Donations Management Plan as a support plan or appendix / annex to the applicable emergency operations plan (state, local, regional), to include the following critical areas: a) List of members (with contact information) and task assignments for the Disaster Logistics and Donations Management Team; b) List of transportation, facility, equipment, and personnel resources that may be needed for disaster logistics / donations management operations; c) Sample right-of-entry / hold harmless agreements (indemnifying all levels of government against potential claims from conducting work on private property); d) Sample public information releases; e) Establishment of an incident assessment process to identify and define commodity needs; f) Identification of critical areas, facilities, and populations for priority commodities distribution; g) Establishment of a process for general commodities distribution; h) Identification of Control Check Points, Staging Areas / Warehouses, Points of Distribution, and the Base / Camps; i) Compliance with appropriate regulatory requirements (local, state, and federal – e.g., ADA); j) Documentation requirements for logistics / donations management activities (for cost reimbursement, legal protection, regulatory requirements, historical records, plan updates, etc.). At a minimum, document the following: - Labor, equipment, rental fees, and material costs - Mutual aid agreement costs - Use of volunteer resources, including labor - Administrative costs - Disposal costs (if any, for unused / unneeded commodities or donations) - Types, kinds, and quantities of commodities received and distributed Note: The MSP/EMHSD and MDHS are the central coordinating agencies for logistics / donations management functions at the state-level in Michigan, in accordance with the MEMP. In that role, they will help facilitate the development of logistics / donations management capability at the local jurisdiction level through plan and procedure development, interpretation of planning and program guidance, training, plan exercising, information sharing, provision of technical assistance to identified support agencies, and other appropriate activities.
INCREASED READINESS (a potential disaster is approaching / imminent that may require supplemental commodities and/or result in unsolicited donations of goods and/or services)	• Alert the DLDMT and others involved in the operation. • Place the DLDMC and identified support facilities (i.e., Control Check Points, Staging Areas / Warehouses, Points of Distribution, and the Base / Camps – as applicable) on standby for possible activation. Identify alternative facilities if pre-designated facilities are likely to be significantly impacted by the disaster. • Review (and update as required) applicable aspects of the logistics / donations management plan, including contact information and right-of-entry / hold harmless agreements. • Provide expedient training (as required) for the DLDMT and other involved personnel. • Contact needed resources to determine general availability. • Review commodity distribution options for the anticipated affected areas and for functional needs populations. (Note: Many disasters are likely to occur without warning. In those cases, the Increased Readiness considerations would have to be addressed during the Response Phase, along with the other established considerations listed below.)

(See next page for Response and Recovery Phases.)

G. LOGISTICS / DONATIONS MANAGEMENT PHASES – PLANNING AND OPERATIONAL CONSIDERATIONS (cont.)

Management Phase	Primary Planning and Operational Considerations
RESPONSE (commodities needs assessment; commodities procurement, transport, delivery, and initial distribution; donations processing)	• Assess the need for supplemental commodities through the established incident assessment process. • Based upon need, request supplemental commodities through FEMA, the EMAC / MEMAC, state assistance through the MSP/EMHSD, mutual aid, direct donations requests, private sector procurement, or other appropriate avenues. • Activate the DLDMT and DLDMC. • Activate identified logistics / donations management support facilities (i.e., Control Check Points, Staging Areas / Warehouses, Points of Distribution, the Base / Camps) as required. • Work with the MSP/EMHSD and FEMA to activate the designated federal Mobilization Center(s) if federal commodities are being provided. • Activate the appropriate elements of the logistics / donations management plan. • Establish commodity distribution priorities, based on incident circumstances. • Activate other needed resources (transport, equipment, personnel) for the operation. • Initiate commodity receipt, transport, and distribution activities in accordance with established priorities. • Initiate donations processing activities in accordance with established priorities. • Initiate a vigorous public information campaign to control or influence disaster donations, if unsolicited, non-value-added donations have or may become an issue impeding the response / recovery effort. • Issue public information releases regarding commodities availability and distribution, and donations, as appropriate. • Request supplemental logistics / donations management assistance as required (i.e., mutual aid, state assistance through the MSP/EMHSD, federal Stafford Act or other direct assistance, NGO / private sector assistance, etc.). • Track / document (in the EOC CIMS, if possible) all major decisions and actions regarding the logistics / donations management operation. • Track / document (in the EOC CIMS, if possible) all costs incurred in the logistics / donations management operation (e.g., labor hours, equipment hours, materials used, equipment rented, contracts activated or awarded, facility usage, etc.).
RECOVERY (general commodities distribution; operation closeout)	• Distribute commodities directly to targeted facilities / populations through established distribution networks, and generally though Points of Distribution. • Continuously issue public information releases to ensure that all affected populations are aware of commodities availability and distribution. • Continue with a vigorous public information campaign to control or influence disaster donations, if unsolicited, non-value-added donations have become an issue impeding the recovery effort. • Continuously monitor distribution operations to ensure that: 1) commodities are being properly distributed; 2) all populations are being reached in a timely manner; 3) appropriate safety and sanitation measures are being followed; and 4) Points of Distribution are secure and being controlled properly. • Work with commodity providers / donors to determine appropriate disposal methods for unneeded / unused commodities and donations. • Close / restore support facilities at the conclusion of the disaster logistics / donations management operation.

THE REMAINDER OF THIS PAGE INTENTIONALLY LEFT BLANK.

H. DONATIONS INTAKE AND PROCESSING CENTER – PLANNING AND OPERATIONAL CONSIDERATIONS

Background Notes: Disaster donation offers may be received via telephone or online. The Donations Intake and Processing Center (DIPC) – a functional element of the Disaster Logistics and Donations Management Center (DLDMC) – must be equipped to handle both types of transactions. At a very minimum, the DIPC must have one dedicated phone line and one computer terminal. Large-scale / catastrophic disasters will likely require a multi-line phone bank and multiple computers to receive, record, and process donation offers. Ideally, each phone operator will have a computer terminal to record the donation offer directly into the CIMS using the "Donations Management" input form as a format. That may not always be possible, however, due to space constraints, lack of connectivity, and lack of readily-available computer equipment. Therefore, it is likely that some donation offers received by telephone will simply be recorded on hardcopy on the "Donation Offer Form" (an abbreviated and modified version of the CIMS Donations Management input form) for later entry into the CIMS.

A five-step process will be followed with regard to establishment of the DIPC. Unless delegated, responsibility for implementation of these five steps rests with the DDMC:

- Step 1: Publicize donation preferences
- Step 2: Establish / equip the DIPC
- Step 3: Receive and record donation offers
- Step 4: Process donation offers
- Step 5: Dismantle / close-out the DIPC

STEP 1: PUBLICIZE DONATION PREFERENCES
The PIO is responsible for issuing press releases and coordinating the posting of donation preference information on the jurisdiction's web and social media sites. The DDMC, PIO, appropriate members of the DLDMT, and the SEOC Incident Commander and Operations Section Chief will jointly determine the donation preferences for the incident based on the actual / anticipated needs of the affected population. For most incidents, cash contributions to established disaster relief organizations will be the preferred donation. However, if incident circumstances dictate that other types of donations are needed, that information will be publicized early, often, and widely. The goal of the public information campaign will be to stem an influx of unsolicited, unneeded items and/or spontaneous, unaffiliated volunteers. Although it is unlikely that the campaign will stop all unwanted / unneeded donations (of goods and/or services), it is likely to help. The sample public information templates found in Attachment B will be used to develop the appropriate materials.

STEP 2: ESTABLISH / EQUIP THE DIPC
The following factors will be considered:

Space / Location: Ideally, the DIPC will physically be part of the DLDMC. If space and/or logistical reasons will not allow for that, then the DIPC will be located adjacent to or in close proximity to the DLDMC. For operational effectiveness, it is important that the DIPC be located within or close to the DLDMC, and be within reasonable proximity to the SEOC. In some cases, it may be possible to locate the DLDMC and DIPC at another facility with direct phone links to the SEOC. This is not considered an ideal set-up, however. The DIPC will have two dedicated areas – one for phone and online operations and one for the DLDMT to review and process offers. The anticipated size of the operation will determine how much square footage is required. (The nature, scope, magnitude, and anticipated duration of the incident will dictate, to a large extent, the size of the operation. In addition, competing response and/or recovery functions, such as a disaster debris management or mass sheltering operation, will necessarily compete for square footage with the DIPC. Adjustments and compromises will likely have to be made once the full scope of response and recovery operations is known.

Background Note: The DIPC layout will be dictated by the physical constraints of the facility ultimately used, and the equipment needs. As there are many acceptable ways to organize the DIPC, a "standard" layout has not been developed. However, the simple box diagrams found at the end of this Attachment provide examples of general room arrangements which might work well in many situations. These diagrams should be considered when establishing the layout of the DIPC.

Hours of Operation: Hours will be based on need. Ideally, the phone bank should be open from early morning until late evening during the first several days of the disaster. Voice mail will be used for after-hours operation. Online offers will also be encouraged for after-hours contact, with appropriate follow up provided by DIPC staff the following business day.

Equipment: Equipment requirements will be based on need. The number of telephone lines will be determined by the disaster circumstances and staff, equipment, and space availability. FEMA recommends up to 50 telephone lines and computers for a large / catastrophic disaster (see checklist below); however, most incidents will require considerably less phone lines and computers. Telephone system features will include, as appropriate, call-waiting, answering capability, and a rotating system for taking calls.

Background Notes: The FEMA donations management training module provides the following checklist of space and equipment requirements for a donations management phone bank operation for a large-scale / catastrophic disaster. This checklist serves as a guide when arranging for facilities, equipment, and personnel. (Note: Actual needs / requirements for the jurisdiction's operations will be determined by the disaster conditions and other factors.)

Phone Bank Inventory Checklist – FEMA Recommendations

- 3,000 square feet of office space
- 50 phones and phone lines
- 50 operator headsets
- 60 chairs
- 25 6-foot tables
- 1 4X8-foot display board
- 1 copy machine with paper
- 1 facsimile machine with paper
- 1 laser printer with paper
- 2 computer workstations (with LAN capability)
- 1 phone operator per unit
- 1 supervisor per 4-8 operators
- 1 coordinator
- Data entry (computer / online) operators
- *A supply of state highway maps*

Personnel / Training: Training will be provided to all DIPC staff (computer and telephone operators) for each disaster – even if the staff has prior experience in DIPC operations. As required, provisions will be made for bilingual staff (online and telephone operators) to accommodate offers from non-English speaking donors. Training will be provided by the DDMC unless delegated. Possible sources of supplemental personnel for DIPC operations include but are not limited to: state agencies and FEMA (via the MSP/EMHSD); volunteers from NGOs, the Citizen Corps, community- and/or faith-based organizations, and private industry; and temporary employees from an employment service.

Key Messages: Key messages regarding urgent needs or concerns (e.g., need more bottled water and plastic tarps) will be handwritten on flipcharts and/or displayed electronically in view of computer and telephone operators so that these key messages will be conveyed to potential donors, and in a consistent manner.

STEP 3: RECEIVE AND RECORD DONATION OFFERS

The DIPC will begin taking telephone and online donation offers as soon as possible after being established and equipped. Every effort will be made to discourage unsolicited donations. Essentially, if the good and/or service is not identified as a needed commodity (i.e., value-added donation), the potential donor will be requested to donate to a local human service organization and/or to consider making a cash donation to one of the organizations identified in the donation preferences public information releases. Donations Intake / Processing Specialists will enter donor information on value-added donations directly into the CIMS (using the "Donations Management" input form, if using a computer terminal that is connected to the CIMS), or on a "Donation Offer Form" (hardcopy or

electronic). All information recorded on hardcopy forms will ultimately be entered into the CIMS. The Donations Intake / Processing Specialists task assignment list will guide phone bank and computer entry operations.

STEP 4: PROCESS DONATION OFFERS
The general steps involved in processing donation offers include:

- Sorting goods from services.
- Directing volunteers (donated labor and/or services) to report to and register at the VRC.
- Prioritizing offers based on immediate and longer-term need.
- Routing top-priority offers to the appropriate DLDMT staff for immediate processing.
- Donation processing includes but is not limited to: notifying the appropriate SEOC staff (who can use or direct / coordinate the use of the donation) of its availability; working with donors to coordinate packaging, transport, and delivery of donations; generating a receipt for donors, if requested; and recording the final disposition of the donation in the CIMS.
- Calling or sending a reply email to donors to decline offers (submitted via email or phone message) which are not needed.
- Processing offers with 48 to 72 hours, if possible.

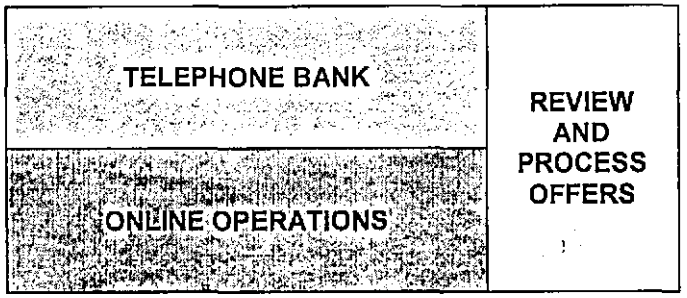
STEP 5: DISMANTLE / CLOSE-OUT THE DIPC
When it becomes clear that the DIPC is no longer necessary, the DLDMT will gradually reduce the hours of phone bank and computer operations and assess the readiness of local agencies and organizations to handle any remaining donation offers which might occur. By the close of the DIPC, the status of all donation offers made to that date should be clear.

Closure of the DIPC involves the following steps:

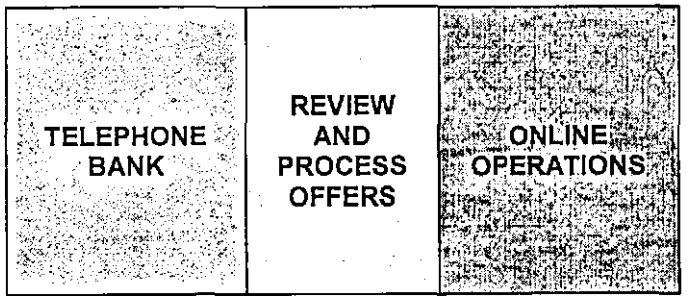
- Distributing a news release notifying the public that the DIPC will close, and when. This release should provide referrals to local agencies and organizations in the event that individuals and companies may still wish to donate goods and/or services.
- Ensuring that all accepted donors have received thank-you notices for donating. The donation receipt (if requested) will be included unless it was previously received by the donor. (This step will be done through the DIPC in most cases; in other cases, the local agencies or organizations that actually used the donations may handle this.)
- Making arrangements for maintenance of records in the CIMS and/or in hardcopy files.
- Making arrangements to disconnect the computer and telephone lines, return equipment (if borrowed) to its owner, and restore the facility to its pre-incident condition.

POTENTIAL DPIC LAYOUTS

Option 1: Combined Telephone Bank and Online Operations



Option 2: Separate Telephone Bank and Online Operations in "Split" Layout



Option 3: Combined Telephone Bank and Online Operations in "Surround" Layout

K. VOLUNTEER REGISTRATION CENTER SUPPLIES

The Volunteer Coordinator "Go Kit" for the VRC should include office supplies, forms, lists, maps, and special equipment to support the following functions within the VRC:

VRC Function	Required Support Supplies
Greeter / Registration / Screening	• Tables • Chairs • Disaster Volunteer Registration Forms • General instruction sheet (for display and/or handout) • Number cards (for maintaining order of processing, as applicable)
Skills Inventory / Assessment	• Tables • Chairs • Disaster Volunteer Registration Forms • Pens / pencils
Interviews	• Tables • Chairs • Telephones (land-line or cellular) • Computer(s) and printer(s) – optional • Writing notepads and pens / pencils
Incident / Area Orientation	• Hardcopy map(s) and/or incident status report(s) and/or computer(s) for information display
Volunteer Identification	• Badge or card blanks for imprinting, with plastic cases and lanyards or fastener system • Credentialing system, if available / as applicable
Safety Training	• Safety supplies (e.g., hard hats, reflective vests, protective clothing, basic first aid supplies, etc.) for safety demonstrations
Volunteer Orientation	• Table • Chairs • Disaster Volunteer Orientation Checklist • Chalk board / dry erase board (or similar)
Telephone Bank	• Tables • Chairs • Telephones (land-line or cellular) • Computer(s) and printer(s) – optional • Donation Offer Forms • Writing notepads and pens / pencils • Desktop baskets for papers

(Table continued on next page.)

K. VOLUNTEER REGISTRATION CENTER SUPPLIES (cont.)

VRC Function	Required Support Supplies
Online Operations (Two functions – 1) processing online volunteer inquiries; and 2) populating volunteer information in the CIMS.)	• Tables • Chairs • Computer(s) and printer(s) • Disaster Volunteer Registration Form (online, for forwarding via e-mail) • Writing notepads and pens / pencils • Desktop baskets for papers
Facilities Management / Maintenance	• Cleaning supplies appropriate for facility (e.g., vacuum for carpeted floors, broom / dustpan and mop / bucket for hard floors, general purpose cleaner solution, waste / recycling receptacles, glass cleaner, clean rags, etc.) • Restroom supplies (e.g., hand soap, disposable wash towels, toilet paper, deodorizer, etc.) • Temporary signage for VRC functions (i.e., paper, cardboard, or plastic construct) • Chairs for volunteers (while waiting) • Photocopy and facsimile machines (as applicable)
Public Information	• Television and portable radio (for event / weather monitoring) – optional • Hardcopies of public information releases regarding volunteers and other incident needs • Hardcopy printouts of incident-related news articles (for wall posting) • Volunteer information pamphlet (if pre-developed locally)
Runners	• Packs / bags (for carrying materials, as applicable)
Support Services*	• Local service / facility information materials – hardcopy • Disposable rain ponchos and/or work gloves • Refreshments (i.e., food, drinks, ice, disposable cups and utensils, etc.) • First aid supplies • Telephone(s) (land-line and/or cellular) and/or computer(s) for volunteer use at the VRC

Background Note: *Support Services are not required, but may be desirable to ensure that: 1) volunteers are better able to focus on their assignments rather than arranging for basic necessities; 2) the safety and general well-being of volunteers is adequately addressed; and 3) volunteers will not need to use response and recovery resources intended for disaster survivors. The State must pre-determine the level to which it will provide support services for emergent / unaffiliated volunteers participating in response and/or recovery operations, based on incident conditions at the time.

M. DISASTER VOLUNTEER INTERVIEW RECORD

Background Note: This form can be used to aid in conducting interviews of potential disaster volunteers. The list of interview questions can be customized to fit local needs and conditions, as required.

STEP 1: INTERVIEW	
Name of Volunteer	
Name of Interviewer	
Interview Date	
REVIEW OF APPLICATION FORM	
Clarification of missing / unclear information on application (note additions / revisions ►)	
QUESTIONS	
Why do you want to volunteer? What do you hope to achieve?	
What type of work do you most enjoy? Least enjoy? Do you have a particular interest?	
Do you work best alone or with others? Why?	
What kind of supervision do you prefer?	
Availability (days / hours)? Do you have access to a vehicle for volunteer work? (Y / N)	
What questions do you have?	
MATCH WITH VOLUNTEER POSITIONS	
Discuss potential volunteer positions and check match of interest, qualifications, and availability (note best possibilities ►)	
Are there any physical limitations which may affect volunteer placement? (Y / N) (if Y, describe ►)	

(Form continued on next page.)

M. DISASTER VOLUNTEER INTERVIEW RECORD (Page 2)

STEP 2: INTERVIEWER ASSESSMENT AND RECOMMENDATIONS (post-interview)	
Appearance	
Disposition / Interpersonal Skills	
Reaction to Questions	
Physical Restrictions	
RECOMMENDED ACTION (complete only one)	
Place (indicate disaster position ►)	
Investigate Further (list reasons ►)	
Refer to (indicate organization / agency ►)	
Decline (list reasons not suitable ►)	
NOTIFICATION / PLACEMENT SPECIFICS	
Volunteer Notified of Decision (list method and date notified ►)	
Work Location / Start Date and Time	
Comments (complete as applicable ►)	

(Form Content Source: FEMA IS-244 Training Course – Developing and Managing Volunteers)

N. DISASTER VOLUNTEER ORIENTATION* CHECKLIST

Background Notes: This form can be used to aid in conducting disaster volunteer orientations, prior to deployment, at the VRC. This of topics can be customized to fit local needs and conditions, as required.

*An Orientation is not position-specific training. It is merely an overview of the situation, the expectations for volunteers while on the job, anticipated incident conditions, and other general situational factors. Volunteers will receive position-specific training from the agency / organization they are assigned to for disaster work. The Orientation will be conducted at the VRC, prior to deployment. It may be conducted in a group setting, or individually, as dictated by conditions at the time.

X	CHECKLIST OF ACTIVITIES / CONSIDERATIONS
	Assign mentor / supervisor to each volunteer, and ensure volunteer knows where and when to report for duty.
	Review jurisdiction map and information, aerial photos and maps / diagrams of incident scene (as applicable), and incident-related information collected to date.
	Hand out support items, as applicable (e.g., maps, comfort care kits, disposable rain poncho and/or gloves, etc.).
	Review expectations regarding personal conduct during volunteer work (e.g., punctuality, attention to duty, safe work practices, dealing with disaster survivors and/or the media, responsible use of social media, responsible photographic practices, confidentiality regarding disaster survivors, etc.).
	Review administrative details related to volunteer assignment (e.g., starting / ending times, phones, parking, restrooms, breaks and lunch, check in/out procedures, emergency procedures for severe weather and other hazards, etc.).
	Provide summary of incident goals and objectives – short-term and long-term – and how volunteer will be contributing to accomplishment of those goals and objectives.
	Review disaster organizational chart (if available) to show where volunteer fits into overall response and/or recovery structure.
	Review general safety policies, procedures and practices, indicating to volunteer that additional (position-specific) safety training will be provided prior to commencing work.
	As applicable, provide overview of volunteer's work in relation to federal disaster relief program implementation (i.e., volunteer's work may aid in receiving assistance; for example, volunteer's efforts in collecting and piling up debris may result in increased federal or state funding for debris clearance and removal).
	Review other subjects as applicable.

O. SAMPLE RIGHT-OF-ENTRY PERMIT / HOLD HARMLESS AGREEMENT
(FOR FACILITY USAGE)

Permit No._____

(Property Address / Description)

(County Name)

(City, Village or Township Name)

(Name[s] of Owner[s])

(Date)

I / We, (insert name[s] of owner[s]), the owner(s) of the property commonly identified as (insert property address), in the (City / Village / Township) of (insert name), State of Michigan, do hereby grant and give freely and without coercion, the right of access and entry to said property to the (County / City / Village / Township) of (insert name) (and/or State of Michigan), its agencies, contractors, and subcontractors thereof, for the purpose of receiving, storing, staging, inventorying, packaging, and distributing disaster commodities from the above described property.

It is fully understood that this permit is not an obligation to participate in the disaster commodities distribution effort being conducted from the above described property. The undersigned agrees and warrants to hold harmless the (County / City / Village / Township) of (insert name) , State of Michigan (and/or State of Michigan), its agencies, contractors and subcontractors, for damage of any type, whatsoever, either to the above described property or persons situated thereon and hereby release, discharge and waive any action, either legal or equitable which might arise out of any activities on the above described property.

I / We (have ___, have not ___) (will ___, will not ___) receive any compensation for the usage of the above described property for the above described uses. For the considerations and purposes set forth herein, I hereby set my hand this (insert numerical date) day of (insert month), 20_____.

P. LOGISTICS AND DONATIONS MANAGEMENT RECORD KEEPING

The DLDMT will use the following forms / formats to document logistics management (and applicable donations management) costs and other aspects of the logistics and donations management operation:

Background Notes: These forms / formats are recommended in FEMA Publications 325, "Public Assistance Debris Management Guide" and 323, "Public Assistance Applicant Handbook," for use in incidents that involve activation of the PAGP. (The forms in FEMA Publication 325 are also applicable to a logistics management operation.) For brevity purposes, not all of the forms / formats are shown in this Attachment, and those that are have been reduced in size. The most recent version of the electronic forms – which may vary slightly from the ones depicted as examples in this plan – will be downloaded for use, as required, from the FEMA website (www.fema.gov/government/grant/pa/forms.shtm or http://docnet.fema.gov). The forms are also available in the CIMS under "Reference Info" and then "FEMA Forms."

Form Number	Form Title	Record Keeping Purpose
FF90-123	Force Account Labor Summary Record	Used to record force account personnel costs.
FF90-124	Materials Summary Record	Used to record supplies / materials taken out of stock or purchased.
FF90-125	Rented Equipment Summary Record	Used to record the costs of rented or leased equipment.
FF90-126	Contract Work Summary Record	Used to record the costs of work done by contract.
FF90-127	Force Account Equipment Summary Record	Used to record force account equipment use costs.
FF90-128	Applicant's Benefits Calculation Worksheet	Used to record employee fringe benefits.
FF90-91D	Project Worksheet – Photo Sheet	Used for photographs and descriptions related to a PAGP project.
(Insert form number)	(Insert name of additional state form used)	(Insert description of form)
(Insert form number)	(Insert name of additional state form used)	(insert description of form)

Q. POINTS OF DISTRIBUTION – PLANNING AND OPERATIONAL CONSIDERATIONS

Background Note: The guidance found in this Attachment is taken from MSP/EMHSD Publication 107a, "Disaster Logistics and Donations Management Planning Handbook," and is intended to assist local jurisdictions in Point of Distribution selection, layout, operation, and closure. As such, it contains many references to local logistics / donations management positions – almost all of which have an equivalent, counterpart position at the state level. If state-level management assistance with a disaster logistics / donations management operation (a combined operation) is required, many of the decisions regarding facility establishment, layout, operation, and closure will be made jointly between the involved local jurisdiction(s) and state staff.

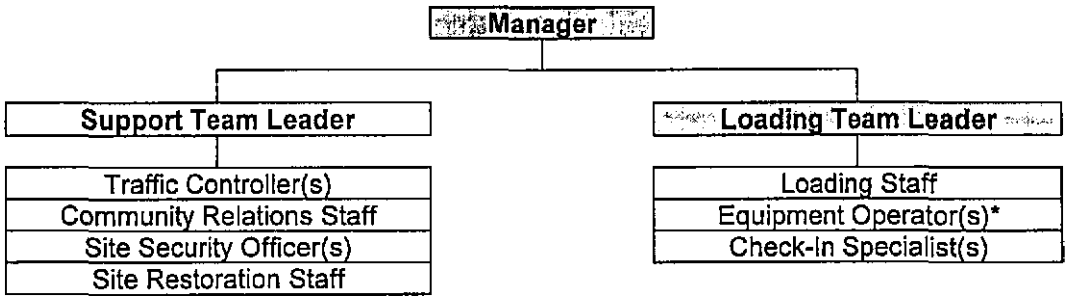
Background. Points of Distribution are local facilities operated by local agencies, churches and other faith-based organizations, and community-based and voluntary organizations, to provide goods (commodities) directly to disaster survivors. Points of Distribution will be located at a site the public recognizes and can easily locate, and will generally have controlled access and security provisions, restrooms, adequate lighting and parking, and access for handicapped individuals. Points of Distribution can be set up indoors (i.e., inside a building) or outdoors (i.e., in a parking lot or other large, open paved or gravel space). Generally, Points of Distribution will be set up to accommodate vehicle traffic (drive-thru), pedestrian traffic (walk-thru), and mass transit traffic (bus). Each person or vehicle will receive a set amount of supplies. (The recommended amount for each person / vehicle to receive is enough for a three-person household. The actual amount of supplies provided, however, will depend on the type of transportation used, the population density of the affected area, and anticipated need. The DLMC will make this determination after considering all relevant factors.) The involved local jurisdiction has primary authority for the activation, operation, and demobilization of Points of Distribution.

Locations. The MSP/EMHSD, working with local EMCs, has pre-identified Point of Distribution locations in each of the districts around the state. (Refer to Attachment W, "Pre-Identified Logistics / Donations Management Facilities – Points of Distribution.") Additional Points of Distribution may also be identified by local jurisdictions based on local logistics / donations management planning efforts. Points of Distribution will be activated by the DLMC based on operational needs, incident conditions, and the capabilities of each individual site / facility. Although any organization is free to open a facility to distribute goods to those in need, the only "official' Points of Distribution are those activated by the DLMC.

Background Notes: Non-official Points of Distribution (e.g., set up in parking lots of active enterprises, along active roadways, in parks, etc.) should generally be discouraged because they may have health, safety, and access concerns that officially-sanctioned Points of Distribution would not have. These facilities may also cause traffic, parking, crowd control and security concerns if not carefully located, planned, and operated. In addition, non-official Points of Distribution may result in: 1) workers not being covered for worker's compensation or liability if an injury occurs during the distribution of commodities; 2) the PODs not being able to adequately communicate with the EOC and other emergency support and coordination facilities; 3) the PODs not having adequate commodities to hand out or resources for operating; and 4) the creation of false expectations on the part of the public regarding the continued availability of certain commodities, or lack of commodities, in the community.

Organizational Structure. The Point of Distribution organizational structure consists of a Point of Distribution Manager, responsible for the overall set-up and management of the facility, a Loading Team, and a Support Team:

POINT OF DISTRIBUTION ORGANIZATIONAL STRUCTURE



*Equipment may include fork lifts, pallet jacks, trucks, etc., as appropriate. Source: FEMA IS-26: Guide to Points of Distribution, modified for this plan

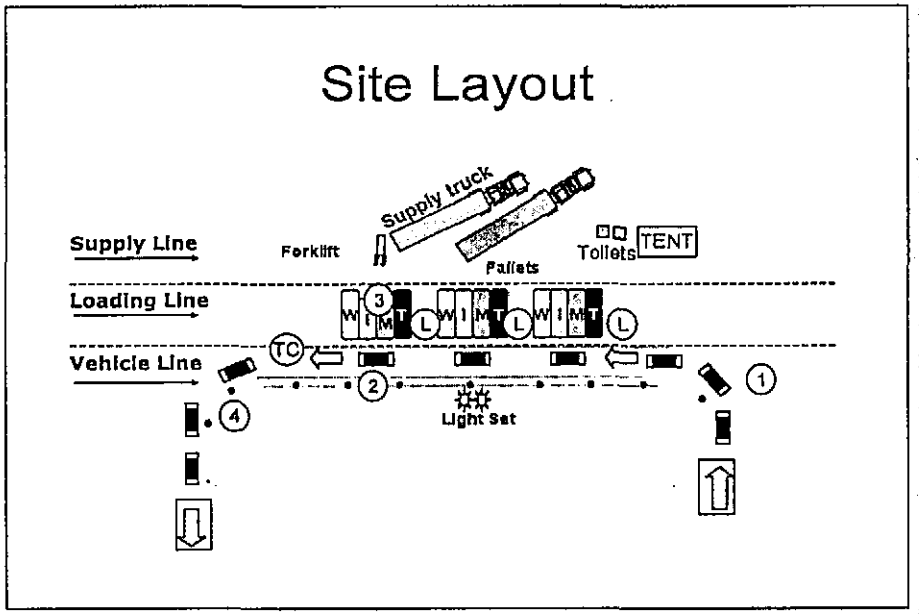
Specific task assignments for these various positions can be found in the "Facility-Specific Roles and Responsibilities" under "Point of Distribution Staff" in the main body of the plan.

Layout. Point of Distribution layouts generally conform to recommendations made by FEMA and the U.S. Army Corps of Engineers, as presented below and in MSP/EMHSD Publication 107a. Refer to Attachment W, "Pre-Identified Logistics / Donations Management Facilities – Points of Distribution," for a current list of designated Points of Distribution.

Background Notes and Site Layout Guidance: When developing the Point of Distribution site layout, there are several considerations to keep in mind: 1. What type of Point of Distribution will it be? Will it accommodate vehicles only (no walk-ups), both vehicles and pedestrians, pedestrians only (no vehicles), and mass transit use? (There are different set up requirements suggested for each.) 2. Are there entrance and exit concerns? Is there more than one entrance / exit point? 3. What is the traffic flow around the site? Will residents have to cross a busy street? Will having a Point of Distribution at this location halt the surrounding traffic and cause a traffic jam? Will this site impede emergency response vehicles? 4. Are there turns within the site or at the entrance / exit points that require extra maneuvering? Can large semi- trucks get in and out without assistance? 5. Prior to setting up and activating a Point of Distribution, make sure there are no hazards threatening the site or staff. (For example, is the Point of Distribution in a location that may flood? Is there debris on the site that could injure someone? Did the disaster create new hazards which must be considered? Is there a structure that could fall on the Point of Distribution? Is there a fire burning nearby that could affect the site?)

Each Point of Distribution site is divided into three areas: 1. The **SUPPLY LINE** is where supply trucks, usually tractor-trailers, have room to unload. This area also includes staff care facilities including restroom facilities and a rest tent. Having an informational bulletin board in the rest tent is a good way to keep the staff updated on conditions, concerns and issues. 2. The **LOADING LINE** is where supplies are kept waiting on stacked pallets to be distributed to the public. This is also where loaders wait while vehicles are moving through the Vehicle Line. 3. The **VEHICLE LINE** is where the public drives through to get supplies. Entry into the vehicle line occurs only when all vehicles have come to a complete stop and the Traffic Controller has instructed the staff to "LOAD."

Points of Distribution provide the same quantity of supplies to each vehicle. In the sample site layout and traffic flow diagram below, notations are made regarding the locations of water (W), ice (I), shelf stable meals (M), and tarps (T).

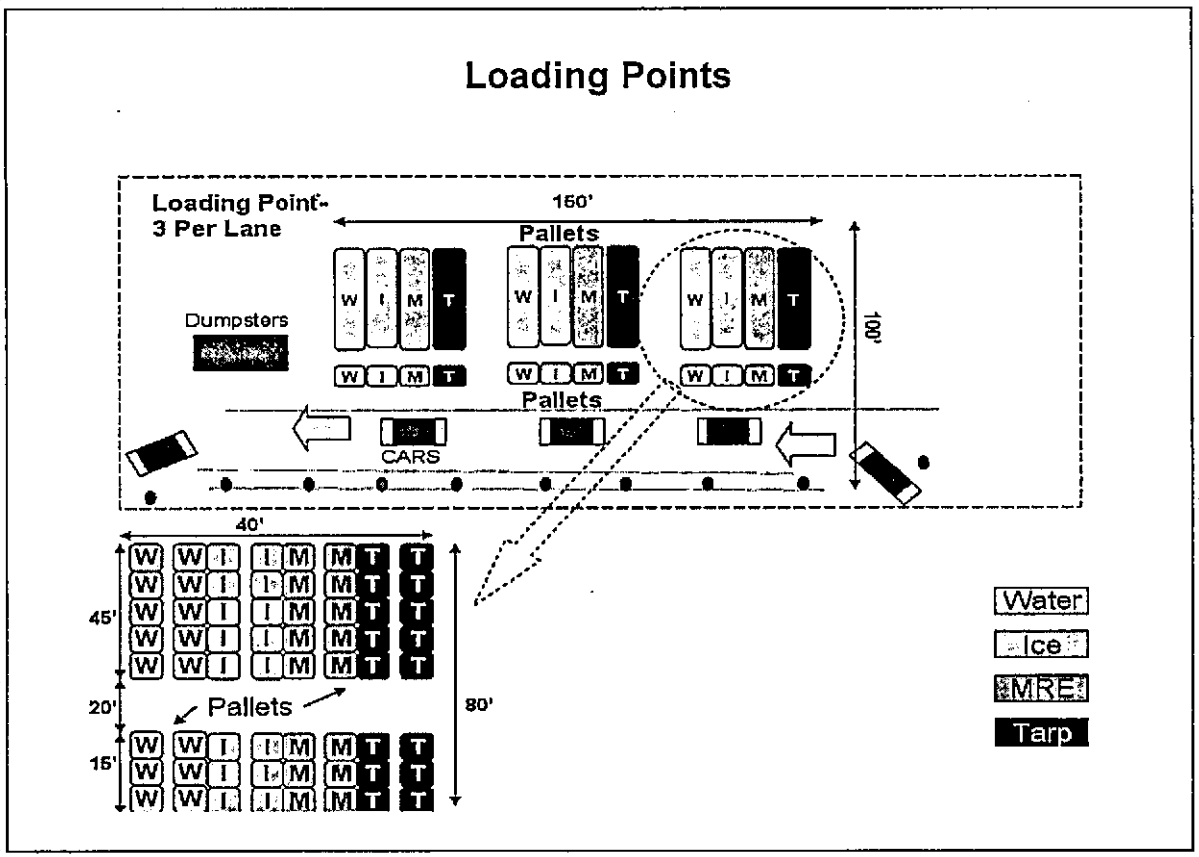


Graphic Source: FEMA IS-26 – Guide to Points of Distribution

Background Notes and Site Layout Guidance (cont.): When setting up a Point of Distribution, the recommended minimum space for each area is: 1) VEHICLE LINE – 20 feet wide; 2) LOADING POINT – 80 feet by 40 feet each; 3) SUPPLY LINE – 50 feet wide.

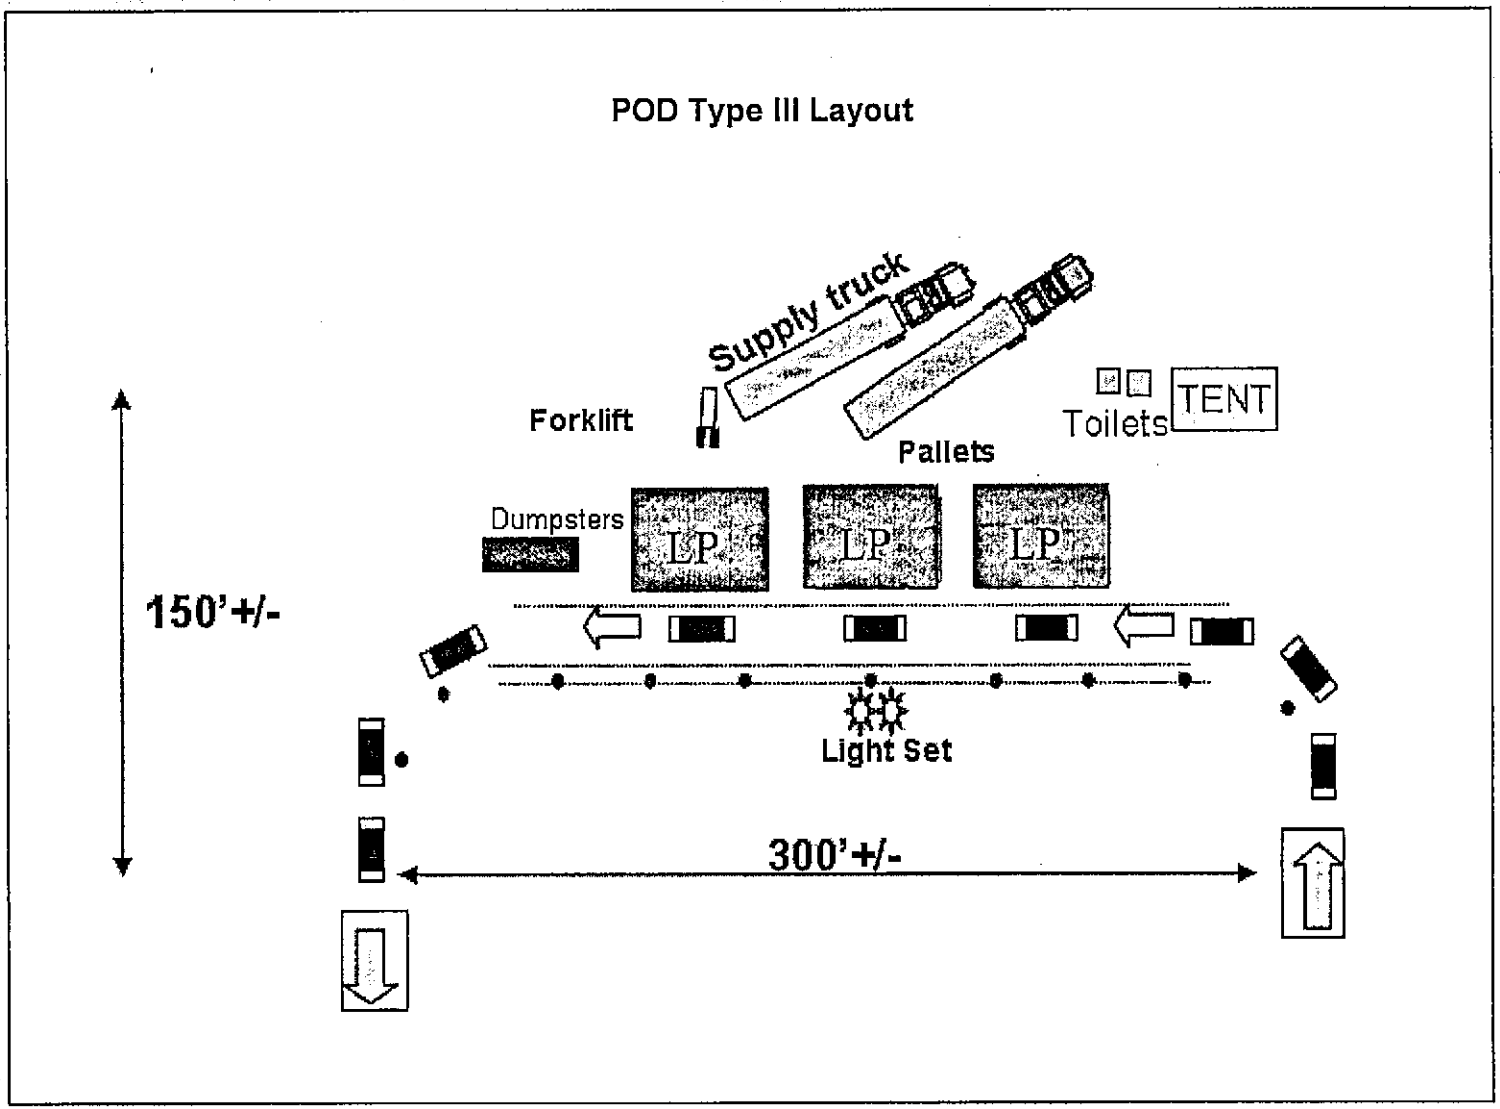
Traffic cones should be used to guide customers through the Point of Distribution site. The standards for placing traffic cones are different for pedestrian and vehicle Points of Distribution. For vehicles, cones should create a lane that is 12 feet wide, and not be placed more than 20 feet apart. For pedestrians, cones should create a lane that is five feet wide, and not be placed more than 10 feet apart. Signage for a Point of Distribution is the same for vehicles and pedestrians. A "Point of Distribution Ahead" sign will provide directions to inbound customers in locating the entrance to the site. If desired, there can be multiple signs placed away from the Point of Distribution to give the estimated distance to the site. An "Enter" sign should be placed to direct customers to enter at the correct point of the vehicle lane. Each loading point should be marked so that customers know to stop for materials to be loaded. An "Exit / Do Not Enter" sign should mark the vehicle lane exit. It is also important to clearly mark the opposite side of the sign with "DO NOT ENTER." Other signs that can be used at the Point of Distribution include but are not limited to: "This Site Staffed By;" "One Way;" and "Turn Here."

A proper layout of the loading points can ensure a smooth and efficient flow of goods through the Point of Distribution. Each loading point should be 80 feet by 40 feet. These dimensions are a guide to be adjusted according to the size and quantity of commodities being distributed. In the diagram above, notations are made regarding the locations of water (W), ice (I), shelf stable meals (M), and tarps (T). If the Point of Distribution is only providing water and food, the loading point can be smaller. Pallets of commodities must be separated at each loading point. This allows for a more efficient loading and re-supply of materials. If pallets of commodities are mixed, loaders will have to spend additional time sorting.



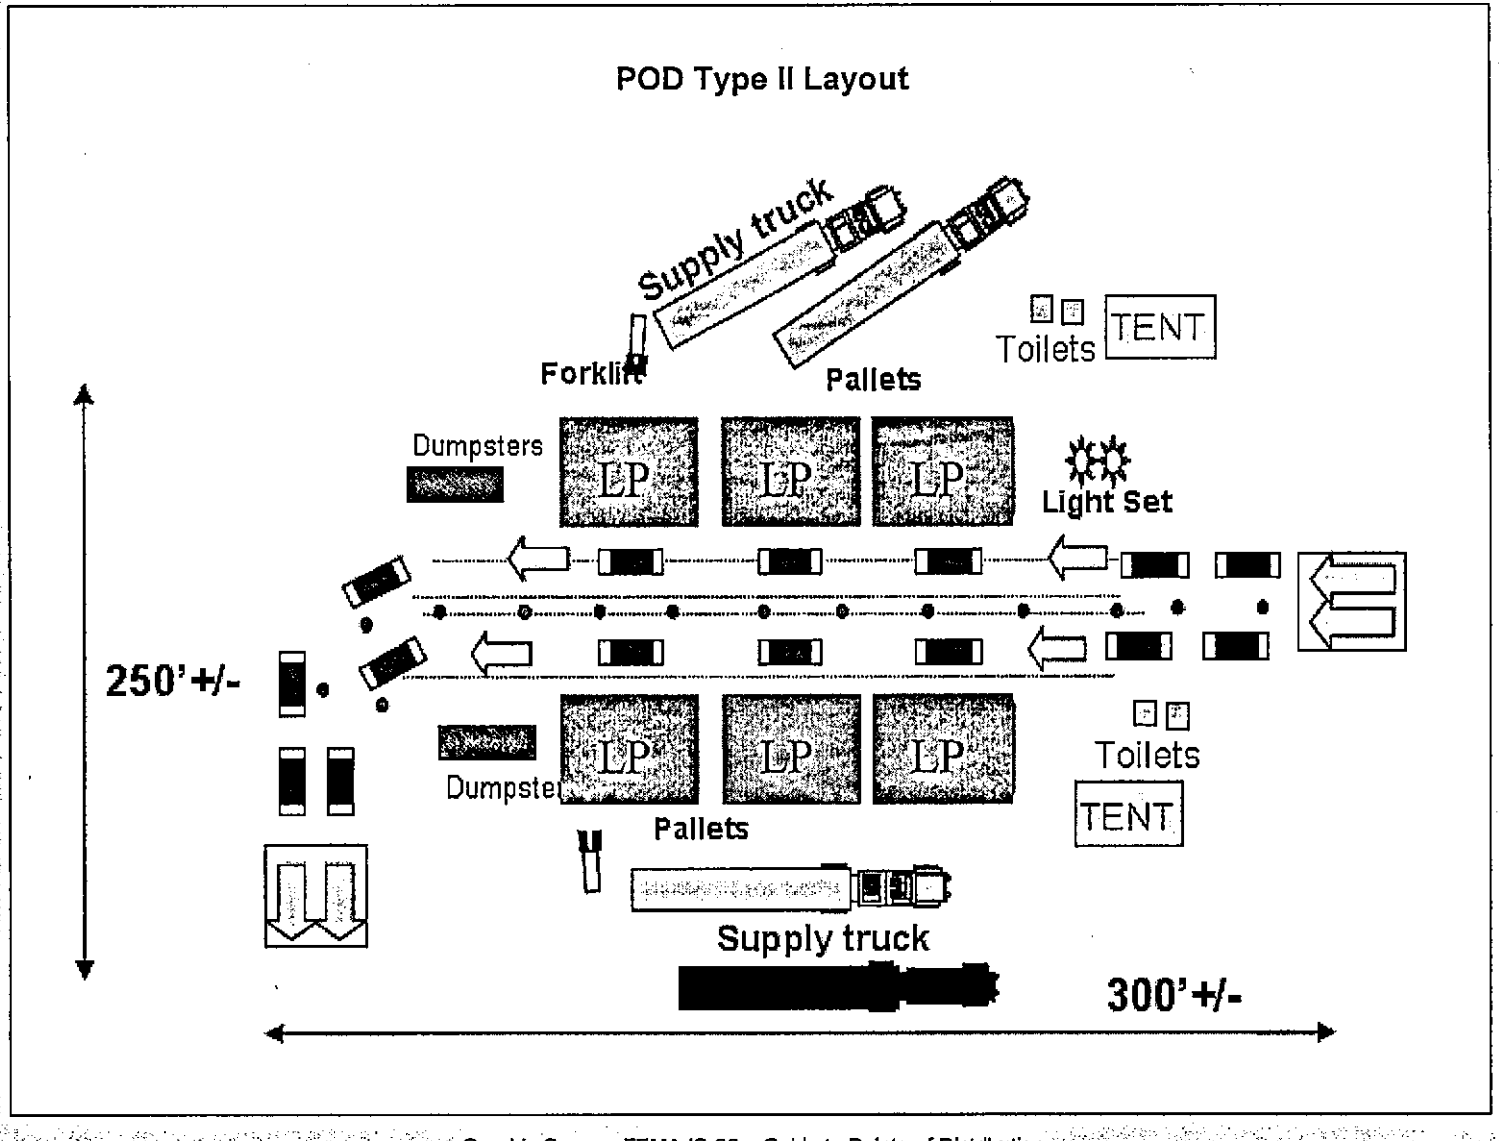
Graphic Source: FEMA IS-26 – Guide to Points of Distribution

Background Notes and Site Layout Guidance (cont.): The U. S. Army Corps of Engineers has developed a typing standard for Points of Distribution (a.k.a., PODs). The smallest is a Type III, which can serve 5,000 people a day based on one vehicle representing a household of three people. A Type III POD is 150 feet by 300 feet and requires a staff of 19 per day and four per night. A Type III POD has three loading points and only one vehicle lane.



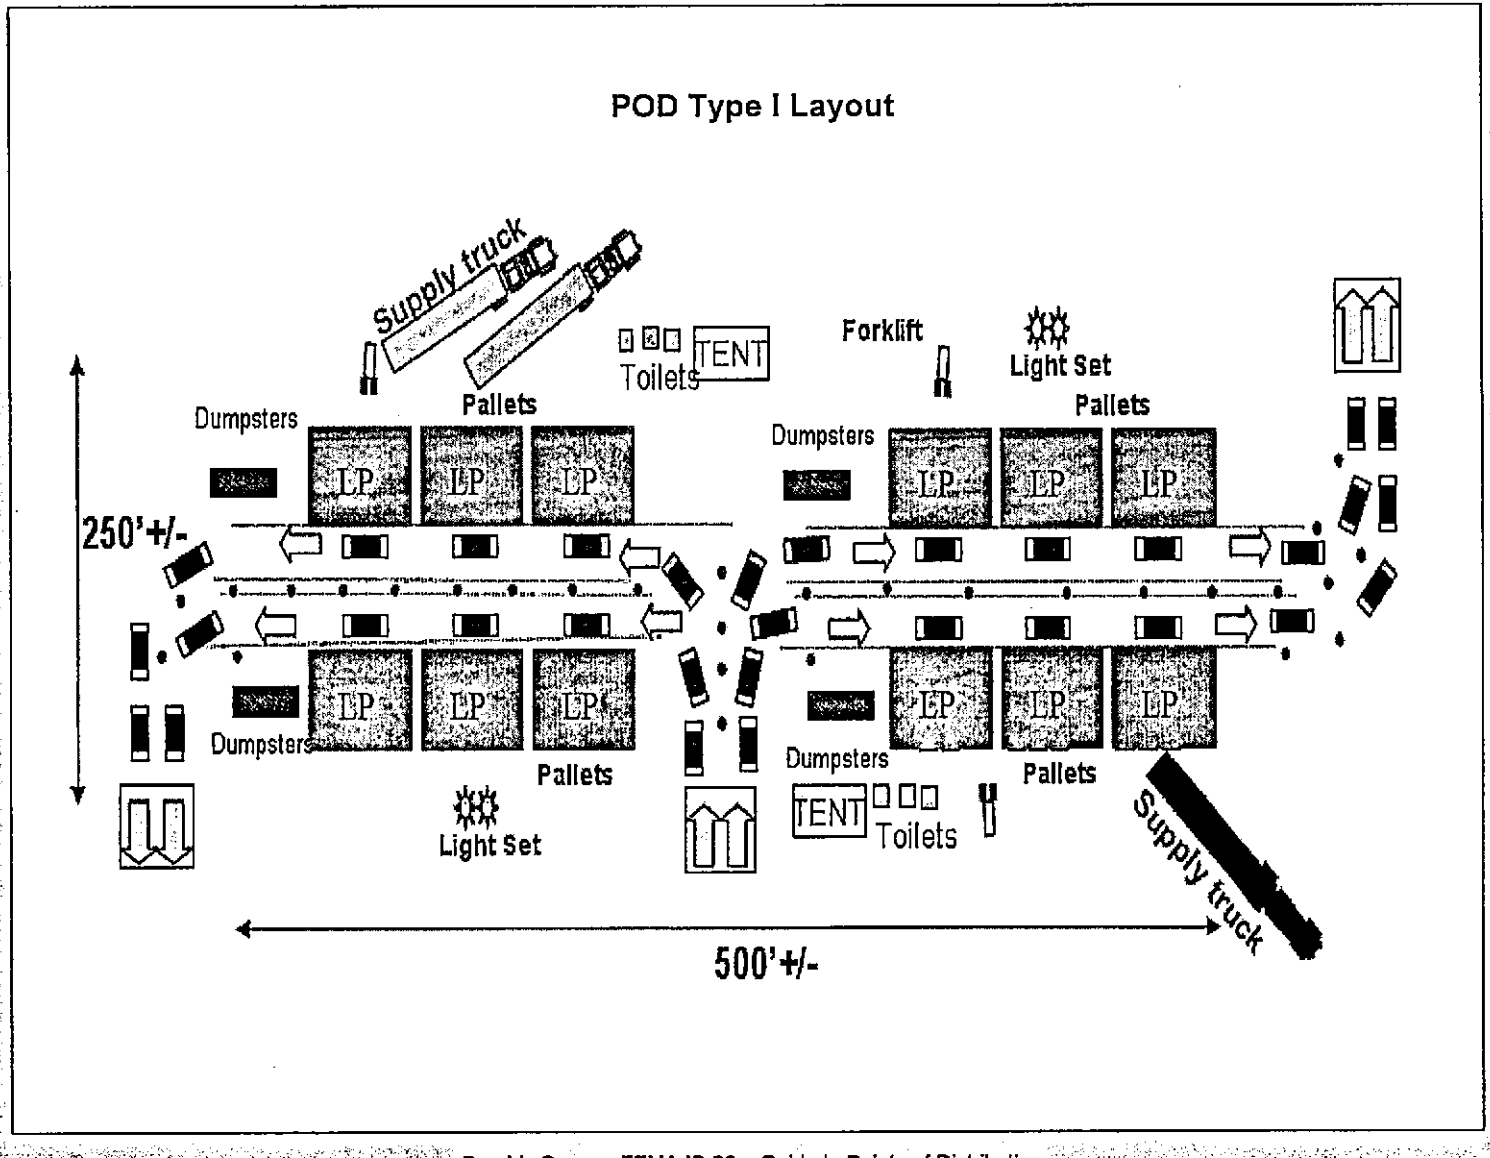
Graphic Source: FEMA IS-26 – Guide to Points of Distribution

Background Notes and Site Layout Guidance (cont.): A Type II POD is twice the size of a Type III and serves 10,000 people a day based on one vehicle representing a household of three people. A Type II POD is 250 feet by 300 feet and requires a staff of 34 per day and six per night. A Type II POD has six loading points and two vehicle lanes.



Graphic Source: FEMA IS-26 – Guide to Points of Distribution

Background Notes and Site Layout Guidance (cont.): The largest POD, a Type I, serves 20,000 people a day based on one vehicle representing a household of three people. A Type I POD is 250 feet by 500 feet and requires a staff of 78 per day and 10 per night. Type I PODs are only used in large metropolitan areas. A Type I POD has twelve loading points and four vehicle lanes.



Graphic Source: FEMA IS-26 – Guide to Points of Distribution

Activation. The decision to activate a disaster logistics management operation locally rests with the EOC Incident Commander. If the damage / needs assessment process reveals that disaster commodities are required in an area of the state and state-level management assistance to the affected local jurisdiction(s) is also required, the SEOC Incident Commander will make the decision to activate the state DLDMT and DLDMC as part of the SEOC structure. Activation of Points of Distribution will occur simultaneously with activation of other support facilities such as Control Check Points, Staging Areas and Warehouses, and the Base / Camps as appropriate. If the State will be providing management assistance to the affected local jurisdiction(s), all decisions regarding facility establishment, activation, and operation will be made jointly. In that regard, the local and state DLMCs will oversee and coordinate the establishment of all disaster logistics management facilities.

Background Note: If activation of Control Check Points is required for disaster donations management purposes, local and state DDMCs will also be part of the facility activation decision-making process.

The DLMC will contact the Point of Distribution Manager via telephone, email, radio, or other available means and provide, at a minimum, the following information regarding Point of Distribution establishment:

- Point of Distribution address and facility name
- Point of Distribution size / type (i.e., Type I, II, or III)
- Time and date the Point of Distribution will open
- Operating days and hours
- Type and quantities of commodities that will be distributed to each vehicle or person (i.e., food, water, supplies, etc.)
- Estimated date and time of first supply shipment
- Specifics regarding support staff (e.g., positions to be staffed, needed time of arrival, etc.)

Once the Point of Distribution Manager has been notified, he/she will notify the Point of Distribution support staff in accordance with the instructions provided by the DLMC. This notification will be accomplished by one or more of the following methods: telephone call; text message; email; pager; messenger; or direct contact. The Point of Distribution Manager will inform support staff when and where to report, and what to bring in terms of supporting materials (e.g., foul weather gear, extra clothing, etc.).

Site Hazard Assessment. Upon arriving at the Point of Distribution site, the Point of Distribution Manager will conduct a hazard assessment to determine the suitability of using the site given current and projected incident conditions and hazards. The "Points of Distribution Hazard Assessment Form" on page 127 will be used for this purpose. Based on the results of this assessment, and other relevant factors, the Point of Distribution Manager will decide if the site is safe for operations. If the site is deemed unsafe, the Point of Distribution Manager will contact the DLMC and report the findings of the hazard assessment. The DLMC will consult with the EOC Incident Commander and other EOC staff to determine if an alternate site should be selected, or if another Point of Distribution could be expanded in size to accommodate the additional customers. This decision will be made as quickly as possible to allow for the greatest operational efficiency, and to meet the immediate needs of affected customers.

Site Set-Up. If the site is deemed safe, the Point of Distribution Manager and support staff will begin to set up the Point of Distribution using the "Points of Distribution Set-up Checklist" found on page 128 as a guide to assist in the set-up process. Set-Up Kits will be requested as required for facility size. (Note: Set-Up Kits are designed for a Type III facility; Type II facilities require two Kits; Type I facilities require four Kits.)

Expedient Staff Training. The Point of Distribution Manager will assign positions based on who is available and who is trained for specific positions. All staff – experienced, new / volunteer – will be provided just-in-time training (by the Point of Distribution Manager or a designee) to ensure that all positions are carried out safely and efficiently. The order for filling staff positions generally will be: 1) Team Leaders (Support and Loading); 2) Traffic Controller(s); 3) Equipment Operators (Pallet Jack and Forklift); 4) Loader(s); 5) Check-In Specialist(s); 6) Community Relations staff; 7) Security Officer(s); and 8) Site Restoration staff.

Preparation for Opening. The Point of Distribution Manager will ensure that at least one pallet jack is onsite and operational before the first commodity shipment is received. This will allow for the immediate movement of pallets, as required. Loading points and vehicle lanes will be established in accordance with site size (i.e., Type I, II, or III) and U.S. Army Corps of Engineers recommended site layouts. The site will not be opened up to the public until the site layout is complete and adequate shipments of commodities have been received to serve the anticipated need for the first few hours of operation. Authorization to open will come from the DLMC. Signage will be placed no more than 30 minutes before opening to help reduce traffic in the area and set a reasonable expectation with the public. When the site opens, confirmation will be provided to the DLMC and PIO for dissemination to the public.

Points of Distribution Operations.

Hours of Operation. The Point of Distribution will generally be open to customers 12 hours per day, between the hours of 7 AM and 7 PM. This time frame reduces the amount of time the Point of Distribution is open in low-light conditions. If incident conditions or operational needs require a change in operating hours, this information will be widely disseminated to the public by the PIO using the public information materials found in Attachment A.

Commodity Amounts. Each customer (walk-up or drive-through) will receive a set amount of commodities for a household of three – no more and no less. This will include:

- One gallon of water, per person, per day (four liters)
- Eight pounds of ice, per person, per day (one bag)
- Two emergency food rations, per person, per day (in the form of MREs or traditional packaged food products)
- One plastic tarp (size and type to be determined by incident conditions and needs, and general availability)

Adhering to this standard allotment will help ensure that commodity supplies do not run out early, before all in need receive their base allotment and reliable resupply can be assured. It will also help expedite the distribution process, ensuring that the maximum number of customers can be served during the 12-hour operational period.

Additional commodities may be provided if available and needed, based on incident conditions and recovery needs.

Distribution Process. Depending on needs and circumstances, commodities may have to be distributed to persons arriving in personal vehicles, walking-up to the site, or arriving via mass transit (i.e., bus). Points of Distribution will generally be set up to accommodate the mode(s) of arrival most likely for the customer base being served. In most cases, that will require that accommodations be made for all three modes of arrival. The primary safety concern will be to limit the interaction between pedestrians (i.e., those walking-up or arriving via mass transit) and drive-through vehicular traffic. This will be addressed during the site set-up by designating non-vehicular pedestrian entry and exit points, and proper marking of Vehicle Lines, Loading Lines, and other vehicle-only areas.

Vehicle Loading Procedures. The following procedure will be followed in loading commodities into drive-up vehicles:

- Vehicles will enter the Point of Distribution via the Vehicle Line.
- The Traffic Controller will stand at the front of the Vehicle Line where all vehicles in the lane can see him/her.
- When the front vehicle is adjacent to the front Loading Point, the Traffic Controller will signal the vehicle to stop. Each vehicle behind the first vehicle will also stop.
- Once all vehicles come to a stop, the Traffic Controller will blow one whistle blast and shout "LOAD." The "LOAD" command will be echoed by the Loaders.
- The Loaders will then load the designated amount of commodities from the Loading Line into the trunk of the vehicle.
- Once the Loaders complete loading commodities into the vehicle, they will step back to the Loading Line and shout "CLEAR."

- When the Traffic Controller hears "CLEAR," he/she will visually verify that the Loaders (and any other individuals) have cleared the Vehicle Line and, using hand signals, will instruct the vehicles to depart the Point of Distribution and blow a single whistle blast.
- The same process will repeat for each succeeding set of vehicles entering the Vehicle Line.

Walk-Up Customer Procedures. Customers without vehicles (i.e., walk-ups and those using mass transit) must be accommodated. These customers will be instructed, in the public information materials, to bring a box or sturdy bag in which to carry their commodities. A limited supply of boxes and plastic bags will be kept at the Point of Distribution for those walk-up customers that arrive without having something in which to carry their commodities; however, the Point of Distribution staff is under no obligation to provide boxes or bags if supplies run out.

A separate pedestrian Loading Line will be established, away from the Vehicle Line(s), to accommodate walk-up customers. The same procedures will be followed with regard to the loading of commodities. The Loaders will provide the commodities to the customer, and will assist in loading them into a box or bag as appropriate. The customer is responsible for carrying the commodities away from the Loading Line. In those rare instances where the customer is physically unable to carry the commodities by themselves, the Point of Distribution Manager will attempt to arrange for assistance from volunteers, if such resources are available and timely. If required, the Point of Distribution Manager will contact the DLDMC to arrange for assistance from the VRC and/or appropriate human service agencies in the EOC. Point of Distribution staff will **NOT** be re-assigned to assist customers in carrying their commodities back to their home or mass transit stop, because doing so would adversely impact Point of Distribution operations.

Resupply of Commodities. The DLDMC will work with the Points of Distribution, Warehouses, and Staging Areas to coordinate resupply of commodities during the 12 hours the Points of Distribution are closed (generally between the hours of 7 PM to 7 AM). Resupply quantities will be determined based on projected needs as identified in the incident needs assessment and/or through actual commodity consumption rates for each Point of Distribution. Point of Distribution night crews will handle resupply and clean-up functions only; they will not participate in commodities distribution. Forklifts and Pallet Jacks will be used for the unloading and movement of commodities. Unloading of trucks by hand will only be done in the event of equipment inoperability. Commodities will be organized for distribution on a first-in, first-out basis (i.e., the earliest arriving commodities will be distributed first). The night crews will unload supply trucks in the Supply Line, reload Loading Lines with commodities, remove empty pallets from the Supply Line, and generally clean-up and organize the site in preparation for the next day's distribution operations.

Commodity Receipt and Accountability. As supply shipments arrive at the Point of Distribution via truck, the Point of Distribution Manager will use the trucker's Bill of Lading or federal Mission Assignment Form to account for the supplies being delivered. If there is a discrepancy, the Point of Distribution Manager will contact the point of origination (Warehouse, Staging Area, or vendor) to discuss the difference. If resolution of the discrepancy cannot be reached, the Point of Distribution Manager will make note of the discrepancy, and actions taken to resolve it, on the Bill of Lading or Mission Assignment Form before signing for the shipment. The Point of Distribution Manager will not accept shipments without signing for them, and documenting in writing efforts made to resolve identified discrepancies.

Comfort Care for Staff. The Point of Distribution Manager will work with the Loading Team Leader to determine breaks for staff, including meal breaks. Due to the physical nature of the work, as a general rule staff will get a ten minute break every hour and a twenty minute meal break. Food will be provided by locally-identified agencies or organizations. If incident conditions and/or operational circumstances will not allow for the delivery of hot food, staff will be provided meals-ready-to-eat (MREs) or will be allowed to seek food on their own from nearby restaurants. Restrooms will be available onsite for staff to use as required. A break room or tent will also be available onsite.

Spontaneous, Unaffiliated Volunteers. Any individuals or groups that show up at the Point of Distribution, wishing to volunteer, will be referred to the local Volunteer Registration Center for appropriate screening, registration, orientation and training. Any volunteers required for Point of Distribution operations will be obtained through the VRC and/or EOC only; spontaneous, unaffiliated volunteers who have not been vetted through the VRC and/or EOC will not be utilized.

Media / VIP Tours. Requests by the media and/or "VIPs" (i.e., high-ranking public or private officials) for tours, interviews or photo-ops will be handled by Community Relations staff, working directly with the PIO. All questions and inquiries from the media will be directed to the PIO to ensure consistency of message, and to prevent unnecessary disruption of Point of Distribution operations. The media will not be allowed to interfere with or impede ongoing distribution activities, such as stopping traffic to conduct customer interviews or attempting to interview staff while they are doing their job. If information is requested regarding onsite operations or activities, the Point of Distribution Manager will work with Community Relations staff to ensure the information is provided in the most expedient manner possible.

Time, Resource, and Staff Accountability. The Point of Distribution Manager is ultimately responsible for accounting for all personnel, equipment, supplies, and commodities at the Point of Distribution. Accuracy in this effort is crucial to ensure proper time accounting, cost reimbursement and resupply of commodities, and to ensure that equipment and supplies are returned to their proper point of origin, in good condition, once operations wind down. The tracking forms on pages 129-132 (i.e., "Equipment / Supply Inventory Form," "Commodity Inventory Form," and "Emergency Worker Activity Report") will be used for these purposes.

In addition, daily reporting of staffing (to the DLMC/EOC) will help in tracking Point of Distribution activities and staffing needs. The Emergency Worker Activity Report will be used to track assigned personnel, unassigned personnel, and properly registered (vetted) spontaneous volunteers, by day shift and night shift (as applicable). Unassigned personnel may be assigned to another Point of Distribution, at the discretion of the DLMC/EOC. Conversely, requests for additional personnel will be submitted to the DLMC/EOC for consideration within available resources.

Safety Procedures. All personnel at the Point of Distribution are responsible for conducting their activities in a safe manner and following good safety practices. All personnel will inspect their work area daily and be aware of changing hazards. The Point of Distribution Manager is the primary Safety Officer and is responsible for the safety of all staff and customers at the site. The Point of Distribution Manager will train (or arrange for the training of) staff on proper safety practices, including the safe operation of all equipment, and ensure that safety measures are enforced. The Point of Distribution Manager will also complete the Hazard Assessment Form prior to the Point of Distribution site being approved for use, and set-up. If accidents occur, the Point of Distribution Manager will conduct an appropriate investigation with other onsite staff and develop preventive measures based on the outcome of the investigation. This report (or form) will record the accident information and findings, and will be submitted to the DLDMC/EOC for possible claim processing and recordkeeping by the Legal Department or other appropriate local agency.

Closure of Point of Distribution. The decision to close the Point of Distribution will be made by the DLDMC and will be based on a number of factors, including but not limited to, the status of infrastructure repair and the overall recovery effort (the return to normality), the need for continued disaster commodities distribution, and the ability to sustain continued operations at that particular site. If basic commodities are readily available from stores and other private vendors in the community, then strong consideration will be given to closing the Point of Distribution. The DLDMC will decide if all Points of Distribution will be closed, or just some of them. The Point of Distribution Manager will coordinate closure activities with the Support Team Leader and Site Restoration Staff.

Manage Site Access. Once the date and time for Point of Distribution closure has been publicized by the PIO via news release, web posting, and other appropriate means, the Point of Distribution Manager will work with the Support Team Leader to ensure that the vehicle and pedestrian lanes are blocked to further traffic. This will be accomplished with traffic cones and/or a vehicle across the entrance, with appropriate signage stating "Point of Distribution now closed." The DLDMC will provide instructions on where to send any remaining customers, and this information will be included on the closure signage if room allows.

Clear, Account for, and Load Commodities. The Point of Distribution Manager will work with the Loading Team Leader, Loading Staff, and Equipment Operators to clear the loading line of any remaining commodities, consolidate them onto pallets in the supply line, and load them back onto trucks for removal from the site. All commodities will be inventoried prior to loading on the truck. The Commodity Inventory Form will be used for this purpose. A copy of this form will be provided to the truck driver as a Bill of Lading. As appropriate, loose commodities will be strapped or plastic-wrapped to their pallets before loading them. Once the commodities have been loaded, the Site Restoration Staff can begin the final cleaning of the supply line.

Account for Equipment and Supplies. Once all commodities have been loaded and removed from the site, the loading equipment and supplies used at the site will be consolidated behind the supply line and inventoried / inspected by the Point of Distribution Manager, Support Team Leader, and Loading Team Leader. The Equipment / Supply Inventory Form will be used for this purpose. In addition, the equipment and supplies will be photographed to provide visual documentation of their condition upon return to their owner. If equipment or supplies are missing, a check will be made with workers to see who had the equipment or supplies last to determine their possible location. If the item(s) cannot be located, the Point of Distribution Manager will generate a written statement regarding the missing item(s) and the attempts to locate them. Once everything has been accounted for, the Equipment / Supply Inventory Form and any written statements regarding missing items will be provided to the DLDMC for inclusion in the permanent disaster file, and any required follow-up activities. The DLDMC will contact the equipment / supply owner to schedule a pick-up.

Set-Up Kit Cleaning and Replenishment. The Point of Distribution Manager will work with the Support Team Leader to collect, inspect, clean and inventory all items of the Point of Distribution Set-Up Kit(s) for repacking. The "Points of Distribution Set-Up Checklist" will be used for this purpose. Damaged, missing, or otherwise unusable items will be noted on the form, and reported to the DLDMC for replacement / replenishment prior to kit repacking. Damaged items will also be photographed to provide visual documentation of their condition. The kit(s) will be restored, resupplied, and repacked as close to original condition as possible to ensure readiness for the next incident. The Points of Distribution Set-Up Checklist and any photographic documentation will be provided to the DLDMC for inclusion in the permanent disaster file, and any required follow-up activities. The DLDMC will arrange for the pick-up and storage of the Set-Up Kits.

Physical Restoration. Once the left-over commodities and the equipment, supplies and set-up kits have been cleared from the site, the Point of Distribution Manager will work with the Site Restoration Staff to clean and restore the site to its pre-use condition. Damage and/or lingering impacts will be reported to the DLDMC for appropriate follow up with applicable agencies. Damaged or impacted areas of the site will also be photographed to provide visual documentation of their condition. The photographs will be provided to the DLDMC for inclusion in the permanent disaster file, and for possible claim processing related to the damage or impacts.

Final Operational Reporting. The DLDMC will generate a final status report for the facility and its operations, based on the information provided in the facility's daily reports. The Point of Distribution Manager will review the draft of this report to ensure its accuracy and completeness, and provide the DLDMC with a written summary of the site closeout steps taken and any significant problems encountered during the operation, for inclusion in the final report. This final report will provide some of the documentation needed to recoup a portion of the operational costs related to the commodity distribution effort under a federal Stafford Act declaration or a Governor's declaration. It will also serve as the final historical account of the operation for inclusion in the permanent disaster file.

After-Action Review. Prior to official site closure, the Point of Distribution Manager will gather all staff who worked at the facility for an after-action review. The after-action review will focus on what worked well and what didn't work well, and how operations might be improved in the future. The Point of Distribution Manager will facilitate the process and the staff will provide input. Examples of outstanding work will also be recognized. The Point of Distribution Manager will summarize the after-action findings, concerns, and recommendations and provide this information in written narrative to the DLDMC for inclusion in the jurisdiction's final after-action report, as appropriate. With the completion of this final step, the Point of Distribution will be considered officially closed.

R. POINTS OF DISTRIBUTION HAZARD ASSESSMENT FORM

Location:	**Inspected by:**
Date:	**Time:**

Training:	**Yes**	**No**	**Comments**
Is each person assigned to a job within their capability?			
Did each person receive a safety brief and general operational overview?			
Is training on PPE and equipment provided?			
Environment:	**Yes**	**No**	**Comments**
Are resources available to deal with very hot or very cold conditions? (e.g., drinking water, heated tent, shade)			
Does staff know the symptoms of heat cramps, heat stroke, and hypothermia?			
Is the level of light adequate for safe and comfortable performance of work?			
Housekeeping:	**Yes**	**No**	**Comments**
Is the work area clear of debris and tripping hazards?			
Are materials properly stacked and spaced?			
Are work areas clear of fluid spills or leakage?			
Are aisles and passageways clear of obstructions?			
Are walkways clear of holes, loose debris, protruding nails, and loose boards?			
Is the break area kept clean and sanitary?			
Are the dumpsters being serviced properly?			
Are the restrooms (portable or fixed) clean, sanitary and restocked?			
Personal Protective Equipment:	**Yes**	**No**	**Comments**
Is required equipment provided and maintained?			
Does equipment meet requirements?			
Are warning signs prominently displayed in all hazard areas?			
Material Handling and Storage:	**Yes**	**No**	**Comments**
Is there safe clearance for all equipment through aisles and doors?			
Is stored material stable and secure?			
Are storage areas free from tipping hazards?			
Are only trained operators allowed to operate lifting and moving equipment?			
Do personnel know proper lifting techniques?			
Vehicle Traffic:	**Yes**	**No**	**Comments**
Are cones placed to direct traffic?			
Is the vehicle line kept free of pedestrians when vehicles are moving?			
Are pedestrian and vehicular traffic separated?			

ADDITIONAL COMMENTS OR CONCERNS:

S. POINTS OF DISTRIBUTION SET-UP CHECKLIST

Location:

Point of Distribution Manager:

X		Yes	No	Comments
	Support staff arrives			
	Complete site hazard assessment form			
	Establish communications with appropriate facilities			
	Inspect guidance documents and other support materials (Set-Up Kits – see below)			
	Conduct just-in-time training to include safety brief and operational overview			
	Determine and mark the locations of Supply Lines, Loading Lines, and Vehicle Lines			
	Establish and mark portable restroom ("port-a-potty") locations			
	Establish and mark trash dumpster location			
	Establish break area for staff			
	Set up traffic cones around Vehicle Line			
	Receive and place portable light sets, as required (not all sites will require this)			
	Ensure supply trucks can enter and exit			
	Assign staffing positions			
	Distribute PPE as required			
	Conduct PPE training as required			
	Determine signage locations and set up signage			
	Receive and place portable restrooms ("port-a-potties")			
	Receive and place trash dumpster			
	Receive and inspect commodity moving and lifting equipment			
	Determine delivery date and time for first supply of commodities			
	Notify EOC (DLDMC) that the Point of Distribution is ready for opening			
	Open Point of Distribution when authorized			
	Notify EOC (DLDMC) that the Point of Distribution is open and operational

U. POINTS OF DISTRIBUTION COMMODITY INVENTORY FORM (Alternate Format – not using CIMS)

POINTS OF DISTRIBUTION COMMODITY INVENTORY FORM

Location:

Point of Distribution Manager:

Date	Time	Commodity Item	Unit of Measure	Quantity Received	Quantity Distributed	Balance on Hand	Consumption Rate (per day)	Resupply Quantity Required

V. POINTS OF DISTRIBUTION EMERGENCY WORKER ACTIVITY REPORT

Facility Name / Address / Type:

Shift (Day or Night) and Operating Hours (24-hour format):

Emergency Worker Name	Volunteer? (Y/N)	Car No.*	Assignment	Date:		Date:		Date:		Total Hours Worked	Round Trip Miles*
				IN	OUT	IN	OUT	IN	OUT		

Total Personnel:		Total Hours Worked:		Total Mileage Incurred:	

THIS FORM MUST BE SIGNED BY POINT OF DISTRIBUTION MANAGER OR DESIGNEE

By my signature below, I certify these persons did participate in the mission / incident as identified above:

Print Name and Title:	**Signature:**
Telephone Number: Cell ( ) Land Line ( ) **E-mail Address:**	**Other Contact Means (specify):**

*Complete these fields only as applicable

Form Instructions: All personnel working at the facility on the shift, including the Manager, should be listed with the following minimum information: 1) name; 2) volunteer status; 3) assigned position at the facility; 4) time on and time off work; and 5) total hours worked. There are multiple columns for time on and off, for when individuals need to leave for a period of time and the time-break may bridge two separate days (e.g., off at 11 PM on September 1 and back on at 1 AM on September 2). The car number and round trip mileage columns are to be filled in only as applicable. The car number column may be used to record a vehicle number, driver license number, or similar identifier. The round trip mileage column may be used to record total mileage for personnel who have to commute and/or are sent on a mission during their shift. It is extremely important to record on this form all personnel working at the facility, as the form will become a part of the official record for the disaster. It is especially important to record volunteers, as this form is their proof that they worked the disaster.

W. PRE-IDENTIFIED LOGISTICS / DONATIONS MANAGEMENT FACILITIES*

The following facilities have been pre-identified for POSSIBLE use during a logistics / donations management operation subsequent to a large-scale or catastrophic incident that requires the procurement and distribution of supplemental commodities to sustain the affected population and / or to aid in the response and recovery effort. The incident circumstances will determine, to a large degree, the specifics of the operation. Because of the time constraints that would be involved within the EOC for making critical decisions related to the logistics / donations management operation, it is important that as many details as possible be pre-addressed in this plan. To that end, the facility listings that follow are intended to provide a STARTING POINT for making rapid, informed decisions regarding the establishment of facilities required to support and sustain a large-scale logistics / donations management operation. Many incident and situation-specific factors will ultimately be considered before final facility selections are made. In some cases, it may be determined that these (or other) public / private nonprofit facilities are not appropriate for use; rather, privately owned / operated (commercial) facilities may be considered instead. In those situations, the Michigan Department of Technology, Management and Budget (MDTMB) will aid the SEOC staff in locating and procuring the private space required to handle the needs of the specific logistics / donations management function.

CONTROL CHECK POINTS (for disaster donations):

Selection Considerations: Control Check Points are officially designated locations where trucks and other transport vehicles containing unsolicited donated goods can be inspected and directed to an appropriate volunteer agency or other location for processing, storage, and distribution. Unaffiliated volunteers from outside the disaster area wishing to provide services can also be interviewed at these locations, or they may be referred to a central Volunteer Registration Center (VRC). Items or services needed immediately, as well as those that may be needed in the long-term, can be directed to those locations in which they are needed. Unneeded or unwanted items or volunteers can be turned back at these points, although it is expected that some unneeded / unwanted items and volunteers will make their way through to the disaster area. Examples of possible Control Check Point locations include weigh stations, roadside parks, truck stops, state parks and recreation areas, county fairgrounds, highway rest areas, armories, and other governmental facilities (located in close proximity to major transportation routes) that have large parking areas for vehicle inspections. (Note: Private facilities such as large shopping center parking lots can also be used, but only with the expressed written permission of the owner. Such permission should be carefully documented to avoid potential future problems with regard to legal claims, etc.) Each Control Check Point should be staffed with at least two individuals, although more staff may be needed to handle anticipated large volumes of donations.

Facility Name	Facility Address	Facility Type	Geo-Location (Latitude/Longitude)	Comments / Considerations
TBD – based on incident location, conditions and needs, and anticipated donations volume.				

***Note:** State facilities that potentially could be used include but are not limited to state parks and recreation areas (under the MDNR), state warehouses (under the MDTMB), state correctional facility warehouses (under the MDOC), and state transportation maintenance garages (under the MDOT). If the facilities listed in each table are determined to be unsuitable or are unavailable for a logistics / donations management operation and appropriate local replacements cannot be identified, consideration will be given to using nearby state facilities.

VOLUNTEER REGISTRATION CENTER(S):

Selection Considerations: The Volunteer Registration Center (VRC) should provide physical space for spontaneous, unaffiliated volunteers as well as properly vetted volunteers to assemble and be interviewed by screeners. The VRC may also have a virtual component (i.e., a web and/or social media site for initial registration), but it is important that the VRC provide a "place" for volunteers to report to and talk to someone about their skills, capabilities, work desires, and support needs. This space will likely be nothing more than a room in a conveniently-located community building, although it could also be a covered outdoor space (e.g., large tented area, park pavilion, dedicated section of a parking ramp) or even a designated vehicle in a parking area (although the latter would clearly be considered a last-resort option).

District	Facility Name	Facility Address	Facility Type	Geo-Location (Lat/Long)		Comments / Considerations
1	Mount Hope Church	202 Creyts Rd., Lansing	Church	42.732483	-84.643117	Access to I-496; large facility/parking lot

ALL	Volunteer Michigan Local Volunteer Centers	Refer to the following website for current locations and addresses: www.volunteermichigan.org/localvolunteercenters	Varies	N/A	N/A	Established and publicized centers (currently 32 statewide) operated for Volunteer Michigan by United Way or other local human service agencies

***Note:** State facilities that potentially could be used include but are not limited to state parks and recreation areas (under the MDNR), state warehouses (under the MDTMB), state correctional facility warehouses (under the MDOC), and state transportation maintenance garages (under the MDOT). If the facilities listed in each table are determined to be unsuitable or are unavailable for a logistics / donations management operation and appropriate local replacements cannot be identified, consideration will be given to using nearby state facilities. **(The Volunteer Michigan Local Volunteer Centers are already established and publicized, and may be the ideal starting point for facility selection in those counties having such centers.)**

WAREHOUSES:

Selection Considerations: Warehouse facilities can be any available, large enclosed storage area (ideally 25,000 – 200,000 square feet in size, located on a secured / fenced site) with sufficient area to park and unload trucks and other vehicles. Warehouses are needed to receive, unload, sort, inventory, package, store, and dispatch commodities to local Points of Distribution, designated voluntary agencies, or other locations, as part of a phased distribution process. These facilities can be used for both short and longer-term storage, although it is usually best to designate one or two locations exclusively for longer-term storage. Warehouses should be located in relative proximity to the disaster area, and be available for use on a 24-hour basis if necessary. Possible facilities for use include vacant commercial warehouse space, governmental and/or NGO warehouse facilities, armories, county fairground buildings, ice arenas, highway / public works maintenance garages, airport hangers, community recreation centers, etc. Ideally, using the facility as a Warehouse will not greatly interfere with its normal, day-to-day use. The facility should be capable of supporting a staff of up to 40 people, and have the capability of supporting a computer, facsimile machine, and telephone. The facility should also have adequate climate control capabilities, a restroom, and loading / unloading areas.

District	Facility Name	Facility Address	Facility Type	Geo-Location (Lat/Long)		Comments / Considerations

8	Little Bear Arena	275 Marquette St., St. Ignace	Arena / Event Ctr.	45.872417	-84.733694	Multi-purpose arena / event center
8	Sawyer Service Center	125 Airport Ave., Gwinn	Warehouse	46.345348	-87.381822	

***Note:** State facilities that potentially could be used include but are not limited to state parks and recreation areas (under the MDNR), state warehouses (under the MDTMB), state correctional facility warehouses (under the MDOC), and state transportation maintenance garages (under the MDOT). If the facilities listed in each table are determined to be unsuitable or are unavailable for a logistics / donations management operation and appropriate local replacements cannot be identified, consideration will be given to using nearby state facilities.

STAGING AREAS:

Selection Considerations: Staging Areas can be any available, large outdoor area (ideally 1-25 acres in size, with fencing or other security provisions) with sufficient area to temporarily park vehicles, equipment, personnel and goods that are ready for deployment to the affected area to aid in disaster response and recovery operations. (Vehicles and equipment might include dump trucks, front-end loaders, bulldozers, buses, cargo trucks, etc.) Staging Areas should have adequate parking spaces for a large number of workers at any time, and (ideally) covered space (e.g., permanent building, tent) to shelter workers and goods from the weather and provide a measure of security. Staging Areas should also have provisions in place for temporarily lodging, feeding, and caring for volunteer workers (that are ready for deployment) and for addressing their basic sanitation concerns (i.e., port-a-johns, portable showers, and hand washing facilities). Either a permanent building, tent space on the grounds, or a combination of both may meet the temporary lodging requirements. (An alternative is to provide shuttle service for workers to and from local motels and hotels, or a nearby Base / Camp set up to provide for the lodging, food, water, and sanitation needs of personnel.) Possible locations for use as Staging Areas include vacant commercial lots, governmental and/or NGO warehouse facilities, armories, county fairgrounds, highway / public works maintenance garages, airports, parks and recreation areas, or possibly shopping center parking lots (providing there is expressed written permission from the owner).

District	Facility Name	Facility Address	Facility Type	Geo-Location (Lat/Long)		Comments / Considerations
1	MDOT – General Services Building	7461 Crowner Dr., Lansing	Warehouse	42.683667	-84.641817	Part of State Secondary Complex

***Note:** State facilities that potentially could be used include but are not limited to state parks and recreation areas (under the MDNR), state warehouses (under the MDTMB), state correctional facility warehouses (under the MDOC), and state transportation maintenance garages (under the MDOT). If the facilities listed in each table are determined to be unsuitable or are unavailable for a logistics / donations management operation and appropriate local replacements cannot be identified, consideration will be given to using nearby state facilities.

BASE / CAMPS:

Selection Considerations: The incident Base is the location where primary incident support logistics functions are coordinated and administered and equipment / personnel support operations are conducted. This includes equipment maintenance repair, reorder and procurement activities, as well as other support services such as supply, medical, food / water, overnight lodging, sanitation, and communications. Local jurisdictions will normally establish and operate the incident Base. The Base will be designed to support operations at multiple incident sites (if possible). Support may be requested from the State (via the MSP/EMHSD) if local resources are not sufficient to operate the Base. This may include a request for the State to assist in establishing and operating Camps as a way of supplementing the capabilities and/or capacity of the Base.

Camps may be established if additional support locations are required due to incident size (geographically) or complexity. Camps are temporary locations within the general incident area which are equipped and staffed to provide food, water, sleeping areas, and sanitation services for workers who are not currently on call for deployment. Camps may be used in those situations where overnight / multi-day accommodations are required for volunteers, equipment operators, and other deployed resources under the disaster logistics / donations management operation that cannot be adequately (or efficiently) handled at the Incident Base. Camps may be utilized in lieu of local hotel / motel or other accommodations. Camps are particularly suited for certain situations, such as when: 1) there is a shortage of nearby hotel / motel rooms or other suitable accommodations for deployed resources; 2) large numbers of resources have been deployed from outside the Incident area (e.g., EMAC resources); and 3) the incident area is particularly large or widely-dispersed. Possible facilities for use as the Base / Camps include county fairgrounds, state / local parks and recreation areas, local campgrounds, military bases, college campuses, school grounds (if tents are used), community centers or community recreation centers, etc. Ideally, using the facility as a Base / Camp will not greatly interfere with its normal, day-to-day use.

***Note:** State facilities that potentially could be used include but are not limited to state parks and recreation areas (under the MDNR), state warehouses (under the MDTMB), state correctional facility warehouses (under the MDOC), and state transportation maintenance garages (under the MDOT). If the facilities listed in each table are determined to be unsuitable or are unavailable for a logistics / donations management operation and appropriate local replacements cannot be identified, consideration will be given to using nearby state facilities.

POINTS OF DISTRIBUTION:

Selection Considerations: Points of Distribution (a.k.a., "Distribution Centers") are facilities operated by the local jurisdiction, local churches and other faith-based organizations, and community-based and voluntary organizations, to provide commodities directly to disaster survivors. (Note: Point s of Distribution are not the only means of distributing commodities to persons in need. In many cases, commodities will be distributed directly to designated facilities [e.g., shelters, care centers] and/or to designated agencies in lieu of local Points of Distribution.) Points of Distribution should be located at a site the public recognizes and can easily locate. They should have controlled access and security provisions, restrooms, adequate lighting and parking, and access for handicapped individuals. Possible locations for use as Points of Distribution include churches and other faith-based facilities, schools, recreation centers, community centers, senior centers, armories, county fairgrounds, and other similar type facilities. Vacant commercial space can also be used, as long as it is in a location that is well known to the general public. However, there is usually a cost associated with renting commercial space, even on a short-term basis. Points of Distribution can be set up indoors (i.e., inside a building) or outdoors (i.e., in a parking lot or other large, open paved or gravel space).

Y: MICHIGAN VOLUNTEER REGISTRY INFORMATION

(Source: Michigan Department of Community Health web site; reformatted for space / appearance purposes)

The Michigan Department of Community Health, Office of Public Health Preparedness leads the coordination, planning, implementation, and recruitment efforts of the MI Volunteer Registry. The Registry is an internet-based system that conforms to the Office of the Assistant Secretary of Preparedness and Response (ASPR), Emergency System for Advanced Registration of Volunteer Health Professionals (ESAR-VHP) national standards and definitions. The Registry is part of a national network of State based systems designed for the advanced registration and credential verification of volunteers needed to help augment patient care and surge capacity needs.

The Registry was originally designed primarily for health professionals with all skill levels and experiences. Initial recruitment and registration focused on physicians, nurses, behavioral health, and ancillary professionals. Since the initial launch, focus has expanded to include any type of individual willing to volunteer in a public health or medical event.

Volunteers may choose to register for one or more of twelve main organizations within the MI Volunteer Registry. These organizations include: Community Emergency Response Team (CERT); Fire Corps; General Volunteers; Local Health Departments (LHD); Medical Reserve Corps (MRC), Michigan Mortuary Response Team (MI-MORT); Michigan State Animal Response Team (MI-SART); Michigan Transportable Emergency Surge Assistance (MI-TESA); Neighborhood Watch; Regional Healthcare Coalitions (HCC); Tribal Response Teams; or Volunteers in Police Service (VIPS).

The purpose of this system is to provide a secure, electronic environment for volunteers to indicate their interests and contact information. In the event of an accidental, natural, intentional, or other public health or medical emergency; the Registry functions as a central location for volunteer information. In an event, this information can be queried and appropriate volunteers contacted by e-mail.

The Registry is also a place where volunteers can access important topical information regarding specific events, exercises and drills, or general knowledge and training.

Support to develop and create the Registry originates from a cooperative agreement with the ASPR, Hospital Preparedness Program (HPP) and ESAR-VHP program. Funds have been used to develop, implement, and sustain the Registry. Volunteers, along with local and regional agencies, are able to use the system without direct cost to them.

Michigan Volunteer Registry: Frequently Asked Questions

1. BACKGROUND INFORMATION

What is the purpose of MI Volunteer Registry?
The purpose of the MI Volunteer Registry is to provide an electronic environment for volunteers to indicate their interests and contact information for helping to support a public health or medical emergency response. The Registry functions as a central location for volunteer information, which can be queried and appropriate volunteers contacted by e-mail.

Where does support come from for the MI Volunteer Registry?
Funding for the program is provided through a federal cooperative agreement with the Office of the Assistant Secretary for Preparedness and Response (ASPR), Hospital Preparedness Program (HPP); and the Emergency System for Advance Registration of Volunteer Health Professionals (ESAR-VHP) national program. Funds have been used to develop, implement, and sustain the Registry. Volunteers, along with designated local and regional preparedness partners, are able to use the system without direct cost to them.

What professions are being sought?
The MI Volunteer Registry seeks people with all skill levels and experiences. When registering to volunteer, you will be asked to select a volunteer organization(s) that is right for you!

The **Community Emergency Response Team (CERT)** program educates people about disaster preparedness and trains them in basic disaster response skills, such as fire safety, light search and rescue, and disaster medical operations. Using their training, CERT members can assist others in their neighborhood or workplace following an event and can take a more active role in preparing their community. To register, you must have already completed the 20 hour CERT course.
Fire Corps promotes the use of citizen advocates to enhance the capacity of resource-constrained fire and rescue departments at all levels: volunteer, combination, and career. Citizen advocates can assist local fire departments in a range of activities including fire safety outreach, youth programs, and administrative support. To register, you must belong to a certified Fire Corps organization and have completed their required training.
General Volunteers represent all types of individuals that wish to volunteer, including both medical and non-medical professions. A specific volunteer affiliation is not required to become a member; however, individuals may indicate an affiliation with a Regional Healthcare Coalition (HCC), Local Health Department (LHD), or Tribal Community Response Team.
There are 45 **Local Health Departments (LHDs)** that serve all the jurisdictions in Michigan, providing a myriad of programs, including emergency preparedness services to the public. Individuals may indicate an affiliation with an LHD, which may include interest or involvement as a jurisdictional volunteer or strike team member.
Medical Reserve Corps (MRC) strengthens communities by offering support throughout the year, as well as during local emergencies and other times of community need. Public health, medical, or other volunteers work in coordination with existing local emergency response programs and supplement public health initiatives. You must first belong to a local MRC unit, prior to registering on the MI Volunteer Registry. For more information, visit www.medicalreservecorps.gov.
Michigan Mortuary Response Team (MI-MORT) is a Mass Fatality Response Team made up of different professions all with the common goal of assisting county Medical Examiners, Emergency Management, and Public Health with Mass Fatality Management. To register, you must be a member of the team. Visit www.mimort.org for more information or contact Gloria Zunker at ZunkerG1@michigan.gov.
The **Michigan State Animal Response Team (MI-SART)** is dedicated to preparing for, responding to, and recovering from disasters which affect animals in Michigan. MI-SART is a volunteer organization of trained and credentialed veterinarians, veterinary technicians, and others with animal care experience. To register, you must complete certain training requirements and submit documentation to verify completion. Visit www.michigansart.org for more information or contact MI-SART at info@michigansart.org.
The **Michigan Transportable Emergency Surge Assistance Medical Unit (MI-TESA)** is an all-weather 140 bed mobile field hospital that is supported by Mobile Medical Personnel and Tactical Support Teams to meet medical surge or healthcare infrastructure disruption. To register, you must be a member of the team. For more information on MI-TESA contact Loren Korte at KorteL@michigan.gov.
An expanded **Neighborhood Watch Program (NWP)** incorporates terrorism awareness education into its existing crime prevention mission, while also serving as a way to bring residents together to focus on emergency preparedness and emergency response training. To register, you must belong to a certified NWP organization and have completed their required training.
There are eight **Regional Healthcare Coalitions (HCCs)** throughout the state. These coalitions work with local partners within each region to prepare hospitals, emergency medical services, and supporting healthcare organizations to deliver coordinated and effective care to victims of terrorism and other public health/healthcare emergencies. Individuals may indicate an affiliation with an HCC, which may include *interest or involvement in a regional Mobile Medical Field Team (MMFT) or other regional strike team.*
The **Volunteers in Police Service (VIPS)** program provides support and resources for agencies interested in developing or enhancing a volunteer program and for citizens who wish to volunteer their time and skills with a community law enforcement agency. The program's ultimate goal is to enhance the capacity of state and local law enforcement to utilize volunteers. To register, you must belong to a certified VIPS organization and have completed their required training.
There are 12 **Tribal Response Teams** in the State of Michigan. Each sovereign tribe has an independent relationship with each other and with the state. The State of Michigan and Tribal governments share a responsibility to provide for and protect the health, safety, and welfare of our common constituents. Individuals may indicate interest or involvement in a Tribal Response Team.

2. REGISTRATION INFORMATION

Who can register for MI Volunteer Registry?
MI Volunteer Registry was originally designed primarily for health care professionals. However, anyone over the age of 18 can register.

Where can I register to be a volunteer?
To register, go online and enter the following address: http://www.mivolunteerregistry.org. The registration process may take anywhere from 15-30 minutes for unlicensed professionals, but may take up to 60 minutes if you have multiple licenses or certifications to enter. If you have a medical license, medical specialty, or any health certifications, make sure to have them available as you will need them for the registration process.

What do I have to do to qualify to register?
We are seeking people with health care backgrounds and experience, or a genuine interest in volunteering during an emergency. We are looking for people with all skill levels and experiences. Once you have filled out an on-line application, a Registry administrator will review and verify your information – including a criminal background check – to determine your qualification to assist with potential volunteer activities.

Can I register if I am not currently a licensed health professional?
Yes, there is a need for all types of volunteers.

If I am not currently employed, but keep my license current, can I register?
Yes, if you are retired, a student, or are not working in a health care field, please register.

May I volunteer for the MI Volunteer Registry as well as for other organizations?
Yes, the MI Volunteer Registry captures volunteer affiliations and other commitments, as identified by the applicant.

What if I am in the Military?
If you have other emergency response commitments, please indicate that in the appropriate area on the registration form.

How many people are needed for the registry?
We would like to register as many people as possible so that communities will have immediate access to the volunteers needed to support a public health or medical emergency.

How will I be able to update my information?
Once you register, you will have a secure password that will allow you to re-enter and modify your record at any time. You will also receive periodic reminders to check the accuracy of your profile.

Is it required that I register now or may I decide if and when a crisis occurs?
We strongly recommend registration prior to an event, however it is not required. Advanced registration of volunteers will provide hospitals, public health, and emergency authorities' immediate access to personnel that may be needed in the event of an emergency.

Does registering obligate me to volunteer in an emergency?
No. At the time of an event, you may be notified with a request to volunteer. Volunteers are encouraged to respond to availability requests and may change their response at any time.

3. LEGAL ISSUES

Are there provisions for compensating me for time lost from work or other expenses?
The Registry is intended for volunteers who are willing to render aid or perform services on a temporary basis without pay or any benefits. Some employers support employee volunteer and community service activities. Check with your own employer for details.

Are there provisions for workers' compensation benefits?
The first option would be to discuss with your current employer their willingness to support your volunteer activity as part of their organizational community mission by providing you workers' compensation coverage. This should be a clear discussion on the MI Volunteer Registry, the potential to volunteer and its impact to your routine work schedule, and any burdens or hardships your volunteerism may cause the company/or your employer. MI Volunteer Registry activities may be requested outside of normal work hours, location, or facility.

If your employer is unwilling or unable to provide you workers' compensation coverage, Michigan has recently amended its Workers' Compensation Act- 2012 PA 83, MCL 418.161(1)(o) to include volunteer activity, provided that activity is consistent with the described process for registration and deployment during a public health or medical emergency disaster, training, or exercise.

In addition, many private health care practitioners carry their own insurances, including workers' compensation. Therefore, check with your carrier(s) to see if that coverage includes activities associated with volunteerism.

An individual registered with and deployed through the MI Volunteer Registry shall be considered an employee of the state when engaged in the performance of duties agreed upon through registration on this specific site. This would include duties related to training and exercising.

IMPORTANT: This coverage is only applicable to volunteer activity sanctioned by and deployed through an authorized administrator on the MI Volunteer Registry.

What protection might be available for volunteers against liability lawsuits arising out of the volunteer work?
In Michigan, volunteers may be protected from civil liability through the following statutes. However, they do not protect against harm caused by willful or criminal misconduct, gross negligence, reckless misconduct, or a conscious, flagrant indifference to the rights or safety of the individual harmed.

Governmental Immunity Act, MCL 691.1401 et seq. – While acting on behalf of a governmental agency, a volunteer is immune from tort liability if the volunteer is acting or reasonably believes he or she is acting within the scope of his or her authority, and the governmental agency is engaged in the exercise or discharge of a governmental function. This Act does not provide immunity for medical treatment or care to a patient, with limited exceptions. However, other laws discussed in this section may apply to provide protection from liability for medical care.

Liability of Certain Persons for Emergency Care, MCL 691.1501 et seq. – Commonly referred to as ***The Good Samaritan Act***, this statute

- Protects certain licensed health professionals from civil liability when providing emergency care without compensation at the scene of an emergency, provided there was no provider/patient relationship established before the emergency.
- Covers physicians, physician's assistants, registered professional nurses, and licensed practical nurses responding to a life threatening emergency in a hospital or other licensed medical care

facility when the health professional's duties do not require responding to such emergencies.
- Protects individuals assisting the government with a search and rescue operation.

Emergency Management Act, MCL 30.401 et seq. – This statute provides general immunity from liability for ***Disaster Relief Forces*** while on duty. A person who renders services at the express or implied request of a state official, agency, county, local coordinator, or executive body is considered an authorized disaster relief worker. During a declared state of disaster, additional protections are provided to certain health professionals who render services as part of a government authorized response. Moreover, the Director of the Michigan State Police may issue a directive relieving volunteers of liability except for gross negligence.

Public Health Code, MCL 333.1101 et seq. – Several sections of the Public Health Code grant immunity from liability:

- **Health Department** – The director or an employee or representative of the state health department or a local health department is not personally liable for damages sustained in the performance of departmental functions, except for wanton and willful misconduct (MCL 333.2228 and 333.2465).
- **Immunization Program** – When the state health department approves a mass immunization program, health personnel employed by a governmental entity or a volunteer authorized to participate by the director or a local health officer cannot be held liable except for gross negligence or willful and wanton misconduct (MCL 333.9203).
- **Emergency Medical Services Personnel** – Immunity from liability is provided except for gross negligence or willful misconduct (MCL 333.20965).

Volunteer Protection Act of 1997 (Public Law 105-19, 42 USC § 14501) – Volunteers may also be protected from civil liability under this federal law.

Public Readiness and Emergency Preparedness (PREP) Act, Part of the Public Health Service Act, 42 USC § 247d-6d - Provides broad and strong protection to individuals and entities that are engaged in activities related to the use of covered pharmaceutical countermeasures. This includes, for example, entities and individuals involved with manufacturing, labeling, distributing, packaging, marketing, selling, purchasing, donating, dispensing, prescribing, administrating, licensing, or using of such countermeasures. Requires a PREP Act Declaration from the Secretary of Dept of Health & Human Services. To be protected from liability, would need to act consistent with the terms of the PREP Act declaration. PREP Act declarations, and FAQs that explain the PREP Act, can be found at http://www.hhs.gov/disasters/discussion/planners/prepact/index.html. Protection under a PREP Act declaration pre-empts state law, which means state law cannot provide less protection for entities or individuals covered by a PREP Act declaration. Permits a lawsuit to be filed in the U.S. District Court for the District of Columbia for "willful misconduct", which the plaintiff must prove by "clear and convincing evidence."

For Government Employees:

Interstate Emergency Management Assistance Compact (EMAC), MCL 3.991 et seq. – Michigan is a member of this multi-state compact, which is commonly referred to as EMAC. Individuals who are deployed to other states under the compact are immune from civil liability except for willful misconduct, gross negligence, or recklessness. Deployment under the compact is through the EMAC Coordinator at the Michigan State Police Emergency Management and Homeland Security Division.

Are there any eligibility restrictions for volunteering?
All individuals willing to volunteer in support of a public health or medical emergency are encouraged to enroll in the Registry. When a volunteer's services are needed, an authorized Registry administrator will contact the volunteer to inquire about availability, willingness to serve, and physical nature of the intended deployment. Depending on the circumstances, conditions may require certain skills, abilities, or other criteria.

What precautions are being taken by the State to protect health volunteers against disclosure of personal information contained in the MI Volunteer Registry?
Authorized Registry system administrators are the only individuals to have access to your information. Registry volunteer profile information is not open to the public. The system is designed to provide unique privileged access for specific professions and qualifications following an emergency incident. This includes the ability to limit administrator access rights to local teams and certain program affiliations (i.e., Medical Reserve Corps).

Is the State able to provide malpractice insurance to volunteers?
No. Any individual who volunteers should carry their own malpractice insurance. Individuals can check to see if their primary employer has any provisions to provide this benefit for volunteer services.

What other legal resources are available?
Before deployment, health volunteers are advised to consult with their own legal counsel, employers, or sponsors. More information is available at the following websites:

- U.S. Department of Health and Human Services (DHHS) (http://www.phe.gov/preparedness/Pages/default.aspx)
- Office of the Assistant Secretary for Preparedness and Response (ASPR) (http://www.phe.gov/about/aspr/Pages/default.aspx)
- Emergency System for Preparedness and Response (ESAR-VHP) Employer page (http://www.phe.gov/esarvhp/pages/employers.aspx)
- Medical Reserve Corps (http://www.medicalreservecorps.gov)
- American Red Cross (http://www.redcross.org)

4. COMMITMENTS

What is the level or length of volunteer commitment in an emergency?
Once notified of the emergency or crisis, each volunteer will determine their current availability, based on the following:

- What kind of incident are you willing to respond to?
- What distance are you willing to travel?
- How long are you willing to be deployed?

What kind of tasks may I be assigned?
The type of tasks assigned may depend upon the situation or event.

Can I be asked to volunteer out of state?
Yes, you may be asked but are under no obligation to volunteer out of state.

Under what conditions will I be contacted to provide emergency services?
You will be contacted in an emergency if local, regional, and/or state responder resources are not sufficient to meet the need for response and recovery efforts resulting from that incident.

Will I get paid to volunteer?
No. All volunteer work is unpaid. However, being a volunteer is important!

5. TRAINING AND EDUCATION

What kind of training or additional responsibilities will I receive dealing with emergencies?
There are no trainings or additional responsibilities required prior to an emergency for most registrants however, disaster training and participation in local and regional exercises is encouraged. Training opportunities will be posted from time to time to the *Training & Events* section of the MI Volunteer Registry. Volunteers are encouraged to check this page frequently.

Registered volunteers may also reference the *Volunteer Training Matrix*, posted to the Document Library (Training, Volunteer Resources), which offers recommendations and at a minimum an understanding in the Incident Command Structure (ICS). Opportunities are available on-line through MI-TRAIN or through local, regional or State events.

What kind of risks may I be exposed to in an emergency?
You may be requested on your interest or availability for responding to different types of emergencies; including floods, tornados, large fires, and events that may be chemical, biological, radiological, or nuclear. You will be offered training on how to help in an emergency, as well as how to protect yourself.

How can I get information about local or regional preparedness efforts, contact information, training and events?
Additional information may be found in the MI Volunteer Registry, the OPHP Website, or MI-TRAIN.

6. CONTACT INFORMATION

How will I be contacted in an emergency?
You will be contacted via e-mail. The e-mail message will provide all of the information about where to report, credentials to bring, and other necessary information relative to the situation.

If I have questions or concerns once I have registered, whom do I contact?
If you have general or technical assistance questions regarding MI Volunteer Registry, please contact a Registry administrator at help-mivolunteerregistry@michigan.gov or (866) 636-6324.

If I volunteer, will there be help available to take care of my family?
No, this is a personal responsibility and whether you chose to volunteer or not, it is important to develop an emergency plan for your family.

Z: VOLUNTEER MICHIGAN INFORMATION

(Source: Michigan Community Service Commission / Volunteer Michigan web site; reformatted for space / appearance purposes and edited for relevant content)

VolunteerMICHIGAN

Promoting volunteerism as a strategy for strengthening Michigan communities.

About Volunteer Michigan

Volunteer Michigan is the state of Michigan's collaborative volunteer initiative. Through a strategic partnership between the Michigan Community Service Commission (MCSC) and the Volunteer Centers of Michigan (VCM), Volunteer Michigan will implement a variety of tools as it seeks to connect volunteers with the organizations that need them, increase the visibility of volunteers statewide, and highlight the urgent need for increased volunteerism across Michigan. As a result of its volunteer promotion and resource development, Volunteer Michigan will demonstrate that volunteerism can be and is an effective and proven strategy for strengthening Michigan's communities.

About the MCSC

The Michigan Community Service Commission (MCSC) is the state's lead government agency on volunteerism. For more than 20 years, the MCSC has been promoting service as a strategy to address Michigan's greatest challenges and providing vision and resources to strengthen communities through volunteerism. To help advance their mission, the MCSC relies on four signature programs: Michigan's AmeriCorps, Mentor Michigan, Volunteer Michigan, and the Governor's Service Awards. Since its inception in 1991, the MCSC has invested more than $100 million in communities for volunteer initiatives, leveraged an excess of $85 million in local funds, engaged more than one million people in volunteerism, enrolled 24,000 people in 29 million hours of AmeriCorps service, and impacted critical community issues such as disaster preparedness, education, foreclosure, healthcare, and the environment.

About VCM

Volunteer Centers of Michigan (VCM) is an affiliate program of the Michigan Nonprofit Association that supports a statewide network of more than 30 Volunteer Centers. These Volunteer Centers, which collectively serve nearly 60 of Michigan's 83 counties, play an instrumental role in developing creative community solutions through service. VCM works to ensure that each of these Volunteer Centers can continue to positively impact their community by strengthening, developing and connecting network members throughout the state. To achieve this mission, VCM provides resources, fund development, networking opportunities, training, and more to Michigan's Volunteer Center field. With the support, services, and assistance of VCM, local Volunteer Center affiliates are able to grow and expand the positive work they perform in their individual communities and increase volunteerism statewide. The VCM network has served the sector for more than 25 years and is the only one of its kind in the nation.

FAQ – For Volunteers

How do I become a member of Volunteer Michigan?

Becoming a volunteer is easy! Simply become a member (volunteer) and start searching! It doesn't cost anything to register and your information will be kept private and secure. Before you get started, ensure your community is not currently served by a local volunteer center by clicking here.

Volunteer Michigan: FAQ – For Volunteers (cont.)

What if my community is already served by a local volunteer center?
We highly encourage Michigan residents to volunteer with the Volunteer Center in their community, if one exists. Local Volunteer Centers are the best place to search for volunteer opportunities as they work with nonprofits, schools, and other organizations right in your backyard, and can often provide more localized information and support. However, if you have searched your local volunteer center's service opportunities and didn't find one you were interested in, please feel free to use the Volunteer Michigan portal. We would also encourage you to use our site if you plan to volunteer in other communities outside of your own.

Does it cost anything to volunteer?
Just your time and skills! Volunteering is free.

How much time do I have to commit?
It's entirely up to you! You can volunteer as much or as little as you like based on your time and interest. However, every organization will have different requirements for their volunteer opportunities. Some organizations may require an orientation and training with a commitment of a certain number of hours while others may not have any of those requirements.

What is a Volunteer Leader (VL)?
A VL is just a regular volunteer (like you) who makes volunteer-managed projects meaningful, successful and FUN! VLs share project details with volunteers, guide the team onsite, build their leadership skills, and make these events possible.

What if I don't find what I'm looking for on the calendar of projects?
We also offer a searchable database of volunteer opportunities that occur on an ongoing basis.

Can I volunteer if I am under 18 years-old?
Check the age listing for each project as the minimum age varies depending on the agency and activity. Some organizations may require an adult to volunteer with you or at least attend an orientation. In addition, some volunteer activities may require a waiver to be filed at the event. Volunteers under the age of 13 are unable to sign up through our website due to the Federal Child Online Privacy Protection Act (COPPA).

I don't have transportation. Can you get me to the volunteer projects?
Unfortunately, we do not have the capacity to transport volunteers to volunteer activities.

Questions About the Website

After I have become a member, how do I sign up for a volunteer project?
Click on the "Find an Opportunity" section of our website to search for volunteer projects by keywords and locations or by date on our opportunity calendar. Once you find one of interest to you, sign up for the opportunity through our website. You will receive an e-mail with directions and any other special instructions. Then go out on the project and have a great time while helping to meet an important community need.

How do I change my password or update my email address?
After you log-in to our website, click the "My Account" sub-tab and then click "Personal Information." Make your changes and click "Update" at the top of the screen.

What if I am unable to sign-up for a project through the website?
You can always contact the Volunteer Michigan staff at info@volunteermichigan.org. We would be glad to assist you with the registration process.

How do I remove myself from a project I signed up for previously?
Log-in to our website, click on the "My Account" sub-tab, and scroll down to "Upcoming Opportunities." Then, simply click "Remove Me" next to the project from which you wish to remove yourself. Please do this as early as possible so that your volunteer slot becomes available for other volunteers to fill.

What if a project I want to sign-up for is full? Can I get on a wait-list?
If a project occurrence is full, the "Sign Up" button that typically appears at the bottom of the project page will change to "Add Me to Wait List." Simply click there to add yourself to the project's waitlist. Although the website may say that you have been registered, please note if the project is full, you are not officially registered until a space opens up. You will be notified if a space opens up and will then be able to officially register yourself for the project.

Volunteer Michigan: Questions About the Website (cont.)

Which browser do you recommend for the best performance?
HandsOn Connect runs on the Salesforce platform, therefore we recommend using Firefox for the best performance. Google Chrome is also an acceptable alternative. If you use Internet Explorer, Internet Explorer version 8 is recommended over versions 6 and 7. While using Internet Explorer you may experience a slower response time over the recommended browsers.

FAQ – For Organizations

How do I become a partner agency?
Becoming a partner is easy! We are always looking for new volunteer opportunities and partners. If you are a nonprofit, school, faith-based, government or civic organization that would like to partner with us to recruit and manage volunteers, please visit our "Register As a Partner" page. Before you get started, ensure your community is not currently served by a local volunteer center by clicking here.

What if my community is already served by a local volunteer center?
We highly encourage community organizations to work directly with the Volunteer Center in their community, if one exists. Local Volunteer Centers are the best place to search for volunteers as they can often provide more localized information, outreach, and support. However, if you have tried connecting with your local Volunteer Center or would like to use our portal in addition to your local resource, please feel free to use the Volunteer Michigan site. We would also encourage you to use our site if you are trying to recruit and manage volunteers in multiple communities across the state.

Does it cost anything to register my opportunities?
Nope! We are proud to offer this online listing service free to nonprofit organizations, schools, community and faith-based organizations, civic groups, and more throughout the state of Michigan.

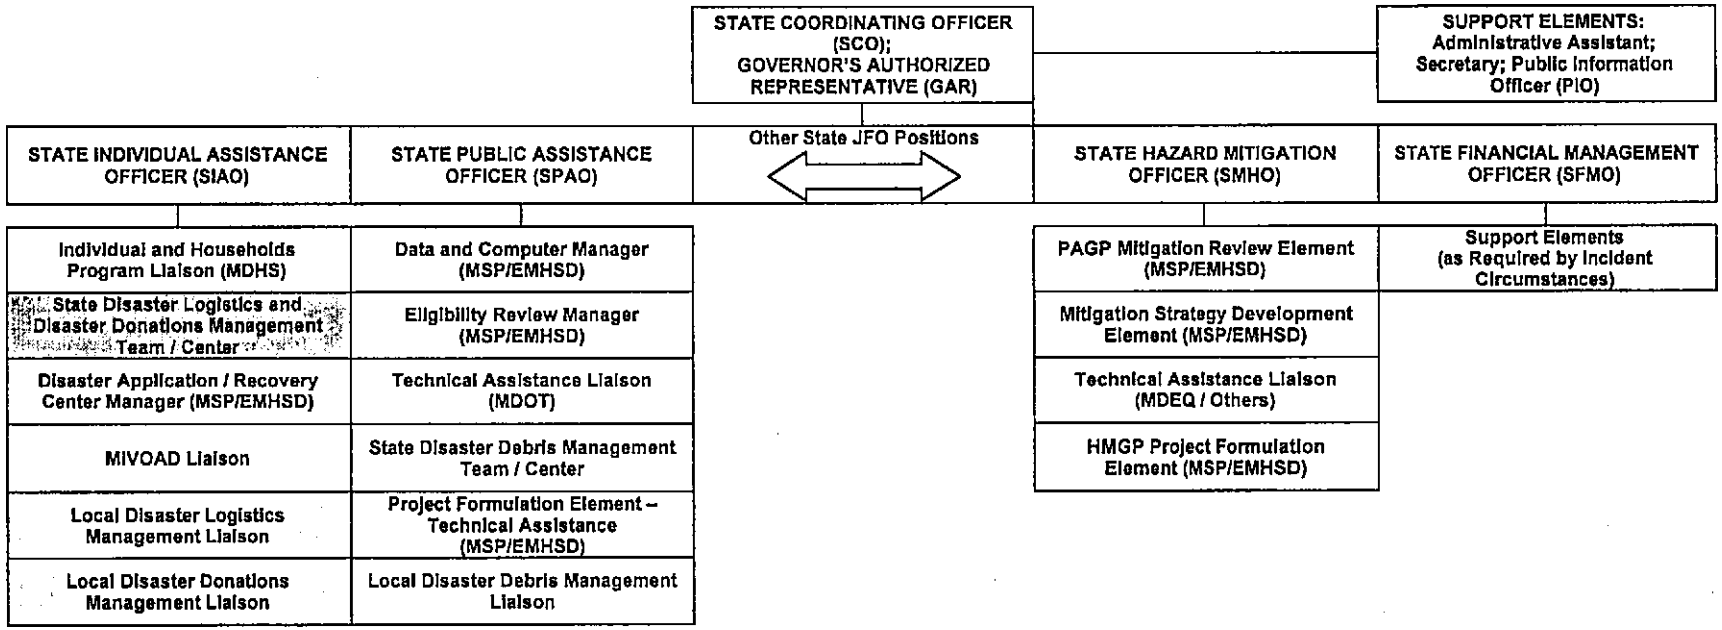
How do I submit new volunteer opportunities?
Currently, to submit volunteer opportunities, we are asking all partner agencies to fill out our online opportunity form.

What happens when a volunteer signs-up for one of my opportunities?
When a volunteer signs up for, or expresses interest in one of your volunteer opportunities an email is generated to both you and the volunteer (and Volunteer Michigan). In your version of the email, you will be given information on the volunteer such as which opportunity they are interested in, as well as their contact information as entered into our system. It is then up to you to contact that volunteer to schedule the next steps - whether that be scheduling their volunteer hours or contacting them for an interview - or just letting them know that the opportunity is full (be sure to let us know too!).

Do I have to take every volunteer that signs up through this website?
Absolutely not. These are YOUR volunteers – so go through any process you normally would and take only the volunteers you want! We only ask that you contact EVERY volunteer that signs up for your opportunity. If you are unable to do so, please let us know so we can deactivate your opportunities. We want to provide the best experience for volunteers possible, and that includes responding to their interest.

I have an urgent volunteer need, can Volunteer Michigan help?
YES! First, be sure that you have filled out a Volunteer Opportunity Form and that the volunteer opportunity is in our system. Next, contact us! Email us, Facebook us, Tweet us – whatever you are most comfortable with and we'll do our best to help you get the word out through our social media channels.

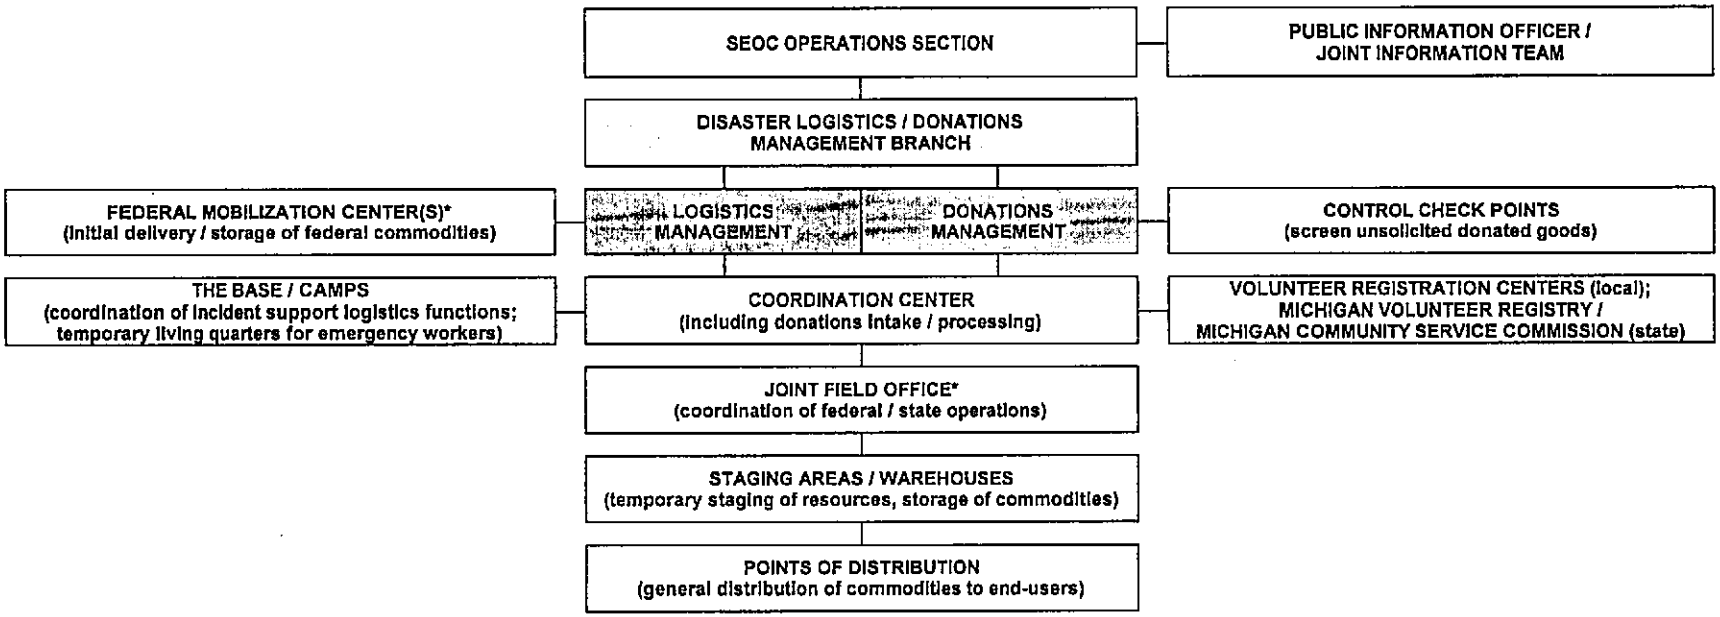
AA. FIGURE 1: TYPICAL JOINT FIELD OFFICE ORGANIZATIONAL STRUCTURE FOR LOCAL AND STATE STAFF



Background Notes: The state-level positions in this basic organizational structure which are logistics and donations management-specific are that of State Disaster Logistics Management Coordinator and State Disaster Donations Management Coordinator, who lead, respectively, the logistics management and donations management functions of the State Disaster Logistics and Donations Management Team. In addition, the State Individual Assistance Officer (SIAO) works to ensure that the life-sustaining needs of the affected population are being adequately met through the various federal financial assistance programs, disaster donations, or the direct provision of commodities.

Most of the other JFO positions are not directly related to logistics and donations management, but rather to other assistance programs. However, several do have impact on logistics and/or donations management operations. For example, the State Public Assistance Officer (SPAO) is instrumental in determining the eligibility of certain logistics and/or donations management activities for reimbursement under the federal PAGP – Category B (Emergency Protective Measures). The State Coordinating Officer (SCO) works to ensure that the disaster response and recovery effort is proceeding forward and that all necessary resources are mobilized and operational. The State Financial Management Officer (SFMO) is responsible for tracking and compiling costs associated with the logistics and donations management operation (and other disaster operations as well). The PIO, Administrative Assistants, and clerical staff will also be involved in logistics and donations management, but in a support capacity. (They have other disaster-related duties to perform for other program areas.)

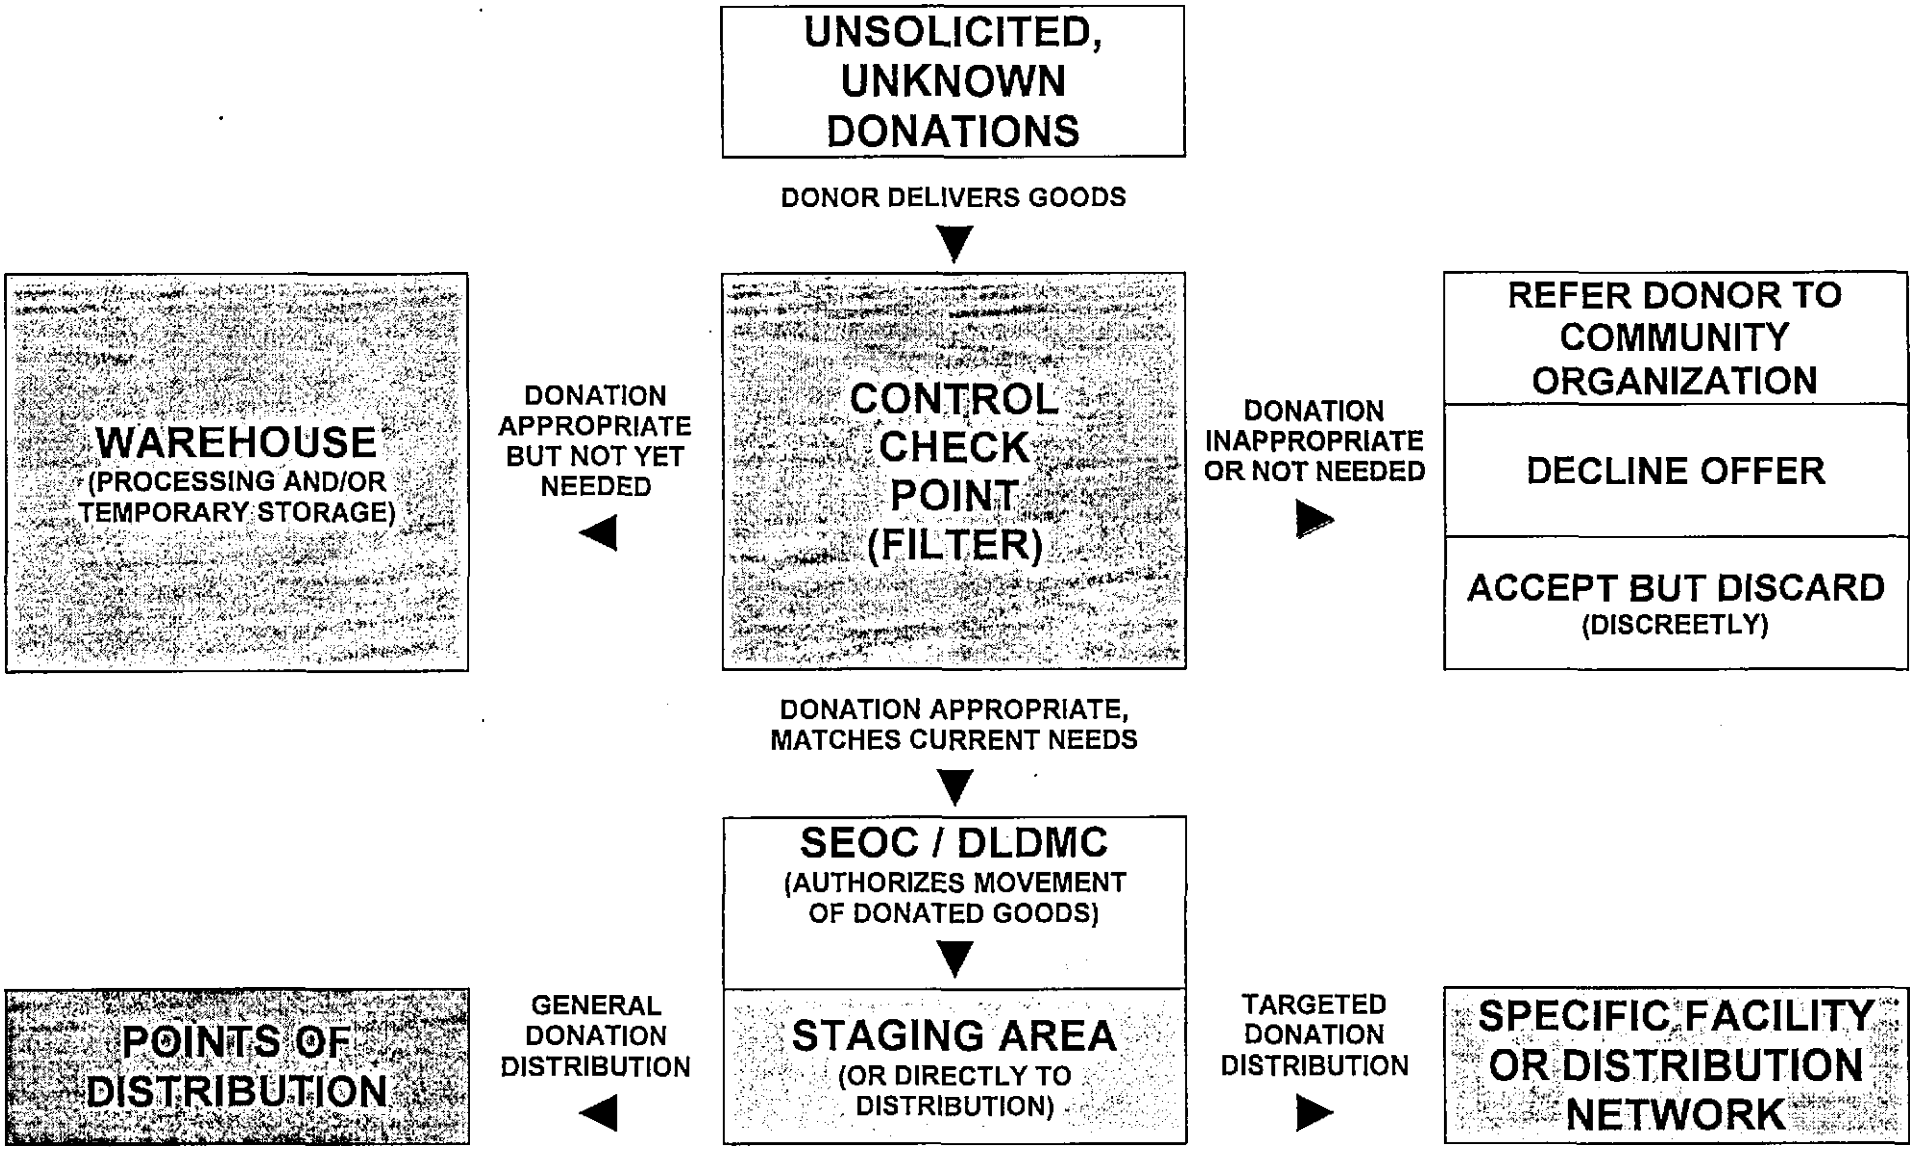
AA. FIGURE 2: PRIMARY ORGANIZATIONAL ELEMENTS OF DISASTER LOGISTICS / DONATIONS MANAGEMENT BRANCH, SEOC OPERATIONS SECTION



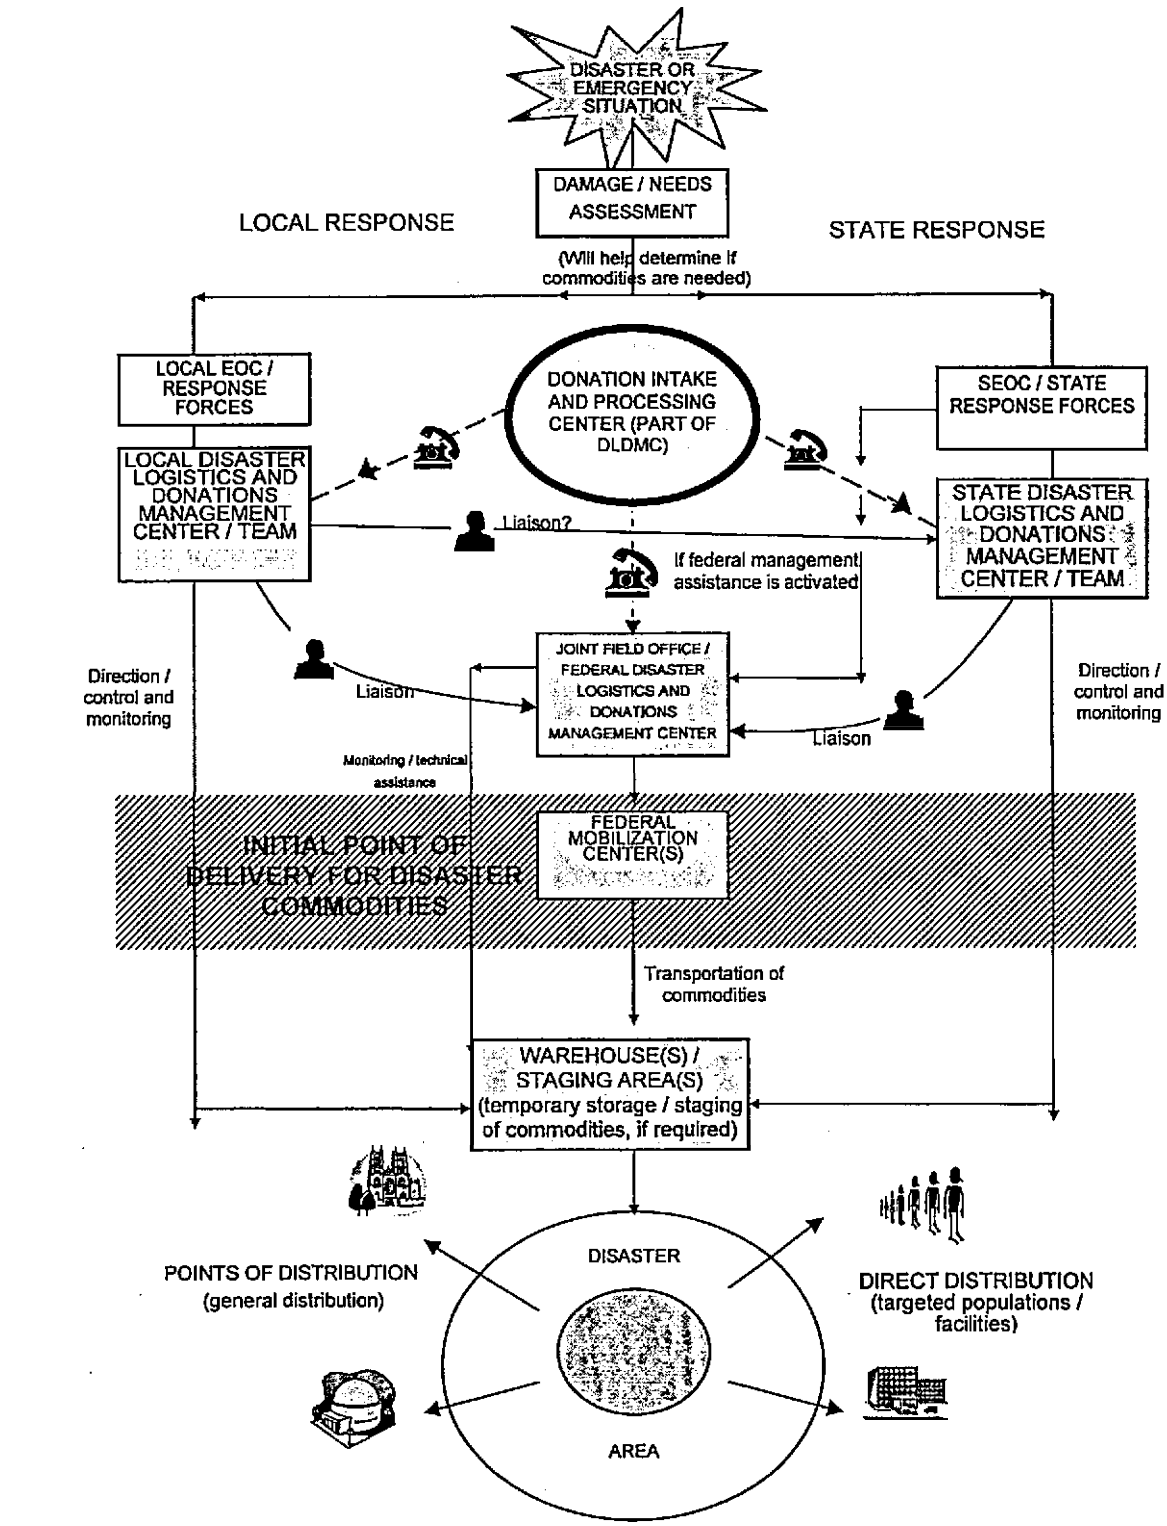
*Activated only for a federal Stafford Act declaration which involves federal assistance with logistics and/or donations management.

Background Note: This generalized organizational chart will be customized to fit local and state conditions and needs for each incident requiring a disaster logistics and/or donations management operation.

AA. FIGURE 3: RELATIONSHIP BETWEEN DONATIONS MANAGEMENT FACILITIES

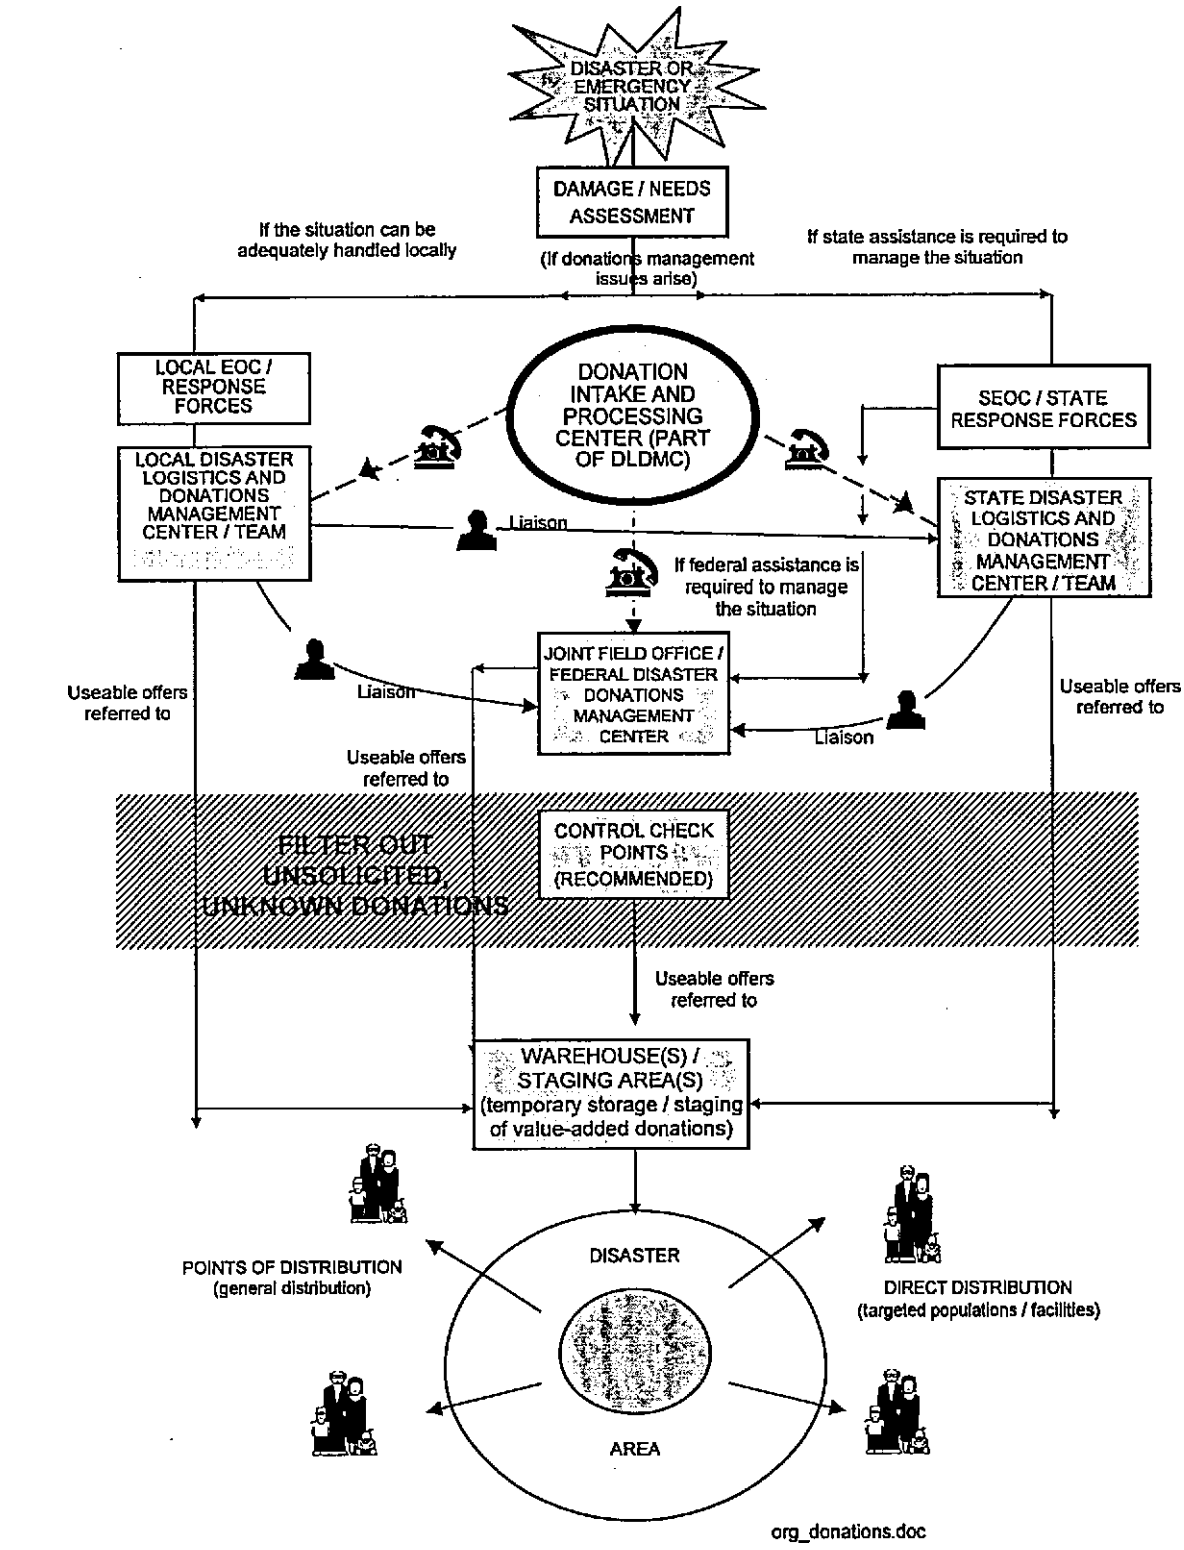


AA. FIGURE 4: INTEGRATED DISASTER LOGISTICS / DONATIONS MANAGEMENT PROCESS FOR FEDERALLY-DECLARED INCIDENTS



AT STATE DISCRETION, COMMODITIES MAY BE DELIVERED DIRECTLY TO POINTS OF DISTRIBUTION OR OTHER DESIGNATED LOCATIONS INSTEAD OF GOING TO WAREHOUSES / STAGING AREAS.

AA. FIGURE 5: DISASTER DONATIONS MANAGEMENT (ONLY) PROCESS FOR FEDERALLY-DECLARED INCIDENTS



BB. NATIONAL RESPONSE FRAMEWORK SUPPORT ELEMENTS FOR LOGISTICS / DONATIONS MANAGEMENT, AND CORREDPONDING STATE PLANNING AND OPERATIONAL CONSIDERATIONS*

NRF Annex	Logistics / Donations Management Assistance Provided	State Logistics / Donations Management Considerations
ESF 5 Information and Planning (May 2013)	• Supports overall activities of the federal government for incident management. • Coordinates federal incident action planning. • Staffs key positions on federal emergency response teams. • Establishes required field facilities, supplies, and equipment to support federal activities during federally-declared incidents. • Provides core management / administrative functions in support of JFO operations. • Maintains a cadre of trained reserve employees to provide surge capability for essential functions. • Provides staff for Logistics Section, which implements the NRF Logistics Annex (ESF 7).	• Immediate and continuous coordination with federal response elements. • Coordinate incident action planning (related to logistics and/or donations management) with federal counterparts. • Articulate state-determined commodity needs and capability shortfalls as early as possible in the response phase so that federal support can be mobilized. (State needs should be clearly articulated in the request for a federal declaration.) • Coordinate with federal officials regarding the establishment and operation of needed field facilities to support logistics / donations management and other required functions. • Provide state staff for established federal field facilities, as appropriate. • Continuously collect and share incident-related information to facilitate effective operations.
ESF 6 Mass Care, Emergency Assistance, Temporary Housing and Human Services (May 2013)	• Promotes the delivery of services and the implementation of programs to assist individuals, households, and families impacted by federally-declared incidents. Responsible for mass care, housing, and human services functions. • Helps determine resource (i.e., commodity) requirements based on identified resource and capability shortfalls, and affected area / population characteristics. • Assists in locating and procuring needed commodities and/or donations to sustain the affected area and population through the response and/or recovery phase.	• Identify and quantify locally-available commodities to support mass care, temporary housing, and other human service needs. • Determine resource (i.e., commodity) needs and shortfalls through capability and incident assessments. • Articulate state-determined commodity needs and capability shortfalls as early as possible in the response phase so that federal support can be mobilized. (State needs should be clearly articulated in the request for a federal declaration.) • Continuously collect and share incident-related information to facilitate effective operations.
ESF 7 Logistics (May 2013)	• Provides resource support prior to, during, and/or after federally-declared incidents. • Locates, procures, and issues resources to federal agencies to support response and recovery operations. • Establishes and manages federal Mobilization Centers (General Services Administration) when mission assigned by FEMA. • Establishes the NIMS-compliant framework for federal logistics and/or donations management operations for federally-declared incidents. • Addresses Materiel Management, Personal Property Management, Facility Management, and Transportation Management.	• Articulate state-determined commodity needs and capability shortfalls as early as possible in the response phase so that federal support can be mobilized. (State needs should be clearly articulated in the request for a federal declaration.) • Coordinate with FEMA / GSA regarding state staffing at federal Mobilization Centers. • Coordinate with NRF ESF 1 (Transportation) regarding the movement of commodities into and through the state. (The MDOT will coordinate the issuance of oversize and/or overweight permits, as required, as well as advise on construction activities or other potential hindrances.) • Identify and coordinate the establishment of state and local facilities to support the logistics / donations management operation (based on incident circumstances). • Continuously collect and share incident-related information to facilitate effective operations. • The state logistics / donations management framework should be NIMS-compliant and consistent / compatible with the established federal logistics / donations management framework. (Note: This plan establishes a framework that is NIMS-compliant and consistent / compatible with the federal framework.) • The State must attempt to fill identified commodity needs through agency assets, mutual aid, NGOs, the EMAC, commercial sources, or private donations. If that cannot be done in a timely manner, then federal assistance may be requested. • Selection of federal Mobilization Center location(s) is based upon assessments conducted by federal, state, and local officials early in the incident assessment process. • The State must determine early on if commodities will be temporarily warehoused / staged at state-designated Staging Areas / Warehouses (for phased distribution / deployment), or if they should be delivered directly to local- and/or state-designated Points of Distribution and/or targeted facilities / populations. • The State must determine early on if federal transportation assets will be used to deliver commodities to designated locations, if state / local transportation assets will be used, or if a combination of the two would be most appropriate. • Ideally, a state liaison should be present in the JFO to coordinate logistics and/or donations management operations with federal staff.
Private Sector Coordination (May 2013)	• Describes policies, responsibilities, and concept of operations for federal incident management activities involving the private sector during federally-declared incidents. (Note: Many required disaster commodities are provided through private sector entities – either through purchase or donation.)	• Commodities donated by the private sector will be managed in accordance with the Michigan Disaster Logistics / Donations Management Plan – a support plan to the MEMP.

(Table continued on next page.)

BB. NATIONAL RESPONSE FRAMEWORK SUPPORT ELEMENTS FOR LOGISTICS / DONATIONS MANAGEMENT, AND CORRESPONDING STATE PLANNING AND OPERATIONAL CONSIDERATIONS*

(Table continued from previous page.)

NRF Annex	Logistics / Donations Management Assistance Provided	State Logistics / Donations Management Considerations
Catastrophic Incident (November 2008)	• Provides for the pre-identification and rapid deployment of key essential resources (i.e., commodities) that may be needed to save lives, protect property and critical infrastructure, contain the incident, and protect national security – organized into incident-specific "packages." • Federal resources identified in this Annex automatically deploy unless it is credibly established that the resources are not required based on incident assessments.	• Articulate anticipated / confirmed resource (commodity) needs and capability shortfalls to FEMA as soon as possible after the incident occurs (or prior to incident occurrence if circumstances allow). • Cost-sharing may be required for federal assets requested by the State. (Federal assets unilaterally deployed in accordance with the NRF Catastrophic Incident Annex do not require a state cost-share.) • If possible, determine the acceptable level of state cost-share for the incident (based on budget constraints, political realities, and social expectations) and factor that into all applicable facets of logistics / donations management decision making. • Continuously collect and share incident-related information to facilitate effective operations and to ensure proper resource (commodity) deployment.
Volunteer and Donations Management (May 2013)	• Provides support to states in the management of masses of unaffiliated volunteers and unsolicited donated goods before, during, and after an incident. • Provides a system to manage and coordinate offers of unaffiliated volunteer services and unsolicited donated goods from the private sector to the federal government, for use by state and/or local governments. • As appropriate, activates a headquarters-level Volunteer / Donations Coordination Team to expedite service provided to donors from large private sector entities, large civic organizations, and others, and to address large national media-driven collection drives. • As requested, activates a national donations and volunteer management web-based application to enable the general public to register offers of donated goods and/or services. • Facilitates management of warehouse and volunteer reception center capabilities. • Provides communications support such as coordination of a national hotline and/or call center.	• Coordinate with the MIVOAD, Citizen Corps Councils, the ARC and other appropriate NGOs to encourage participation in preparedness activities for logistics / donations management, including but not limited to planning, training, exercising, and development of operational support agreements. • As early as possible and in coordination with NGO and other involved partners, issue public information releases (using all appropriate dissemination means) specifically articulating state donations preferences and discouraging the donation of non-value-added items and the spontaneous arrival of unaffiliated, non-registered volunteers at the disaster area. • Establish a structure to receive, task, and employ the full range of goods and services that may be donated during an incident. • Ensure maximum use of value-added donated goods and services and NGO-provided goods and services at the local and state levels before seeking assistance from the federal government. • Identify and coordinate the establishment of state and local facilities to support the logistics / donations management operation (based on incident circumstances). • Work with the MDHS / MCSC to fully utilize the Volunteer Michigan web site and network of local Volunteer Centers to register unaffiliated volunteers and advertise opportunities for volunteer service in the disaster logistics / donations management operation and/or other incident response and recovery functions. • Work with the MDCH to fully utilize the Michigan Voluntary Registry web site to register unaffiliated volunteers for volunteer service in the disaster logistics / donations management operation and/or other incident response and recovery functions, and to recruit vetted volunteers in specific occupations and/or with specific skill sets for targeted placement.

*For details, refer to the full-text version of each Annex on the FEMA National Response Framework web site: http://www.fema.gov/national-response-framework

ESF 5 (Information and Planning Annex) – found under Emergency Support Function Annexes

State Emergency Management Coordinators:

In response to the Flint water contamination, the SEOC is requesting all state agencies compile a list of available assets near the Flint area which could be called upon during response to this incident. For example, if an agency has a vacant building in the area that could be used to stage donated resources, this information should be shared with the SEOC.

Please complete the attached spreadsheet, and submit to the **POSITION at EMAIL by DATE/TIME.**

If you have any questions or concerns with this request, please contact ***POSITION* at PHONE/EMAIL.**

Thank you,
SEOC

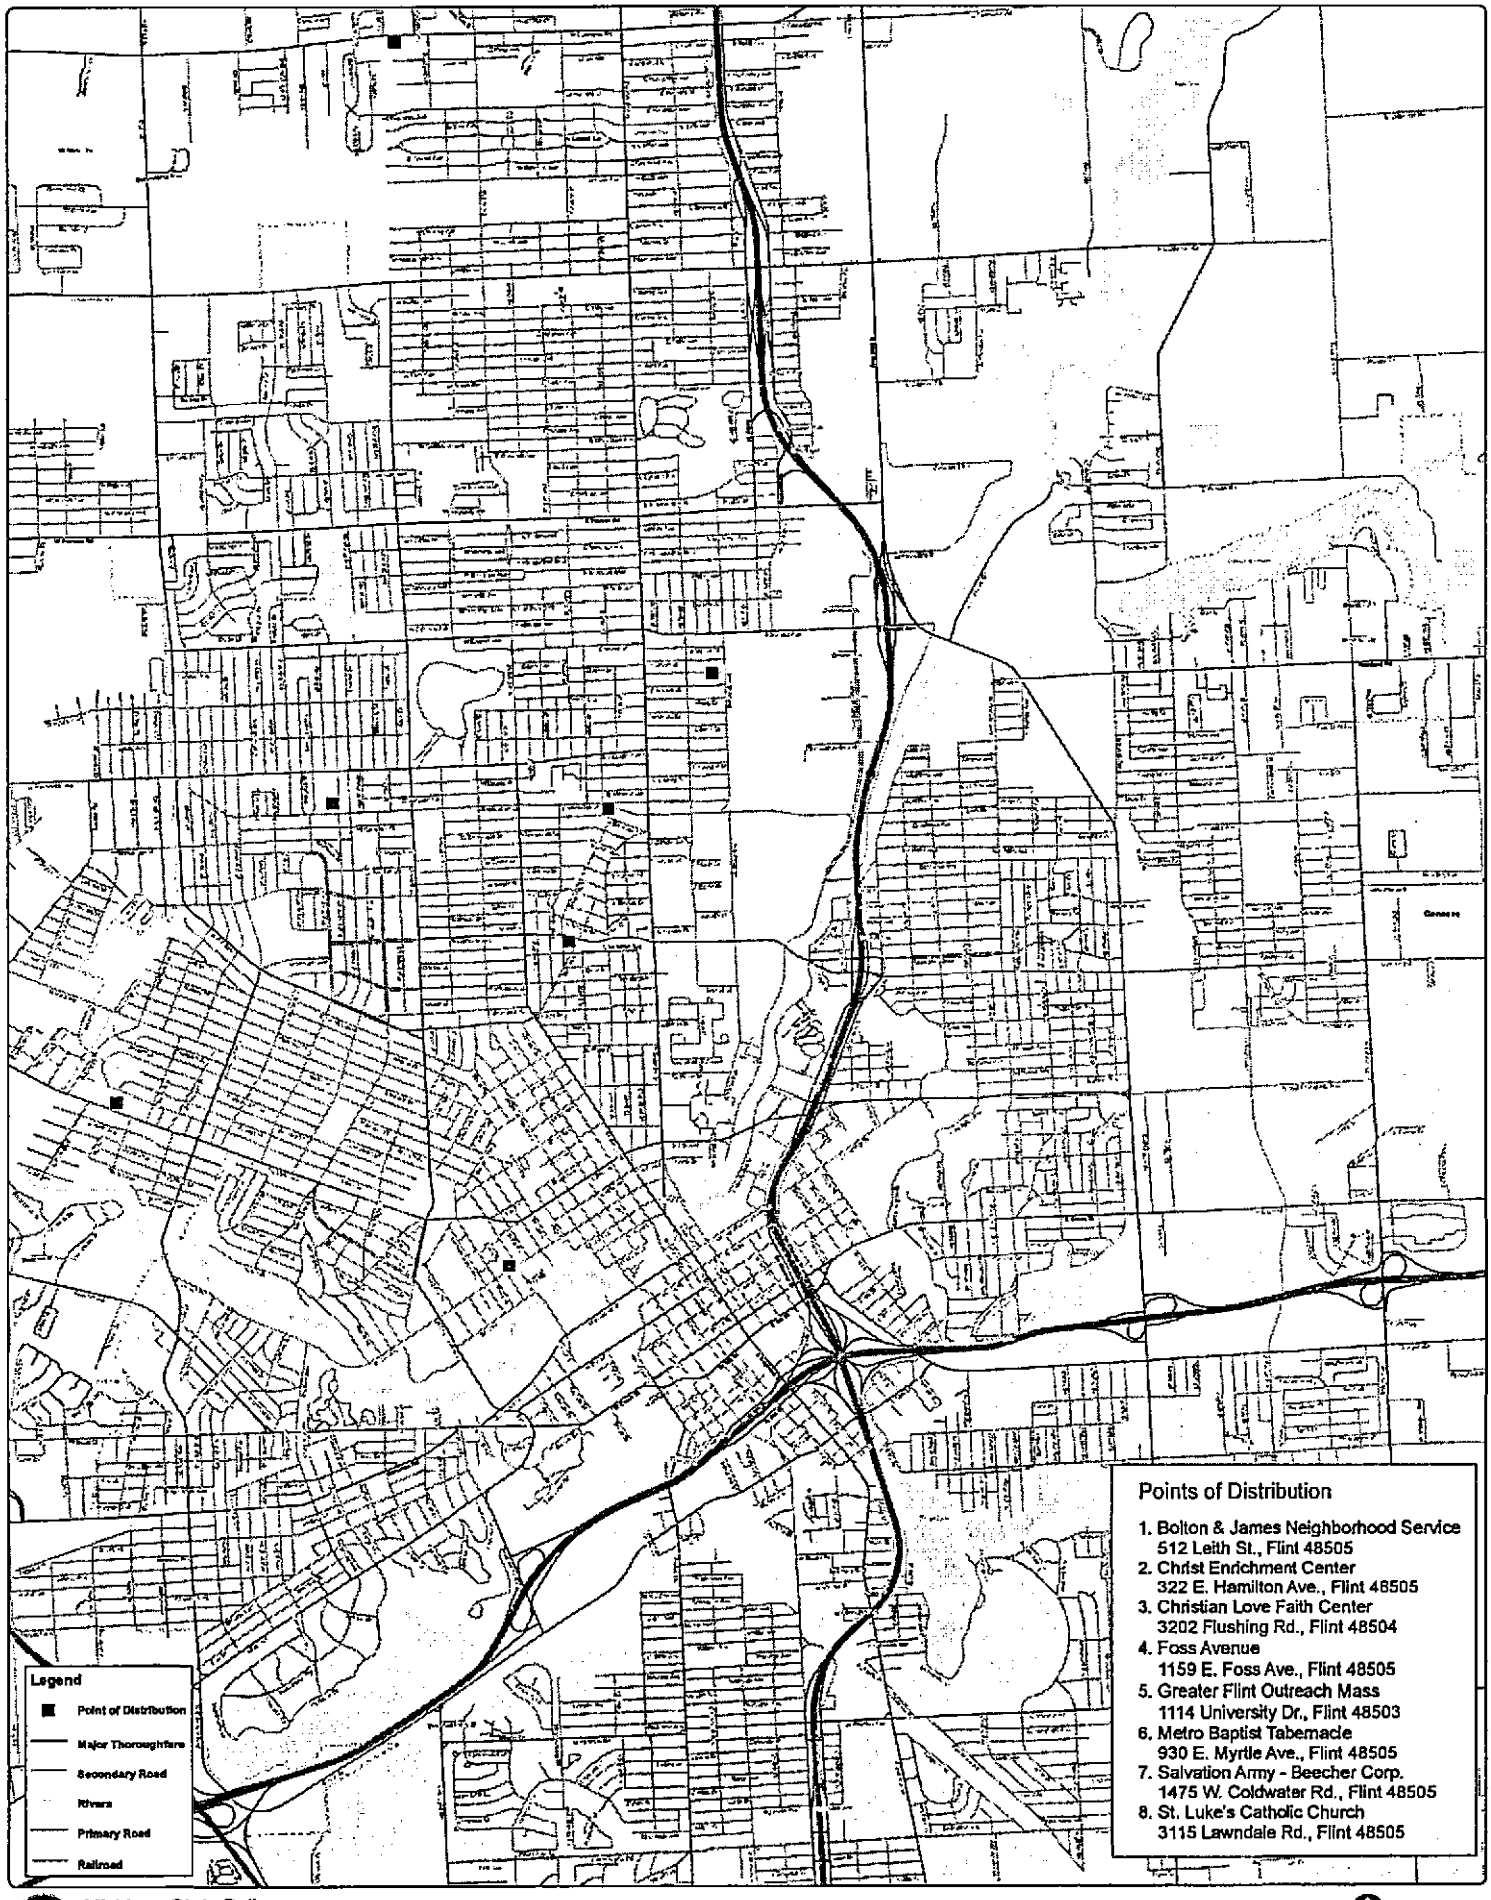
Objectives

Activate the State Recovery Task Force
Ensure coordination between the City of Flint, Genesee County, state and federal agencies, and appropriate medical experts.
Obtain and maintain situational awareness and common operating picture of all activities.
Establish operational period and hours of operations.
Investigate and identify all available programs for assistance with direct or related impacts, including the federal Lead Pipe Replacement Program.
Develop a comprehensive GIS strategy
Identify critical resources for acquisition and allocation.
Coordinate response and recovery activities with MIVOAD and identify potential mission areas.
Facilitate and coordinate technical assistance among state agencies and to local agencies.
Provide technical assistance to the local Damage Assessment process.
Establish a Joint Information Center and develop a public information strategy.
Monitor MI CIMS for resource requests and address as appropriate.
Establish and disseminate cost center information for the incident.

Command Emphasis

Provide regular local and technical briefings.
Identify life safety issues.
Identify priorities.
Provide policy direction by observance of SEOC SOPs.
Seek technical guidance from relevant federal agencies.
Provide regular legislative/congressional briefings.

Flint Water Crisis - Points of Distribution



Points of Distribution

1. Bolton & James Neighborhood Service
   512 Leith St., Flint 48505
2. Christ Enrichment Center
   322 E. Hamilton Ave., Flint 48505

Mike Sobocinski's notes from the SEOC briefing of January 6, 2015:

Capt. Kelenske: This activation is different from many. Overall goals will include assessing the situation, prioritizing actions, and coordinating between agencies, identifying life-safety issues. SEOC activation hours are currently 8a-5p Mon-Fri. MI CIMS event titled 2015-10-1-City of Flint water contamination/shortage. Maintain activity logs in MI CIMS. Battle order set up for today: IC objectives meeting 10am, assign work tasks 11am IC + general staff, 2pm planning meeting, IAP approved 3pm, Unified command initial meeting 4pm. Governor declared state of emergency. Presidential disaster declaration will not apply here, but an emergency is possible to supplement state efforts. Lead pipe replacement program to be checked into – perhaps by Jen [Boyer?] of MDEQ. GIS mapping to cover filter distribution, home locations, distribution/testing gaps, etc. Nutrition distribution program [correct title?]. More of a long-term recovery style of approach. Goal to restore trust in state government. JIC will be set up.

Dr. Wells (DHHS chief medical executive): Pb as neurotoxin, affecting every system in the body, lowering Fe and Ca. Especially problematic in developing children under age 6, esp if not getting enough Ca, Fe. Standards have become increasingly strict over time, with Pb levels formerly 10ug/dl to warrant action, then lowered to 5ug/dl, and today Pb is treated as having no safe exposure level.

[NOTE: she is referring to blood concentration levels of micrograms per deciliter, not to be confused with water concentrations referred to elsewhere in units of micrograms per liter: ug/l. I'm using u to represent the greek letter mu, symbol for the "micro" prefix]

Health problems from lead include gastric problems, ulcers, anemia, etc. including death. Cognitive & developmental delays, attention & behavioral disorders. Pb sources include gasoline and paint (until the 1970s), pipes (esp. pre-1978 home construction), ammunition and firearms, soils & industrial sites, air pollution (especially in summertime). CLPP "clip" Childhood Lead Prevention Program. Screenings at age 1, age 2. Those who test >5ug/dl (national standard) are evaluated for environmental exposures/causes. Critical action level 45ug/dl – immediate medical treatment, chelation treatment to remove Pb, and investigation of Pb sources in environment. Water concentration does vary seasonally, with temperature and Ph changes. Old cities are targeted areas for higher risk. Virginia Tech independent testing of water. [From her limited description, I was unclear in the end of the relationship between these results and other tests.] Elevated Pb levels generally declining, including in Flint, until 3rd quarter of 2014 [fiscal quarter or calendar year???]. Hurley Medical Center deals with the high-risk area in Flint. American Journal of Public Health issue of 2 weeks ago had study published on this topic. Water is not the only source of Pb in the area. An increase was measured in 2 Flint zip codes [485]03 and [485]04 although it didn't reach statistical significance. Need to pin down high-risk areas – Pb levels can and do drop when environmental exposure is reduced. Testing since Oct. 1 [2015], to Dec. 18 [period for specific results, assuming testing still continues after Dec. 18?]. Improper water filter use, or non-use (e.g. after Detroit water restored in Flint), has caused problems. Pb has half-life of less than 30 days. Department [hers or in the city of Flint?] surveillance results: 23 children under 6, 7 children age 6+, 13 adults who had blood levels above 5ug/dl. 12 elevated Pb blood level investigations; now including water testing, but Pb in dust, paint, and soil was also found. 1 hospitalized (level in the high

30s of ug/dl). HUD-funded program at the state level [name?] Coordination with Wayne State University and Flint campus of [she had said MSU, but it is likely that it is instead U-M Flint]. Misinformation exists re: questions like whether it's okay to shower or bathe in the water [she provided no answer for her own example – is it okay?]. Much local support exists. Info sent through schools with the children who attend them. SNAF, WIF [double check?] nutritional programs for young children. Would like to test as many young children (under 6) as possible in the city. See MI.gov or Flint Water for information about filters – Home Depot as a partner. MDEQ includes blood Pb level in their testing reports.

Question asked: Are there other substances of concern besides Pb in water? A: yes, bacteria, Cu (esp. for those with Wilson's disease), and "other chemicals." [MDEQ person later fills in a couple of these: total trihalomethanes TTHM and halo-acetic acids HAA5, which both fall under the category of disinfectant by-products DBPs]

George Christian [correct spelling?] of the MDEQ (Flint action plan coordinator): Flint had used the Flint River as a source before 1967, in 1967 switched to use of Detroit Water and Sewer Department DWSD for its water supply. Jan 2006 discussions began with Karegnondi Water Authority KWA. April 17, 2014 [event? Possibly the end of DWSD supply?]. May 2014 city began using Flint River water. Aug-Sept Boil water notices issued in part of the city of Flint, for E. coli and total coliform violations. [NOTE: spoke too quickly for me to accurately catch all of the dates/events he mentioned. People really should provide their info in writing rather than rely upon verbal briefs under distracting SEOC conditions!] Had the Flint River as a back-up supply all along, which is why the facility there was still maintained [paraphrase; didn't catch exact wording]. Late 2014-early 2015 DBPs: HAA5 and TTHM, with carbon as a treatment to remove these compounds. Sequence of tests: first at 6ppb 90th percentile level [he didn't explain this well at all, but normally this would mean that the 90th percentile value is at or above the bottom 90% out of all ranked values in a list]. 2nd round of tests: up to 11ppb, compared to EPA's action level of 15ppb. Corrosion control treatment [a means of reducing lead concentrations in the water]. There were also issues reported involving the color, odor, and taste of Flint water. Virginia Tech Pb testing Sept 5 [?], 2015, with Pb advisory issued by Flint. Fall 2015 schools testing and actions required. Some fixtures and fountains above 100ppb. 4 samples per sampling point, after different flush times, 10 consecutive 1liter samples, 200-300 samples total per facility [math not exact; must be estimates], Info placed into spreadsheets and reports. Oct. 15 Flint switched back to DWSD water. Dec. 9, 2015 supplemental phosphate [PO?] addition began. Use of erosion controls do slow but do not stop the leaching process (of lead into the water). Any resident of Flint can obtain a bottle and take water samples in for testing; results posted online. Water filters are available for free. Overall slight downward Pb trend, but some values are well over 100ppb. One child care facility measured at 2500ppb. No historical test results there [in schools?] to compare with, but some historical data exists elsewhere to compare. [No mention of the comparisons themselves!] Not a problem only of Flint's, increasing recognition of problem more broadly. "Low-lead brass fixtures" could still have as much as 8% lead. [not sure whether he said this or Dr. Wells]

Dr. Wells: Excavation and manipulation of lead lines tends to exacerbate particulate levels.\

Capt. K: Everyone review the MEMP to look for relevant information. All info to go out through PIOs (except for internal coordination and calculations).

Richard [Thelen?] of DHHS: allocation to buy water and filters, 2 pick-up locations in Genesee – free filters [locations not specified, are they at DHHS offices?]. Water purchases from South Carolina.

Brad [Deacon?] of MDARD: Food services, processing, and restaurants are also of interest. Lead affects animals as it does humans, so companion animals may be affected.

??? of the Dept of Education? "DEA" or "DoA"? [people were not introduced properly!] said something about school meals.

ARC not yet involved at this point.

LARA helped DEQ with testing. Flint & Genesee oversee their won plumbing but lack inspectors – need assist from state (Capt: or through EMAC use)

Terrace Room to be used as initial JIC, with PIOs there.

Governor's Representative [name?]: pending lawsuit against governor, potential lawsuit under Safe Drinking Water Act. Everyone do your jobs, but take care, remembering litigation potential.

MDOT [Eileen Phifer?]: Many pipes are under roads and so coordination would be good; shared objectives probably exist w MDOT, EPA, etc.

Lt. BJ Roach, MSP: Genesee Co. Public Health Dept, GCARP [??] (public assistance forum) are involved: water distribution, filter distribution, education, Pb testing clinics (coordinated with DHHS), United Way, Flint Health Dept. Over 23K filters and replacement cartridges provided so far. County GIS getting under way – coord w MSP GIS?

Capt K: submit action items to Tom Weber for IAP. Everyone stay until noon and review MEMP, then to decide whether needed after lunch today.

Tony: Required agencies already known to be needed to stay: MDEQ, DHHS, Education, Talent & Economic Growth, MDTMB, MDARD.

ASSIGNMENT LIST (ICS 204)

1. Incident Name:	2. Operational Period:		3. Branch: Recovery Division: Group: Staging Area:
Recovery Branch (Obj. 1)-2015-10-01-City of Flint-Water Contamination/Shortage Objective: 1. Ensure all households within impacted community have required resources and are included in DEQ water sampling plan.	Date From: 02/23/2016 Time From:08:00:00	Date To: 03/01/2016 Time To: 08:00:00	

4. Operations Personnel:	Name	Contact Number(s)
Operations Section Chief:	Rotating Daily	
Branch Director:	Brianna Briggs	
Division/Group Supervisor	Carly Georgopoulos	

5. Resources Assigned:		# of Persons	Contact (e.g., phone, pager, radio, frequency, etc.)	Reporting Location, Special Equipment and Supplies, Remarks, Notes, Information
Resource Identifier	Leader			
ARC POC	Christina Curtis	1		
ARC POC #2	Daniel Wirth	1		

6. Work Assignments:

Critical Task: Support ongoing distribution efforts.

Tactics:
1. Verify with Logistics that there are enough supplies to support the PODS and Water Response Teams.
2. Coordinate with GIS on development of target area maps as needed.
3. Update Water Response Team Plan daily for distribution to key personnel.
4. Compile daily the distribution numbers from Water Response Teams and daily Recovery Branch accomplishments. Provide to Operations Section Chief and Planning Section Chief by 6 pm.
5. Demobilize resources as Water Resource Team sizes reduce.
6. Finalize FWRT transition to rapid response mission upon completion of targeted area mission.
7. Develop and implement a strategy for the recovery branch following FWRT transition to local EOC.

7. Special Instructions:

Any safety information, report in requirements, information to share/not to share, etc.

A Flint Water Response Team consists of personnel, transportation, mobile device, identified team leader with contact information, resource package (from warehouse).

All volunteers will be coordinated by the American Red Cross through the Volunteer Reception Center (VRC). Local EOC contact will coordinate with the VRC to fulfill missions.

The number of teams will vary from day to day for deployment during this operations period.

8. Communications (radio and/or phone contact numbers needed for this assignment):

Name/Function		Primary Contact: indicate cell, pager, or radio (frequency/system/channel)
Dave Gutierrez	/Red Cross	
	/	
	/	
	/	

9. Prepared by: Name: Carly Georgopoulos | Position/Title: Recovery Branch/Director | Date/Time: 02/15/2016 15:00:00

Comments [Add Comment]

Position	Name	Phone	Date/Time	Comment	Details
SEOC OPS Recovery Branch Director	Renee Tober	517-333-5030	02/08/2016 10:26:16	A recommendation was provided by email to SEOCOPSC to evaluate the need for the canvassing teams. If we continue canvassing efforts, Recovery Unit staff recommends possibly assisting with 211 calls and servicing the access and functional needs population. Recovery staff is working to compile a full list of these. It may be possible to reduce the number of ARC teams to five (or fewer).	Update
SEOC OPS Recovery Branch Director	Renee Tober	517-333-5030	02/01/2016 12:39:10	Staff continues to compile daily distribution numbers from Water Response Teams and provide updates to Operations Chief and Planning Chief. Recovery Unit continues to deliver nightly bullet reports on team accomplishments to Planning Section by 6 pm	Update
SEOC OPS Recovery Branch Director	Renee Tober	517-333-5030	02/01/2016 11:32:55	Coordinating with water response teams to follow up with houses, Franchise Customers and Apartment Complexes. Demobilizing resources as the number of teams have reduced. Act upon any new requests for resources.	Update
SEOC OPS Recovery Branch Director	Renee Tober	517-333-5030	02/01/2016 11:30:54	Staff continues to coordinate with the GIS Unit on development of target area maps such as Franchise customers, and Team Assignment Areas.	Update
SEOC OPS Recovery Branch Director	Renee Tober	517-333-5030	02/01/2016 11:25:35	Recovery staff has been attending daily Distribution Process Meetings to continue coordination and verification of supplies needed to support the PODs and the Water Response Teams.	Update
SEOC OPS Recovery Branch Director	Stacy Theis	517-336-2694	01/25/2016 13:17:36	Coordinating with water response teams to follow up with houses. Demobilizing resources as the number of teams have reduced. Act upon any new requests for resources.	Update
SEOC OPS Recovery Branch Director	Brianna Briggs	517-230-2949	01/12/2016 10:57:24	Hours of operation for the teams has been established and will remain 8:30 a.m. to 5 p.m. Local GIS has provided IPads and software for tracking distribution in the field. A tracking sheet has been developed and printed for use in the field if software issues occur. Training was developed and conducted for the teams currently scheduled to be in the field Tuesday through Friday. MSP is currently developing a strategy for canvassing of the entire affected area. Teams were deployed into the field as of 1000 Tuesday, Jan 15. Weather conditions and media avail at GCCARD prevented start time at 0830. MSP continues to monitor any safety and security concerns for the teams. EMHSD staff delivered the four vehicles being used for canvassing to the GCCARD facility on Monday, Jan 11. All related requests are currently being worked on and monitored by Recovery Branch staff. Additional requests are being considered in order to expand operations of the teams in the field. Training was conducted for the current teams. Daily deployment briefings will be conducted. The first briefing occurred Tuesday, Jan 12.	Update

FLINT WATER PLANT

Q. POINTS OF DISTRIBUTION – PLANNING AND OPERATIONAL CONSIDERATIONS

Background Note: The guidance found in this Attachment is taken from MSP/EMHSD Publication 107a, "Disaster Logistics and Donations Management Planning Handbook," and is intended to assist local jurisdictions in Point of Distribution selection, layout, operation, and closure. As such, it contains many references to local logistics / donations management positions – almost all of which have an equivalent, counterpart position at the state level. If state-level management assistance with a disaster logistics / donations management operation (a combined operation) is required, many of the decisions regarding facility establishment, layout, operation, and closure will be made jointly between the involved local jurisdiction(s) and state staff.

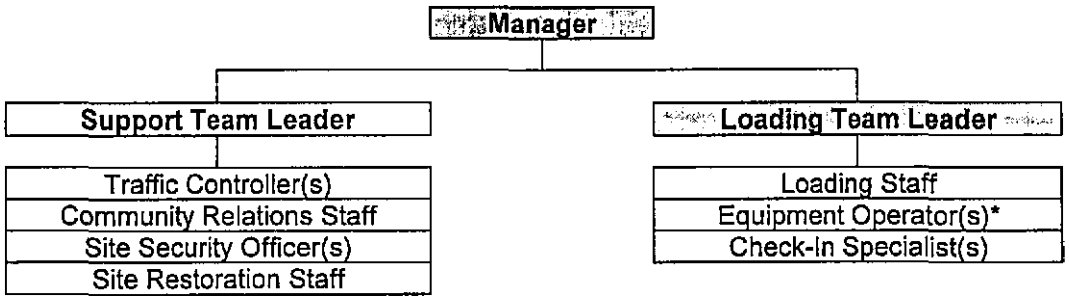
Background. Points of Distribution are local facilities operated by local agencies, churches and other faith-based organizations, and community-based and voluntary organizations, to provide goods (commodities) directly to disaster survivors. Points of Distribution will be located at a site the public recognizes and can easily locate, and will generally have controlled access and security provisions, restrooms, adequate lighting and parking, and access for handicapped individuals. Points of Distribution can be set up indoors (i.e., inside a building) or outdoors (i.e., in a parking lot or other large, open paved or gravel space). Generally, Points of Distribution will be set up to accommodate vehicle traffic (drive-thru), pedestrian traffic (walk-thru), and mass transit traffic (bus). Each person or vehicle will receive a set amount of supplies. (The recommended amount for each person / vehicle to receive is enough for a three-person household. The actual amount of supplies provided, however, will depend on the type of transportation used, the population density of the affected area, and anticipated need. The DLMC will make this determination after considering all relevant factors.) The involved local jurisdiction has primary authority for the activation, operation, and demobilization of Points of Distribution.

Locations. The MSP/EMHSD, working with local EMCs, has pre-identified Point of Distribution locations in each of the districts around the state. (Refer to Attachment W, "Pre-Identified Logistics / Donations Management Facilities – Points of Distribution.") Additional Points of Distribution may also be identified by local jurisdictions based on local logistics / donations management planning efforts. Points of Distribution will be activated by the DLMC based on operational needs, incident conditions, and the capabilities of each individual site / facility. Although any organization is free to open a facility to distribute goods to those in need, the only "official' Points of Distribution are those activated by the DLMC.

Background Notes: Non-official Points of Distribution (e.g., set up in parking lots of active enterprises, along active roadways, in parks, etc.) should generally be discouraged because they may have health, safety, and access concerns that officially-sanctioned Points of Distribution would not have. These facilities may also cause traffic, parking, crowd control and security concerns if not carefully located, planned, and operated. In addition, non-official Points of Distribution may result in: 1) workers not being covered for worker's compensation or liability if an injury occurs during the distribution of commodities; 2) the PODs not being able to adequately communicate with the EOC and other emergency support and coordination facilities; 3) the PODs not having adequate commodities to hand out or resources for operating; and 4) the creation of false expectations on the part of the public regarding the continued availability of certain commodities, or lack of commodities, in the community.

Organizational Structure. The Point of Distribution organizational structure consists of a Point of Distribution Manager, responsible for the overall set-up and management of the facility, a Loading Team, and a Support Team:

POINT OF DISTRIBUTION ORGANIZATIONAL STRUCTURE



*Equipment may include fork lifts, pallet jacks, trucks, etc., as appropriate. Source: FEMA IS-26: Guide to Points of Distribution, modified for this plan

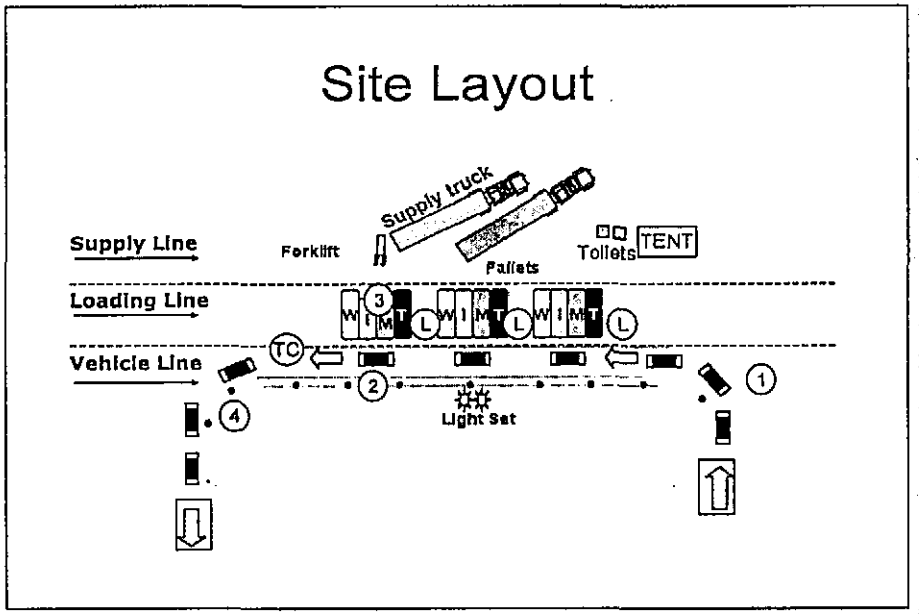
Specific task assignments for these various positions can be found in the "Facility-Specific Roles and Responsibilities" under "Point of Distribution Staff" in the main body of the plan.

Layout. Point of Distribution layouts generally conform to recommendations made by FEMA and the U.S. Army Corps of Engineers, as presented below and in MSP/EMHSD Publication 107a. Refer to Attachment W, "Pre-Identified Logistics / Donations Management Facilities – Points of Distribution," for a current list of designated Points of Distribution.

Background Notes and Site Layout Guidance: When developing the Point of Distribution site layout, there are several considerations to keep in mind: 1. What type of Point of Distribution will it be? Will it accommodate vehicles only (no walk-ups), both vehicles and pedestrians, pedestrians only (no vehicles), and mass transit use? (There are different set up requirements suggested for each.) 2. Are there entrance and exit concerns? Is there more than one entrance / exit point? 3. What is the traffic flow around the site? Will residents have to cross a busy street? Will having a Point of Distribution at this location halt the surrounding traffic and cause a traffic jam? Will this site impede emergency response vehicles? 4. Are there turns within the site or at the entrance / exit points that require extra maneuvering? Can large semi- trucks get in and out without assistance? 5. Prior to setting up and activating a Point of Distribution, make sure there are no hazards threatening the site or staff. (For example, is the Point of Distribution in a location that may flood? Is there debris on the site that could injure someone? Did the disaster create new hazards which must be considered? Is there a structure that could fall on the Point of Distribution? Is there a fire burning nearby that could affect the site?)

Each Point of Distribution site is divided into three areas: 1. The **SUPPLY LINE** is where supply trucks, usually tractor-trailers, have room to unload. This area also includes staff care facilities including restroom facilities and a rest tent. Having an informational bulletin board in the rest tent is a good way to keep the staff updated on conditions, concerns and issues. 2. The **LOADING LINE** is where supplies are kept waiting on stacked pallets to be distributed to the public. This is also where loaders wait while vehicles are moving through the Vehicle Line. 3. The **VEHICLE LINE** is where the public drives through to get supplies. Entry into the vehicle line occurs only when all vehicles have come to a complete stop and the Traffic Controller has instructed the staff to "LOAD."

Points of Distribution provide the same quantity of supplies to each vehicle. In the sample site layout and traffic flow diagram below, notations are made regarding the locations of water (W), ice (I), shelf stable meals (M), and tarps (T).

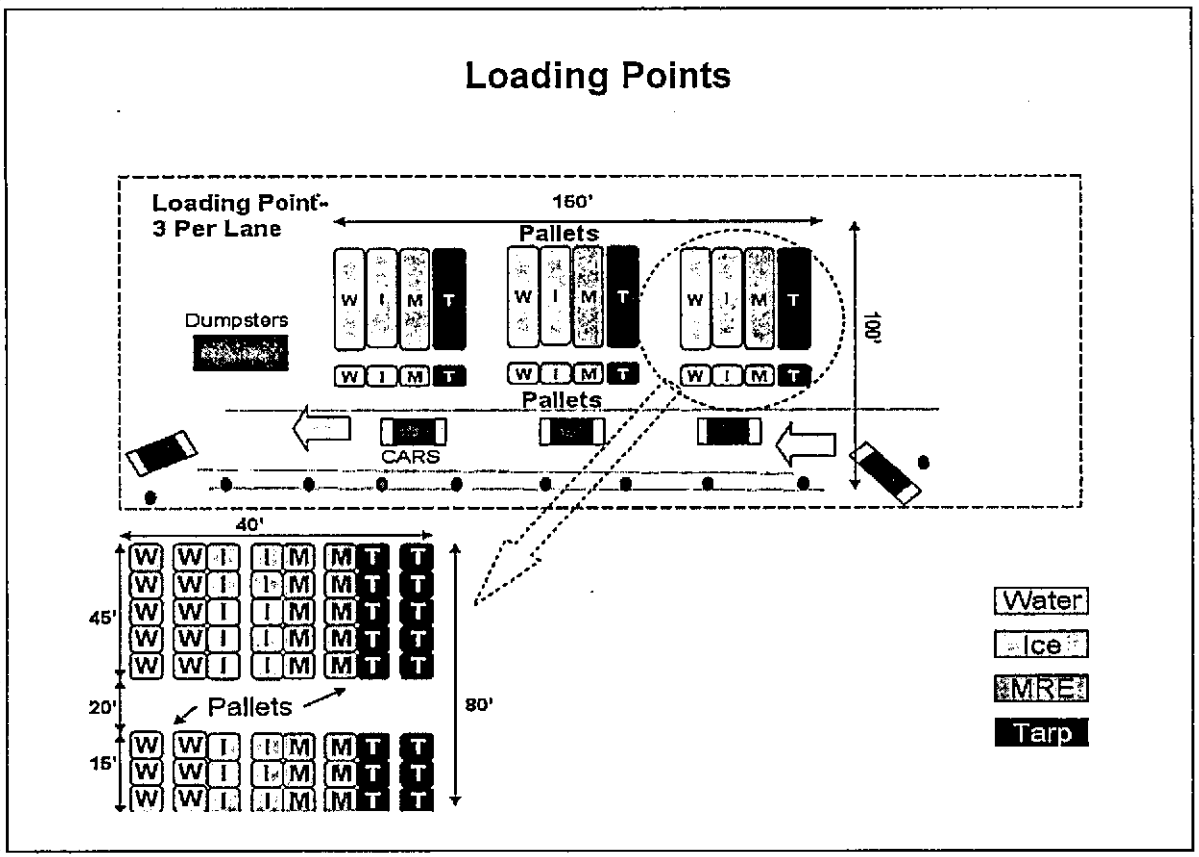


Graphic Source: FEMA IS-26 – Guide to Points of Distribution

Background Notes and Site Layout Guidance (cont.): When setting up a Point of Distribution, the recommended minimum space for each area is: 1) VEHICLE LINE – 20 feet wide; 2) LOADING POINT – 80 feet by 40 feet each; 3) SUPPLY LINE – 50 feet wide.

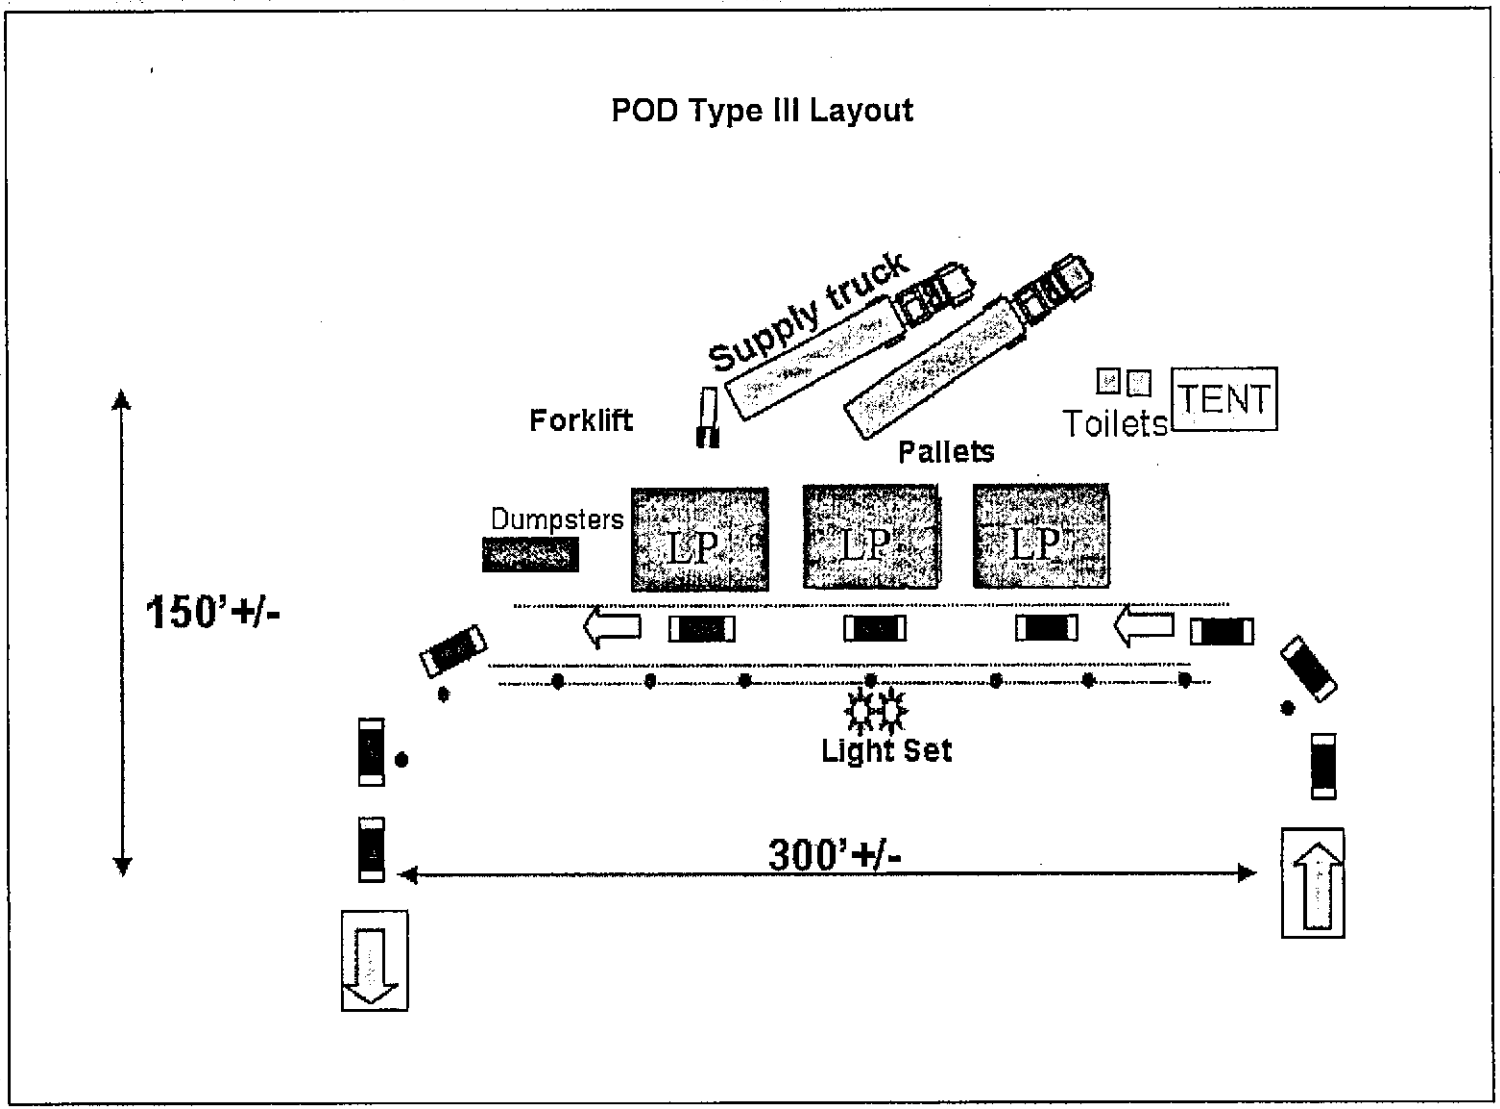
Traffic cones should be used to guide customers through the Point of Distribution site. The standards for placing traffic cones are different for pedestrian and vehicle Points of Distribution. For vehicles, cones should create a lane that is 12 feet wide, and not be placed more than 20 feet apart. For pedestrians, cones should create a lane that is five feet wide, and not be placed more than 10 feet apart. Signage for a Point of Distribution is the same for vehicles and pedestrians. A "Point of Distribution Ahead" sign will provide directions to inbound customers in locating the entrance to the site. If desired, there can be multiple signs placed away from the Point of Distribution to give the estimated distance to the site. An "Enter" sign should be placed to direct customers to enter at the correct point of the vehicle lane. Each loading point should be marked so that customers know to stop for materials to be loaded. An "Exit / Do Not Enter" sign should mark the vehicle lane exit. It is also important to clearly mark the opposite side of the sign with "DO NOT ENTER." Other signs that can be used at the Point of Distribution include but are not limited to: "This Site Staffed By;" "One Way;" and "Turn Here."

A proper layout of the loading points can ensure a smooth and efficient flow of goods through the Point of Distribution. Each loading point should be 80 feet by 40 feet. These dimensions are a guide to be adjusted according to the size and quantity of commodities being distributed. In the diagram above, notations are made regarding the locations of water (W), ice (I), shelf stable meals (M), and tarps (T). If the Point of Distribution is only providing water and food, the loading point can be smaller. Pallets of commodities must be separated at each loading point. This allows for a more efficient loading and re-supply of materials. If pallets of commodities are mixed, loaders will have to spend additional time sorting.



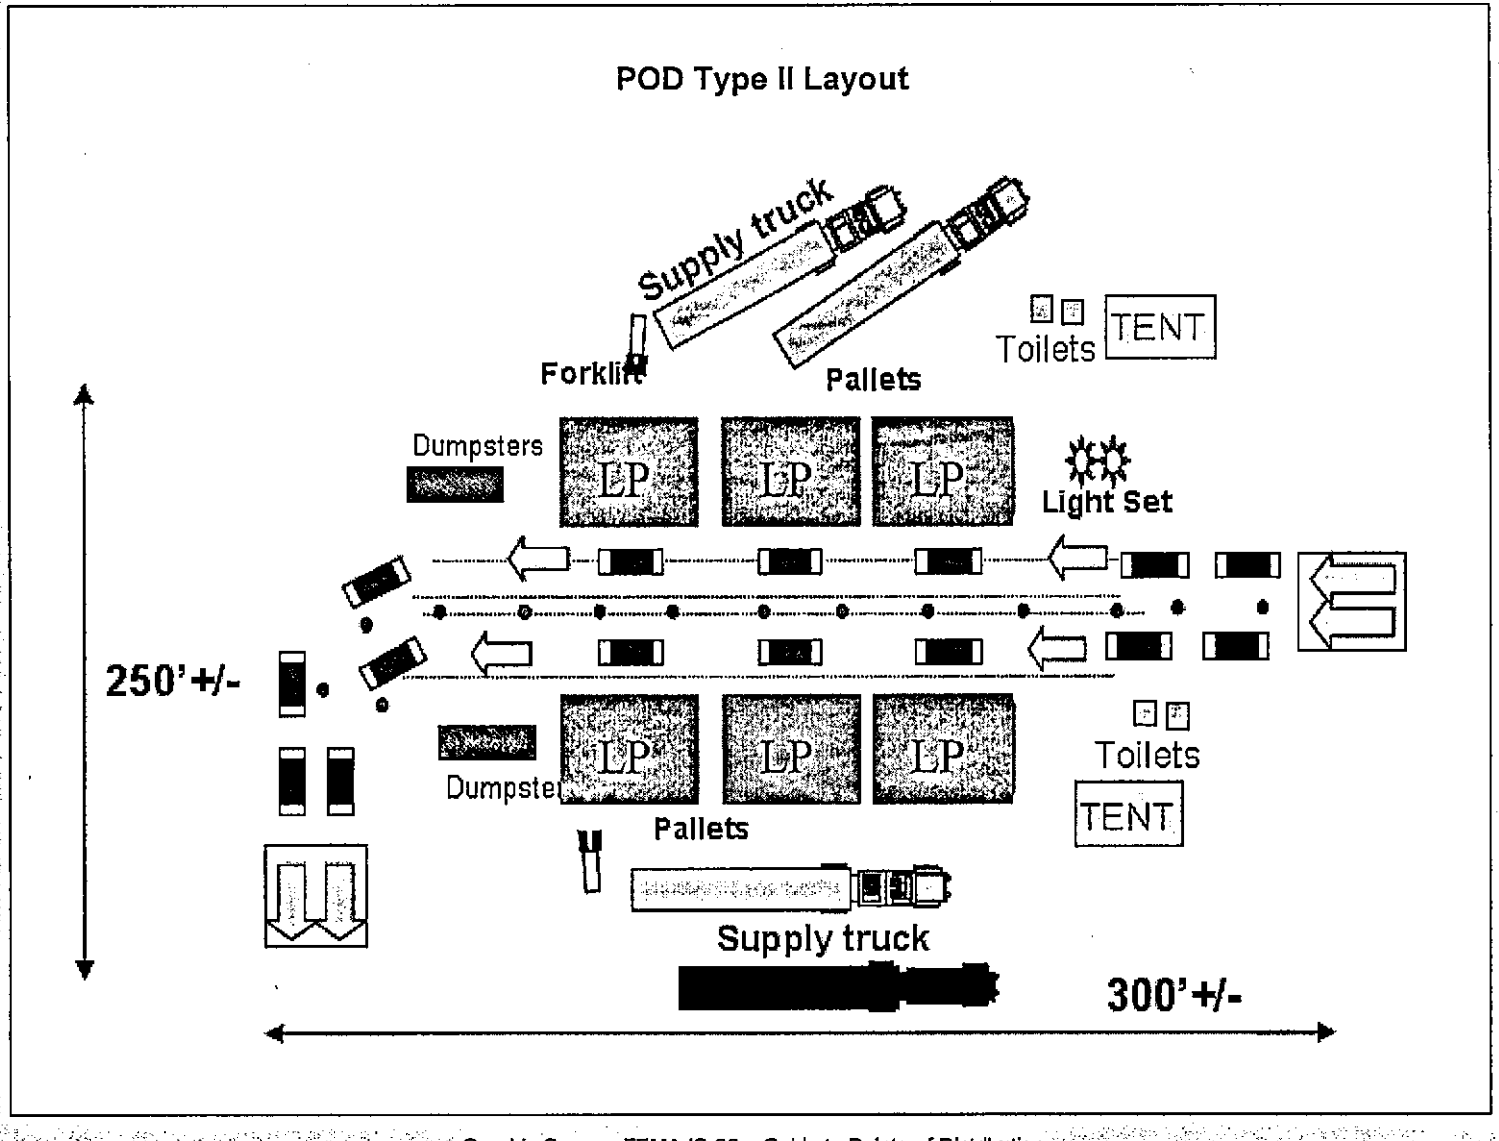
Graphic Source: FEMA IS-26 – Guide to Points of Distribution

Background Notes and Site Layout Guidance (cont.): The U. S. Army Corps of Engineers has developed a typing standard for Points of Distribution (a.k.a., PODs). The smallest is a Type III, which can serve 5,000 people a day based on one vehicle representing a household of three people. A Type III POD is 150 feet by 300 feet and requires a staff of 19 per day and four per night. A Type III POD has three loading points and only one vehicle lane.



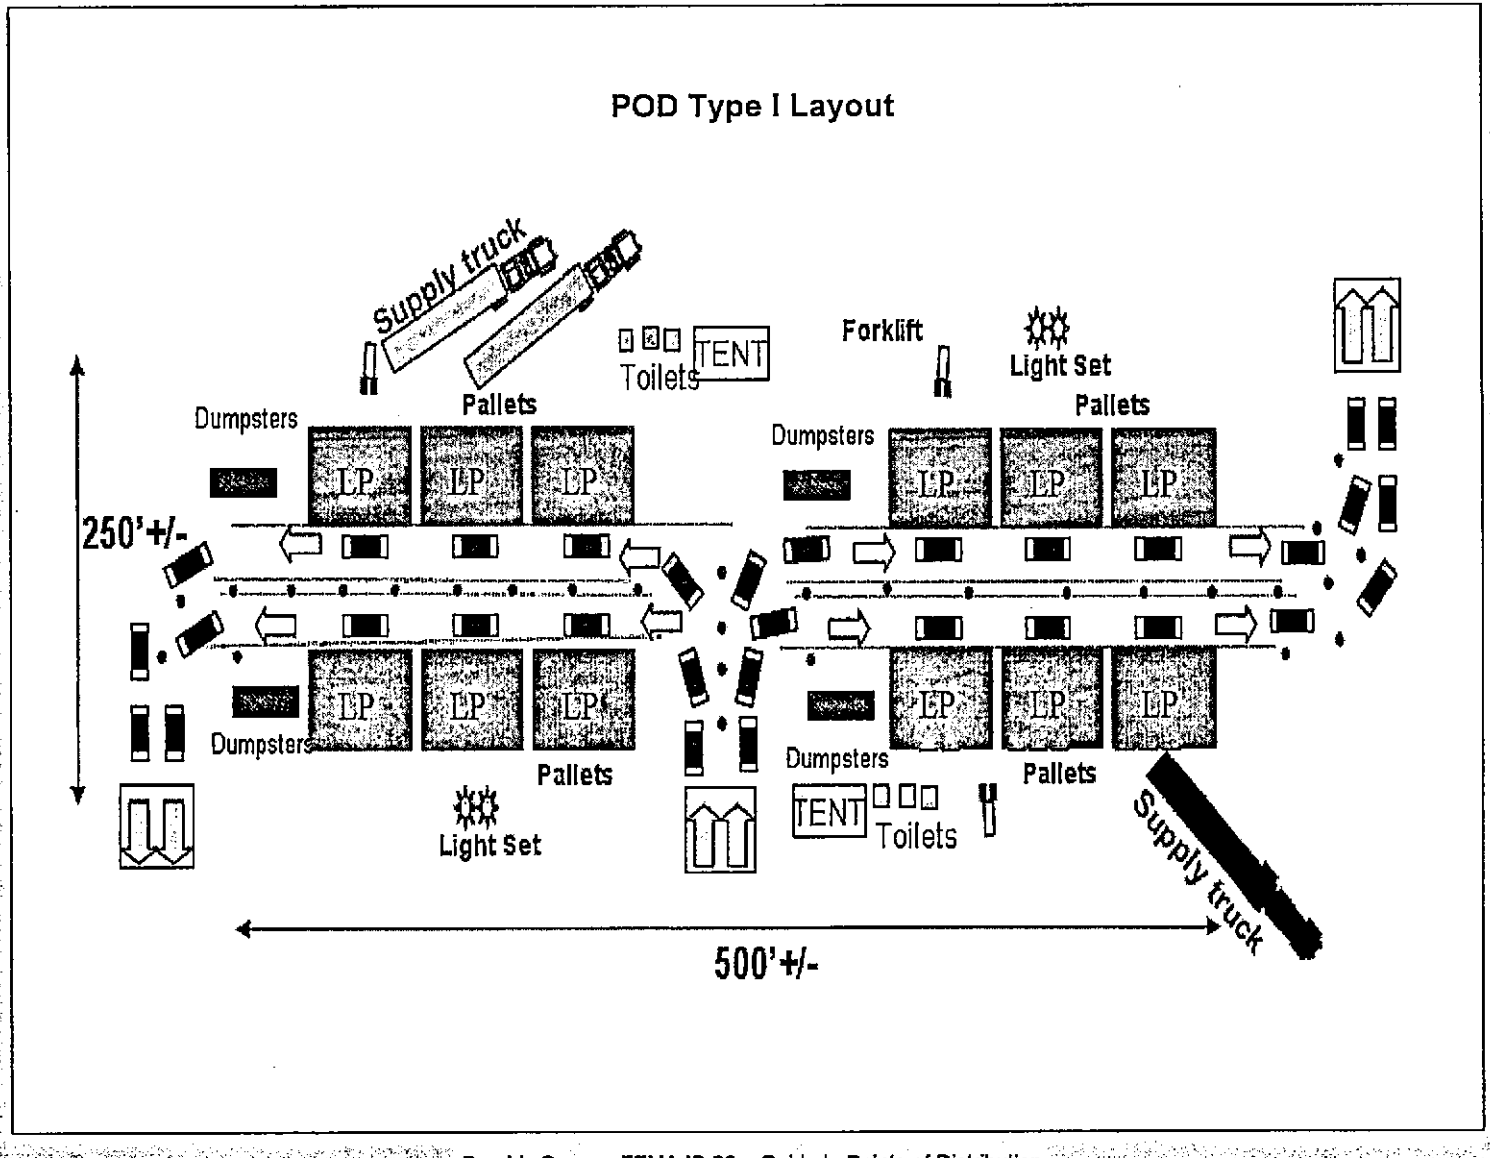
Graphic Source: FEMA IS-26 – Guide to Points of Distribution

Background Notes and Site Layout Guidance (cont.): A Type II POD is twice the size of a Type III and serves 10,000 people a day based on one vehicle representing a household of three people. A Type II POD is 250 feet by 300 feet and requires a staff of 34 per day and six per night. A Type II POD has six loading points and two vehicle lanes.



Graphic Source: FEMA IS-26 – Guide to Points of Distribution

Background Notes and Site Layout Guidance (cont.): The largest POD, a Type I, serves 20,000 people a day based on one vehicle representing a household of three people. A Type I POD is 250 feet by 500 feet and requires a staff of 78 per day and 10 per night. Type I PODs are only used in large metropolitan areas. A Type I POD has twelve loading points and four vehicle lanes.



Graphic Source: FEMA IS-26 – Guide to Points of Distribution

Activation. The decision to activate a disaster logistics management operation locally rests with the EOC Incident Commander. If the damage / needs assessment process reveals that disaster commodities are required in an area of the state and state-level management assistance to the affected local jurisdiction(s) is also required, the SEOC Incident Commander will make the decision to activate the state DLDMT and DLDMC as part of the SEOC structure. Activation of Points of Distribution will occur simultaneously with activation of other support facilities such as Control Check Points, Staging Areas and Warehouses, and the Base / Camps as appropriate. If the State will be providing management assistance to the affected local jurisdiction(s), all decisions regarding facility establishment, activation, and operation will be made jointly. In that regard, the local and state DLMCs will oversee and coordinate the establishment of all disaster logistics management facilities.

Background Note: If activation of Control Check Points is required for disaster donations management purposes, local and state DDMCs will also be part of the facility activation decision-making process.

The DLMC will contact the Point of Distribution Manager via telephone, email, radio, or other available means and provide, at a minimum, the following information regarding Point of Distribution establishment:

- Point of Distribution address and facility name
- Point of Distribution size / type (i.e., Type I, II, or III)
- Time and date the Point of Distribution will open
- Operating days and hours
- Type and quantities of commodities that will be distributed to each vehicle or person (i.e., food, water, supplies, etc.)
- Estimated date and time of first supply shipment
- Specifics regarding support staff (e.g., positions to be staffed, needed time of arrival, etc.)

Once the Point of Distribution Manager has been notified, he/she will notify the Point of Distribution support staff in accordance with the instructions provided by the DLMC. This notification will be accomplished by one or more of the following methods: telephone call; text message; email; pager; messenger; or direct contact. The Point of Distribution Manager will inform support staff when and where to report, and what to bring in terms of supporting materials (e.g., foul weather gear, extra clothing, etc.).

Site Hazard Assessment. Upon arriving at the Point of Distribution site, the Point of Distribution Manager will conduct a hazard assessment to determine the suitability of using the site given current and projected incident conditions and hazards. The "Points of Distribution Hazard Assessment Form" on page 127 will be used for this purpose. Based on the results of this assessment, and other relevant factors, the Point of Distribution Manager will decide if the site is safe for operations. If the site is deemed unsafe, the Point of Distribution Manager will contact the DLMC and report the findings of the hazard assessment. The DLMC will consult with the EOC Incident Commander and other EOC staff to determine if an alternate site should be selected, or if another Point of Distribution could be expanded in size to accommodate the additional customers. This decision will be made as quickly as possible to allow for the greatest operational efficiency, and to meet the immediate needs of affected customers.

Site Set-Up. If the site is deemed safe, the Point of Distribution Manager and support staff will begin to set up the Point of Distribution using the "Points of Distribution Set-up Checklist" found on page 128 as a guide to assist in the set-up process. Set-Up Kits will be requested as required for facility size. (Note: Set-Up Kits are designed for a Type III facility; Type II facilities require two Kits; Type I facilities require four Kits.)

Expedient Staff Training. The Point of Distribution Manager will assign positions based on who is available and who is trained for specific positions. All staff – experienced, new / volunteer – will be provided just-in-time training (by the Point of Distribution Manager or a designee) to ensure that all positions are carried out safely and efficiently. The order for filling staff positions generally will be: 1) Team Leaders (Support and Loading); 2) Traffic Controller(s); 3) Equipment Operators (Pallet Jack and Forklift); 4) Loader(s); 5) Check-In Specialist(s); 6) Community Relations staff; 7) Security Officer(s); and 8) Site Restoration staff.

Preparation for Opening. The Point of Distribution Manager will ensure that at least one pallet jack is onsite and operational before the first commodity shipment is received. This will allow for the immediate movement of pallets, as required. Loading points and vehicle lanes will be established in accordance with site size (i.e., Type I, II, or III) and U.S. Army Corps of Engineers recommended site layouts. The site will not be opened up to the public until the site layout is complete and adequate shipments of commodities have been received to serve the anticipated need for the first few hours of operation. Authorization to open will come from the DLMC. Signage will be placed no more than 30 minutes before opening to help reduce traffic in the area and set a reasonable expectation with the public. When the site opens, confirmation will be provided to the DLMC and PIO for dissemination to the public.

Points of Distribution Operations.

Hours of Operation. The Point of Distribution will generally be open to customers 12 hours per day, between the hours of 7 AM and 7 PM. This time frame reduces the amount of time the Point of Distribution is open in low-light conditions. If incident conditions or operational needs require a change in operating hours, this information will be widely disseminated to the public by the PIO using the public information materials found in Attachment A.

Commodity Amounts. Each customer (walk-up or drive-through) will receive a set amount of commodities for a household of three – no more and no less. This will include:

- One gallon of water, per person, per day (four liters)
- Eight pounds of ice, per person, per day (one bag)
- Two emergency food rations, per person, per day (in the form of MREs or traditional packaged food products)
- One plastic tarp (size and type to be determined by incident conditions and needs, and general availability)

Adhering to this standard allotment will help ensure that commodity supplies do not run out early, before all in need receive their base allotment and reliable resupply can be assured. It will also help expedite the distribution process, ensuring that the maximum number of customers can be served during the 12-hour operational period.

Additional commodities may be provided if available and needed, based on incident conditions and recovery needs.

Distribution Process. Depending on needs and circumstances, commodities may have to be distributed to persons arriving in personal vehicles, walking-up to the site, or arriving via mass transit (i.e., bus). Points of Distribution will generally be set up to accommodate the mode(s) of arrival most likely for the customer base being served. In most cases, that will require that accommodations be made for all three modes of arrival. The primary safety concern will be to limit the interaction between pedestrians (i.e., those walking-up or arriving via mass transit) and drive-through vehicular traffic. This will be addressed during the site set-up by designating non-vehicular pedestrian entry and exit points, and proper marking of Vehicle Lines, Loading Lines, and other vehicle-only areas.

Vehicle Loading Procedures. The following procedure will be followed in loading commodities into drive-up vehicles:

- Vehicles will enter the Point of Distribution via the Vehicle Line.
- The Traffic Controller will stand at the front of the Vehicle Line where all vehicles in the lane can see him/her.
- When the front vehicle is adjacent to the front Loading Point, the Traffic Controller will signal the vehicle to stop. Each vehicle behind the first vehicle will also stop.
- Once all vehicles come to a stop, the Traffic Controller will blow one whistle blast and shout "LOAD." The "LOAD" command will be echoed by the Loaders.
- The Loaders will then load the designated amount of commodities from the Loading Line into the trunk of the vehicle.
- Once the Loaders complete loading commodities into the vehicle, they will step back to the Loading Line and shout "CLEAR."

- When the Traffic Controller hears "CLEAR," he/she will visually verify that the Loaders (and any other individuals) have cleared the Vehicle Line and, using hand signals, will instruct the vehicles to depart the Point of Distribution and blow a single whistle blast.
- The same process will repeat for each succeeding set of vehicles entering the Vehicle Line.

Walk-Up Customer Procedures. Customers without vehicles (i.e., walk-ups and those using mass transit) must be accommodated. These customers will be instructed, in the public information materials, to bring a box or sturdy bag in which to carry their commodities. A limited supply of boxes and plastic bags will be kept at the Point of Distribution for those walk-up customers that arrive without having something in which to carry their commodities; however, the Point of Distribution staff is under no obligation to provide boxes or bags if supplies run out.

A separate pedestrian Loading Line will be established, away from the Vehicle Line(s), to accommodate walk-up customers. The same procedures will be followed with regard to the loading of commodities. The Loaders will provide the commodities to the customer, and will assist in loading them into a box or bag as appropriate. The customer is responsible for carrying the commodities away from the Loading Line. In those rare instances where the customer is physically unable to carry the commodities by themselves, the Point of Distribution Manager will attempt to arrange for assistance from volunteers, if such resources are available and timely. If required, the Point of Distribution Manager will contact the DLDMC to arrange for assistance from the VRC and/or appropriate human service agencies in the EOC. Point of Distribution staff will **NOT** be re-assigned to assist customers in carrying their commodities back to their home or mass transit stop, because doing so would adversely impact Point of Distribution operations.

Resupply of Commodities. The DLDMC will work with the Points of Distribution, Warehouses, and Staging Areas to coordinate resupply of commodities during the 12 hours the Points of Distribution are closed (generally between the hours of 7 PM to 7 AM). Resupply quantities will be determined based on projected needs as identified in the incident needs assessment and/or through actual commodity consumption rates for each Point of Distribution. Point of Distribution night crews will handle resupply and clean-up functions only; they will not participate in commodities distribution. Forklifts and Pallet Jacks will be used for the unloading and movement of commodities. Unloading of trucks by hand will only be done in the event of equipment inoperability. Commodities will be organized for distribution on a first-in, first-out basis (i.e., the earliest arriving commodities will be distributed first). The night crews will unload supply trucks in the Supply Line, reload Loading Lines with commodities, remove empty pallets from the Supply Line, and generally clean-up and organize the site in preparation for the next day's distribution operations.

Commodity Receipt and Accountability. As supply shipments arrive at the Point of Distribution via truck, the Point of Distribution Manager will use the trucker's Bill of Lading or federal Mission Assignment Form to account for the supplies being delivered. If there is a discrepancy, the Point of Distribution Manager will contact the point of origination (Warehouse, Staging Area, or vendor) to discuss the difference. If resolution of the discrepancy cannot be reached, the Point of Distribution Manager will make note of the discrepancy, and actions taken to resolve it, on the Bill of Lading or Mission Assignment Form before signing for the shipment. The Point of Distribution Manager will not accept shipments without signing for them, and documenting in writing efforts made to resolve identified discrepancies.

Comfort Care for Staff. The Point of Distribution Manager will work with the Loading Team Leader to determine breaks for staff, including meal breaks. Due to the physical nature of the work, as a general rule staff will get a ten minute break every hour and a twenty minute meal break. Food will be provided by locally-identified agencies or organizations. If incident conditions and/or operational circumstances will not allow for the delivery of hot food, staff will be provided meals-ready-to-eat (MREs) or will be allowed to seek food on their own from nearby restaurants. Restrooms will be available onsite for staff to use as required. A break room or tent will also be available onsite.

Spontaneous, Unaffiliated Volunteers. Any individuals or groups that show up at the Point of Distribution, wishing to volunteer, will be referred to the local Volunteer Registration Center for appropriate screening, registration, orientation and training. Any volunteers required for Point of Distribution operations will be obtained through the VRC and/or EOC only; spontaneous, unaffiliated volunteers who have not been vetted through the VRC and/or EOC will not be utilized.

Media / VIP Tours. Requests by the media and/or "VIPs" (i.e., high-ranking public or private officials) for tours, interviews or photo-ops will be handled by Community Relations staff, working directly with the PIO. All questions and inquiries from the media will be directed to the PIO to ensure consistency of message, and to prevent unnecessary disruption of Point of Distribution operations. The media will not be allowed to interfere with or impede ongoing distribution activities, such as stopping traffic to conduct customer interviews or attempting to interview staff while they are doing their job. If information is requested regarding onsite operations or activities, the Point of Distribution Manager will work with Community Relations staff to ensure the information is provided in the most expedient manner possible.

Time, Resource, and Staff Accountability. The Point of Distribution Manager is ultimately responsible for accounting for all personnel, equipment, supplies, and commodities at the Point of Distribution. Accuracy in this effort is crucial to ensure proper time accounting, cost reimbursement and resupply of commodities, and to ensure that equipment and supplies are returned to their proper point of origin, in good condition, once operations wind down. The tracking forms on pages 129-132 (i.e., "Equipment / Supply Inventory Form," "Commodity Inventory Form," and "Emergency Worker Activity Report") will be used for these purposes.

In addition, daily reporting of staffing (to the DLMC/EOC) will help in tracking Point of Distribution activities and staffing needs. The Emergency Worker Activity Report will be used to track assigned personnel, unassigned personnel, and properly registered (vetted) spontaneous volunteers, by day shift and night shift (as applicable). Unassigned personnel may be assigned to another Point of Distribution, at the discretion of the DLMC/EOC. Conversely, requests for additional personnel will be submitted to the DLMC/EOC for consideration within available resources.

Safety Procedures. All personnel at the Point of Distribution are responsible for conducting their activities in a safe manner and following good safety practices. All personnel will inspect their work area daily and be aware of changing hazards. The Point of Distribution Manager is the primary Safety Officer and is responsible for the safety of all staff and customers at the site. The Point of Distribution Manager will train (or arrange for the training of) staff on proper safety practices, including the safe operation of all equipment, and ensure that safety measures are enforced. The Point of Distribution Manager will also complete the Hazard Assessment Form prior to the Point of Distribution site being approved for use, and set-up. If accidents occur, the Point of Distribution Manager will conduct an appropriate investigation with other onsite staff and develop preventive measures based on the outcome of the investigation. This report (or form) will record the accident information and findings, and will be submitted to the DLDMC/EOC for possible claim processing and recordkeeping by the Legal Department or other appropriate local agency.

Closure of Point of Distribution. The decision to close the Point of Distribution will be made by the DLDMC and will be based on a number of factors, including but not limited to, the status of infrastructure repair and the overall recovery effort (the return to normality), the need for continued disaster commodities distribution, and the ability to sustain continued operations at that particular site. If basic commodities are readily available from stores and other private vendors in the community, then strong consideration will be given to closing the Point of Distribution. The DLDMC will decide if all Points of Distribution will be closed, or just some of them. The Point of Distribution Manager will coordinate closure activities with the Support Team Leader and Site Restoration Staff.

Manage Site Access. Once the date and time for Point of Distribution closure has been publicized by the PIO via news release, web posting, and other appropriate means, the Point of Distribution Manager will work with the Support Team Leader to ensure that the vehicle and pedestrian lanes are blocked to further traffic. This will be accomplished with traffic cones and/or a vehicle across the entrance, with appropriate signage stating "Point of Distribution now closed." The DLDMC will provide instructions on where to send any remaining customers, and this information will be included on the closure signage if room allows.

Clear, Account for, and Load Commodities. The Point of Distribution Manager will work with the Loading Team Leader, Loading Staff, and Equipment Operators to clear the loading line of any remaining commodities, consolidate them onto pallets in the supply line, and load them back onto trucks for removal from the site. All commodities will be inventoried prior to loading on the truck. The Commodity Inventory Form will be used for this purpose. A copy of this form will be provided to the truck driver as a Bill of Lading. As appropriate, loose commodities will be strapped or plastic-wrapped to their pallets before loading them. Once the commodities have been loaded, the Site Restoration Staff can begin the final cleaning of the supply line.

Account for Equipment and Supplies. Once all commodities have been loaded and removed from the site, the loading equipment and supplies used at the site will be consolidated behind the supply line and inventoried / inspected by the Point of Distribution Manager, Support Team Leader, and Loading Team Leader. The Equipment / Supply Inventory Form will be used for this purpose. In addition, the equipment and supplies will be photographed to provide visual documentation of their condition upon return to their owner. If equipment or supplies are missing, a check will be made with workers to see who had the equipment or supplies last to determine their possible location. If the item(s) cannot be located, the Point of Distribution Manager will generate a written statement regarding the missing item(s) and the attempts to locate them. Once everything has been accounted for, the Equipment / Supply Inventory Form and any written statements regarding missing items will be provided to the DLDMC for inclusion in the permanent disaster file, and any required follow-up activities. The DLDMC will contact the equipment / supply owner to schedule a pick-up.

Set-Up Kit Cleaning and Replenishment. The Point of Distribution Manager will work with the Support Team Leader to collect, inspect, clean and inventory all items of the Point of Distribution Set-Up Kit(s) for repacking. The "Points of Distribution Set-Up Checklist" will be used for this purpose. Damaged, missing, or otherwise unusable items will be noted on the form, and reported to the DLDMC for replacement / replenishment prior to kit repacking. Damaged items will also be photographed to provide visual documentation of their condition. The kit(s) will be restored, resupplied, and repacked as close to original condition as possible to ensure readiness for the next incident. The Points of Distribution Set-Up Checklist and any photographic documentation will be provided to the DLDMC for inclusion in the permanent disaster file, and any required follow-up activities. The DLDMC will arrange for the pick-up and storage of the Set-Up Kits.

Physical Restoration. Once the left-over commodities and the equipment, supplies and set-up kits have been cleared from the site, the Point of Distribution Manager will work with the Site Restoration Staff to clean and restore the site to its pre-use condition. Damage and/or lingering impacts will be reported to the DLDMC for appropriate follow up with applicable agencies. Damaged or impacted areas of the site will also be photographed to provide visual documentation of their condition. The photographs will be provided to the DLDMC for inclusion in the permanent disaster file, and for possible claim processing related to the damage or impacts.

Final Operational Reporting. The DLDMC will generate a final status report for the facility and its operations, based on the information provided in the facility's daily reports. The Point of Distribution Manager will review the draft of this report to ensure its accuracy and completeness, and provide the DLDMC with a written summary of the site closeout steps taken and any significant problems encountered during the operation, for inclusion in the final report. This final report will provide some of the documentation needed to recoup a portion of the operational costs related to the commodity distribution effort under a federal Stafford Act declaration or a Governor's declaration. It will also serve as the final historical account of the operation for inclusion in the permanent disaster file.

After-Action Review. Prior to official site closure, the Point of Distribution Manager will gather all staff who worked at the facility for an after-action review. The after-action review will focus on what worked well and what didn't work well, and how operations might be improved in the future. The Point of Distribution Manager will facilitate the process and the staff will provide input. Examples of outstanding work will also be recognized. The Point of Distribution Manager will summarize the after-action findings, concerns, and recommendations and provide this information in written narrative to the DLDMC for inclusion in the jurisdiction's final after-action report, as appropriate. With the completion of this final step, the Point of Distribution will be considered officially closed.

R. POINTS OF DISTRIBUTION HAZARD ASSESSMENT FORM

Location:	**Inspected by:**
Date:	**Time:**

Training:	**Yes**	**No**	**Comments**
Is each person assigned to a job within their capability?			
Did each person receive a safety brief and general operational overview?			
Is training on PPE and equipment provided?			
Environment:	**Yes**	**No**	**Comments**
Are resources available to deal with very hot or very cold conditions? (e.g., drinking water, heated tent, shade)			
Does staff know the symptoms of heat cramps, heat stroke, and hypothermia?			
Is the level of light adequate for safe and comfortable performance of work?			
Housekeeping:	**Yes**	**No**	**Comments**
Is the work area clear of debris and tripping hazards?			
Are materials properly stacked and spaced?			
Are work areas clear of fluid spills or leakage?			
Are aisles and passageways clear of obstructions?			
Are walkways clear of holes, loose debris, protruding nails, and loose boards?			
Is the break area kept clean and sanitary?			
Are the dumpsters being serviced properly?			
Are the restrooms (portable or fixed) clean, sanitary and restocked?			
Personal Protective Equipment:	**Yes**	**No**	**Comments**
Is required equipment provided and maintained?			
Does equipment meet requirements?			
Are warning signs prominently displayed in all hazard areas?			
Material Handling and Storage:	**Yes**	**No**	**Comments**
Is there safe clearance for all equipment through aisles and doors?			
Is stored material stable and secure?			
Are storage areas free from tipping hazards?			
Are only trained operators allowed to operate lifting and moving equipment?			
Do personnel know proper lifting techniques?			
Vehicle Traffic:	**Yes**	**No**	**Comments**
Are cones placed to direct traffic?			
Is the vehicle line kept free of pedestrians when vehicles are moving?			
Are pedestrian and vehicular traffic separated?			

ADDITIONAL COMMENTS OR CONCERNS:

S. POINTS OF DISTRIBUTION SET-UP CHECKLIST

Location:

Point of Distribution Manager:

X		Yes	No	Comments
	Support staff arrives			
	Complete site hazard assessment form			
	Establish communications with appropriate facilities			
	Inspect guidance documents and other support materials (Set-Up Kits – see below)			
	Conduct just-in-time training to include safety brief and operational overview			
	Determine and mark the locations of Supply Lines, Loading Lines, and Vehicle Lines			
	Establish and mark portable restroom ("port-a-potty") locations			
	Establish and mark trash dumpster location			
	Establish break area for staff			
	Set up traffic cones around Vehicle Line			
	Receive and place portable light sets, as required (not all sites will require this)			
	Ensure supply trucks can enter and exit			
	Assign staffing positions			
	Distribute PPE as required			
	Conduct PPE training as required			
	Determine signage locations and set up signage			
	Receive and place portable restrooms ("port-a-potties")			
	Receive and place trash dumpster			
	Receive and inspect commodity moving and lifting equipment			
	Determine delivery date and time for first supply of commodities			
	Notify EOC (DLDMC) that the Point of Distribution is ready for opening			
	Open Point of Distribution when authorized			
	Notify EOC (DLDMC) that the Point of Distribution is open and operational

V. POINTS OF DISTRIBUTION EMERGENCY WORKER ACTIVITY REPORT

Facility Name / Address / Type:

Shift (Day or Night) and Operating Hours (24-hour format):

Emergency Worker Name	Volunteer? (Y/N)	Car No.*	Assignment	Date:		Date:		Date:		Total Hours Worked	Round Trip Miles*
				IN	OUT	IN	OUT	IN	OUT		

Total Personnel:		Total Hours Worked:		Total Mileage Incurred:	

THIS FORM MUST BE SIGNED BY POINT OF DISTRIBUTION MANAGER OR DESIGNEE

By my signature below, I certify these persons did participate in the mission / incident as identified above:

Print Name and Title:	**Signature:**
Telephone Number: Cell ( ) Land Line ( ) **E-mail Address:**	**Other Contact Means (specify):**

*Complete these fields only as applicable

Form Instructions: All personnel working at the facility on the shift, including the Manager, should be listed with the following minimum information: 1) name; 2) volunteer status; 3) assigned position at the facility; 4) time on and time off work; and 5) total hours worked. There are multiple columns for time on and off, for when individuals need to leave for a period of time and the time-break may bridge two separate days (e.g., off at 11 PM on September 1 and back on at 1 AM on September 2). The car number and round trip mileage columns are to be filled in only as applicable. The car number column may be used to record a vehicle number, driver license number, or similar identifier. The round trip mileage column may be used to record total mileage for personnel who have to commute and/or are sent on a mission during their shift. It is extremely important to record on this form all personnel working at the facility, as the form will become a part of the official record for the disaster. It is especially important to record volunteers, as this form is their proof that they worked the disaster.

W. PRE-IDENTIFIED LOGISTICS / DONATIONS MANAGEMENT FACILITIES*

The following facilities have been pre-identified for POSSIBLE use during a logistics / donations management operation subsequent to a large-scale or catastrophic incident that requires the procurement and distribution of supplemental commodities to sustain the affected population and / or to aid in the response and recovery effort. The incident circumstances will determine, to a large degree, the specifics of the operation. Because of the time constraints that would be involved within the EOC for making critical decisions related to the logistics / donations management operation, it is important that as many details as possible be pre-addressed in this plan. To that end, the facility listings that follow are intended to provide a STARTING POINT for making rapid, informed decisions regarding the establishment of facilities required to support and sustain a large-scale logistics / donations management operation. Many incident and situation-specific factors will ultimately be considered before final facility selections are made. In some cases, it may be determined that these (or other) public / private nonprofit facilities are not appropriate for use; rather, privately owned / operated (commercial) facilities may be considered instead. In those situations, the Michigan Department of Technology, Management and Budget (MDTMB) will aid the SEOC staff in locating and procuring the private space required to handle the needs of the specific logistics / donations management function.

CONTROL CHECK POINTS (for disaster donations):

Selection Considerations: Control Check Points are officially designated locations where trucks and other transport vehicles containing unsolicited donated goods can be inspected and directed to an appropriate volunteer agency or other location for processing, storage, and distribution. Unaffiliated volunteers from outside the disaster area wishing to provide services can also be interviewed at these locations, or they may be referred to a central Volunteer Registration Center (VRC). Items or services needed immediately, as well as those that may be needed in the long-term, can be directed to those locations in which they are needed. Unneeded or unwanted items or volunteers can be turned back at these points, although it is expected that some unneeded / unwanted items and volunteers will make their way through to the disaster area. Examples of possible Control Check Point locations include weigh stations, roadside parks, truck stops, state parks and recreation areas, county fairgrounds, highway rest areas, armories, and other governmental facilities (located in close proximity to major transportation routes) that have large parking areas for vehicle inspections. (Note: Private facilities such as large shopping center parking lots can also be used, but only with the expressed written permission of the owner. Such permission should be carefully documented to avoid potential future problems with regard to legal claims, etc.) Each Control Check Point should be staffed with at least two individuals, although more staff may be needed to handle anticipated large volumes of donations.

Facility Name	Facility Address	Facility Type	Geo-Location (Latitude/Longitude)	Comments / Considerations
TBD – based on incident location, conditions and needs, and anticipated donations volume.				

***Note:** State facilities that potentially could be used include but are not limited to state parks and recreation areas (under the MDNR), state warehouses (under the MDTMB), state correctional facility warehouses (under the MDOC), and state transportation maintenance garages (under the MDOT). If the facilities listed in each table are determined to be unsuitable or are unavailable for a logistics / donations management operation and appropriate local replacements cannot be identified, consideration will be given to using nearby state facilities.

VOLUNTEER REGISTRATION CENTER(S):

Selection Considerations: The Volunteer Registration Center (VRC) should provide physical space for spontaneous, unaffiliated volunteers as well as properly vetted volunteers to assemble and be interviewed by screeners. The VRC may also have a virtual component (i.e., a web and/or social media site for initial registration), but it is important that the VRC provide a "place" for volunteers to report to and talk to someone about their skills, capabilities, work desires, and support needs. This space will likely be nothing more than a room in a conveniently-located community building, although it could also be a covered outdoor space (e.g., large tented area, park pavilion, dedicated section of a parking ramp) or even a designated vehicle in a parking area (although the latter would clearly be considered a last-resort option).

District	Facility Name	Facility Address	Facility Type	Geo-Location (Lat/Long)		Comments / Considerations
1	Mount Hope Church	202 Creyts Rd., Lansing	Church	42.732483	-84.643117	Access to I-496; large facility/parking lot
1	Challenger Elementary School	1066 W. Grand River, Howell	School	42.613367	-83.945133	Close proximity to Howell HS
1	Northwest High School	4200 Van Horn Rd., Jackson	School	42.329483	-84.468250	
2N	Goodells Park	8345 County Park Dr., Goodells	Park	42.982921	-82.654767	Easy access to I-94 / I-69
2N	St. Clair County Airport	177 Ash Rd., Kimball Twp.	Airport	42.910115	-82.520269	Easy access to I-94 / I-69

3	Michigan National Guard Armory	2510 East Wilder Rd., Bay City	Armory	43.623494	-83.947153	
3	Wurtsmith Air Base	Oscoda	Air Base	44.454940	-83.355461	Former air base; owned by City of Oscoda
5	Kellogg Arena	35 Hamblin Ave., Battle Creek	Arena	42.317872	-85.184241	Has concessions, showers, restrooms
5	Kalamazoo County Fairgrounds	2900 Lake St., Kalamazoo	Fairgrounds	42.277043	-85.544846	
5	Berrien County Youth Fair	9122 N. US-31, Berrien Springs	Fairgrounds	41.953403	-86.351650	
6	Isabella County Commission on Aging	3480 S. Isabella Rd., Mt. Pleasant	County Building	43.583415	-84.747688	Easy access to US-127
6	Ludington Dept. of Public Works	975 First St., Ludington	City Building	43.947197	-86.425097	Large facility
6	Creston High School	1720 Plainfield Ave. NE, Grand Rapids	High School	42.994289	-85.660293	
7	Alpena Combat Readiness Training Ctr.	5884 A Street, Alpena	Military Training Base	45.050000	-83.550000	
7	Emmet County Fairgrounds	1129 Charlevoix Ave.; Petoskey	Fairgrounds	45.370080	-84.976055	
7	Ralph A. McMullen Center	104 Conservation Rd., Roscommon	Conference Center	44.514722	-84.749722	State owned conference center
8	LaSalle High School	850 Portage St., St. Ignace	School	45.864833	-84.742750	
8	Little Bear Arena	275 Marquette St., St. Ignace	Arena / Event Ctr.	45.872417	-84.733694	Multi-purpose arena / event center
8	Northern Mich. Univ. Superior Dome	1401 4th St., Marquette	Athletic Facility	46.559165	-87.396190	Domed stadium with artificial turf field
ALL	Volunteer Michigan Local Volunteer Centers	Refer to the following website for current locations and addresses: www.volunteermichigan.org/localvolunteercenters	Varies	N/A	N/A	Established and publicized centers (currently 32 statewide) operated for Volunteer Michigan by United Way or other local human service agencies

***Note:** State facilities that potentially could be used include but are not limited to state parks and recreation areas (under the MDNR), state warehouses (under the MDTMB), state correctional facility warehouses (under the MDOC), and state transportation maintenance garages (under the MDOT). If the facilities listed in each table are determined to be unsuitable or are unavailable for a logistics / donations management operation and appropriate local replacements cannot be identified, consideration will be given to using nearby state facilities. **(The Volunteer Michigan Local Volunteer Centers are already established and publicized, and may be the ideal starting point for facility selection in those counties having such centers.)**

WAREHOUSES:

Selection Considerations: Warehouse facilities can be any available, large enclosed storage area (ideally 25,000 – 200,000 square feet in size, located on a secured / fenced site) with sufficient area to park and unload trucks and other vehicles. Warehouses are needed to receive, unload, sort, inventory, package, store, and dispatch commodities to local Points of Distribution, designated voluntary agencies, or other locations, as part of a phased distribution process. These facilities can be used for both short and longer-term storage, although it is usually best to designate one or two locations exclusively for longer-term storage. Warehouses should be located in relative proximity to the disaster area, and be available for use on a 24-hour basis if necessary. Possible facilities for use include vacant commercial warehouse space, governmental and/or NGO warehouse facilities, armories, county fairground buildings, ice arenas, highway / public works maintenance garages, airport hangers, community recreation centers, etc. Ideally, using the facility as a Warehouse will not greatly interfere with its normal, day-to-day use. The facility should be capable of supporting a staff of up to 40 people, and have the capability of supporting a computer, facsimile machine, and telephone. The facility should also have adequate climate control capabilities, a restroom, and loading / unloading areas.

District	Facility Name	Facility Address	Facility Type	Geo-Location (Lat/Long)		Comments / Considerations
1	*MDOT – Overhead Sign Garage	6333 Old Lansing Rd., Lansing	Warehouse	42.683667	-84.641817	Easy access to I-96 / I-69

7	*Emmet County Fairgrounds	1129 Charlevoix Ave., Petoskey	Fairgrounds	45.370060	-84.976055	
7	Ralph A. McMullen Center	104 Conservation Rd., Roscommon	Conference Center	44.514722	-84.749722	State owned conference center
8	St. Ignace Airport	180 N. Airport Rd., St. Ignace	Airport Hangar	45.890867	-84.737139	
8	Little Bear Arena	275 Marquette St., St. Ignace	Arena / Event Ctr.	45.872417	-84.733694	Multi-purpose arena / event center
8	Sawyer Service Center	125 Airport Ave., Gwinn	Warehouse	46.345348	-87.381822	

***Note:** State facilities that potentially could be used include but are not limited to state parks and recreation areas (under the MDNR), state warehouses (under the MDTMB), state correctional facility warehouses (under the MDOC), and state transportation maintenance garages (under the MDOT). If the facilities listed in each table are determined to be unsuitable or are unavailable for a logistics / donations management operation and appropriate local replacements cannot be identified, consideration will be given to using nearby state facilities.

STAGING AREAS:

Selection Considerations: Staging Areas can be any available, large outdoor area (ideally 1-25 acres in size, with fencing or other security provisions) with sufficient area to temporarily park vehicles, equipment, personnel and goods that are ready for deployment to the affected area to aid in disaster response and recovery operations. (Vehicles and equipment might include dump trucks, front-end loaders, bulldozers, buses, cargo trucks, etc.) Staging Areas should have adequate parking spaces for a large number of workers at any time, and (ideally) covered space (e.g., permanent building, tent) to shelter workers and goods from the weather and provide a measure of security. Staging Areas should also have provisions in place for temporarily lodging, feeding, and caring for volunteer workers (that are ready for deployment) and for addressing their basic sanitation concerns (i.e., port-a-johns, portable showers, and hand washing facilities). Either a permanent building, tent space on the grounds, or a combination of both may meet the temporary lodging requirements. (An alternative is to provide shuttle service for workers to and from local motels and hotels, or a nearby Base / Camp set up to provide for the lodging, food, water, and sanitation needs of personnel.) Possible locations for use as Staging Areas include vacant commercial lots, governmental and/or NGO warehouse facilities, armories, county fairgrounds, highway / public works maintenance garages, airports, parks and recreation areas, or possibly shopping center parking lots (providing there is expressed written permission from the owner).

District	Facility Name	Facility Address	Facility Type	Geo-Location (Lat/Long)		Comments / Considerations
1	MDOT – General Services Building	7461 Crowner Dr., Lansing	Warehouse	42.683667	-84.641817	Part of State Secondary Complex
1	Livingston Cty. Transportation Complex	3950 W. Grand River, Howell	Maintenance Garage	42.579850	-83.882400	Easy access to I-96/M-59, Howell Airport

2S	Eastern Market	2334 Russell, Detroit	Farmer's Market	42.344000	-83.039000	Outdoor Farmer's Market
3	Genesee County Fairgrounds	5045 Stanley Rd., Flint	Fairgrounds	43.105900	-83.616004	
3	Bay County Fairgrounds	800 Livingston, Bay City	Fairgrounds	43.596584	-83.854934	
3	Wurtsmith Air Base	Oscoda	Air Base	44.454940	-83.355461	Former air base; owned by City of Oscoda
5	Kalamazoo County Fairgrounds	2900 Lake St., Kalamazoo	Fairgrounds	42.277043	-85.544846	130 acres; 37,571 square ft. under roof
5	Lake Michigan College	2755 Napier, Benton Harbor	College	42.089609	-86.391644	Close proximity to I-94
5	Battle Creek Air National Guard Base	3367 W. Dickman Rd., Battle Creek	Military Base	42.317222	-85.254722	Airport with 10,000 foot runway
6	Isabella County Fairgrounds	500 N. Mission Rd., Mt. Pleasant	Fairgrounds	43.647700	-84.767909	Easy access to US-127 / M-20
6	Mason County Fairgrounds	102 S. Main St., Scottville	Fairgrounds	43.954859	-86.279402	Easy access to US-31 / US-10
6	Kent County Fairgrounds	225 S. Hudson St., Lowell	Fairgrounds	42.931682	-85.342073	Easy access to I-96 / M-50
7	Alpena Combat Readiness Training Ctr.	5884 A Street, Alpena	Military Training Base	45.050000	-83.550000	
7	Emmet County Fairgrounds	1129 Charlevoix Ave., Petoskey	Fairgrounds	45.370080	-84.976055	
7	Ralph A. McMullen Center	104 Conservation Rd., Roscommon	Conference Center	44.514722	-84.749722	State owned conference center
8	Great Lakes Air	180 N. Airport Rd., St. Ignace	Airport	45.890687	-84.737139	
8	Little Bear Arena	275 Marquette St., St. Ignace	Arena / Event Ctr.	45.872417	-84.733694	Multi-purpose arena / event center
8	Marquette County Fairgrounds	County Road 553, Marquette	Fairgrounds	46.490368	-87.413982	

***Note:** State facilities that potentially could be used include but are not limited to state parks and recreation areas (under the MDNR), state warehouses (under the MDTMB), state correctional facility warehouses (under the MDOC), and state transportation maintenance garages (under the MDOT). If the facilities listed in each table are determined to be unsuitable or are unavailable for a logistics / donations management operation and appropriate local replacements cannot be identified, consideration will be given to using nearby state facilities.

BASE / CAMPS:

Selection Considerations: The incident Base is the location where primary incident support logistics functions are coordinated and administered and equipment / personnel support operations are conducted. This includes equipment maintenance repair, reorder and procurement activities, as well as other support services such as supply, medical, food / water, overnight lodging, sanitation, and communications. Local jurisdictions will normally establish and operate the incident Base. The Base will be designed to support operations at multiple incident sites (if possible). Support may be requested from the State (via the MSP/EMHSD) if local resources are not sufficient to operate the Base. This may include a request for the State to assist in establishing and operating Camps as a way of supplementing the capabilities and/or capacity of the Base.

Camps may be established if additional support locations are required due to incident size (geographically) or complexity. Camps are temporary locations within the general incident area which are equipped and staffed to provide food, water, sleeping areas, and sanitation services for workers who are not currently on call for deployment. Camps may be used in those situations where overnight / multi-day accommodations are required for volunteers, equipment operators, and other deployed resources under the disaster logistics / donations management operation that cannot be adequately (or efficiently) handled at the Incident Base. Camps may be utilized in lieu of local hotel / motel or other accommodations. Camps are particularly suited for certain situations, such as when: 1) there is a shortage of nearby hotel / motel rooms or other suitable accommodations for deployed resources; 2) large numbers of resources have been deployed from outside the Incident area (e.g., EMAC resources); and 3) the incident area is particularly large or widely-dispersed. Possible facilities for use as the Base / Camps include county fairgrounds, state / local parks and recreation areas, local campgrounds, military bases, college campuses, school grounds (if tents are used), community centers or community recreation centers, etc. Ideally, using the facility as a Base / Camp will not greatly interfere with its normal, day-to-day use.

District	Facility Name	Facility Address	Facility Type	Geo-Location (Lat/Long)		Comments / Considerations
1	MSP Training Academy	7426 N. Canal Rd., Lansing	Campus	42.675350	-84.660167	Easy access to I-96 / I-69

2S	Wayne County Community College	Northline Rd., Taylor	College	42.212845	-83.239308	Has classrooms/locker rooms/sleeping areas
2S	Sterling State Park	2800 State Park Rd., Monroe	Park	41.920876	-83.340384	Can serve 1,000+ campers; I-75 access
2S	Saline Farm Council Fairgrounds	5055 Saline Ann Arbor Rd., Saline	Fairgrounds	42.210364	-83.796932	
2S	Wheeler Recreation Center	637 Brewster St., Detroit	Recreation Center	42.347000	-83.046000	Has large parking area
2S	Michigan State Fairgrounds	1120 W. State Fair, Detroit	Fairgrounds	42.439000	-83.117000	Used by other agencies for staging
2S	Eastern Market	2334 Russell, Detroit	Farmer's Market	42.344000	-83.039000	Outdoor Farmer's Market
3	Genesee County Fairgrounds	5045 Stanley Rd., Flint	Fairgrounds	43.105900	-83.616004	
3	Bay County Community Center	800 John F. Kennedy Dr., Bay City	Community Center	43.591711	-83.901147	
3	Wurtsmith Air Base	Oscoda	Air Base	44.454940	-83.355461	Former air base; owned by City of Oscoda
5	Fort Custer Training Center	2501 26th St., Augusta	Military Base	42.308325	-85.446440	Has sleeping quarters, showers, mess hall
5	Berrien County Youth Fair	9122 N. US-31, Berrien Springs	Fairgrounds	41.953403	-86.351650	
5	Lakeview Middle School	300 S. 28th St., Battle Creek	School	42.318280	-85.231684	
6	Central Michigan University	1720 SE Campus Dr., Mt. Pleasant	University	43.586939	-84.769484	US-127 access
6	Westshore Community College	3000 N. Stiles Rd., Scottville	College	43.901398	-86.338475	US-10 access
6	Grand Rapids Community College	227 Fulton St. E., Grand Rapids	College	42.963100	-85.663960	I-196 access
7	Alpena Combat Readiness Training Ctr.	5884 A Street, Alpena	Military Training Base	45.050000	-83.560000	
7	Emmet County Fairgrounds	1129 Charlevoix Ave., Petoskey	Fairgrounds	45.370060	-84.976055	
7	Ralph A. McMullen Center	104 Conservation Rd., Roscommon	Conference Center	44.514722	-84.749722	State owned conference center
8	Gros Cap School (Moran Twp.)	W1828 Cros Cap Rd., St. Ignace	School	45.870278	-84.624000	
8	LaSalle High School	850 Portage St., St. Ignace	School	45.864833	-84.742750	
8	Northern Mich. Univ. Superior Dome	1401 4th St., Marquette	Athletic Facility	46.559165	-87.396190	Domed stadium with artificial turf field

***Note:** State facilities that potentially could be used include but are not limited to state parks and recreation areas (under the MDNR), state warehouses (under the MDTMB), state correctional facility warehouses (under the MDOC), and state transportation maintenance garages (under the MDOT). If the facilities listed in each table are determined to be unsuitable or are unavailable for a logistics / donations management operation and appropriate local replacements cannot be identified, consideration will be given to using nearby state facilities.

POINTS OF DISTRIBUTION:

Selection Considerations: Points of Distribution (a.k.a., "Distribution Centers") are facilities operated by the local jurisdiction, local churches and other faith-based organizations, and community-based and voluntary organizations, to provide commodities directly to disaster survivors. (Note: Point s of Distribution are not the only means of distributing commodities to persons in need. In many cases, commodities will be distributed directly to designated facilities [e.g., shelters, care centers] and/or to designated agencies in lieu of local Points of Distribution.) Points of Distribution should be located at a site the public recognizes and can easily locate. They should have controlled access and security provisions, restrooms, adequate lighting and parking, and access for handicapped individuals. Possible locations for use as Points of Distribution include churches and other faith-based facilities, schools, recreation centers, community centers, senior centers, armories, county fairgrounds, and other similar type facilities. Vacant commercial space can also be used, as long as it is in a location that is well known to the general public. However, there is usually a cost associated with renting commercial space, even on a short-term basis. Points of Distribution can be set up indoors (i.e., inside a building) or outdoors (i.e., in a parking lot or other large, open paved or gravel space).

District	Facility Name	Facility Address	Facility Type	Geo-Location (Lat/Long)		Comments / Considerations
1	Mount Hope Church	202 Creyts Rd., Lansing	Church	42.732483	-84.643117	Access to I-496; large facility/parking lot

Y: MICHIGAN VOLUNTEER REGISTRY INFORMATION

(Source: Michigan Department of Community Health web site; reformatted for space / appearance purposes)

The Michigan Department of Community Health, Office of Public Health Preparedness leads the coordination, planning, implementation, and recruitment efforts of the MI Volunteer Registry. The Registry is an internet-based system that conforms to the Office of the Assistant Secretary of Preparedness and Response (ASPR), Emergency System for Advanced Registration of Volunteer Health Professionals (ESAR-VHP) national standards and definitions. The Registry is part of a national network of State based systems designed for the advanced registration and credential verification of volunteers needed to help augment patient care and surge capacity needs.

The Registry was originally designed primarily for health professionals with all skill levels and experiences. Initial recruitment and registration focused on physicians, nurses, behavioral health, and ancillary professionals. Since the initial launch, focus has expanded to include any type of individual willing to volunteer in a public health or medical event.

Volunteers may choose to register for one or more of twelve main organizations within the MI Volunteer Registry. These organizations include: Community Emergency Response Team (CERT); Fire Corps; General Volunteers; Local Health Departments (LHD); Medical Reserve Corps (MRC), Michigan Mortuary Response Team (MI-MORT); Michigan State Animal Response Team (MI-SART); Michigan Transportable Emergency Surge Assistance (MI-TESA); Neighborhood Watch; Regional Healthcare Coalitions (HCC); Tribal Response Teams; or Volunteers in Police Service (VIPS).

The purpose of this system is to provide a secure, electronic environment for volunteers to indicate their interests and contact information. In the event of an accidental, natural, intentional, or other public health or medical emergency; the Registry functions as a central location for volunteer information. In an event, this information can be queried and appropriate volunteers contacted by e-mail.

The Registry is also a place where volunteers can access important topical information regarding specific events, exercises and drills, or general knowledge and training.

Support to develop and create the Registry originates from a cooperative agreement with the ASPR, Hospital Preparedness Program (HPP) and ESAR-VHP program. Funds have been used to develop, implement, and sustain the Registry. Volunteers, along with local and regional agencies, are able to use the system without direct cost to them.

Michigan Volunteer Registry: Frequently Asked Questions

1. BACKGROUND INFORMATION

What is the purpose of MI Volunteer Registry?
The purpose of the MI Volunteer Registry is to provide an electronic environment for volunteers to indicate their interests and contact information for helping to support a public health or medical emergency response. The Registry functions as a central location for volunteer information, which can be queried and appropriate volunteers contacted by e-mail.

Where does support come from for the MI Volunteer Registry?
Funding for the program is provided through a federal cooperative agreement with the Office of the Assistant Secretary for Preparedness and Response (ASPR), Hospital Preparedness Program (HPP); and the Emergency System for Advance Registration of Volunteer Health Professionals (ESAR-VHP) national program. Funds have been used to develop, implement, and sustain the Registry. Volunteers, along with designated local and regional preparedness partners, are able to use the system without direct cost to them.

What professions are being sought?
The MI Volunteer Registry seeks people with all skill levels and experiences. When registering to volunteer, you will be asked to select a volunteer organization(s) that is right for you!

The **Community Emergency Response Team (CERT)** program educates people about disaster preparedness and trains them in basic disaster response skills, such as fire safety, light search and rescue, and disaster medical operations. Using their training, CERT members can assist others in their neighborhood or workplace following an event and can take a more active role in preparing their community. To register, you must have already completed the 20 hour CERT course.
Fire Corps promotes the use of citizen advocates to enhance the capacity of resource-constrained fire and rescue departments at all levels: volunteer, combination, and career. Citizen advocates can assist local fire departments in a range of activities including fire safety outreach, youth programs, and administrative support. To register, you must belong to a certified Fire Corps organization and have completed their required training.
General Volunteers represent all types of individuals that wish to volunteer, including both medical and non-medical professions. A specific volunteer affiliation is not required to become a member; however, individuals may indicate an affiliation with a Regional Healthcare Coalition (HCC), Local Health Department (LHD), or Tribal Community Response Team.
There are 45 **Local Health Departments (LHDs)** that serve all the jurisdictions in Michigan, providing a myriad of programs, including emergency preparedness services to the public. Individuals may indicate an affiliation with an LHD, which may include interest or involvement as a jurisdictional volunteer or strike team member.
Medical Reserve Corps (MRC) strengthens communities by offering support throughout the year, as well as during local emergencies and other times of community need. Public health, medical, or other volunteers work in coordination with existing local emergency response programs and supplement public health initiatives. You must first belong to a local MRC unit, prior to registering on the MI Volunteer Registry. For more information, visit www.medicalreservecorps.gov.
Michigan Mortuary Response Team (MI-MORT) is a Mass Fatality Response Team made up of different professions all with the common goal of assisting county Medical Examiners, Emergency Management, and Public Health with Mass Fatality Management. To register, you must be a member of the team. Visit www.mimort.org for more information or contact Gloria Zunker at ZunkerG1@michigan.gov.
The **Michigan State Animal Response Team (MI-SART)** is dedicated to preparing for, responding to, and recovering from disasters which affect animals in Michigan. MI-SART is a volunteer organization of trained and credentialed veterinarians, veterinary technicians, and others with animal care experience. To register, you must complete certain training requirements and submit documentation to verify completion. Visit www.michigansart.org for more information or contact MI-SART at info@michigansart.org.
The **Michigan Transportable Emergency Surge Assistance Medical Unit (MI-TESA)** is an all-weather 140 bed mobile field hospital that is supported by Mobile Medical Personnel and Tactical Support Teams to meet medical surge or healthcare infrastructure disruption. To register, you must be a member of the team. For more information on MI-TESA contact Loren Korte at KorteL@michigan.gov.
An expanded **Neighborhood Watch Program (NWP)** incorporates terrorism awareness education into its existing crime prevention mission, while also serving as a way to bring residents together to focus on emergency preparedness and emergency response training. To register, you must belong to a certified NWP organization and have completed their required training.
There are eight **Regional Healthcare Coalitions (HCCs)** throughout the state. These coalitions work with local partners within each region to prepare hospitals, emergency medical services, and supporting healthcare organizations to deliver coordinated and effective care to victims of terrorism and other public health/healthcare emergencies. Individuals may indicate an affiliation with an HCC, which may include *interest or involvement in a regional Mobile Medical Field Team (MMFT) or other regional strike team.*
The **Volunteers in Police Service (VIPS)** program provides support and resources for agencies interested in developing or enhancing a volunteer program and for citizens who wish to volunteer their time and skills with a community law enforcement agency. The program's ultimate goal is to enhance the capacity of state and local law enforcement to utilize volunteers. To register, you must belong to a certified VIPS organization and have completed their required training.
There are 12 **Tribal Response Teams** in the State of Michigan. Each sovereign tribe has an independent relationship with each other and with the state. The State of Michigan and Tribal governments share a responsibility to provide for and protect the health, safety, and welfare of our common constituents. Individuals may indicate interest or involvement in a Tribal Response Team.

2. REGISTRATION INFORMATION

Who can register for MI Volunteer Registry?
MI Volunteer Registry was originally designed primarily for health care professionals. However, anyone over the age of 18 can register.

Where can I register to be a volunteer?
To register, go online and enter the following address: http://www.mivolunteerregistry.org. The registration process may take anywhere from 15-30 minutes for unlicensed professionals, but may take up to 60 minutes if you have multiple licenses or certifications to enter. If you have a medical license, medical specialty, or any health certifications, make sure to have them available as you will need them for the registration process.

What do I have to do to qualify to register?
We are seeking people with health care backgrounds and experience, or a genuine interest in volunteering during an emergency. We are looking for people with all skill levels and experiences. Once you have filled out an on-line application, a Registry administrator will review and verify your information – including a criminal background check – to determine your qualification to assist with potential volunteer activities.

Can I register if I am not currently a licensed health professional?
Yes, there is a need for all types of volunteers.

If I am not currently employed, but keep my license current, can I register?
Yes, if you are retired, a student, or are not working in a health care field, please register.

May I volunteer for the MI Volunteer Registry as well as for other organizations?
Yes, the MI Volunteer Registry captures volunteer affiliations and other commitments, as identified by the applicant.

What if I am in the Military?
If you have other emergency response commitments, please indicate that in the appropriate area on the registration form.

How many people are needed for the registry?
We would like to register as many people as possible so that communities will have immediate access to the volunteers needed to support a public health or medical emergency.

How will I be able to update my information?
Once you register, you will have a secure password that will allow you to re-enter and modify your record at any time. You will also receive periodic reminders to check the accuracy of your profile.

Is it required that I register now or may I decide if and when a crisis occurs?
We strongly recommend registration prior to an event, however it is not required. Advanced registration of volunteers will provide hospitals, public health, and emergency authorities' immediate access to personnel that may be needed in the event of an emergency.

Does registering obligate me to volunteer in an emergency?
No. At the time of an event, you may be notified with a request to volunteer. Volunteers are encouraged to respond to availability requests and may change their response at any time.

3. LEGAL ISSUES

Are there provisions for compensating me for time lost from work or other expenses?
The Registry is intended for volunteers who are willing to render aid or perform services on a temporary basis without pay or any benefits. Some employers support employee volunteer and community service activities. Check with your own employer for details.

Are there provisions for workers' compensation benefits?
The first option would be to discuss with your current employer their willingness to support your volunteer activity as part of their organizational community mission by providing you workers' compensation coverage. This should be a clear discussion on the MI Volunteer Registry, the potential to volunteer and its impact to your routine work schedule, and any burdens or hardships your volunteerism may cause the company/or your employer. MI Volunteer Registry activities may be requested outside of normal work hours, location, or facility.

If your employer is unwilling or unable to provide you workers' compensation coverage, Michigan has recently amended its Workers' Compensation Act- 2012 PA 83, MCL 418.161(1)(o) to include volunteer activity, provided that activity is consistent with the described process for registration and deployment during a public health or medical emergency disaster, training, or exercise.

In addition, many private health care practitioners carry their own insurances, including workers' compensation. Therefore, check with your carrier(s) to see if that coverage includes activities associated with volunteerism.

An individual registered with and deployed through the MI Volunteer Registry shall be considered an employee of the state when engaged in the performance of duties agreed upon through registration on this specific site. This would include duties related to training and exercising.

IMPORTANT: This coverage is only applicable to volunteer activity sanctioned by and deployed through an authorized administrator on the MI Volunteer Registry.

What protection might be available for volunteers against liability lawsuits arising out of the volunteer work?
In Michigan, volunteers may be protected from civil liability through the following statutes. However, they do not protect against harm caused by willful or criminal misconduct, gross negligence, reckless misconduct, or a conscious, flagrant indifference to the rights or safety of the individual harmed.

Governmental Immunity Act, MCL 691.1401 et seq. – While acting on behalf of a governmental agency, a volunteer is immune from tort liability if the volunteer is acting or reasonably believes he or she is acting within the scope of his or her authority, and the governmental agency is engaged in the exercise or discharge of a governmental function. This Act does not provide immunity for medical treatment or care to a patient, with limited exceptions. However, other laws discussed in this section may apply to provide protection from liability for medical care.

Liability of Certain Persons for Emergency Care, MCL 691.1501 et seq. – Commonly referred to as ***The Good Samaritan Act***, this statute

- Protects certain licensed health professionals from civil liability when providing emergency care without compensation at the scene of an emergency, provided there was no provider/patient relationship established before the emergency.
- Covers physicians, physician's assistants, registered professional nurses, and licensed practical nurses responding to a life threatening emergency in a hospital or other licensed medical care

facility when the health professional's duties do not require responding to such emergencies.
- Protects individuals assisting the government with a search and rescue operation.

Emergency Management Act, MCL 30.401 et seq. – This statute provides general immunity from liability for ***Disaster Relief Forces*** while on duty. A person who renders services at the express or implied request of a state official, agency, county, local coordinator, or executive body is considered an authorized disaster relief worker. During a declared state of disaster, additional protections are provided to certain health professionals who render services as part of a government authorized response. Moreover, the Director of the Michigan State Police may issue a directive relieving volunteers of liability except for gross negligence.

Public Health Code, MCL 333.1101 et seq. – Several sections of the Public Health Code grant immunity from liability:

- **Health Department** – The director or an employee or representative of the state health department or a local health department is not personally liable for damages sustained in the performance of departmental functions, except for wanton and willful misconduct (MCL 333.2228 and 333.2465).
- **Immunization Program** – When the state health department approves a mass immunization program, health personnel employed by a governmental entity or a volunteer authorized to participate by the director or a local health officer cannot be held liable except for gross negligence or willful and wanton misconduct (MCL 333.9203).
- **Emergency Medical Services Personnel** – Immunity from liability is provided except for gross negligence or willful misconduct (MCL 333.20965).

Volunteer Protection Act of 1997 (Public Law 105-19, 42 USC § 14501) – Volunteers may also be protected from civil liability under this federal law.

Public Readiness and Emergency Preparedness (PREP) Act, Part of the Public Health Service Act, 42 USC § 247d-6d - Provides broad and strong protection to individuals and entities that are engaged in activities related to the use of covered pharmaceutical countermeasures. This includes, for example, entities and individuals involved with manufacturing, labeling, distributing, packaging, marketing, selling, purchasing, donating, dispensing, prescribing, administrating, licensing, or using of such countermeasures. Requires a PREP Act Declaration from the Secretary of Dept of Health & Human Services. To be protected from liability, would need to act consistent with the terms of the PREP Act declaration. PREP Act declarations, and FAQs that explain the PREP Act, can be found at http://www.hhs.gov/disasters/discussion/planners/prepact/index.html. Protection under a PREP Act declaration pre-empts state law, which means state law cannot provide less protection for entities or individuals covered by a PREP Act declaration. Permits a lawsuit to be filed in the U.S. District Court for the District of Columbia for "willful misconduct", which the plaintiff must prove by "clear and convincing evidence."

For Government Employees:

Interstate Emergency Management Assistance Compact (EMAC), MCL 3.991 et seq. – Michigan is a member of this multi-state compact, which is commonly referred to as EMAC. Individuals who are deployed to other states under the compact are immune from civil liability except for willful misconduct, gross negligence, or recklessness. Deployment under the compact is through the EMAC Coordinator at the Michigan State Police Emergency Management and Homeland Security Division.

Are there any eligibility restrictions for volunteering?
All individuals willing to volunteer in support of a public health or medical emergency are encouraged to enroll in the Registry. When a volunteer's services are needed, an authorized Registry administrator will contact the volunteer to inquire about availability, willingness to serve, and physical nature of the intended deployment. Depending on the circumstances, conditions may require certain skills, abilities, or other criteria.

What precautions are being taken by the State to protect health volunteers against disclosure of personal information contained in the MI Volunteer Registry?
Authorized Registry system administrators are the only individuals to have access to your information. Registry volunteer profile information is not open to the public. The system is designed to provide unique privileged access for specific professions and qualifications following an emergency incident. This includes the ability to limit administrator access rights to local teams and certain program affiliations (i.e., Medical Reserve Corps).

Is the State able to provide malpractice insurance to volunteers?
No. Any individual who volunteers should carry their own malpractice insurance. Individuals can check to see if their primary employer has any provisions to provide this benefit for volunteer services.

What other legal resources are available?
Before deployment, health volunteers are advised to consult with their own legal counsel, employers, or sponsors. More information is available at the following websites:

- U.S. Department of Health and Human Services (DHHS) (http://www.phe.gov/preparedness/Pages/default.aspx)
- Office of the Assistant Secretary for Preparedness and Response (ASPR) (http://www.phe.gov/about/aspr/Pages/default.aspx)
- Emergency System for Preparedness and Response (ESAR-VHP) Employer page (http://www.phe.gov/esarvhp/pages/employers.aspx)
- Medical Reserve Corps (http://www.medicalreservecorps.gov)
- American Red Cross (http://www.redcross.org)

4. COMMITMENTS

What is the level or length of volunteer commitment in an emergency?
Once notified of the emergency or crisis, each volunteer will determine their current availability, based on the following:

- What kind of incident are you willing to respond to?
- What distance are you willing to travel?
- How long are you willing to be deployed?

What kind of tasks may I be assigned?
The type of tasks assigned may depend upon the situation or event.

Can I be asked to volunteer out of state?
Yes, you may be asked but are under no obligation to volunteer out of state.

Under what conditions will I be contacted to provide emergency services?
You will be contacted in an emergency if local, regional, and/or state responder resources are not sufficient to meet the need for response and recovery efforts resulting from that incident.

Will I get paid to volunteer?
No. All volunteer work is unpaid. However, being a volunteer is important!

5. TRAINING AND EDUCATION

What kind of training or additional responsibilities will I receive dealing with emergencies?
There are no trainings or additional responsibilities required prior to an emergency for most registrants however, disaster training and participation in local and regional exercises is encouraged. Training opportunities will be posted from time to time to the *Training & Events* section of the MI Volunteer Registry. Volunteers are encouraged to check this page frequently.

Registered volunteers may also reference the *Volunteer Training Matrix*, posted to the Document Library (Training, Volunteer Resources), which offers recommendations and at a minimum an understanding in the Incident Command Structure (ICS). Opportunities are available on-line through MI-TRAIN or through local, regional or State events.

What kind of risks may I be exposed to in an emergency?
You may be requested on your interest or availability for responding to different types of emergencies; including floods, tornados, large fires, and events that may be chemical, biological, radiological, or nuclear. You will be offered training on how to help in an emergency, as well as how to protect yourself.

How can I get information about local or regional preparedness efforts, contact information, training and events?
Additional information may be found in the MI Volunteer Registry, the OPHP Website, or MI-TRAIN.

6. CONTACT INFORMATION

How will I be contacted in an emergency?
You will be contacted via e-mail. The e-mail message will provide all of the information about where to report, credentials to bring, and other necessary information relative to the situation.

If I have questions or concerns once I have registered, whom do I contact?
If you have general or technical assistance questions regarding MI Volunteer Registry, please contact a Registry administrator at help-mivolunteerregistry@michigan.gov or (866) 636-6324.

If I volunteer, will there be help available to take care of my family?
No, this is a personal responsibility and whether you chose to volunteer or not, it is important to develop an emergency plan for your family.

Z: VOLUNTEER MICHIGAN INFORMATION

(Source: Michigan Community Service Commission / Volunteer Michigan web site; reformatted for space / appearance purposes and edited for relevant content)

VolunteerMICHIGAN

Promoting volunteerism as a strategy for strengthening Michigan communities.

About Volunteer Michigan

Volunteer Michigan is the state of Michigan's collaborative volunteer initiative. Through a strategic partnership between the Michigan Community Service Commission (MCSC) and the Volunteer Centers of Michigan (VCM), Volunteer Michigan will implement a variety of tools as it seeks to connect volunteers with the organizations that need them, increase the visibility of volunteers statewide, and highlight the urgent need for increased volunteerism across Michigan. As a result of its volunteer promotion and resource development, Volunteer Michigan will demonstrate that volunteerism can be and is an effective and proven strategy for strengthening Michigan's communities.

About the MCSC

The Michigan Community Service Commission (MCSC) is the state's lead government agency on volunteerism. For more than 20 years, the MCSC has been promoting service as a strategy to address Michigan's greatest challenges and providing vision and resources to strengthen communities through volunteerism. To help advance their mission, the MCSC relies on four signature programs: Michigan's AmeriCorps, Mentor Michigan, Volunteer Michigan, and the Governor's Service Awards. Since its inception in 1991, the MCSC has invested more than $100 million in communities for volunteer initiatives, leveraged an excess of $85 million in local funds, engaged more than one million people in volunteerism, enrolled 24,000 people in 29 million hours of AmeriCorps service, and impacted critical community issues such as disaster preparedness, education, foreclosure, healthcare, and the environment.

About VCM

Volunteer Centers of Michigan (VCM) is an affiliate program of the Michigan Nonprofit Association that supports a statewide network of more than 30 Volunteer Centers. These Volunteer Centers, which collectively serve nearly 60 of Michigan's 83 counties, play an instrumental role in developing creative community solutions through service. VCM works to ensure that each of these Volunteer Centers can continue to positively impact their community by strengthening, developing and connecting network members throughout the state. To achieve this mission, VCM provides resources, fund development, networking opportunities, training, and more to Michigan's Volunteer Center field. With the support, services, and assistance of VCM, local Volunteer Center affiliates are able to grow and expand the positive work they perform in their individual communities and increase volunteerism statewide. The VCM network has served the sector for more than 25 years and is the only one of its kind in the nation.

FAQ – For Volunteers

How do I become a member of Volunteer Michigan?

Becoming a volunteer is easy! Simply become a member (volunteer) and start searching! It doesn't cost anything to register and your information will be kept private and secure. Before you get started, ensure your community is not currently served by a local volunteer center by clicking here.

Volunteer Michigan: FAQ – For Volunteers (cont.)

What if my community is already served by a local volunteer center?
We highly encourage Michigan residents to volunteer with the Volunteer Center in their community, if one exists. Local Volunteer Centers are the best place to search for volunteer opportunities as they work with nonprofits, schools, and other organizations right in your backyard, and can often provide more localized information and support. However, if you have searched your local volunteer center's service opportunities and didn't find one you were interested in, please feel free to use the Volunteer Michigan portal. We would also encourage you to use our site if you plan to volunteer in other communities outside of your own.

Does it cost anything to volunteer?
Just your time and skills! Volunteering is free.

How much time do I have to commit?
It's entirely up to you! You can volunteer as much or as little as you like based on your time and interest. However, every organization will have different requirements for their volunteer opportunities. Some organizations may require an orientation and training with a commitment of a certain number of hours while others may not have any of those requirements.

What is a Volunteer Leader (VL)?
A VL is just a regular volunteer (like you) who makes volunteer-managed projects meaningful, successful and FUN! VLs share project details with volunteers, guide the team onsite, build their leadership skills, and make these events possible.

What if I don't find what I'm looking for on the calendar of projects?
We also offer a searchable database of volunteer opportunities that occur on an ongoing basis.

Can I volunteer if I am under 18 years-old?
Check the age listing for each project as the minimum age varies depending on the agency and activity. Some organizations may require an adult to volunteer with you or at least attend an orientation. In addition, some volunteer activities may require a waiver to be filed at the event. Volunteers under the age of 13 are unable to sign up through our website due to the Federal Child Online Privacy Protection Act (COPPA).

I don't have transportation. Can you get me to the volunteer projects?
Unfortunately, we do not have the capacity to transport volunteers to volunteer activities.

Questions About the Website

After I have become a member, how do I sign up for a volunteer project?
Click on the "Find an Opportunity" section of our website to search for volunteer projects by keywords and locations or by date on our opportunity calendar. Once you find one of interest to you, sign up for the opportunity through our website. You will receive an e-mail with directions and any other special instructions. Then go out on the project and have a great time while helping to meet an important community need.

How do I change my password or update my email address?
After you log-in to our website, click the "My Account" sub-tab and then click "Personal Information." Make your changes and click "Update" at the top of the screen.

What if I am unable to sign-up for a project through the website?
You can always contact the Volunteer Michigan staff at info@volunteermichigan.org. We would be glad to assist you with the registration process.

How do I remove myself from a project I signed up for previously?
Log-in to our website, click on the "My Account" sub-tab, and scroll down to "Upcoming Opportunities." Then, simply click "Remove Me" next to the project from which you wish to remove yourself. Please do this as early as possible so that your volunteer slot becomes available for other volunteers to fill.

What if a project I want to sign-up for is full? Can I get on a wait-list?
If a project occurrence is full, the "Sign Up" button that typically appears at the bottom of the project page will change to "Add Me to Wait List." Simply click there to add yourself to the project's waitlist. Although the website may say that you have been registered, please note if the project is full, you are not officially registered until a space opens up. You will be notified if a space opens up and will then be able to officially register yourself for the project.

Volunteer Michigan: Questions About the Website (cont.)

Which browser do you recommend for the best performance?
HandsOn Connect runs on the Salesforce platform, therefore we recommend using Firefox for the best performance. Google Chrome is also an acceptable alternative. If you use Internet Explorer, Internet Explorer version 8 is recommended over versions 6 and 7. While using Internet Explorer you may experience a slower response time over the recommended browsers.

FAQ – For Organizations

How do I become a partner agency?
Becoming a partner is easy! We are always looking for new volunteer opportunities and partners. If you are a nonprofit, school, faith-based, government or civic organization that would like to partner with us to recruit and manage volunteers, please visit our "Register As a Partner" page. Before you get started, ensure your community is not currently served by a local volunteer center by clicking here.

What if my community is already served by a local volunteer center?
We highly encourage community organizations to work directly with the Volunteer Center in their community, if one exists. Local Volunteer Centers are the best place to search for volunteers as they can often provide more localized information, outreach, and support. However, if you have tried connecting with your local Volunteer Center or would like to use our portal in addition to your local resource, please feel free to use the Volunteer Michigan site. We would also encourage you to use our site if you are trying to recruit and manage volunteers in multiple communities across the state.

Does it cost anything to register my opportunities?
Nope! We are proud to offer this online listing service free to nonprofit organizations, schools, community and faith-based organizations, civic groups, and more throughout the state of Michigan.

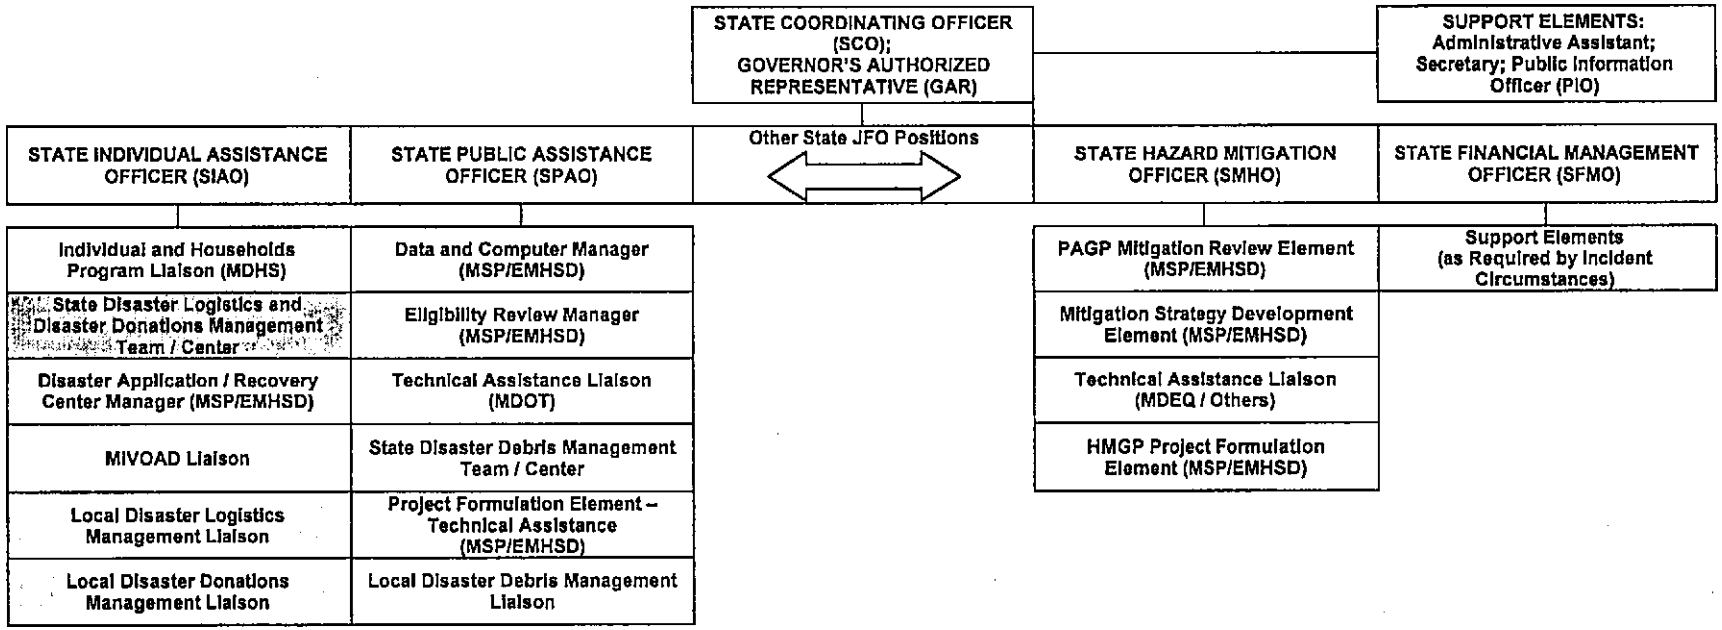
How do I submit new volunteer opportunities?
Currently, to submit volunteer opportunities, we are asking all partner agencies to fill out our online opportunity form.

What happens when a volunteer signs-up for one of my opportunities?
When a volunteer signs up for, or expresses interest in one of your volunteer opportunities an email is generated to both you and the volunteer (and Volunteer Michigan). In your version of the email, you will be given information on the volunteer such as which opportunity they are interested in, as well as their contact information as entered into our system. It is then up to you to contact that volunteer to schedule the next steps - whether that be scheduling their volunteer hours or contacting them for an interview - or just letting them know that the opportunity is full (be sure to let us know too!).

Do I have to take every volunteer that signs up through this website?
Absolutely not. These are YOUR volunteers – so go through any process you normally would and take only the volunteers you want! We only ask that you contact EVERY volunteer that signs up for your opportunity. If you are unable to do so, please let us know so we can deactivate your opportunities. We want to provide the best experience for volunteers possible, and that includes responding to their interest.

I have an urgent volunteer need, can Volunteer Michigan help?
YES! First, be sure that you have filled out a Volunteer Opportunity Form and that the volunteer opportunity is in our system. Next, contact us! Email us, Facebook us, Tweet us – whatever you are most comfortable with and we'll do our best to help you get the word out through our social media channels.

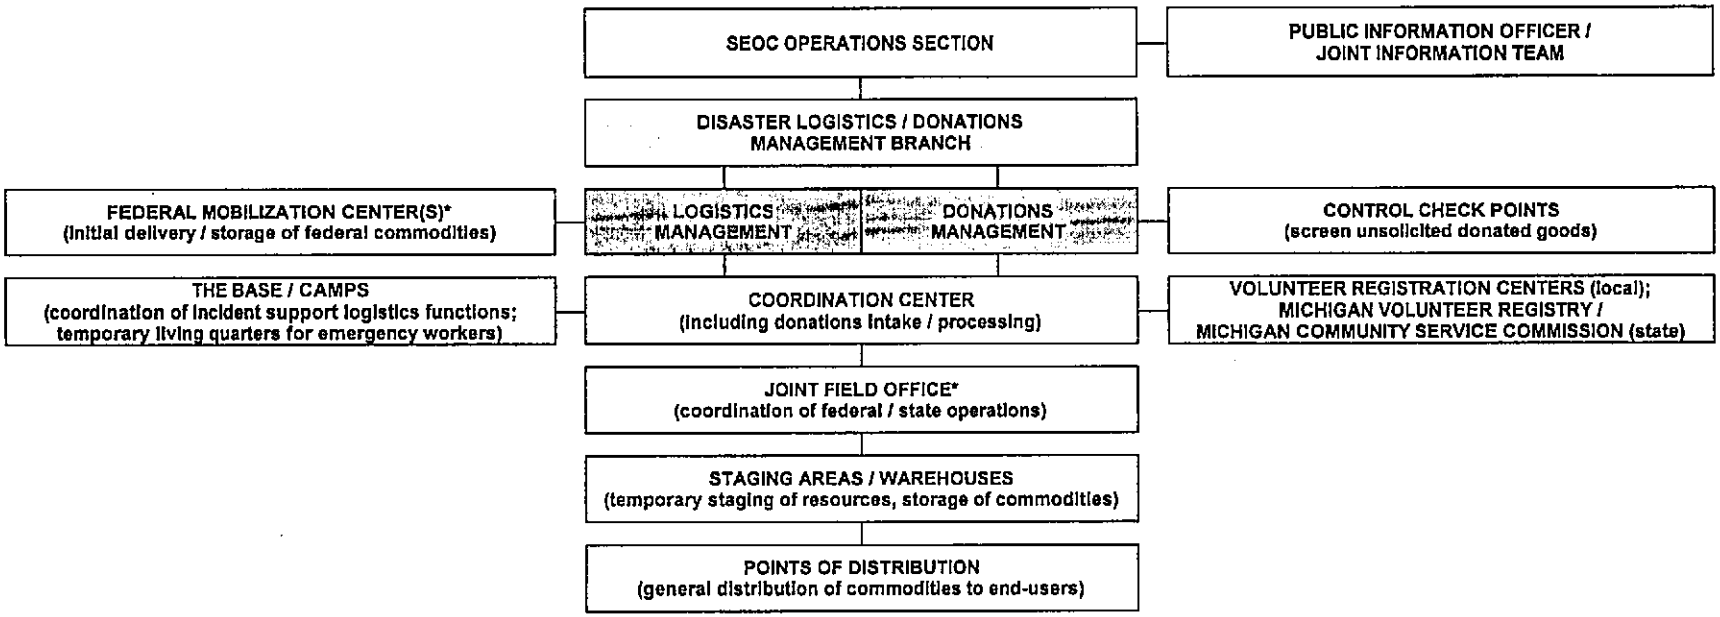
AA. FIGURE 1: TYPICAL JOINT FIELD OFFICE ORGANIZATIONAL STRUCTURE FOR LOCAL AND STATE STAFF



Background Notes: The state-level positions in this basic organizational structure which are logistics and donations management-specific are that of State Disaster Logistics Management Coordinator and State Disaster Donations Management Coordinator, who lead, respectively, the logistics management and donations management functions of the State Disaster Logistics and Donations Management Team. In addition, the State Individual Assistance Officer (SIAO) works to ensure that the life-sustaining needs of the affected population are being adequately met through the various federal financial assistance programs, disaster donations, or the direct provision of commodities.

Most of the other JFO positions are not directly related to logistics and donations management, but rather to other assistance programs. However, several do have impact on logistics and/or donations management operations. For example, the State Public Assistance Officer (SPAO) is instrumental in determining the eligibility of certain logistics and/or donations management activities for reimbursement under the federal PAGP – Category B (Emergency Protective Measures). The State Coordinating Officer (SCO) works to ensure that the disaster response and recovery effort is proceeding forward and that all necessary resources are mobilized and operational. The State Financial Management Officer (SFMO) is responsible for tracking and compiling costs associated with the logistics and donations management operation (and other disaster operations as well). The PIO, Administrative Assistants, and clerical staff will also be involved in logistics and donations management, but in a support capacity. (They have other disaster-related duties to perform for other program areas.)

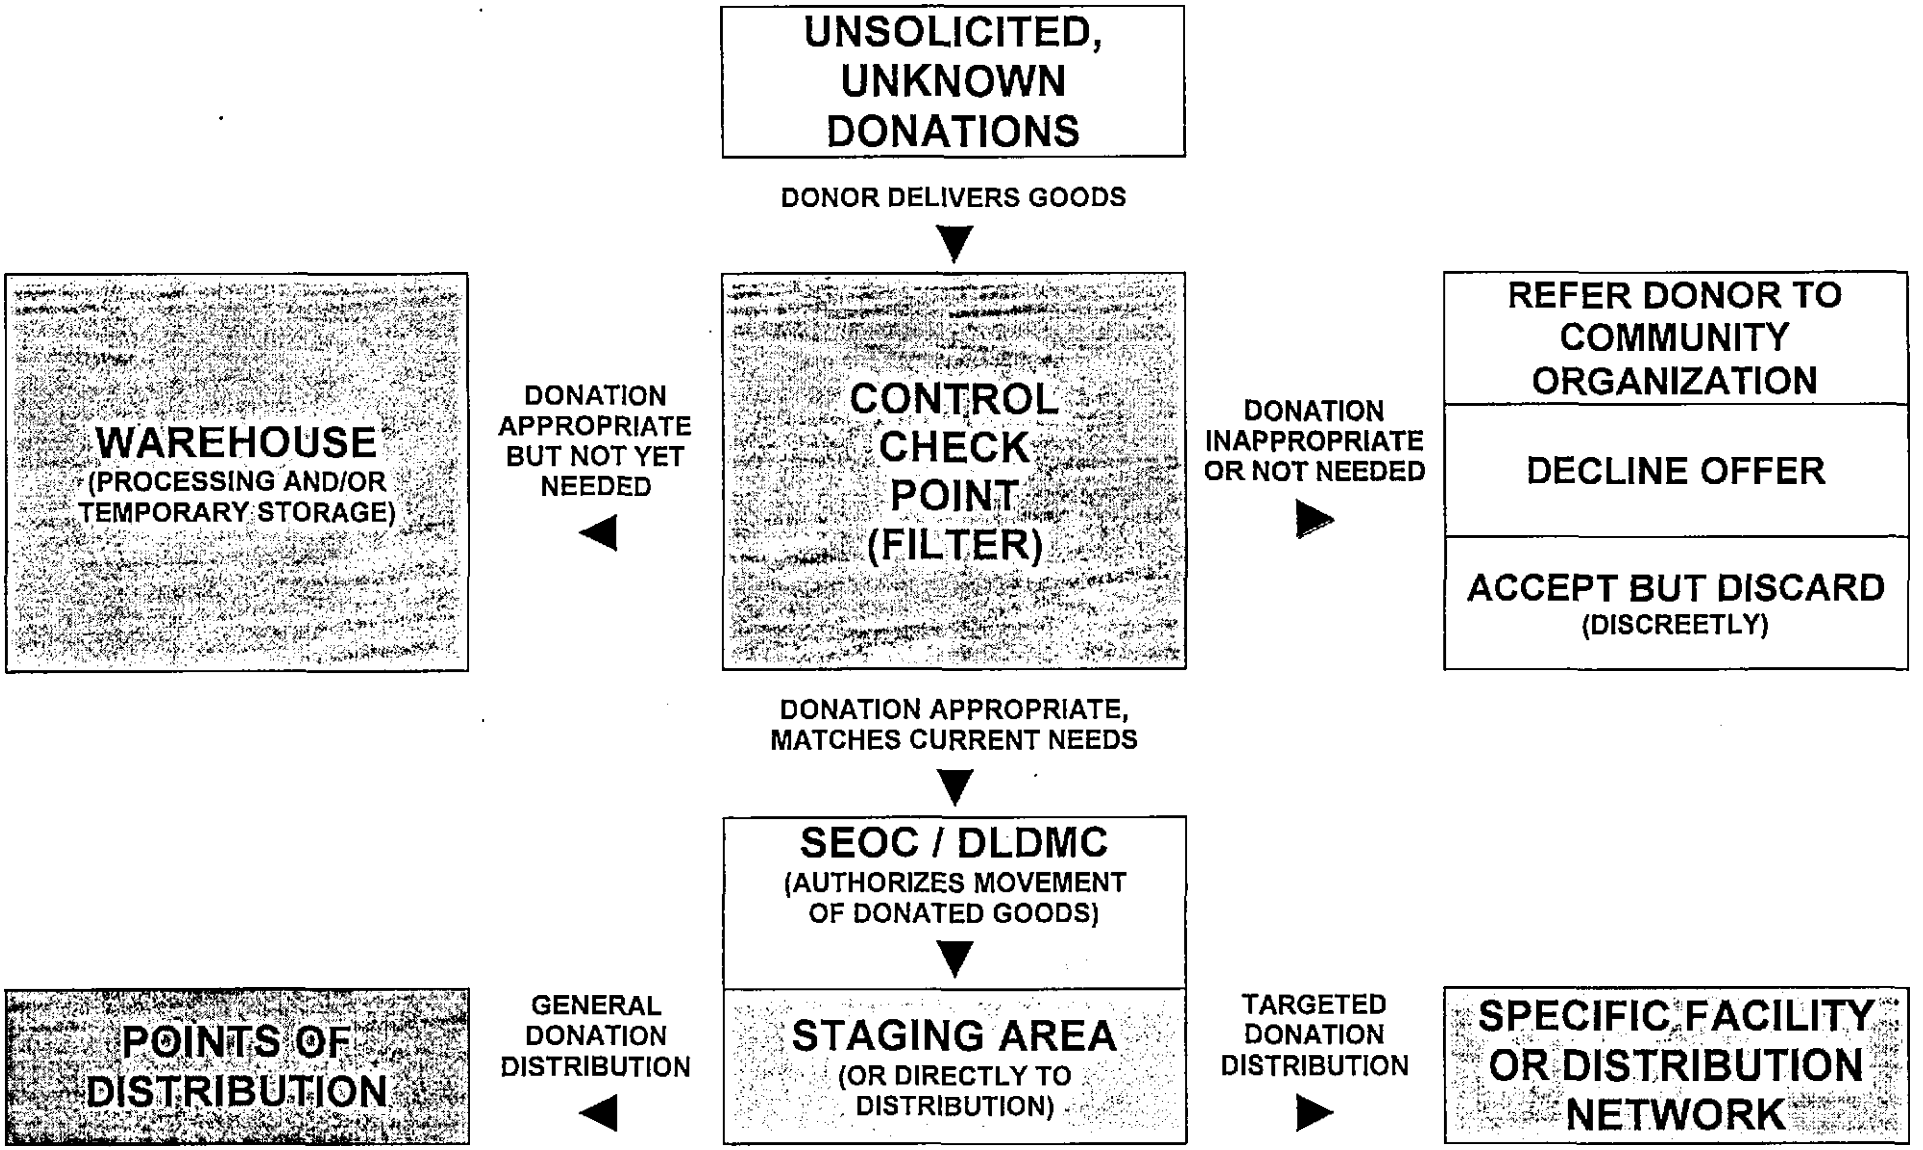
AA. FIGURE 2: PRIMARY ORGANIZATIONAL ELEMENTS OF DISASTER LOGISTICS / DONATIONS MANAGEMENT BRANCH, SEOC OPERATIONS SECTION



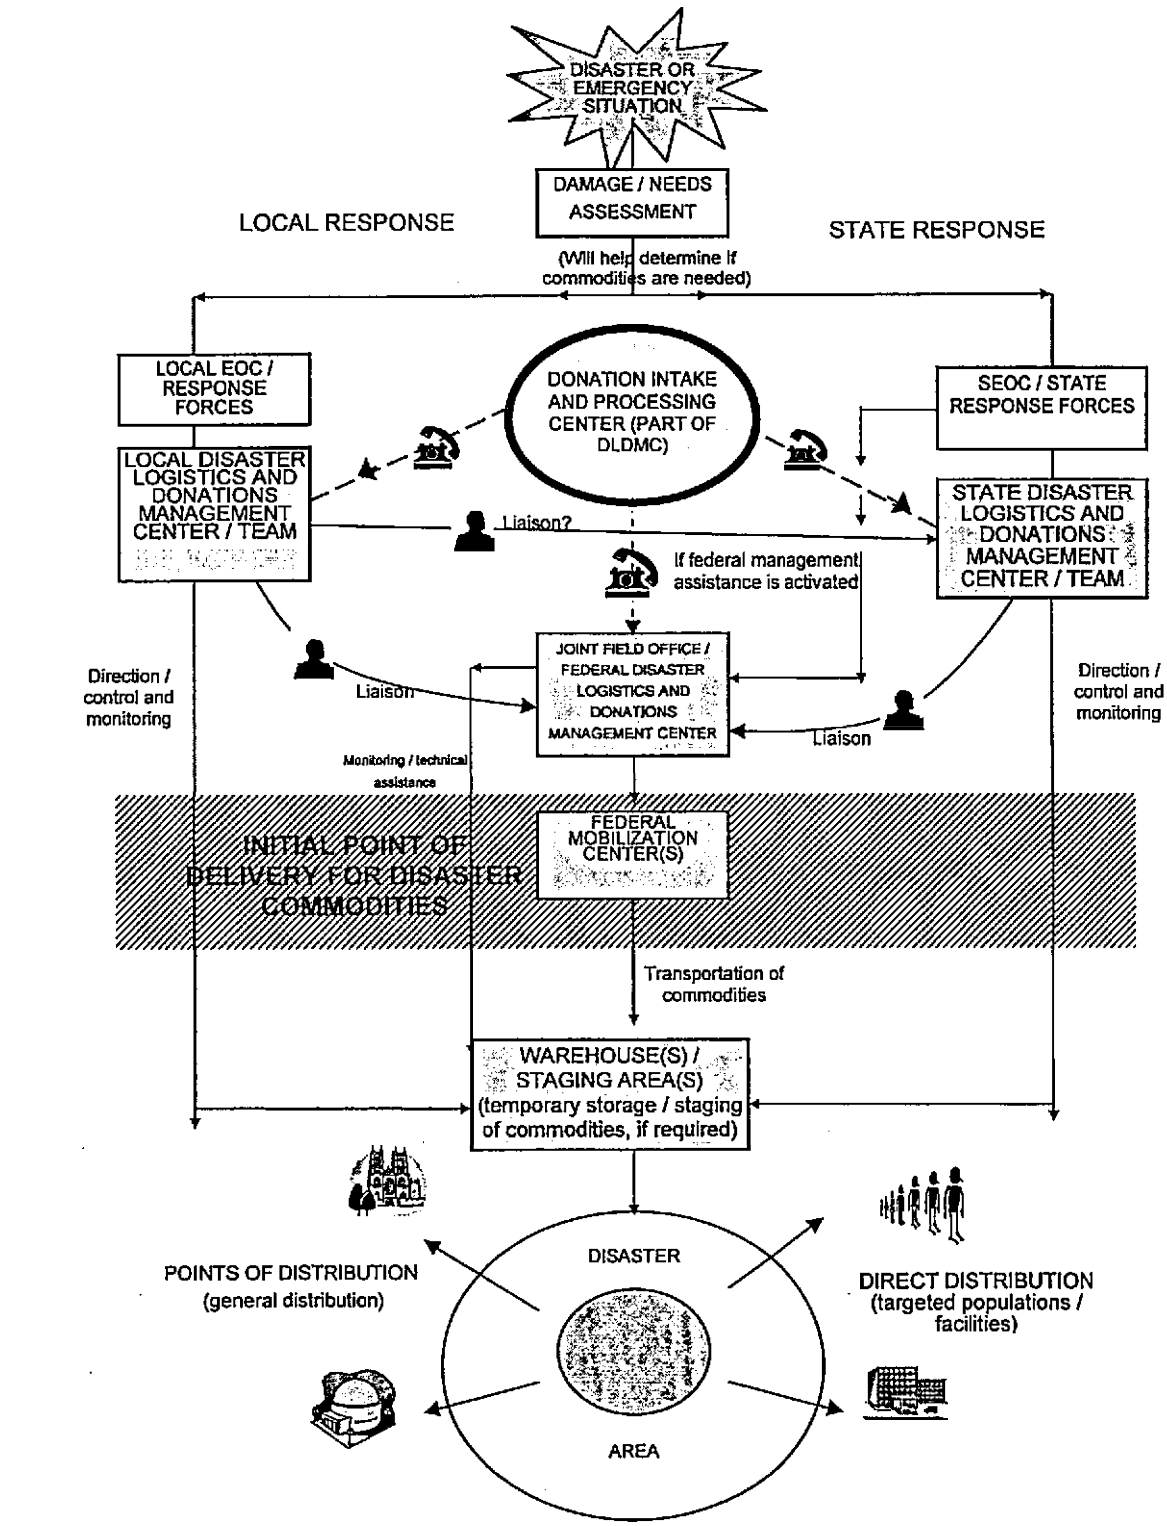
*Activated only for a federal Stafford Act declaration which involves federal assistance with logistics and/or donations management.

Background Note: This generalized organizational chart will be customized to fit local and state conditions and needs for each incident requiring a disaster logistics and/or donations management operation.

AA. FIGURE 3: RELATIONSHIP BETWEEN DONATIONS MANAGEMENT FACILITIES

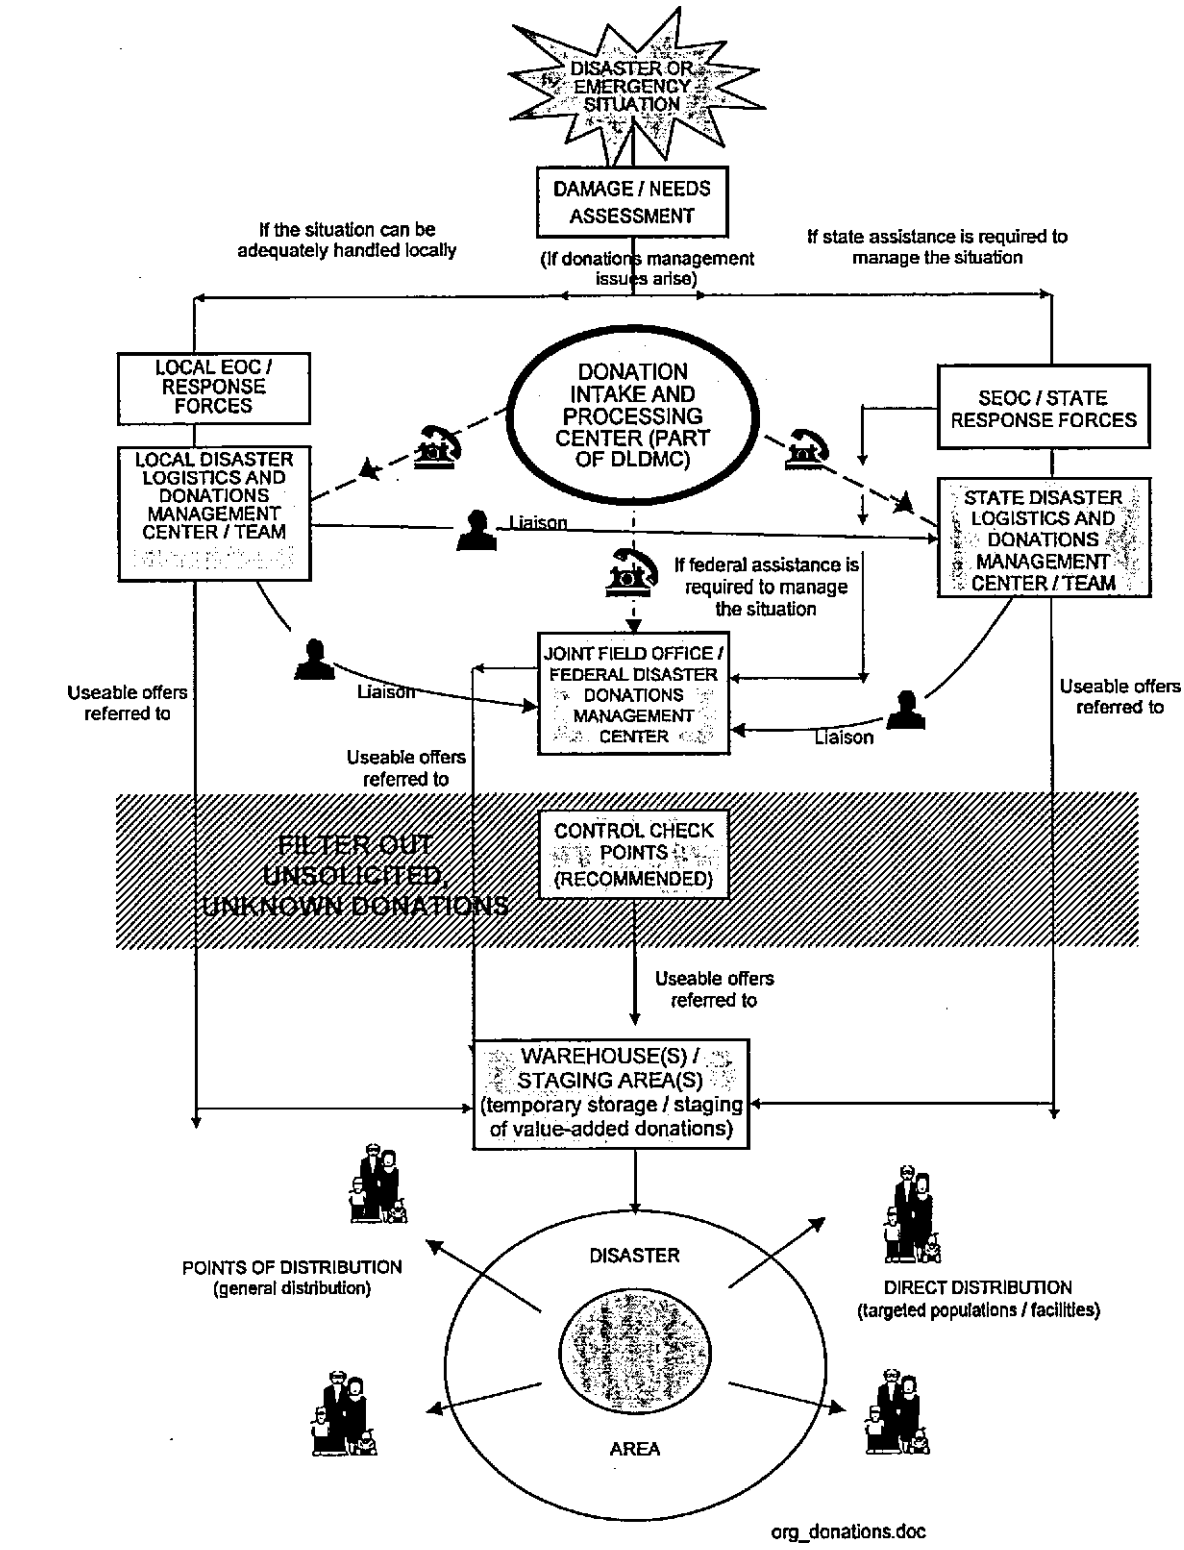


AA. FIGURE 4: INTEGRATED DISASTER LOGISTICS / DONATIONS MANAGEMENT PROCESS FOR FEDERALLY-DECLARED INCIDENTS



AT STATE DISCRETION, COMMODITIES MAY BE DELIVERED DIRECTLY TO POINTS OF DISTRIBUTION OR OTHER DESIGNATED LOCATIONS INSTEAD OF GOING TO WAREHOUSES / STAGING AREAS.

AA. FIGURE 5: DISASTER DONATIONS MANAGEMENT (ONLY) PROCESS FOR FEDERALLY-DECLARED INCIDENTS



BB. NATIONAL RESPONSE FRAMEWORK SUPPORT ELEMENTS FOR LOGISTICS / DONATIONS MANAGEMENT, AND CORREDPONDING STATE PLANNING AND OPERATIONAL CONSIDERATIONS*

NRF Annex	Logistics / Donations Management Assistance Provided	State Logistics / Donations Management Considerations
ESF 5 Information and Planning (May 2013)	• Supports overall activities of the federal government for incident management. • Coordinates federal incident action planning. • Staffs key positions on federal emergency response teams. • Establishes required field facilities, supplies, and equipment to support federal activities during federally-declared incidents. • Provides core management / administrative functions in support of JFO operations. • Maintains a cadre of trained reserve employees to provide surge capability for essential functions. • Provides staff for Logistics Section, which implements the NRF Logistics Annex (ESF 7).	• Immediate and continuous coordination with federal response elements. • Coordinate incident action planning (related to logistics and/or donations management) with federal counterparts. • Articulate state-determined commodity needs and capability shortfalls as early as possible in the response phase so that federal support can be mobilized. (State needs should be clearly articulated in the request for a federal declaration.) • Coordinate with federal officials regarding the establishment and operation of needed field facilities to support logistics / donations management and other required functions. • Provide state staff for established federal field facilities, as appropriate. • Continuously collect and share incident-related information to facilitate effective operations.
ESF 6 Mass Care, Emergency Assistance, Temporary Housing and Human Services (May 2013)	• Promotes the delivery of services and the implementation of programs to assist individuals, households, and families impacted by federally-declared incidents. Responsible for mass care, housing, and human services functions. • Helps determine resource (i.e., commodity) requirements based on identified resource and capability shortfalls, and affected area / population characteristics. • Assists in locating and procuring needed commodities and/or donations to sustain the affected area and population through the response and/or recovery phase.	• Identify and quantify locally-available commodities to support mass care, temporary housing, and other human service needs. • Determine resource (i.e., commodity) needs and shortfalls through capability and incident assessments. • Articulate state-determined commodity needs and capability shortfalls as early as possible in the response phase so that federal support can be mobilized. (State needs should be clearly articulated in the request for a federal declaration.) • Continuously collect and share incident-related information to facilitate effective operations.
ESF 7 Logistics (May 2013)	• Provides resource support prior to, during, and/or after federally-declared incidents. • Locates, procures, and issues resources to federal agencies to support response and recovery operations. • Establishes and manages federal Mobilization Centers (General Services Administration) when mission assigned by FEMA. • Establishes the NIMS-compliant framework for federal logistics and/or donations management operations for federally-declared incidents. • Addresses Materiel Management, Personal Property Management, Facility Management, and Transportation Management.	• Articulate state-determined commodity needs and capability shortfalls as early as possible in the response phase so that federal support can be mobilized. (State needs should be clearly articulated in the request for a federal declaration.) • Coordinate with FEMA / GSA regarding state staffing at federal Mobilization Centers. • Coordinate with NRF ESF 1 (Transportation) regarding the movement of commodities into and through the state. (The MDOT will coordinate the issuance of oversize and/or overweight permits, as required, as well as advise on construction activities or other potential hindrances.) • Identify and coordinate the establishment of state and local facilities to support the logistics / donations management operation (based on incident circumstances). • Continuously collect and share incident-related information to facilitate effective operations. • The state logistics / donations management framework should be NIMS-compliant and consistent / compatible with the established federal logistics / donations management framework. (Note: This plan establishes a framework that is NIMS-compliant and consistent / compatible with the federal framework.) • The State must attempt to fill identified commodity needs through agency assets, mutual aid, NGOs, the EMAC, commercial sources, or private donations. If that cannot be done in a timely manner, then federal assistance may be requested. • Selection of federal Mobilization Center location(s) is based upon assessments conducted by federal, state, and local officials early in the incident assessment process. • The State must determine early on if commodities will be temporarily warehoused / staged at state-designated Staging Areas / Warehouses (for phased distribution / deployment), or if they should be delivered directly to local- and/or state-designated Points of Distribution and/or targeted facilities / populations. • The State must determine early on if federal transportation assets will be used to deliver commodities to designated locations, if state / local transportation assets will be used, or if a combination of the two would be most appropriate. • Ideally, a state liaison should be present in the JFO to coordinate logistics and/or donations management operations with federal staff.
Private Sector Coordination (May 2013)	• Describes policies, responsibilities, and concept of operations for federal incident management activities involving the private sector during federally-declared incidents. (Note: Many required disaster commodities are provided through private sector entities – either through purchase or donation.)	• Commodities donated by the private sector will be managed in accordance with the Michigan Disaster Logistics / Donations Management Plan – a support plan to the MEMP.

(Table continued on next page.)

BB. NATIONAL RESPONSE FRAMEWORK SUPPORT ELEMENTS FOR LOGISTICS / DONATIONS MANAGEMENT, AND CORRESPONDING STATE PLANNING AND OPERATIONAL CONSIDERATIONS*

(Table continued from previous page.)

NRF Annex	Logistics / Donations Management Assistance Provided	State Logistics / Donations Management Considerations
Catastrophic Incident (November 2008)	• Provides for the pre-identification and rapid deployment of key essential resources (i.e., commodities) that may be needed to save lives, protect property and critical infrastructure, contain the incident, and protect national security – organized into incident-specific "packages." • Federal resources identified in this Annex automatically deploy unless it is credibly established that the resources are not required based on incident assessments.	• Articulate anticipated / confirmed resource (commodity) needs and capability shortfalls to FEMA as soon as possible after the incident occurs (or prior to incident occurrence if circumstances allow). • Cost-sharing may be required for federal assets requested by the State. (Federal assets unilaterally deployed in accordance with the NRF Catastrophic Incident Annex do not require a state cost-share.) • If possible, determine the acceptable level of state cost-share for the incident (based on budget constraints, political realities, and social expectations) and factor that into all applicable facets of logistics / donations management decision making. • Continuously collect and share incident-related information to facilitate effective operations and to ensure proper resource (commodity) deployment.
Volunteer and Donations Management (May 2013)	• Provides support to states in the management of masses of unaffiliated volunteers and unsolicited donated goods before, during, and after an incident. • Provides a system to manage and coordinate offers of unaffiliated volunteer services and unsolicited donated goods from the private sector to the federal government, for use by state and/or local governments. • As appropriate, activates a headquarters-level Volunteer / Donations Coordination Team to expedite service provided to donors from large private sector entities, large civic organizations, and others, and to address large national media-driven collection drives. • As requested, activates a national donations and volunteer management web-based application to enable the general public to register offers of donated goods and/or services. • Facilitates management of warehouse and volunteer reception center capabilities. • Provides communications support such as coordination of a national hotline and/or call center.	• Coordinate with the MIVOAD, Citizen Corps Councils, the ARC and other appropriate NGOs to encourage participation in preparedness activities for logistics / donations management, including but not limited to planning, training, exercising, and development of operational support agreements. • As early as possible and in coordination with NGO and other involved partners, issue public information releases (using all appropriate dissemination means) specifically articulating state donations preferences and discouraging the donation of non-value-added items and the spontaneous arrival of unaffiliated, non-registered volunteers at the disaster area. • Establish a structure to receive, task, and employ the full range of goods and services that may be donated during an incident. • Ensure maximum use of value-added donated goods and services and NGO-provided goods and services at the local and state levels before seeking assistance from the federal government. • Identify and coordinate the establishment of state and local facilities to support the logistics / donations management operation (based on incident circumstances). • Work with the MDHS / MCSC to fully utilize the Volunteer Michigan web site and network of local Volunteer Centers to register unaffiliated volunteers and advertise opportunities for volunteer service in the disaster logistics / donations management operation and/or other incident response and recovery functions. • Work with the MDCH to fully utilize the Michigan Voluntary Registry web site to register unaffiliated volunteers for volunteer service in the disaster logistics / donations management operation and/or other incident response and recovery functions, and to recruit vetted volunteers in specific occupations and/or with specific skill sets for targeted placement.

*For details, refer to the full-text version of each Annex on the FEMA National Response Framework web site: http://www.fema.gov/national-response-framework

State Emergency Management Coordinators:

In response to the Flint water contamination, the SEOC is requesting all state agencies compile a list of available assets near the Flint area which could be called upon during response to this incident. For example, if an agency has a vacant building in the area that could be used to stage donated resources, this information should be shared with the SEOC.

Please complete the attached spreadsheet, and submit to the **POSITION at EMAIL by DATE/TIME.**

If you have any questions or concerns with this request, please contact ***POSITION* at PHONE/EMAIL.**

Thank you,
SEOC

Objectives

Activate the State Recovery Task Force
Ensure coordination between the City of Flint, Genesee County, state and federal agencies, and appropriate medical experts.
Obtain and maintain situational awareness and common operating picture of all activities.
Establish operational period and hours of operations.
Investigate and identify all available programs for assistance with direct or related impacts, including the federal Lead Pipe Replacement Program.
Develop a comprehensive GIS strategy
Identify critical resources for acquisition and allocation.
Coordinate response and recovery activities with MIVOAD and identify potential mission areas.
Facilitate and coordinate technical assistance among state agencies and to local agencies.
Provide technical assistance to the local Damage Assessment process.
Establish a Joint Information Center and develop a public information strategy.
Monitor MI CIMS for resource requests and address as appropriate.
Establish and disseminate cost center information for the incident.

Command Emphasis

Provide regular local and technical briefings.
Identify life safety issues.
Identify priorities.
Provide policy direction by observance of SEOC SOPs.
Seek technical guidance from relevant federal agencies.
Provide regular legislative/congressional briefings.

Author: msp-secogis2@michigan.gov, (A111)
Created: 11:50 AM, 07 Jan 16

Mike Sobocinski's notes from the SEOC briefing of January 6, 2015:

Capt. Kelenske: This activation is different from many. Overall goals will include assessing the situation, prioritizing actions, and coordinating between agencies, identifying life-safety issues. SEOC activation hours are currently 8a-5p Mon-Fri. MI CIMS event titled 2015-10-1-City of Flint water contamination/shortage. Maintain activity logs in MI CIMS. Battle order set up for today: IC objectives meeting 10am, assign work tasks 11am IC + general staff, 2pm planning meeting, IAP approved 3pm, Unified command initial meeting 4pm. Governor declared state of emergency. Presidential disaster declaration will not apply here, but an emergency is possible to supplement state efforts. Lead pipe replacement program to be checked into – perhaps by Jen [Boyer?] of MDEQ. GIS mapping to cover filter distribution, home locations, distribution/testing gaps, etc. Nutrition distribution program [correct title?]. More of a long-term recovery style of approach. Goal to restore trust in state government. JIC will be set up.

Dr. Wells (DHHS chief medical executive): Pb as neurotoxin, affecting every system in the body, lowering Fe and Ca. Especially problematic in developing children under age 6, esp if not getting enough Ca, Fe. Standards have become increasingly strict over time, with Pb levels formerly 10ug/dl to warrant action, then lowered to 5ug/dl, and today Pb is treated as having no safe exposure level.

[NOTE: she is referring to blood concentration levels of micrograms per deciliter, not to be confused with water concentrations referred to elsewhere in units of micrograms per liter: ug/l. I'm using u to represent the greek letter mu, symbol for the "micro" prefix]

Health problems from lead include gastric problems, ulcers, anemia, etc. including death. Cognitive & developmental delays, attention & behavioral disorders. Pb sources include gasoline and paint (until the 1970s), pipes (esp. pre-1978 home construction), ammunition and firearms, soils & industrial sites, air pollution (especially in summertime). CLPP "clip" Childhood Lead Prevention Program. Screenings at age 1, age 2. Those who test >5ug/dl (national standard) are evaluated for environmental exposures/causes. Critical action level 45ug/dl – immediate medical treatment, chelation treatment to remove Pb, and investigation of Pb sources in environment. Water concentration does vary seasonally, with temperature and Ph changes. Old cities are targeted areas for higher risk. Virginia Tech independent testing of water. [From her limited description, I was unclear in the end of the relationship between these results and other tests.] Elevated Pb levels generally declining, including in Flint, until 3rd quarter of 2014 [fiscal quarter or calendar year???]. Hurley Medical Center deals with the high-risk area in Flint. American Journal of Public Health issue of 2 weeks ago had study published on this topic. Water is not the only source of Pb in the area. An increase was measured in 2 Flint zip codes [485]03 and [485]04 although it didn't reach statistical significance. Need to pin down high-risk areas – Pb levels can and do drop when environmental exposure is reduced. Testing since Oct. 1 [2015], to Dec. 18 [period for specific results, assuming testing still continues after Dec. 18?]. Improper water filter use, or non-use (e.g. after Detroit water restored in Flint), has caused problems. Pb has half-life of less than 30 days. Department [hers or in the city of Flint?] surveillance results: 23 children under 6, 7 children age 6+, 13 adults who had blood levels above 5ug/dl. 12 elevated Pb blood level investigations; now including water testing, but Pb in dust, paint, and soil was also found. 1 hospitalized (level in the high

30s of ug/dl). HUD-funded program at the state level [name?] Coordination with Wayne State University and Flint campus of [she had said MSU, but it is likely that it is instead U-M Flint]. Misinformation exists re: questions like whether it's okay to shower or bathe in the water [she provided no answer for her own example – is it okay?]. Much local support exists. Info sent through schools with the children who attend them. SNAF, WIF [double check?] nutritional programs for young children. Would like to test as many young children (under 6) as possible in the city. See MI.gov or Flint Water for information about filters – Home Depot as a partner. MDEQ includes blood Pb level in their testing reports.

Question asked: Are there other substances of concern besides Pb in water? A: yes, bacteria, Cu (esp. for those with Wilson's disease), and "other chemicals." [MDEQ person later fills in a couple of these: total trihalomethanes TTHM and halo-acetic acids HAA5, which both fall under the category of disinfectant by-products DBPs]

George Christian [correct spelling?] of the MDEQ (Flint action plan coordinator): Flint had used the Flint River as a source before 1967, in 1967 switched to use of Detroit Water and Sewer Department DWSD for its water supply. Jan 2006 discussions began with Karegnondi Water Authority KWA. April 17, 2014 [event? Possibly the end of DWSD supply?]. May 2014 city began using Flint River water. Aug-Sept Boil water notices issued in part of the city of Flint, for E. coli and total coliform violations. [NOTE: spoke too quickly for me to accurately catch all of the dates/events he mentioned. People really should provide their info in writing rather than rely upon verbal briefs under distracting SEOC conditions!] Had the Flint River as a back-up supply all along, which is why the facility there was still maintained [paraphrase; didn't catch exact wording]. Late 2014-early 2015 DBPs: HAA5 and TTHM, with carbon as a treatment to remove these compounds. Sequence of tests: first at 6ppb 90th percentile level [he didn't explain this well at all, but normally this would mean that the 90th percentile value is at or above the bottom 90% out of all ranked values in a list]. 2nd round of tests: up to 11ppb, compared to EPA's action level of 15ppb. Corrosion control treatment [a means of reducing lead concentrations in the water]. There were also issues reported involving the color, odor, and taste of Flint water. Virginia Tech Pb testing Sept 5 [?], 2015, with Pb advisory issued by Flint. Fall 2015 schools testing and actions required. Some fixtures and fountains above 100ppb. 4 samples per sampling point, after different flush times, 10 consecutive 1liter samples, 200-300 samples total per facility [math not exact; must be estimates], Info placed into spreadsheets and reports. Oct. 15 Flint switched back to DWSD water. Dec. 9, 2015 supplemental phosphate [PO?] addition began. Use of erosion controls do slow but do not stop the leaching process (of lead into the water). Any resident of Flint can obtain a bottle and take water samples in for testing; results posted online. Water filters are available for free. Overall slight downward Pb trend, but some values are well over 100ppb. One child care facility measured at 2500ppb. No historical test results there [in schools?] to compare with, but some historical data exists elsewhere to compare. [No mention of the comparisons themselves!] Not a problem only of Flint's, increasing recognition of problem more broadly. "Low-lead brass fixtures" could still have as much as 8% lead. [not sure whether he said this or Dr. Wells]

Dr. Wells: Excavation and manipulation of lead lines tends to exacerbate particulate levels.\

Capt. K: Everyone review the MEMP to look for relevant information. All info to go out through PIOs (except for internal coordination and calculations).

Richard [Thelen?] of DHHS: allocation to buy water and filters, 2 pick-up locations in Genesee – free filters [locations not specified, are they at DHHS offices?]. Water purchases from South Carolina.

Brad [Deacon?] of MDARD: Food services, processing, and restaurants are also of interest. Lead affects animals as it does humans, so companion animals may be affected.

??? of the Dept of Education? "DEA" or "DoA"? [people were not introduced properly!] said something about school meals.

ARC not yet involved at this point.

LARA helped DEQ with testing. Flint & Genesee oversee their won plumbing but lack inspectors – need assist from state (Capt: or through EMAC use)

Terrace Room to be used as initial JIC, with PIOs there.

Governor's Representative [name?]: pending lawsuit against governor, potential lawsuit under Safe Drinking Water Act. Everyone do your jobs, but take care, remembering litigation potential.

MDOT [Eileen Phifer?]: Many pipes are under roads and so coordination would be good; shared objectives probably exist w MDOT, EPA, etc.

Lt. BJ Roach, MSP: Genesee Co. Public Health Dept, GCARP [??] (public assistance forum) are involved: water distribution, filter distribution, education, Pb testing clinics (coordinated with DHHS), United Way, Flint Health Dept. Over 23K filters and replacement cartridges provided so far. County GIS getting under way – coord w MSP GIS?

Capt K: submit action items to Tom Weber for IAP. Everyone stay until noon and review MEMP, then to decide whether needed after lunch today.

Tony: Required agencies already known to be needed to stay: MDEQ, DHHS, Education, Talent & Economic Growth, MDTMB, MDARD.

ASSIGNMENT LIST (ICS 204)

1. Incident Name:	2. Operational Period:		3. Branch: Recovery Division: Group: Staging Area:
Recovery Branch (Obj. 1)-2015-10-01-City of Flint-Water Contamination/Shortage Objective: 1. Ensure all households within impacted community have required resources and are included in DEQ water sampling plan.	Date From: 02/23/2016 Time From:08:00:00	Date To: 03/01/2016 Time To: 08:00:00	

4. Operations Personnel:	Name	Contact Number(s)
Operations Section Chief:	Rotating Daily	
Branch Director:	Brianna Briggs	
Division/Group Supervisor	Carly Georgopoulos	

5. Resources Assigned:		# of Persons	Contact (e.g., phone, pager, radio, frequency, etc.)	Reporting Location, Special Equipment and Supplies, Remarks, Notes, Information
Resource Identifier	Leader			
ARC POC	Christina Curtis	1		
ARC POC #2	Daniel Wirth	1		

6. Work Assignments:

Critical Task: Support ongoing distribution efforts.

Tactics:
1. Verify with Logistics that there are enough supplies to support the PODS and Water Response Teams.
2. Coordinate with GIS on development of target area maps as needed.
3. Update Water Response Team Plan daily for distribution to key personnel.
4. Compile daily the distribution numbers from Water Response Teams and daily Recovery Branch accomplishments. Provide to Operations Section Chief and Planning Section Chief by 6 pm.
5. Demobilize resources as Water Resource Team sizes reduce.
6. Finalize FWRT transition to rapid response mission upon completion of targeted area mission.
7. Develop and implement a strategy for the recovery branch following FWRT transition to local EOC.

7. Special Instructions:

Any safety information, report in requirements, information to share/not to share, etc.

A Flint Water Response Team consists of personnel, transportation, mobile device, identified team leader with contact information, resource package (from warehouse).

All volunteers will be coordinated by the American Red Cross through the Volunteer Reception Center (VRC). Local EOC contact will coordinate with the VRC to fulfill missions.

The number of teams will vary from day to day for deployment during this operations period.

8. Communications (radio and/or phone contact numbers needed for this assignment):

Name/Function		Primary Contact: indicate cell, pager, or radio (frequency/system/channel)
Dave Gutierrez	/Red Cross	
	/	
	/	
	/	

9. Prepared by: Name: Carly Georgopoulos | Position/Title: Recovery Branch/Director | Date/Time: 02/15/2016 15:00:00

Position	Name	Phone	Date/Time	Comment	Details
SEOC OPS Recovery Branch Director	Renee Tober	517-333-5030	02/08/2016 10:26:16	A recommendation was provided by email to SEOCOPSC to evaluate the need for the canvassing teams. If we continue canvassing efforts, Recovery Unit staff recommends possibly assisting with 211 calls and servicing the access and functional needs population. Recovery staff is working to compile a full list of these. It may be possible to reduce the number of ARC teams to five (or fewer).	Update
SEOC OPS Recovery Branch Director	Renee Tober	517-333-5030	02/01/2016 12:39:10	Staff continues to compile daily distribution numbers from Water Response Teams and provide updates to Operations Chief and Planning Chief. Recovery Unit continues to deliver nightly bullet reports on team accomplishments to Planning Section by 6 pm	Update
SEOC OPS Recovery Branch Director	Renee Tober	517-333-5030	02/01/2016 11:32:55	Coordinating with water response teams to follow up with houses, Franchise Customers and Apartment Complexes. Demobilizing resources as the number of teams have reduced. Act upon any new requests for resources.	Update
SEOC OPS Recovery Branch Director	Renee Tober	517-333-5030	02/01/2016 11:30:54	Staff continues to coordinate with the GIS Unit on development of target area maps such as Franchise customers, and Team Assignment Areas.	Update
SEOC OPS Recovery Branch Director	Renee Tober	517-333-5030	02/01/2016 11:25:35	Recovery staff has been attending daily Distribution Process Meetings to continue coordination and verification of supplies needed to support the PODs and the Water Response Teams.	Update
SEOC OPS Recovery Branch Director	Stacy Theis	517-336-2694	01/25/2016 13:17:36	Coordinating with water response teams to follow up with houses. Demobilizing resources as the number of teams have reduced. Act upon any new requests for resources.	Update
SEOC OPS Recovery Branch Director	Brianna Briggs	517-230-2949	01/12/2016 10:57:24	Hours of operation for the teams has been established and will remain 8:30 a.m. to 5 p.m. Local GIS has provided IPads and software for tracking distribution in the field. A tracking sheet has been developed and printed for use in the field if software issues occur. Training was developed and conducted for the teams currently scheduled to be in the field Tuesday through Friday. MSP is currently developing a strategy for canvassing of the entire affected area. Teams were deployed into the field as of 1000 Tuesday, Jan 15. Weather conditions and media avail at GCCARD prevented start time at 0830. MSP continues to monitor any safety and security concerns for the teams. EMHSD staff delivered the four vehicles being used for canvassing to the GCCARD facility on Monday, Jan 11. All related requests are currently being worked on and monitored by Recovery Branch staff. Additional requests are being considered in order to expand operations of the teams in the field. Training was conducted for the current teams. Daily deployment briefings will be conducted. The first briefing occurred Tuesday, Jan 12.	Update

EXECUTIVE SUMMARY

11:38 a.m. MSP Operations received NRC Report# 1139847 reporting a spill into the Flint River that occurred July 1, 2015. This information was forwarded the EMHSD Duty Officer Tonya Nobach and EMHSD 3rd District Coordinator Lt. B.J. Roach.
****Mardella Horhn - SEOC OPS Public Safety MSP - HorhnM@michigan.gov at 12:20:29 on 2/5/2016****

11:17 a.m. - Brent Travelbee from DOC called Operations to request a trooper to respond to the Clio Road Warehouse to take an accident report for one of his drivers. Genesee County Dispatch was contacted at 11:28 to dispatch a trooper for the report.
****Mardella Horhn - SEOC OPS Public Safety MSP - HorhnM@michigan.gov at 12:15:54 on 2/5/2016****

Request received from SEOCLGC to find out Customs procedure for Canadian carrier company interested in arranging efforts to have truckloads of water brought across the border. These shipments require an importer of record and must be entered through US Customs and FDA. Spoke with officer at CBP and sent an email that will be forwarded through their chain of command. Will contact us with an answer.

EXECUTIVE SUMMARY

MSP and GCSD supported National Guard staffed teams that were out today and there were 40 Red Cross teams. 6652 homes were visited today.

Contact was made with Tpr. John Looney at 6:54 a.m. from the MSP Lansing Post to arrange transport of 30 additional IPAD's, Credentials and IPAD chargers from the SEOC to the Flint EOC. Tpr. Looney picked up the 30 IPAD's, Credentials and IPAD car chargers at 7:30 a.m. from the SEOC for transport to the Flint EOC. These items were delivered at 8:20 a.m. by Tpr. Looney to the local EOC for the WRT's who were deploying at 9:00 a.m.

The cyber trained personnel from MING who were called upon to support Michigan State Police, Michigan Cyber Command Center at the MC3 located on the 3rd Floor of State Police Headquarters reported to Headquarters on 1/22/16. Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY

MSP and GCSD supported National Guard staffed teams that were out today and there were 15 Red Cross teams. 6257 homes were visited today.

The MSP/National Guard teams are not currently tooled to conduct on-demand services and are singularly focused on reaching all areas of the City of Flint with our Water Response Team assets for phase 2 operations by Sunday, January 24th.

Further, we are not currently equipped to take in volunteers to work on our teams. All volunteers should be directed to the American Red Cross.

MSP SEOC received approval for MING to provide cyber trained personnel to support Michigan State Police, Michigan Cyber Command Center at the MC3 located on the 3rd Floor of State Police Headquarters beginning on 1/22/16 for 30 days with possibility of extension, or until mission complete. Mission is to coordinate, advise, and assist with cyber defense efforts related to the Flint water crisis. The MING personnel reported to MC3 today (1-22-16).

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY
Teams have been distributing water all day. 3226 homes have been visited today. 4 Gas cards provided by DTMB for rental vehicles being used in Water Response Teams. The cards are being delivered to F/Lt. Kish or Lt. Dehner by DEQ. Worked with DTMB to restore iPads as they went down due to a software issue. This was being resolved by DTMB. DTMB provided credit card information for the Survey Monkey tool so reports could be collected with all pertinent information. Instructions were drafted for IOD personnel to access Survey Monkey and obtain volunteer information. ICS 208 created for 1/16/16-1/9/16 to include updated weather information provided by the National Weather Service. We worked with the American Red Cross regarding the logistics for the Water Response Teams and distribution of water, filters, and test kits. The plan was discussed with the Local Water Response Team commander at 1700 and the operational plan was distributed to the commander at that time. The plan will be implemented over the weekend to try to streamline the actions of the Water Response Teams. We have 70 state of Michigan employee volunteers scheduled for Saturday.

Services to the Aging (OSA)

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

Back | Archive | Create PDF

EXECUTIVE SUMMARY

Valley Area Agency on Aging (VAAA) continues to receive phone calls from concerned seniors in Flint and continues to make referrals to the Genesee Co. EOC for water and filter follow-up.

VAAA's local Nursing Home Ombudsman continues to monitor Flint area Nursing Homes to ensure residents have access to safe water.

Contact info for VAAA Executive Director is:
Kathryn C. Boles
President, CEO
Valley Area Agency on Aging
225 E. Fifth Street, Suite 200
Flint, MI 48502
(810) 239-7671
(810) 239-8869 fax

AGENCY INCIDENT OBJECTIVES

Current Operational Period

List 3 Major Objectives

Continue to support VAAA as a resource for seniors and their caregivers living in Flint needing access to water and filters.

Continue to encourage VAAA to track and document disaster response related costs.

Upcoming Operational Period

Services to the Aging (OSA)

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

EXECUTIVE SUMMARY

Valley Area Agency on Aging (VAAA) continues to take calls from seniors and caregivers needing access to water and filters. VAAA is providing this information to the local EOC each afternoon for follow-up.

As of Friday, January 15th, VAAA and MDHHS-Adult Protective Services (APS) has provided AASA with over 2,000 addresses of homebound, frail, or otherwise at-risk seniors living in Flint. AASA has in turn forward these addresses to MSP-GIS to overlay their heat map and for local follow-up.

VAAA's local Nursing Home Ombudsman continues to monitor Flint area Nursing Homes to ensure residents have access to safe water.

Contact info for VAAA Executive Director is:
Kathryn C. Boles
President, CEO
Valley Area Agency on Aging
225 E. Fifth Street, Suite 200
Flint, MI 48502
(810) 239-7671
(810) 239-8869 fax

Prior to the State Declaration of Emergency, Valley Area Agency on Aging - Region 5 (VAAA), in partnership with other local community agencies such as the GCARD, Genesee County Health Department and MDHHS, participated in the local ad-hoc response by helping organize local meetings and distributed water and water filters to VAAA Home Delivered Meal recipients. VAAA was also an I&A access point for receiving calls from homebound seniors who are not able to pick up water filters or needed assistance installing water filters. VAAA referred seniors needing filters to GCARD for follow-up. Because VAAA is a known and trusted local resource for older adults in Genesee County, they continues to receive calls from seniors needing access to water and filters.

AGENCY INCIDENT OBJECTIVES

Current Operational Period

List 3 Major Objectives

Check on VAAA's progress working with the Genesee Senior Millage CM provider to pull addresses for their homebound clients.

Check on VAAA's disaster response costs.

Subject: URGENT - SEOC Activation

On January 4, 2016, Genesee County requested that a "State of Emergency/Disaster" be issued by Governor Snyder. Today, the Governor issued a State of Emergency declaration. EMHSD will **activate the SEOC tomorrow at 0800** and will conduct a briefing at 0900 on the event. All state agencies will be represented. I ask that only those personnel requested to play SEOC roles and section managers attend the 0900 briefing due to space constraints. The initial focus of the SEOC will be to:

- Identify and implement any needed protective actions to protect public health and safety;
- Develop situational awareness;
- Develop understanding of technical aspects;
- Coordinate damage assessment;
- Coordinate public information; and
- Identify programs to assist in remediating damage.

If you have any questions, please let me know.

Hi Carly,
I'm sure it will be fine, I don't have the schedule in front of me but I believe either Bridget or I are there correct?

Importance: High

I spoke with Charlene just a bit ago (thank you Charlene!). She is going to reach out to the local Adventist leadership today, as well as reaching out to the FEMA VAL (Regina). I want to highlight some points to address from the conversation. Charlene, please feel free to correct any errors or misinterpretations!

- Obviously, the Adventists will need to be asked to assist, formally, and some sort of MOU will be needed or confirmed if it comes through an existing relationship (e.g.: FEMA)
- Their focus is truly donations management. They are not merely a warehouse staffing source, but that is part of the overall picture and scope for their organization to address. In order to assist, Charlene is asking for the *specifics on the warehousing and who she can speak with that could answer some questions* (I am not part of that level of detail). Brianna or Tom, who would she speak with for the details of the big picture (warehouses, donations, etc.)?
- Moreover, at what point would she and the Adventists engage as part of this support, should a formal ask is made?
- Charlene can be contacted at: 661-477-3202

I hope this helps!

Chad

Hi Charlene,

We're looking forward to discussing options with you! I've copied Chad Veeser who also works with volunteers, and Brianna Briggs, who's working with me on long term recovery planning. I'm going to be out much of today, but Chad was going to give you a call to discuss warehousing assistance, particularly with an old Kroger store we just signed a lease on. I believe it's about 75k square feet.

Please let me know if you need anything from me. Thanks!

Hi Charlene,

Jeannie was able to give me your email address to get a discussion going on warehousing support for the Flint water crisis. I'm the State VAL, and we're definitely open to support on the warehousing end of things! A few of the items that are on our list of questions would include:

- Potential commitment to warehouse management for an overflow space
- Length of potential commitment (Suggest, one year?)
- Requirements if committed: Only palletized parcels, or willingness to sort and palletize?
- Capacity of local volunteers and potential managers
- Plan/requirements for on-site training of a local team
- If only staffing option is to bring in a trained team from outside the area, what are the requirements (ie. volunteer housing)?
- Equipment needs/requirements

Again, thanks so much for your interest. I look forward to speaking with you very soon!

Wendy,

Great job at getting the warehouse secured!! Whoo hoo!!`

Chad and I will check to see if there is an option for the Adventist to assist with staffing - I am not so sure they will do the entire component. I am thinking we may want to have another option. Is it possible to do what we are doing at the Clio Warehouse - with prison release time? Do we have the option of having another Bonnie? (she is amazing) I am thinking it may be able to be stood up quicker if it is staffed by people who are paid/provided release time.

Another question:
If this warehouse is going to serve as a distribution center, will there be an option to have National Guard members there to assist with the distribution of products and maintain safety?

Jeanette! It's been approved by the Governor's office. Can you work first thing with the Maureen to secure the lease? We will want month-to-month, full access to the entire building, as well as the parking lot. Also, Ramsey mentioned we could have use of the forklifts and pallet jacks. Another thing, we will need 99% of the shelving removed. I think the coolers can stay, but probably not the freezers.

Thanks so much Jeanette! This is so exciting!!!

Chad, if you could please proceed with getting the Adventists to staff it?

Just an FYI for everyone else.

Subject: FW: Flint-Kroger site

Lt. DeCastro, See below. Can you please reach out to them for the keys? Also, we are not interested in the lighted sign at this point. Maybe further down the road if we open it as a POD.

ALL:

I'm working with DOC for work crews until we can get the Adventists confirmed to assist. Bonnie has agreed to assist with managing the warehouse in the short-term with her and the other managers that have been assisting her. Thanks Bonnie ☺

I have requested FEMA to provide technical assistance.

My hopes is to go operational on Saturday if we can get equipment and staffing in place, since weekends seem to be our busiest for loose donations. We have not decided hours yet, so I'd be happy to take suggestions. I'm thinking overlapping with the Food Bank on hours a bit would benefit us both.

Thanks

Jeanette,

Just spoke with the Landlord, he will make two (2) keys, in the meantime you can go to a place in the plaza named Wigland and speak with a person named Sunshine (not kidding), who has a key to the store and knows where the lights are located and or the electrical boxes to operate the building.

He also asked me to have you call Consumers Energy to change the account (there are 3 meters in the building). Please call Joy Wicklebach or Winklebach at 800-805-0490 and ask her to switch 2629 W. Pierson Road power to the State of Michigan.

Also ask them to activate the lighted sign out front if you want to have a sign put up announcing your location. That is separately metered also and costs $22.00 per month.

I think that's all, I let him know to keep three banks of shelving instead of one.

Maureen

Subject: Fw: NCCC - Question

Hello everyone,
Just an FYI - there is a team of NCCC AmeriCorps members who just arrived. Their focus will be with the health department. (see below email) If they begin to do other tasks, I will let you know. I do not anticipate they will do anything that you will need to support, but I will keep you posted.

Brianna and BJ,
I know the planning for the future of the water distributions is happening this week. We may want to consider getting some help from AmeriCorps members. We were able to leverage this resource when we were in Detroit. Chad supported over 17 teams on the ground. NCCC teams do not cost the community anything - they just need to find them housing. They come with a van and a team lead. In Detroit - MCSC served as the host and wrote the application for them. The team that just arrived was requested by United Way.

I was thinking this may be a great resource for community groups who will serve as the Hubs for water delivery. We could see if there would be an option for a team to be placed in flint and then members could be at the different water distribution sites to assist with the coordination of deliveries and volunteers. I also have an AC grant that I have been holding off on closing out - not sure if we could figure a way to use it here - but still trying to consider opportunities that will give the Flint community resources that I can leverage.

We can discuss it tomorrow.

Ginna Holmes

Cc: Rachel Wenzlick
Subject: RE: NCCC - Question

Chad,
I can give you an overview of the team's activities, and if you want more specifics, let me know exactly what you were hoping to learn and I'll share that too!

The team arrives Sunday, January 31, and they have a week of orientation February 1-5. Then they will dive into their service the next week. They are going to be working with the Genesee County Health Department on three primary outreach strategies: 1-1 consultation door-to-door to share resources, lead clinics and other events to reach community members, and train-the-trainer to empower other community groups. The team's efforts will focus on nutrition, wrap-around services, and other ways to mitigate lead exposure and focus on long-term health.

Does that help?
JM

Hi Ray,

Thanks for the email. We have shared your contact info with the MSP logistics team who is planning for the long-term recovery solutions in Flint. They will be in contact soon and are best equipped to determine how we could possibly integrate UPS into the long-term plan. If you need anything else or have questions after speaking with them, please call me anytime at [redacted]

Thank you and we look forward to working with you.

John, Tori and Harvey,

Sorry for the slow response to yesterday's email as I have been travelling and in a big Corporate meeting for the next few days.
I am confident that UPS can help with these needs.
If you could get me the contact person for the water filter cartridge delivery process initiative, I will help connect that person with the operations team in Michigan and Flint and assist with the facilitation of the planning and implementation process.
I will reach out to Tori and Harvey at first opportunity.
What are the best numbers to reach each of you at.
My contact info is found below. Please feel free to reach out to me at any time.

Thanks, Ray

Subject: Follow Up - Request for Assistance

Ray,

I appreciate speaking with you Thursday and appreciate your patience as we worked on the details related to Flint. The first issue for which we request assistance from UPS is as follows: Can UPS work with the Michigan State Police to assist in delivery of water filters to those individuals in Flint, because of age, disability or other challenges, are unable to physically visit the various resource centers throughout the City? The water filters (depending on the size of the family) need to be replaced anywhere from 1 to 3 months, so there will be an ongoing need for filters to be available and delivered. Our hope is that these deliveries can be incorporated in UPS' daily scheduled deliveries in Flint. If you can identify a contact for further information, I will connect them with a person who can provide additional detail and with which direct arrangements could be made.

In addition, I confirmed to you our understanding that Linden Nelson worked with Aquahydrate of Los Angeles, California to arrange for the donation of 5,000 cases of water to be shipped to Flint once a month for the next year. Here is some additional information on the filtration system: http://www.michigan.gov/documents/deq/2015-10-21_-_Lead_-_Flint_Water_FINAL_504265_7.pdf

The attached press release that was issued on October 8th, also provides some additional background information for your reference.

On behalf of Governor Snyder, the administration, and Flint, I thank you for your consideration. To assure direct communications are maintained for the greatest efficiency possible, I have included both Harvey Hollins and Tori Sachs on this email, as they are charged with coordinating ongoing efforts and connecting people who want to help, like UPS, with the right people to facilitate the delivery of that help.

John

Brianna –

My director, Kelly Rose, told me I could contact you regarding the Flint Water response for our Housing Choice Voucher Program.

We are attempting to determine the geographical boundaries of the Flint Water system. I can see that the zip codes for the city name "Flint" expand outside of the geographical city limits of Flint itself. What I cannot tell is which addresses to include from our program as impacted by this issue.

Do you have access to this information? Can you provide me information that will allow me to determine the number of individuals on our rental assistance program that are within the Flint Water system limits?

We are building a program response to this issue and we need this information to proceed.

Thank you!

Subject: Potential Assistance Programs

State Emergency Management Coordinator:

As discussed in this morning's briefing, your agency has been identified to research potential assistance programs (private, state, federal, etc.) that may be available to address the short- and long-term recovery needs in response to the Flint water incident. Earl Zuelke, FEMA Long-Term Recovery, has made contact with some federal agencies to assist with this research. Feel free to touch base with him in the SEOC.

Attached is a copy of the Non-Stafford Act Recovery Guide. Appendix 2 (pg. 24-26) provides a list of some potential federal programs. This list is **not** all-encompassing; however, it will provide a starting point if any of these programs may apply to the response and recovery for this incident.

Provide the following information, *at a minimum*, on potential assistance programs for individuals and/or government support in response to this incident:

- Program Name
- Agency Responsible for program
- Point of Contact
- Type of Support (Individual or Government)
- Eligibility Guidelines
- Benefits Available
- Application Process

This information shall be submitted to Brianna Briggs, the Recovery Branch Chief, at briggsb3@michigan.gov by **COB Friday, January 15.**

Let Brianna (cell phone below) know if you have any questions on this request.

Thank you,

Brianna Briggs
Recovery Branch Director

Sandi,
I have received information regarding lunch and breaks.
It is our understanding that staff will be in the field as a team, and preferably break for lunch as a team. Staff will be responsible for obtaining their own lunch which will be reimbursable through the Mi Time and Expense web portal.
It will be good to remind staff of the challenging weather and to make sure they are prepared for such.

Subject: MSP Water Distribution Operation - AAR

I'm sure after action reports are probably being done within the SEOC, but for what it is worth, a quick snapshot of today's day one operations may be beneficial for the higher planning to put more boots on the ground in Flint in the coming days, so here it goes:

Mission:
4 teams (40 DHHS employees), supported by 4 marked MSP, and 4 marked Sheriff units, and (2) 24' UHaul trucks, conducted water filter delivery operations within the 43rd precinct, beginning at apx 1030 HRS, and ending at 1700 HRS today. The target for today was 150 houses, however final data was not available at the time of publish.

Recommend to Sustain on 1-13-16:
-- Continued use of UHaul type trucks. They are low to the ground, easy to load and more important, to off-load. Easily maneuvered on city streets, especially given poor road conditions, and parked/disabled vehicles on city side streets. DTMB trucks are at a height that makes accessing cargo difficult, and puts volunteers at risk of injury clearing the 5' high box entry.

--iPads and in car mobile terminals. (8) iPads supplied by the City and used by DHHS, made real time data uploads possible and gave a more accurate depiction of ground operations. The ability to push GIS mapping material to troopers vehicles via email facilitated their abilities to make on the ground changes with routes, without having to coordinate through the EOC directly.

--Coordinated efforts with Deputies. A GCSO Lt and Captain on the ground and in the EOC were integral in helping us quickly put together a delivery system that was efficient, and allowed us to skip past obstacles they had already encountered in their previous day's work. In addition, it was GCSO that secured the UHaul trucks for us to use.

--Maintaining a large, central distribution point. This makes it easy to get trucks, vehicles, and supplies in and out very quickly.

As a side note, the delivery model used today was 1 UHaul truck, 20 DHHS personnel, and (2) marked police units per street, and we covered 2 streets at a time. DHHS doubled up going door to door (this was an internal decision made by them). If we were using only law enforcement, we could reduce this number to 10 volunteers per truck, but lower than that would slow down progress, more than 20 would just result in people getting in each other's way, and would make transporting them difficult, not to mention clogging up the street with transport vehicles (which happened today). We used the Sheriff's bus to move volunteers instead of their SUVs because the number of vehicles ended up creating congestion issues on the streets we were delivering on.

Recommend to consider changing on 1-13-16:

--Use of DTMB box trucks (see above). Securing more UHaul type trucks would speed up loading and off-loading.

--We can sustain meals from the EOC for the 60 personnel involved today. More than that is going to require an outside source.

--Using less vehicles to transport volunteers. We used the GCSO bus today, and can continue that until Sunday, however a central transportation unit seems to work best at this point, not individual SUVs for each 4 person team.

Subject: Update from ArcGIS Online for Field Teams

Hello Sir,

Today the app implementation went extremely well. There were a few issues that were quickly addressed. One related to how form fields should be filled out. Another was getting styluses for teams so that they don't have to remove their gloves in the cold. All very simple to fixes. All told there were 394 total home visits with the following breakdowns:

152 Vacant Homes
217 Door Hangers
117 Water Distributions
112 Filters
3 Pitchers
48 Water Test Kits

That said, we should be able to greatly optimize distribution in the near future as we mapped the active water subscribers from Flint's DPW and are adding them to the field team members apps. Of the ~56,000 possible addresses, this reduces the number of possible homes to visit down to ~29,000.

We are working to create a "version 2.0" of the app to allow it to be used in the PODS as well. That way all distributions can be visualized in near-real-time. The discussed implementation for the PODS component is Thursday. Right now ESRI (mapping vendor) agreed to have 100 users in the system (up from 20). They appear very supportive to provide any technical assistance we may need to push this initiative along.

Sent: Tuesday, January 12, 2016 4:39 PM
To: Briggs, Brianna (MSP)
Subject: Revised: Volunteers needed for water resource teams in Flint

Note: Dates are January 14 and January 15.

The department is soliciting volunteers from within the department, both enlisted and civilian, to join water resource teams working to hand out bottled water, water filters, replacement cartridges, and water testing kits at homes in the city of Flint. This effort is part of the state's response to the ongoing health and safety issues caused by lead in the city of Flint's drinking water.

Teams are being assembled for shifts on Thursday, January 14 and Friday, January 15. Volunteers will begin their assignment in Flint at 9 a.m. and end by 4 p.m. Volunteers can be available for one or both days. Lunch will be provided.

Employees chosen for this assignment are considered to be working on-duty; this assignment would be considered their scheduled work day. Overtime or compensatory time is not authorized for this assignment.

Transportation will be provided using state vehicles; mileage reimbursement for personal vehicles is not authorized. Volunteers should dress for working outdoors and wear foot attire appropriate for walking.

Interested employees should obtain the approval of their supervisor. **Supervisors must forward the names of approved volunteers and their email addresses through the chain of command to bureau with the date(s) available by 1 p.m. tomorrow, Wednesday, January 13.**

Confirmation of selected employees, along with additional logistical details, will be made via email by 5 p.m. on Wednesday, January 13.

For questions, please contact Insp. Scott Marier at 517-373-7761.

This email was sent to briggsb3@michigan.gov using GovDelivery, on behalf of: Michigan State Police · 333 S. Grand Ave · P.O. Box 30634 · Lansing, MI 48933

Subject: Potential Assistance Programs

State Emergency Management Coordinator:

As discussed in this morning's briefing, your agency has been identified to research potential assistance programs (private, state, federal, etc.) that may be available to address the short- and long-term recovery needs in response to the Flint water incident. Earl Zuelke, FEMA Long-Term Recovery, has made contact with some federal agencies to assist with this research. Feel free to touch base with him in the SEOC.

Attached is a copy of the Non-Stafford Act Recovery Guide. Appendix 2 (pg. 24-26) provides a list of some potential federal programs. This list is **not** all-encompassing; however, it will provide a starting point if any of these programs may apply to the response and recovery for this incident.

Provide the following information, *at a minimum*, on potential assistance programs for individuals and/or government support in response to this incident:

- Program Name
- Agency Responsible for program
- Point of Contact
- Type of Support (Individual or Government)
- Eligibility Guidelines
- Benefits Available
- Application Process

This information shall be submitted to Brianna Briggs, the Recovery Branch Chief, at briggsb3@michigan.gov by **COB Friday, January 15.**

Let Brianna (cell phone below) know if you have any questions on this request.

Thank you,

Brianna Briggs
Recovery Branch Director

Michelle,

Sorry I missed your call.

We have two trucks coming to supply 4 teams. Each truck should be loaded with 200 cases of water, 200 water test kits, and 200 filters to get them started. Therefore, total for tomorrow's operation, we should plan on 400 of each for the Water Resource Teams.

I'm working on the details on the PUR filters. I'll keep you updated as soon as I know.

Thanks,
Brianna

Jeanette,
We're gonna need another 65k of the English speaking and another 10k of the Spanish by the end of the day. Delivered here for Brianna to take to the teams tomorrow.

Thanks

Great - You may have heard but we might need more than 65k flyers. We need to have lots on hand in Flint for external partners (like Comcast), City Hall, etc.

Was our plan to have flyers at today's training executed?

Hi Pam,

Bri is going to need a vehicle today to go to Flint. From 11-5 pm today. Preferably the Suburban if no one is using it.

Also, Trevor and I are not going to need a car today after all. We will be staying here working on the emergency. Thanks

Subject: Fw: Dept. of Aging or Public Health Data Request

Brianna,

Below is email from the Red Cross staffer who is asking about obtaining addresses of homebound Flint residents. His email includes his contact information. Do you have someone who can connect with Justin and determine whether what he wants is something you would be willing to do (or whether what you are doing will meet his need)?

Paul Spata

Subject: Re: Dept. of Aging or Public Health Data Request

Paul,

Yes, we would greatly appreciate Brianna's collection of home bound individuals' addresses. It is critical information for ARC and our partners. Great idea and thanks to you and Brianna for this solution.

We can arrange the process of data collection/sharing from her POC to the Red Cross POC at her earliest convenience.

We will provide a web link to the GIS Home Bound Map and information to be viewed by SEOC, EOC, Genesee County Health Department for their use.

Best regards,

Subject: Re: Dept. of Aging or Public Health Data Request

Justin,
The GIS (mapping) techs here tell me they do not have such data.

On the other hand, I heard that the state was sending teams out to canvas every residence in the City. That effort will be getting started tomorrow. I have asked Brianna, who is heading up that canvassing effort, whether they could collect info as to which addresses have homebound residents. She thinks it might be possible to add such an indicator to the card they will be using to document each contact. Would that be useful?

Subject: Dept. of Aging or Public Health Data Request

Paul,

A quick follow-up to give you a more detailed request from Roger for (specific) Data Points:

1. **Buildings**
   a. location
   b. number of buildings

2. Number of **Units** in building

3. Total **Residents** in each building

4. Number of **Home Bound** in each unit

Note: Does not need the apartment numbers of the Home Bound residents.

Thanks, Paul!

Best,

Subject: MTED
Importance: High

Good afternoon, Pam.
Per our conversation, I was in attendance at the SEOC from 11:03a to 3:45p. With the recent transition of these responsibilities at MTED, I have not been trained on/logged in to the SIMs system to date. Therefore, this message contains the report from Michigan Department of Talent and Economic Development (MTED), due by 4:30p:

MSHDA

1. Allowable: Pay for the costs of water quality analysis of all MSHDA backed mortgages in Flint.
2. Allowable: Pay for the replacement of water lines owned by residents with MSHDA mortgages within the city that need to be replaced or lines to homes with MSHDA backed mortgages or incomes less than 50% AMI.
3. Allowable: Pay for a percentage of the reconnection fee to acquire water from Detroit up to an amount not to exceed the % of MSHDA financed homes or low income households in the city (50% AMI).

4. *Allowable: Pay for the replacing the city's municipal water line infrastructure associated with water lines* being replaced to homes in the city with MSHDA backed mortgages or those household at or below 50% AMI.
5. Allowable: Pay for a percentage of any new infrastructure costs associated with the build out of a new water supply system so long as the amount doesn't exceed the % of MSHDA financed homes or low-income households in the city (50% AMI).
6. Allowable: Purchase of water for low income households (50% AMI).
7. Allowable: Purchase of water filters for any low income households (50% AMI).
8. *Allowable: public awareness through HDF grants*

- The grants staff team is already drafting the necessary background materials for a potential grant application request. We would just need to know the recipient of the grant and purpose (allowable uses).

- We are exploring CDBG grant funds or other assistance from HUD.

MSF/MEDC

- MSF/MEDC had offered low interest loans as part of the deep freeze crisis. While this would require legislative action to authorize, it is something that could be considered in this scenario. It would require re-purposing any remaining funds.

Please let me know if there is additional information required. I *am* receiving the SEOC emails/voicemails.
As a side note, Melanie Brown has been temporarily reassigned to DEQ during the Flint Water Crisis. Jeremy Hendges will be acting as PIO for TED (cc'd on this message).

Thank you for your assistance, Pam.

Cc: Pepper, Joel (MSP); Weber, Thomas (MSP)
Subject: damage assessment

Henrik,

Here are some items to consider for the Damage Assessment. I'm also copying Brianna and Joel. Brianna for her role as Recovery Branch Leader/Director and Joel as our very own damage assessment SME:

The form in MICIMS is geared really toward physical damages. This is not going to be adequate for this emergency as the impacts are so broad. We recommend not using the DA forms in MI CIMS.
A more informative way to look at this will be "impact assessment" as the impacts themselves are extensive and often not easily quantifiable.
As you said, you felt that the county has a good handle on infrastructure impacts. Here are some ideas on other impacts:

Look at EACH federal ESF which could be impacted and identify ways in which the county (Flint's water also serves three townships I understand) is impacted in each of those ESFs. Even such things as "lack of awareness" under external affairs, etc.

Pull in all the SMEs you need to conduct the impact survey: county health, county equalization; WIC; human services, education, water department; community and economic development, etc. You need all the local SMEs contributing.

Identify the life, health and safety impacts.
How many elevated blood lead level (EBL) cases are reported?
What is the at risk population in the affected area?
How many have been tested; how many have EBLs out of the at risk populations?
How many people are served by WIC or other human services programs in the impacted area?
How many water hookups are there by type? Residential, restaurants, industrial, businesses, hospitals (how many beds), schools (how many students?), non-profits, childcare/preschools, etc.
How many filters have been distributed? And how many households do not yet have them (as far as we know)?
Coordinate with GIS; they have been working on many of these questions and may be able to provide answers and/or contacts.

Measure magnitude/impact/footprint, not dollars (unless dollars are easily and readily identifiable).

Again, the MI CIMS board is not really set up for this, so create your own reports/spreadsheets. The Recovery Branch and Joel can help with suggestions if needed.

Do your best to discover unmet needs that may exist. They would fall in many categories: how many elderly or *functional needs need filters/installation?*

I know this is sort of a laundry list, but hopefully it helps. Joel, any thoughts/changes?

Again, get the SMEs involved, especially county health and human services. They'll have assessments of impacts.

Let me know if there's anything else we can help with at the moment.

V/R,
Tom

This is from Tori in the Governor's office. She just called me and said that Penske called and said we are still using the trucks and they were under the impression we were only going to have them for the weekend. I indicated that they are still donating them and have donated more since then. She said apparently the person we are dealing with is not communicating with their leadership. Below is the contact information for the person that your guy needs to follow up with because he has no idea what we have and apparently he is in charge of the trucks. Please make sure that he reaches out to him.

The Belle Tire contact reached out to Tori indicating that he would like to donate trucks.

Can someone please follow up and also let Tori know what action was taken? Thank you.

Subject: FW: Today's Update

Hi Brad:
I checked with the team and Nancy added a couple of our current state led programs (Specialty Crop Block Grant and Value-Add). Please let us know if you need more information.

Best Regards,

Peter Anastor
Michigan Department of Agriculture and Rural Development

(MDARD); Holton, Jennifer (MDARD); Throne, Heather (MDARD)
Subject: Today's Update

This is what I provided for today's Situation Report: Primary activities today: coordination with FDA Detroit District on their and MDARD's upcoming activities related to food, inquiry into a possible animal facility requiring follow up; draft of a document outlining federal resources that may be available to assist with broader recovery issues.

I talked with Lisa Joseph of FDA Detroit District, who said FDA is planning to conduct inspections at 5 watering points at Flint Bishop Airport starting on Tuesday, 1/19/15. They also plan to conduct a seafood HACCP inspection on Donlan Fisheries to determine the status of their water use (they were using municipal water in October and had not yet received a filter) to process seafood/make ice, and they will let us know. I confirmed that she had our updated Requirements documents and shared what our plans are for this coming week.

Confirmed that one of the locations in USA Herds with a Flint address appears to be in an area served by City water; though the premise is listed as inactive in our database, Animal Industry will visit the location to check status.

Started a Resource Document – State Emergency Operations Center wants a document containing applicable potential resources available for long term recovery; SEOC has requested this back by COB Tuesday (Peter, Nancy, and Maria – need you to review/edit/add to by 4pm Tuesday). I only included some USDA grants/loans info I could find. If there's more please add.

With the Governor's request for a federal Emergency Declaration approved, FEMA's Incident Mgmt Team will be coming in tonight / tomorrow and will be looking to coordinate with state agencies. Byron Beerbower has agreed to come in for Sunday morning, and afternoon if necessary; I will be available by phone and be back in the SEOC Monday.

FDD asked for a resource request for a meeting place for Wednesday for training on water sampling; it has not been submitted since we need more details (start time, how long we need the room for, etc.)

Provided an update to the SEOC on Indiana's HPAI outbreak.

Hi Chad,

Yes, the blank form was attached from a previous forwarded email. I think we are all set on door to door teams through Friday.

Thanks,

Carly

Subject: FW: Volunteer Request Form

Hi Chad,

I just left you a voicemail but thought email might be easier. Do you have a status on the available number of volunteers to go door-to-door tomorrow, 1/19/16 from the ARC Reception Center? We are working on finalizing the number of trucks and vehicles needed to get our plan submitted by 7:00. Please let me know if you need any additional information from us.

Thank you,

Carly Georgopoulos

President Obama Signs Emergency Declaration for Michigan

01/16/2016 04:40 PM EST

WASHINGTON, D.C. -- The U.S. Department of Homeland Security's Federal Emergency Management Agency (FEMA) announced that federal emergency aid has been made available to the State of Michigan to supplement state and local response efforts in the area affected by contaminated water beginning on April 25, 2014, and continuing.

State Emergency Management Coordinator:

As discussed in this morning's briefing, your agency has been identified to research potential assistance programs (private, state, federal, etc.) that may be available to address the short- and long-term recovery needs in response to the Flint water incident. Earl Zuelke, FEMA Long-Term Recovery, has made contact with some federal agencies to assist with this research. Feel free to touch base with him in the SEOC.

Attached is a copy of the Non-Stafford Act Recovery Guide. Appendix 2 (pg. 24-26) provides a list of some potential federal programs. This list is **not** all-encompassing; however, it will provide a starting point if any of these programs may apply to the response and recovery for this incident.

Provide the following information, *at a minimum*, on potential assistance programs for individuals and/or government support in response to this incident:

- Program Name
- Agency Responsible for program
- Point of Contact
- Type of Support (Individual or Government)
- Eligibility Guidelines
- Benefits Available
- Application Process

This information shall be submitted to Brianna Briggs, the Recovery Branch Chief, at briggsb3@michigan.gov by **COB Friday, January 15.**

Let Brianna (cell phone below) know if you have any questions on this request.

Thank you,

Brianna Briggs
Recovery Branch Director

Linda,

I've forwarded your information to our team handling vendors for the upcoming conference. I just wanted to touch base to let you know we're very involved with an ongoing incident and it may take a bit to get you the information. Just know we haven't forgotten you or missed you!

We look forward to seeing you in May!

Thanks,
Brianna

Good Morning,

Attached are the guidelines for entering your time in DCDS by coding block for those of you that are working **overtime** for the City of Flint Contamination/Shortage event. Please use **Index 28900 with PCA 28670** for overtime worked for this event. Do not use these codes for your regular hours.

Please contact one of the division timekeepers if you need additional guidance in entering the special codes for recording your overtime worked on this special event. Division timekeepers are Michelle Gilsdorf, Richard Sheaffer, and Nancy Downs.

Thank you,
Nancy

Subject: Coding for City of Flint Water Contamination incident

Good Afternoon:

For any **overtime hours** spent working in the SEOC with the City of Flint Water Contamination/Shortage event, please use the following coding:

Index 28900 with PCA 28670

Any **non-payroll** costs (travel, SEOC meals during activation, etc.) should be coded to:

Index 28900 with PCA 28671.

These codes are not yet active in DCDS but will be by the end of the week. Please let me know if you have any questions.

Thanks,
Penny

Subject: FW: Teams tomorrow

FYI, I think the information you requested is below, please let me know if you need more or have other questions.

Lt's.
The Team coverage in the Wards tomorrow is this...
Red Cross teams = Ward 6
MSP teams = Wards 5 and 2

This is what I know at this time.
Mike
Spl/Lt. Mike Garland

We are projecting 8 teams tomorrow, 12 volunteers per team.

Local Water Response Team manager is F/Lt. Tom Kish. He can answer the ones I do not have answers for. My answers are in bold below.

1. How many teams? **Kish?**
2. How many volunteers on a team? **Kish?**
3. Where are they reporting to? **Local EOC, 1101 Beach Street, parking at corner of Beach and 8th**
4. Who do they report to? **Kish and his local commander**
5. Do you have enough transport vehicles? **yes**
6. Do you have enough supply vehicles? **Yes**
7. Do you need all the DOC crews back tomorrow? **No, we need 4 short box trucks, DOC calls them Cubes. The resource request has been updated in MiCIMS and this was communicated to DOC. The vehicles they had there today apparently are loaded with product and will need to be unloaded or used tomorrow, so they will be there first thing in the morning and need to be dealt with.**
    a. Here are all the resources they had today and they are mirroring it tomorrow. (If this is not what is needed, this needs to be stated in the resource request. Nothing is getting updated.) **This has been updated, see #7. The below resources that do not fit within #7 may be related to other operations, so I cannot cancel them all. However, I did cancel the passenger vans, handicap van, pickup trucks, and trailers for Water Response Team operations. We left 2 pickup trucks with trailers for "Hot Shot" use**

Today we had 21 staff and 15 vehicles dedicated (on site) to the response, additionally we have 4 pallet jacks, one refrigerated semi-trailer and three MDOC staff assigned to the SEOC location. Information is as follows:

(6) Large Box trucks
(5) 15 passenger vans

(2) Pick-up trucks
(2) enclosed trailers
(1)Handicap Van
(1)20 passenger Van

8. If you do need them, where are they reporting? **The 4 we have requested should report to the Local EOC.** I would like 2 for the GCCard Hot shots operation please. **Feel free to use any, otherwise unallocated DOC vehicles for your needs. I have cancelled all requests in MiCIMS for all DOC assets other than the 4 vehicles we have requested above and the 2 DOC trucks and trailers you requested today. The sheriff department is using some DOC vehicles as well. I did not cancel those requests as they were not my requests. If the sheriff department does not need them anymore, they will need to cancel their request by contacting you.**

9. If we are expecting 100+ people, I think it's a good idea to have the Penske trucks? Especially to offset the DOC crews, since we are paying them and the Penske are free.

We are using 8 U haul trucks that are tasked to the Water Response Team mission in addition to the 4 DOC vehicles listed above. If you want to use Penske trucks instead of U Haul trucks, DTMB will need to coordinate that change. However, the Penske trucks should be low level trucks that can be loaded from the ground without a lift gate or fork lift. (Step up/step in height.

Subject: Volunteer Opportunity in Flint

The State Emergency Operations Center (SEOC) is coordinating a response to the ongoing health and safety issues in the city of Flint's drinking water. Teams from the Michigan State Police, Genesee County Sheriff's Department, Michigan Department of Health and Human Services, and volunteer organizations have been delivering bottled water, water filters, replacement cartridges and water testing kits at homes in the city of Flint since Tuesday.

To help with this critical work, the SEOC is looking for volunteers to expand this effort and continue this distribution during the upcoming holiday weekend. Teams are being assembled for shifts on Saturday, January 16; Sunday, January 17; and Monday, January 18, 2016. If you are interested in volunteering your time for this critical work, please complete the information in one of the attached surveys (depending on which day you are volunteering).

To volunteer on Saturday, January 16, https://www.surveymonkey.com/r/28NVJBL

To volunteer on Sunday, January 17, https://www.surveymonkey.com/r/26NMJKK

To volunteer on Monday, January 18, https://www.surveymonkey.com/r/26P7P5G

Volunteers will begin their assignment at the Local Emergency Operations Center located in the Genesee County Administration Building located at 1101 Beach St, Flint at 9 a.m. and end by 4 p.m. Parking is available at the corner of Beach Street and 8th Street. Lunch will be provided. This is strictly a volunteer effort, as all three days will be unpaid. Volunteers are responsible for their own transportation; mileage reimbursement for personal vehicles is not authorized. Volunteers should dress for working outdoors and wear foot attire appropriate for walking.

This opportunity is for state employees and their immediate family members 16 years of age or older only, others looking to assist should volunteer through the American Red Cross in Flint. The volunteer coordination center for the Red Cross is located at 1401 S. Grand Traverse, Flint, MI. They are open from 9 a.m. to 7 p.m.

For more information on the state's response efforts, visit www.michigan.gov/flintwater.

Forwarding to Brianna also. I believe if nobody answers the door, and it is not obviously abandoned, they are leaving information on the door, which includes how they can request help. Right Brianna?

On the Medicaid / Medicare, the EmPower database has been looked at and offered here from the health side of MDHHS.

Is the answer that anyone who does not answer their door will have information left for them about where to pick up resources? Or who to contact?

Tom also mentioned a Medicaid/ Medicare list that can be released – I know nothing about that process or what is allowable. Is this a SEOC question for Rich to handle?

At the Michigan Homeland Security conference last May there was a speaker who said Medicare/Medicaid has a list of people with disabilities that they can release during a declared disaster to allow responders to provide assistance. Jennifer, could you check with Ron Leix to see what he knows about that option?

Another option would be to reach out to Deaf community leadership to ask for their guidance and support on the best way to get the message out.

Tom

Importance: High

Good evening!

A woman called tonight concerned about the hearing impaired in Flint. She wanted to know when the city officials were coming to her area to pass out drinking water so she could lookout because she is hearing impaired and concerned that she may not hear someone knocking on the door. She also shared her concern for other individuals who are hearing impaired and how they may not hear the officials knocking on their door as well. Is there any way that we can get this message out to them so they know the concerns of this particular citizen?

Thank you!

> Today we started out the day using two groups that consisted of approximately 10 people in each group.
>
> We eventually combine groups with Genesee County Sheriff's group and they brought two more groups with approx. 10 people (Local UAW) in each group.
>
> This made us a lot more efficient and we were able to set up a game plan.
>
> The Sheriff had 4 U-Haul trucks we used and this was a lot more efficient than the 24' Semis. The Semis are too big to make it down the tight streets, so I set them up as a mobile

filling station. When we ran low on supplies we were able to pull up to them and refill the U-Haul trucks. This is the game plan for tomorrow and the rest of the week. Saves us from driving all the way back to the HQ to fill.

Also we had way to many vehicles and it made us less mobile. Tomorrow the game plan is to meet at the Sheriff admin building and we will then bus the volunteers into the zone we will be working.

I will be meeting with the sheriff's team at 8am and we will discuss what are goal is for the day. We will discuss the most efficient way to map out the days route and plan the groups out.

Today we met at lunch time to determine our progress and what we would do in the afternoon. We will continue this at 12:30 each day (So the volunteers can get lunch and warm up) and we can continue to go over the maps/game plan to make any adjustments if needed.

Tomorrow I feel we will be more efficient and we will have a better plan in place to get the maximum output out of our resources.

Subject: Update from ArcGIS Online for Field Teams

Hello Sir,

Today the app implementation went extremely well. There were a few issues that were quickly addressed. One related to how form fields should be filled out. Another was getting styluses for teams so that they don't have to remove their gloves in the cold. All very simple to fixes. All told there were 394 total home visits with the following breakdowns:

152 Vacant Homes
217 Door Hangers
117 Water Distributions
112 Filters
3 Pitchers
48 Water Test Kits

That said, we should be able to greatly optimize distribution in the near future as we mapped the active water subscribers from Flint's DPW and are adding them to the field team members apps. Of the ~56,000 possible addresses, this reduces the number of possible homes to visit down to ~29,000.

We are working to create a "version 2.0" of the app to allow it to be used in the PODS as well. That way all distributions can be visualized in near-real-time. The discussed implementation for the PODS component is Thursday. Right now ESRI (mapping vendor) agreed to have 100 users in the system (up from 20). They appear very supportive to provide any technical assistance we may need to push this initiative along.

Subject: MSP Water Distribution Operation - AAR

I'm sure after action reports are probably being done within the SEOC, but for what it is worth, a quick snapshot of today's day one operations may be beneficial for the higher planning to put more boots on the ground in Flint in the coming days, so here it goes:

Mission:
4 teams (40 DHHS employees), supported by 4 marked MSP, and 4 marked Sheriff units, and (2) 24' UHaul trucks, conducted water filter delivery operations within the 43rd precinct, beginning at apx 1030 HRS, and ending at 1700 HRS today. The target for today was 150 houses, however final data was not available at the time of publish.

Recommend to Sustain on 1-13-16:
-- Continued use of UHaul type trucks. They are low to the ground, easy to load and more important, to off-load. Easily maneuvered on city streets, especially given poor road conditions, and parked/disabled vehicles on city side streets. DTMB trucks are at a height that makes accessing cargo difficult, and puts volunteers at risk of injury clearing the 5' high box entry.

--iPads and in car mobile terminals. (8) iPads supplied by the City and used by DHHS, made real time data uploads possible and gave a more accurate depiction of ground operations. The ability to push GIS mapping material to troopers vehicles via email facilitated their abilities to make on the ground changes with routes, without having to coordinate through the EOC directly.

--Coordinated efforts with Deputies. A GCSO Lt and Captain on the ground and in the EOC were integral in helping us quickly put together a delivery system that was efficient, and allowed us to skip past obstacles they had already encountered in their previous day's work. In addition, it was GCSO that secured the UHaul trucks for us to use.

--Maintaining a large, central distribution point. This makes it easy to get trucks, vehicles, and supplies in and out very quickly.

As a side note, the delivery model used today was 1 UHaul truck, 20 DHHS personnel, and (2) marked police units per street, and we covered 2 streets at a time. DHHS doubled up going door to door (this was an internal decision made by them). If we were using only law enforcement, we could reduce this number to 10 volunteers per truck, but lower than that would slow down progress, more than 20 would just result in people getting in each other's way, and would make transporting them difficult, not to mention clogging up the street with transport vehicles (which happened today). We used the Sheriff's bus to move volunteers instead of their SUVs because the number of vehicles ended up creating congestion issues on the streets we were delivering on.

Recommend to consider changing on 1-13-16:

--Use of DTMB box trucks (see above). Securing more UHaul type trucks would speed up loading and off-loading.

--We can sustain meals from the EOC for the 60 personnel involved today. More than that is going to require an outside source.

--Using less vehicles to transport volunteers. We used the GCSO bus today, and can continue that until Sunday, however a central transportation unit seems to work best at this point, not individual SUVs for each 4 person team.

Subject: Data Entry

Hi, Brianna:

I'm not sure who I should ask about this, so I thought I'd start with you. Inspector Bolger is the one who contacted me about the data entry assistance, but I understand he'll be in Flint for the next few days.

You should have four people in the SEOC all day today doing data entry of the Red Cross sheets. Can someone please let me know when it's determined whether or not you'll need people scheduled for additional days? If you do need more scheduled, I'll just need to know the dates you'll want them and where they need to report.

Thanks.

Hey Phil-

A few other to consider sharing:

- There is a weekly community partners meeting. They meet Thursdays at 3pm (same as the NVOAD Call). If national organizations have local folks who would like to attend, they're free to do so. Moreover, this group is going to be organizing 6 sub-groups for long-term needs: (1) health, (2) mental health, (3) communication, (4) command and control, (5) education, and (6) distribution.

- Michigan VOAD is hosting weekly calls. All are welcome. The next call is scheduled for Tuesday at 2pm Eastern. [redacted] Code:

Thanks!

Subject: Talking Points: NVOAD Bi-Weekly Call @ 3 PM EST

Pre-decisional not for further distribution Brianna & Phil,

We really appreciate you being able to jump on this afternoon's National VOAD Bi-Weekly Operations Call. The full agenda is at the bottom of this email. I asked to have Flint report out first so that you can jump off the call if need be.

Some potential talking points below. Brianna, feel free to report out on anything you'd like from the state side - please do not feel like you need to stick to talking points below. These are just ideas. Just a reminder that some of the national partners on this call may not be familiar with anything going on, so starting high level about activities would be helpful.

Brianna -

- State EOC is fully activated with many state agencies represented

- Distributing water, water filters, replacement filter cartridges, water tests kits through door-to-door canvassing, POD distribution, etc

- The state has been partnering with many voluntary agencies to accomplish this mission

- Working closely with Red Cross Volunteer Reception Center to engage volunteers in this canvassing efforts

- Any additional details or statistics you may be able to provide. I usually stick to approved stats in State Press Releases. Attached is the state press release from today:

o Since Jan. 9, 2016, the following resources have been distributed to residents, both at the water resource sites and by water response teams:

o 196,456 cases of water

o 95,417 water filters

o 30,255 water testing kits

- Some of the next steps include the launching of a recycling program today at an 11:30 media event (attached media advisory)

- Working to transition distribution of commodities to local voluntary agencies; working closely with them to develop a sustainable plan and model for future distribution

Phil- attached are FEMA's internal daily talking points for questions you may get.

- Start with EM Dec overview

o On January 16, 2016, President Barack Obama declared an emergency for Genesee County in the State of Michigan, limited to Direct Federal Assistance, as a result of the emergency conditions resulting from contaminated water in the city of Flint, authorizing FEMA to support the state in its efforts to respond to the incident.

o Under this emergency declaration, FEMA is authorized to provide emergency protective measures, Category B, limited to Direct Federal Assistance, under the Public Assistance program limited to 75 percent of the total eligible costs.

FEMA will, in coordination with the state, provide water, water filters, water filter cartridges, testing kits, and other necessary related items for a period of up to 90 days from the date of this declaration. We will also provide technical assistance to the state.

- Current number of commodities purchased by the state:

- As of COB January 27, 2016, the following commodities were requested by and provided to the state of Michigan in support of the response to the emergency conditions resulting from contaminated water in the city of Flint.

o 844,200 liters of water

o 102,520 water filter replacement cartridges

o 5,000-23 cup water dispenser & filtration systems (ZeroWater)

o 30,000 water filters

- HHS efforts

- On January 19, 2016, the U.S. Department of Health and Human Services (HHS) was designated as the lead federal agency responsible for coordinating federal government response and recovery efforts in Flint, Michigan.

- FEMA will support HHS as needed to identify and mobilize the capabilities of the rest of the federal partners - including the Small Business Administration, the Environmental Protection Agency (EPA), the Department of Housing and Urban Development (HUD) and the Department of Agriculture (USDA), and others-that are already working to help residents in Flint.

I hope this helps! If you have any questions please reach out. I will be on the road to Flint but will monitor my BB.

Thanks,
Katie

REMINDER: Bi-Weekly Call Tomorrow

Dear Members and Partners,
Our next bi-weekly operations call will be held tomorrow, January 28th at 3PM EST. Our goal is to provide a platform for communication and collaboration between members and partners. Please report out unmet needs you are experiencing in relation to Flint, Michigan, Winter Storm Jonas, Texas, Mississippi, Missouri and California. Updates of your current activities can be posted to VOADNet/Yammer.
In an effort to make this call as productive as possible and foster collaboration, please report out the following:
1. Brief overview of current operations
2. Resources available
3. Unmet needs
Purpose: To promote information sharing and operational coordination among VOAD Members and Partners. Please provide information regarding where you are responding, any unmet needs and/or available resources.
Audience: Members and Partners responding or interested in responding shared unmet needs and available resources for response and recovery to the following:

* Flint, Michigan
* Winter Storm Jonas
* Texas and Mississippi tornadoes
* Midwest Floods including Missouri and Illinois
* South Carolina
* Other

Subject: Follow Up - Request for Assistance

Ray,

I appreciate speaking with you Thursday and appreciate your patience as we worked on the details related to Flint. The first issue for which we request assistance from UPS is as follows: Can UPS work with the Michigan State Police to assist in delivery of water filters to those individuals in Flint, because of age, disability or other challenges, are unable to physically visit the various resource centers throughout the City? The water filters (depending on the size of the family) need to be replaced anywhere from 1 to 3 months, so there will be an ongoing need for filters to be available and delivered. Our hope is that these deliveries can be incorporated in UPS' daily scheduled deliveries in Flint. If you can identify a contact for further information, I will connect them with a person who can provide additional detail and with which direct arrangements could be made.

In addition, I confirmed to you our understanding that Linden Nelson worked with Aquahydrate of Los Angeles, California to arrange for the donation of 5,000 cases of water to be shipped to Flint once a month for the next year. Here is some additional information on the filtration system:
http://www.michigan.gov/documents/deq/2015-10-21_-_Lead_-_Flint_Water_FINAL_504265_7.pdf

The attached press release that was issued on October 8th, also provides some additional background information for your reference.

On behalf of Governor Snyder, the administration, and Flint, I thank you for your consideration. To assure direct communications are maintained for the greatest efficiency possible, I have included both Harvey Hollins and Tori Sachs on this email, as they are charged with coordinating ongoing efforts and connecting people who want to help, like UPS, with the right people to facilitate the delivery of that help.

John

> Hi Carol,
>
> I just want it noted that the four trucks/suburbans borrowed for the Flint Response were returned with a lot of junk (boxes, garbage, etc.) in the back of them. In fact we even found a box of 4 Brita filters that should be returned to Flint. If you know of any division staff going to Flint next week we could ensure the filters get in their hands for a return. Also our lift gate on the Ford is acting up now so Ron is going to work on that.
>
> I think a take away from this is when things are borrowed for an event like this there needs to be an official check in and a check out process so there are no surprises like this. I am wondering if all of the donated Penskes that were borrowed had some kind of checkout from the event before they were returned. It just seems to be an area of improvement to keep in mind for future events. Thanks!

Hi, Brianna:

I'm not sure who I should ask about this, so I thought I'd start with you. Inspector Bolger is the one who contacted me about the data entry assistance, but I understand he'll be in Flint for the next few days.

You should have four people in the SEOC all day today doing data entry of the Red Cross sheets. Can someone please let me know when it's determined whether or not you'll need people scheduled for additional days? If you do need more scheduled, I'll just need to know the dates you'll want them and where they need to report.

Thanks.

Thanks Dianne ---and have a blessed and wonderful holiday season. (Melissa and Paul too!)

(I hate when that happens – the "how do I know you" feeling).

I will forward to contacting you in the new year!

Thanks!

Phew, I was trying to figure out where I knew you from!! Glad to hear that I don't (yet)!

I would be happy to talk with you about how we can arrange a Train the Trainer for this course so we can get State trainers up to speed to do this "new" delivery as a G. In fact, I am running a TtT in January at the JFO in SC and hope to do a few with other States soon.

Give me a call when you want to talk about options for Michigan. Thanks.

Take care, Dianne

Hi Dianne

Sorry for the previous odd communication from me, I meant to send to another course instructor and accidently sent to you. However, I still need to discuss the subject course with you.

Paul Benyeda provided me your contact information.

We are very interested in hosting this class in Michigan in the next year or so. I realize the "G" version of the course was just release by EMI. Do you have other qualified instructors we could use? Would it be possible to arrange an "L" course delivery with EMI?

Maybe we can discuss after the holidays? Please let me know.

Pre-decisional not for further distribution

Brianna,

The agenda for tomorrow's NVOAD Call is below. I was able to get us on first. And Tom, they were able to include details for tonight's MI VOAD call as well (see bottom). I believe a number of NVOAD partners will be on the MI VOAD call tonight.

REMINDER: Bi-Weekly Call Tomorrow

Dear Members and Partners,

Our next bi-weekly operations call will be held **tomorrow, January 28th at 3PM EST**. Our goal is to provide a platform for communication and collaboration between members and partners. Please report out unmet needs you are experiencing in relation to Flint, Michigan, Winter Storm Jonas, Texas, Mississippi, Missouri and California. Updates of your current activities can be posted to VOADNet/Yammer.

In an effort to make this call as productive as possible and foster collaboration, please report out the following:

1. Brief overview of current operations
2. Resources available
3. Unmet needs

Purpose: To promote information sharing and operational coordination among VOAD Members and Partners. Please provide information regarding where you are responding, any unmet needs and/or available resources.

Audience: Members and Partners responding or interested in responding shared unmet needs and available resources for response and recovery to the following:

- Flint, Michigan
- Winter Storm Jonas
- Texas and Mississippi tornadoes
- Midwest Floods including Missouri and Illinois
- South Carolina
- Other

Date: 1/28/2016

Time: 3 PM EDT

To: Bays, Justin R.; Gutierrez, David M.; Briggs, Brianna (MSP)
Subject: VRC

Justin/Dave,

I've copied Brianna Briggs. She's leading our Recovery Unit within the SEOC. I mentioned the VRC and the importance of having a way to solicit mission assignments. From our side, I think most of the potential requests would come from the Recovery Unit. And I think we should have a discussion at Thursday's meeting to see what we can do to help agencies and non profits thinking about needs they have that can be turned into volunteer requests.

Brianna's working on canvassing for the apartment complexes right now, and that might be one potential mission.

Subject: State of Michigan - Penske Donations for Flint

Hello Rob,

I received an email that you would like some clarification on the Penske Trucks that have been donated to the Flint Water Response Team effort. I am in the Recovery Unit and have submitted some of the initial requests for trucks. I show that we have received a total of 11 box/cube trucks which we coordinated through the Local EOC (Jay Eickholt). Below is the breakdown of the dates we received each truck.

Penske Trucks	16ft	8	1/15 - 1/16
Penske Trucks	16ft	3	1/18/2016

Please let me know if this does not line up with what your records show and we can talk.

Thank you,

Carly Georgopoulos
